### COMMERCIAL IN CONFIDENCE

This document contains confidential material that is intended solely for the client commissioning AE&D to prepare this report. The client, project team and all regulatory authorities shall exercise precautionary measures to ensure that the information contained herein is not to be accessed by any third party. AE&D will take no responsibility for the use of any information contained within this report by any third party, unless AE&D's permission is requested and provided in writing.

## 1.0 EXECUTIVE SUMMARY AND RECOMMENDATIONS

This report provides a Building Code of Australia (BCA) 2022 assessment of the proposed alterations and additions to the existing tourist accommodation building, located at 20 Candle Heath Road, Perisher Valley (The stables Resort Perisher).

The primary purpose of this report is to identify the non-compliance matters contained in the proposed design against the current Deemed-to-Satisfy (DTS) Provisions of the BCA and to provide compliance recommendations to overcome the DTS non-compliances.

### 1.1 Recommendations

The following is a list of Deemed-to-Satisfy Provisions that should be addressed either by design amendments, additional information **OR** by way of a Performance Solution:

BCA Clause	Deemed-to-Satisfy Provision to be addressed
<p>C2D10</p> <p>Non-combustible building elements [2019: C1.9]</p> <p>and</p> <p>S5C11</p> <p>Type A fire-resisting construction — Fire-resistance of building elements [2019: Spec C1.1: 3.1 and Table 3]</p>	<p><b>Further information required:</b></p> <p>The plans detail the replacement of existing external wall cladding with Nailstrip Cladding using the following methods:</p> <ol style="list-style-type: none"> <li>1. Removal of existing timber board and batten wall cladding and installation of Nailstrip cladding to the existing frame. Discussions with the client suggest that the existing frame is likely timber.</li> <li>2. Installation of Nailstrip cladding over the existing masonry wall cladding.</li> </ol> <p>The following information is required to demonstrate compliance with C2D10 and S5C11:</p> <ol style="list-style-type: none"> <li>1. Provide a CodeMark Certificate of Conformity or other form of evidence of suitability as required by Part A5 of BCA 2022 to verify that Nailstrip Cladding is suitable for use as an external wall cladding for Type A construction.</li> <li>2. If a CodeMark Certificate of Conformity is not available, provide copies of fire testing reports verifying that the wall system has been tested to comply with AS1530.1-1994</li> <li>3. Provide manufacturers installation details to demonstrate how the proposed Nailstrip Cladding is to be fixed to the existing building (i.e. fixed to the existing timber wall frame in some sections and fixed to the existing masonry cladding in others).</li> </ol> <p><i>Please note: As timber framing is an allowable concession under S5C20 of BCA 2022, the existing framing (if timber) will not need to be replaced, however other elements of the wall system which are combustible must be i.e. wall insulation. This only applies to the areas where the existing wall system is being replaced.</i></p>
<p>S5C11</p> <p>Type A fire-resisting construction — Fire-resistance of building elements [2019: Spec C1.1: 3.1 and Table 3]</p>	<p><b>Further information required:</b></p> <p>Where new Nailstrip cladding is proposed to an external wall, the wall system is required to be fire rated in accordance with the following:</p> <ul style="list-style-type: none"> <li>• Less than 1.5m from a fire source feature: 90/90/90</li> <li>• 1.5m to less than 3m from a fire source feature: 90/60/60</li> <li>• 3m or more from a fire source feature: 90/60/30</li> </ul> <p>In this case, the fire source feature is the allotment boundary (i.e. western boundary) or an external wall of another building on the allotment (i.e. other buildings to the northern, eastern and southern sides of the subject building).</p>
<p>F1D7</p> <p>Damp-proofing of floors on the ground [2019: F1.10]</p>	<p><b>Further information required:</b></p> <p>Given the change in use from an open balcony (non-habitable) to an enclosed extension of bedroom 2 (habitable) damp-proofing of the floor is now required. It is possible that the existing floor was not constructed with damp-proofing as it wasn't a requirement for construction as an open balcony.</p> <p><i>Please note: This clause does not apply to any balcony floors which have not been laid directly onto the ground (i.e. does not apply to the balconies positioned above the basement).</i></p>

## 2.0 INTRODUCTION

This report provides a Building Code of Australia (BCA) 2022 assessment of the proposed alterations and additions to the existing tourist accommodation building, located at 20 Candle Heath Road, Perisher Valley (The stables Resort Perisher).

This report provides a BCA assessment table in Section 3.0 that summarises the identified non-compliance matters and offers specific recommendations.

## 2.1 Basis of Report

The key basis of this report is to address compliance with the Building Code of Australia (BCA) 2022. The scope of services is limited to Sections C – “Fire Resistance”, Section D – “Access & Egress”, Section E – “Services & Equipment”, Section F “Health and Amenity” and Section G “Ancillary Provisions”.

This report is based on a desktop assessment of the proposed plans, with specific reference to the following:

- Architectural plans prepared by Tziallas Architects, Project No. 15-025 Drawing Numbers:

Drawing Title	Drawing No.	Revision	Dated
Site Plan	DA-00	J	25/08/2023
Prop. Cladding + Window Elevations	DA-01	J	25/08/2023
Prop. Ground Floor Plan	DA-02	H	25/08/2023
Prop. Elevation and Section	DA-03	L	25/09/2023
Prop. Window Schedule	DA-04	H	25/09/2023
Prop. Waste Management Plan	DA-05	H	25/08/2023
Prop. External Colour Schedule	DA-07	C	25/08/2023
Ex. U20-U25 First Floor Plan	MD-01	D	25/08/2023
Ex. U20-U25 Ground Floor Plan	MD-02	D	25/08/2023
Ex. Basement Plan	MD-03	D	25/08/2023

- The Building Code of Australia 2022, prepared by the Australian Building Codes Board.
- The Guide to the BCA 2019 Amendment 1, prepared by the Australian Building Codes Board.

## 2.2 Purpose of the Report

The purpose of this report is to assess the following:

- Assessment under the current Building Code of Australia 2022 and list any departures from the BCA 2022.
- Provide recommendations to address identified non-compliances, and/or identify potential alternative solutions.

## 2.3 Limitations of the Report

This report does not assess the following:

- Access and facilities for people with disabilities is addressed however compliance with Disability Discrimination Act 1992 (DDA) is outside the scope of this report. It should be noted that BCA compliance does not necessarily meet the requirements of the Disability Discrimination Act (DDA).
- Reporting on hazardous materials, OH&S matters or site contamination
- Assessment of any structural elements or geotechnical matters relating to the building, including any structural or other assessment of the existing fire-resistant levels of the building
- Consideration of any fire services operations (including hydraulic, electrical or other systems)

- Assessment of plumbing and drainage installations, including stormwater
- Assessment of mechanical plant operations, electrical systems or security systems
- Heritage significance
- Consideration of energy or water authority requirements
- Consideration of Council's local planning policies
- Environmental or planning issues
- Requirements of statutory authorities
- Pest inspection or assessment building damage caused by pests (general/visual pest invasion or damage will be reported, however invasive or intrusive inspections have not be carried out)
- Section J of the BCA is not considered.
- Provision of any construction approvals or certification under Part 6A of the Environmental Planning & Assessment Act 1979.
- Glazing, shading, lighting calculations and the like required by Section J of the BCA not been carried out.
- This assessment excludes BCA clauses D4D2-D4D13 (Inclusive), E3D6 and F4D5. Refer to separate access consultant's report.
- BCA 2022 does not directly specify slip-resistance classification(s) for all *accessible paths of travel*; however, we highlight the need under AS 1428.1-2009 for all *accessible paths of travel* to have a slip-resistant surface. We recommend you should seek surface finish advice from an independent specialist slip safety consultant.

### 3.0 BCA ASSESSMENT DATA

The following data is provided in respect to review of the building under the Building Code of Australia 2022 in respect to the compliance assessment of the proposed alterations and additions to the existing tourist accommodation building, located at 20 Candle Heath Road, Perisher Valley (The stables Resort Perisher).

BCA Building Classifications:	Class 3 – Tourist Accommodation
Building rise in storeys:	3 (determined in accordance with C1.2 of the BCA)
Type of Construction:	Type A (determined in accordance with C1.1 of the BCA)
Floor area:	Not applicable to this development
Effective Height (m):	Approximately 5.4m
Climate Zone (Thermal Design)	8 (determined in accordance with ABCB Climate Map, Sept 2019)

### 3.1 Location of Fire Source features

The potential *fire source features* to be considered for this building are the external wall of another building on the allotment which is not a Class 10 building, the side or rear of the allotment boundary or the far side of the road bounding the allotment.

In this instance the following setbacks are determined in respect to the fire source features applicable to the building

- North – side boundary more than 6m
- South – side boundary more than 6m
- East – far side of the road more than 6m
- West – rear boundary less than 3m

## 4.0 BCA ASSESSMENT SUMMARY

The following table details the BCA compliance of the assessed design.

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
<b>Section B Structure</b>					
<b>Part B1 Structural provisions</b>					
B1D1 Deemed-to-Satisfy Provisions [2019: B1.0]			X		<b>Informational clause:</b> (1) Where a Deemed-to-Satisfy Solution is proposed, Performance Requirements B1P1 to B1P4 are satisfied by complying with B1D2 to B1D6. (2) Where a Performance Solution is proposed, the relevant Performance Requirements must be determined in accordance with A2G2(3) and A2G4(3) as applicable.
B1D2 Resistance to actions [2019: B1.1]				X	The resistance of a building or structure must be greater than the most critical action effect resulting from different combinations of actions, where— (a) the most critical action effect on a building or structure is determined in accordance with B1D3 and the general design procedures contained in AS/NZS 1170.0; and (b) the resistance of a building or structure is determined in accordance with B1D4. <b>Details demonstrating compliance with this clause must be incorporated into the Structural Engineering plans / specification</b>
B1D3 Determination of individual actions [2019: B1.2]				X	The magnitude of individual actions must be determined in accordance with the following: (a) Permanent actions: (i) the design or known dimensions of the building or structure; and (ii) the unit weight of the construction; and (iii) AS/NZS 1170.1. (b) Imposed actions: (i) the known loads that will be imposed during the occupation or use of the building or structure; and (ii) construction activity actions; and (iii) AS/NZS 1170.1. (c) Wind, snow and ice and earthquake actions: (i) the applicable annual probability of design event for safety, determined by— (A) assigning the building or structure an Importance Level in accordance with Table B1D3a; and (B) determining the corresponding annual probability of exceedance in accordance with Table B1D3b; and (ii) AS/NZS 1170.2; and (iii) AS/NZS 1170.3 as appropriate; and (iv) AS 1170.4; and

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
					<p>(vi) for the purposes of (v), cyclonic areas are those determined as being located in wind regions C and D in accordance with AS/NZS 1170.2.</p> <p>(d) Actions not covered in (a), (b) and (c) above:</p> <p>(i) the nature of the action; and</p> <p>(ii) the nature of the building or structure; and</p> <p>(iii) the Importance Level of the building or structure determined in accordance with Table B1D3a; and</p> <p>(iv) AS/NZS 1170.1.</p> <p>(e) For the purposes of (d) the actions include but are not limited to—</p> <p>(i) liquid pressure action; and</p> <p>(ii) ground water action; and</p> <p>(iii) rainwater action (including ponding action); and</p> <p>(iv) earth pressure action; and</p> <p>(v) differential movement; and</p> <p>(vi) time dependent effects (including creep and shrinkage); and</p> <p>(vii) thermal effects; and</p> <p>(viii) ground movement caused by—</p> <p>(A) swelling, shrinkage or freezing of the subsoil; and</p> <p>(B) landslip or subsidence; and</p> <p>(C) siteworks associated with the building or structure; and</p> <p>(ix) construction activity actions.</p> <p><b><i>Details demonstrating compliance with this clause must be incorporated into the Structural Engineering plans / specification</i></b></p>
<p>B1D4</p> <p>Determination of structural resistance of materials and forms of construction</p> <p>[2019: B1.4]</p>				X	<p>The structural resistance of materials and forms of construction must be determined in accordance with the following, as appropriate:</p> <p>(a) Masonry (including masonry-veneer, unreinforced masonry and reinforced masonry): AS 3700, except—</p> <p>(i) (for piers—isolated or engaged) is removed from Clause 8.5.1(d); and</p> <p>(ii) where Clause 8.5.1 requires design as for unreinforced masonry in accordance with Section 7, the member must also be designed as unreinforced masonry in accordance with Tables 10.3 and 4.1(a)(i)(C) of AS 3700.</p> <p>(b) Concrete:</p> <p>(i) Concrete construction (including reinforced and prestressed concrete): AS 3600.</p> <p>(ii) Autoclaved aerated concrete: AS 5146.1.</p> <p>(iii) Post-installed and cast-in fastenings: AS 5216.</p> <p>(c) Steel construction:</p> <p>(i) Steel structures: AS 4100.</p> <p>(ii) Cold-formed steel structures: AS/NZS 4600.</p>

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
					<p>(iii) Residential and low-rise steel framing: NASH Standard – Residential and Low-Rise Steel Framing Part 1 or Part 2.</p> <p>(d) Composite steel and concrete: AS/NZS 2327.</p> <p>(e) Aluminium construction: AS/NZS 1664.1 or AS/NZS 1664.2.</p> <p>(f) Timber construction:</p> <p>(i) Design of timber structures: AS 1720.1.</p> <p>(ii) Timber structures: AS 1684.2, AS 1684.3 or AS 1684.4.</p> <p>(iii) Nailplated timber roof trusses: AS 1720.5.</p> <p>(g) Glazed assemblies:</p> <p>(i) The following glazed assemblies in an external wall must comply with AS 2047:</p> <p>(A) Windows excluding those listed in (ii).</p> <p>(B) Sliding and swinging glazed doors with a frame, including french and bi-fold doors with a frame.</p> <p>(C) Adjustable louvres.</p> <p>(D) Shopfronts.</p> <p>(E) Window walls with one piece framing.</p> <p>(ii) All glazed assemblies not covered by (i) and the following glazed assemblies must comply with AS 1288:</p> <p>(h) Termite Risk Management: Where a primary building element is subject to attack by subterranean termites: AS 3660.1, and—</p> <p>(i) for the purposes of this provision, a primary building element consisting entirely of, or a combination of, any of the following materials is considered not subject to termite attack:</p> <p>(A) Steel, aluminium, or other metals.</p> <p>(B) Concrete.</p> <p>(C) Masonry.</p> <p>(D) Fibre-reinforced cement.</p> <p>(E) Timber — naturally termite resistant in accordance with Appendix C of AS 3660.1.</p> <p>(F) Timber — preservative treated in accordance with Appendix D of AS 3660.1; and</p> <p>(ii) a durable notice must be permanently fixed to the building in a prominent location, such as a meter box or the like, indicating—</p> <p>(A) the termite management system used; and</p> <p>(B) the date of installation of the system; and</p> <p>(C) where a chemical is used, its life expectancy as listed on the appropriate authority's pesticides register label; and</p> <p>(D) the installer's or manufacturer's recommendations for the scope and frequency of future inspections for termite activity.</p> <p>(i) Roof construction:</p> <p>(i) Metal roofing: AS 1562.1.</p> <p>(j) Particleboard structural flooring: AS 1860.2.</p>

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	Informational NA or	Compliance Required	COMMENTS
					<b>Details demonstrating compliance with this clause must be incorporated into the Structural Engineering plans / specification</b>
B1D5 Structural software [2019: B1.5]				X	<p>(1) Structural software used in computer aided design of a building or structure, that uses design criteria based on the Deemed-to-Satisfy Provisions of the BCA, including its referenced documents, for the design of steel or timber trussed roof and floor systems and framed building systems, must comply with the ABCB Protocol for Structural Software.</p> <p>(2) Structural software referred to in (1) can only be used for buildings within the following geometric limits:</p> <p>(a) The distance from ground level to the underside of eaves must not exceed 6 m.</p> <p>(b) The distance from ground level to the highest point of the roof, neglecting chimneys, must not exceed 8.5 m.</p> <p>(c) The building width including roofed verandahs, excluding eaves, must not exceed 16 m.</p> <p>(d) The building length must not exceed five times the building width.</p> <p>(e) The roof pitch must not exceed 35 degrees.</p> <p>(3) The requirements of (1) do not apply to design software for individual frame members such as electronic tables similar to those provided in—</p> <p>(a) AS 1684; or</p> <p>(b) NASH Standard Residential and Low-Rise Steel Framing Part 2.</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the Structural Engineering plans / specification</b></p>
B1D6 Construction of buildings in flood hazard areas [2019: B1.6]			X		Not applicable. Subject building is not in a flood hazard area.
<b>Specification 4 Design of buildings in cyclonic areas</b>					
S4C1 Scope [2019: Spec B1.2: 1]			X		Not applicable. Subject building is not in a cyclonic area.
S4C2 Roof cladding [2019: Spec B1.2: 2]			X		Not applicable. Subject building is not in a cyclonic area.
<b>Section C Fire resistance</b>					
<b>Part C2 Fire resistance and stability</b>					
C2D1 Deemed-to-Satisfy Provisions [2019: C1.0]			X		<p><b>Informational clause:</b></p> <p>Where a Deemed-to-Satisfy Solution is proposed, Performance Requirements C1P1 to C1P9 are satisfied by complying with—</p> <p>(a) C2D2 to C2D14, C3D2 to C3D15 and C4D2 to C4D17.</p>
C2D2				X	(1) The minimum Type of fire-resisting construction of a building must be determined in accordance with Table C2D2.

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
Type of construction required [2019: C1.1]					(2) Each building element must comply with Specification 5 as applicable. <b><i>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</i></b>
C2D3 Calculation of rise in storeys [2019: C1.2]			X		(1) The rise in storeys is the sum of the greatest number of storeys at any part of the external walls of the building and any storeys within the roof space— (a) above the finished ground next to that part; or (b) if part of the external wall is on the boundary of the allotment, above the natural ground level at the relevant part of the boundary. (2) A storey is not counted if— (a) it is situated at the top of the building and contains only heating, ventilating or lift equipment, water tanks, or similar service units or equipment; or (b) it is situated partly below the finished ground and the underside of the ceiling is not more than 1 m above the average finished level of the ground at the external wall, or if the external wall is more than 12 m long, the average for the 12 m part where the ground is lowest.
C2D4 Buildings of multiple classification [2019: C1.3]			X		Not applicable.
C2D5 Mixed types of construction [2019: C1.4]			X		Not applicable.
C2D6 Two storey Class 2, 3 or 9c buildings [2019: C1.5]			X		Not applicable.
C2D7 Class 4 parts of buildings [2019: C1.6]			X		Not applicable.
C2D8 Open spectator stands and indoor sports stadiums [2019: C1.7]			X		Not applicable.
C2D9 Lightweight construction [2019: C1.8]				X	(1) Lightweight construction must comply with Specification 6 if it is used in a wall system— (a) that is required to have an FRL. (2) If lightweight construction is used for the fire-resisting covering of a steel column or the like, and if—

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
					<p>(a) the covering is not in continuous contact with the column, then the void must be filled solid, to a height of not less than 1.2 m above the floor to prevent indenting; and</p> <p>(b) the column is liable to be damaged from the movement of vehicles, materials, or equipment, then the covering must be protected by steel or other suitable material.</p> <div style="border: 1px solid black; padding: 5px;"> <p><i>Lightweight construction:</i> Construction which incorporates or comprises—</p> <p>(a) sheet or board material, plaster, render, sprayed application, or other material similarly susceptible to damage by impact, pressure or abrasion; or</p> <p>(b) concrete and concrete products containing pumice, perlite, vermiculite, or other soft material similarly susceptible to damage by impact, pressure or abrasion; or</p> <p>(c) masonry having a width of less than 70 mm</p> </div> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
C2D10 Non-combustible building elements [2019: C1.9]				X	<p><b>Further information required:</b></p> <p>The plans detail the replacement of existing external wall cladding with Nailstrip Cladding using the following methods:</p> <ol style="list-style-type: none"> <li>1. Removal of existing timber board and batten wall cladding and installation of Nailstrip cladding to the existing frame. Discussions with the client suggest that the existing frame is likely timber.</li> <li>2. Installation of Nailstrip cladding over the existing masonry wall cladding.</li> </ol> <p>The following information is required to demonstrate compliance with C2D10 and S5C11:</p> <ol style="list-style-type: none"> <li>1. Provide a CodeMark Certificate of Conformity or other form of evidence of suitability as required by Part A5 of BCA 2022 to verify that Nailstrip Cladding is suitable for use as an external wall cladding for Type A construction.</li> <li>2. If a CodeMark Certificate of Conformity is not available, provide copies of fire testing reports verifying that the wall system has been tested to comply with AS1530.1-1994</li> <li>3. Provide manufacturers installation details to demonstrate how the proposed Nailstrip Cladding is to be fixed to the existing building (i.e. fixed to the existing timber wall frame in some sections and fixed to the existing masonry cladding in others).</li> </ol> <p><i>Note: As timber framing is an allowable concession under S5C20 of BCA 2022, the existing framing (if timber) will not need to be replaced, however other elements of the wall system which are combustible must be i.e. wall insulation. This only applies to the areas where the existing wall system is being replaced.</i></p> <p>X <b>BCA Requirements:</b></p> <p>(1) In a building required to be of Type A construction, the following building elements and their components must be non-combustible:</p>

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
					<p>(a) External walls, including all components incorporated in them including the facade covering, framing and insulation.</p> <p>(2) The requirements of (1) does not apply to the following:</p> <p>(a) Gaskets.</p> <p>(b) Caulking.</p> <p>(c) Sealants.</p> <p>(d) Termite management systems.</p> <p>(e) Glass, including laminated glass, and associated adhesives, including tapes.</p> <p>(f) Thermal breaks associated with—</p> <p>(i) glazing systems; or</p> <p>(ii) external wall systems, where the thermal breaks—</p> <p>(A) are no larger than necessary to achieve thermal objectives; and</p> <p>(B) do not extend beyond one storey; and</p> <p>(C) do not extend beyond one fire compartment.</p> <p>(g) Damp-proof courses.</p> <p>(h) Compressible fillers and backing materials, including those associated with articulation joints, closing gaps not wider than 50 mm.</p> <p>(i) Isolated—</p> <p>(i) construction packers and shims; or</p> <p>(ii) blocking for fixing fixtures; or</p> <p>(iii) fixings, including fixing accessories; or</p> <p>(iv) acoustic mounts.</p> <p>(i) Waterproofing materials applied to the external face, used below ground level and up to 250 mm above ground level.</p> <p>(j) Joint trims and joint reinforcing tape and mesh of a width not greater than 50 mm.</p> <p>(k) Weather sealing materials, applied to gaps not wider than 50mm, used within and between concrete elements.</p> <p>(l) Wall ties and other masonry components complying with AS 2699 Part 1 and Part 3 as appropriate, and associated with masonry wall construction.</p> <p>(m) Reinforcing bars and associated minor elements that are wholly or predominately encased in concrete or grout.</p> <p>(n) A paint, lacquer or a similar finish or coating.</p> <p>(o) Adhesives, including tapes, associated with stiffeners for cladding systems.</p> <p>(p) Fire-protective materials and components required for the protection of penetrations.</p> <p>(3) The following materials, when entirely composed of itself, are non-combustible and may be used wherever a non-combustible material is required:</p> <p>(a) Concrete.</p> <p>(b) Steel, including metallic coated steel.</p> <p>(c) Masonry, including mortar.</p> <p>(d) Aluminium, including aluminium alloy.</p>

F6D5 Artificial lighting [2019: F4.4]				X	<p>(1) Artificial lighting must be provided—</p> <p>(a) if natural light of a standard equivalent to that required by F6D3 is not available, and the periods of occupation or use of the room or space will create undue hazard to occupants seeking egress in an emergency, in—</p> <p>(i) Class 3 building — to all rooms that are frequently occupied, all spaces required to be accessible, all corridors, lobbies, internal stairways, other circulation spaces and paths of egress.</p> <p>(2) The artificial lighting system must comply with AS/NZS 1680.0.</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
NSW F6D6 Ventilation of rooms [2019: F4.5]				X	<p>A habitable room and any other room occupied by a person for any purpose must have—</p> <p>(a) natural ventilation complying with F6D7; or</p> <p>(b) a mechanical ventilation or air-conditioning system complying with AS 1668.2.</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
F6D7 Natural ventilation [2019: F4.6]	X				<p>(1) Natural ventilation provided in accordance with F6D6(a) must consist of openings, windows, doors or other devices which can be opened—</p> <p>(a) with a ventilating area not less than 5% of the floor area of the room required to be ventilated; and</p> <p>(b) open to—</p> <p>(i) a suitably sized court, or space open to the sky; or</p> <p>(ii) an open verandah, carport, or the like; or</p> <p>(iii) an adjoining room in accordance with F6D8.</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
F6D8 Ventilation borrowed from adjoining room [2019: F4.7]			X		Not applicable.
F6D9 Restriction on location of sanitary compartments [2019: F4.8]			X		Not applicable.
F6D10 Airlocks [2019: F4.9]			X		Not applicable.
F6D11			X		Not applicable.

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	NA or Informational	Compliance Required	COMMENTS
Carparks [2019: F4.11]					
F6D12 Kitchen local exhaust ventilation [2019: F4.12]			X		Not applicable.
<b>Part F7 Sound transmission and insulation – This part is not applicable.</b>					
<b>Part F8 Condensation management – This part is not applicable.</b>					
<b>Section G Ancillary Provisions</b>					
<b>Part G1 Minor structures and components – This part is not applicable.</b>					
<b>Part G2 Boilers, pressure vessels, heating appliances, fireplaces, chimneys and flues – This part is not applicable.</b>					
<b>Part G3 Atrium Construction – This part is not applicable.</b>					
<b>Part G4 Construction in alpine areas</b>					
G4D1 Deemed-to-Satisfy Provisions [2019: G4.0]			X		<b>Informational clause:</b> (1) Where a Deemed-to-Satisfy Provisions is proposed, Performance Requirements G4P1 to G4P4 are satisfied by complying with— (a) G4D2 to G4D8. (2) Where a Performance Solution is proposed, the relevant Performance Requirements must be determined in accordance with A2G2(3) and A2G4(3) as applicable.
G4D2 Application of Part [2019: G4.1]				X	(1) The Deemed-to-Satisfy Provisions of this Part apply to any building constructed in an alpine area in addition to other Deemed-to-Satisfy Provisions of NCC Volume One. (2) Where any Deemed-to-Satisfy Provisions are in conflict, the provisions of this Part take precedence. <b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b>
G4D3 External doors [2019: G4.3]				X	Not applicable.
G4D4 Emergency lighting [2019: G4.4]			X		Not applicable.
G4D5 External trafficable structures [2019: G4.5]			X		Not applicable.
G4D6 Clear space around buildings [2019: G4.6]				X	A building must be so constructed that— (a) if any part of an external wall is more than 3.6 m above the natural ground level — the distance of that part from a boundary other than a road alignment is not less than 2.5 m plus an

BCA DEEMED-TO-SATISFY PROVISION	COMPLIES	DOES NOT COMPLY	Informational NA or	Compliance Required	COMMENTS
					<p>additional 100 mm for each 300 mm or part thereof by which that part of the wall exceeds a height of 3.6 m; and</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
G4D7 Fire-fighting services and equipment [2019: G4.8]			X		Not applicable.
G4D8 Fire orders [2019: G4.9]				X	<p>Every Class 2, 3 or 9 building must display a notice clearly marked "FIRE ORDERS" in suitable locations near the main entrance and on each storey, explaining—</p> <p>(a) the method of operation of the fire alarm system and the location of all call-points; and</p> <p>(b) the location and methods of operation of all fire-fighting equipment; and</p> <p>(c) the location of all exits; and</p> <p>(d) the procedure for evacuation of the building.</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
<b>Part G5 Construction in bushfire prone areas</b>					
G5D1 Deemed-to-Satisfy Provisions [2019: G5.0]			X		<p><b>Informational clause:</b></p> <p>(1) Where a Deemed-to-Satisfy Solution is proposed, Performance Requirements G5P1 and subject to G5D2, G5P2, are satisfied by complying with G5D3 and G5D4.</p> <p>(2) Where a Performance Solution is proposed, the relevant Performance Requirements must be determined in accordance with A2G2(3) and A2G4(3) as applicable.</p>
NSW G5D2 Application of Part [2019: G5.1]			X		<p>The Deemed-to-Satisfy Provisions of this Part apply in a designated bushfire prone area to—</p> <p>(a) a Class 3 building.</p>
NSW G5D3 Protection — residential buildings [2019: G5.2]				X	<p>In a designated bushfire prone area the following must comply with AS 3959:</p> <p>(a) A Class 3 building.</p> <p><b>Details demonstrating compliance with this clause must be incorporated into the construction certificate plans / specification</b></p>
G5D4 Protection — certain Class 9 buildings [New for 2022]			X		Not applicable.
<b>Part G6 Occupiable outdoor areas – This part is not applicable.</b>					
<b>Part G7 Liveable housing design – This part is not applicable.</b>					
<b>Section J Energy Efficiency – Refer to energy efficiency consultant's report</b>					

## 5.0 CONCLUSION

This report provides a Building Code of Australia 2022 (BCA) assessment of the proposed alterations and additions to the existing tourist accommodation building, located at 20 Candle Heath Road, Perisher Valley (The stables Resort Perisher).

The primary purpose of this report was to identify the non-compliance matters contained in the proposed design philosophy against the current Deemed-to-Satisfy (DTS) Provisions of the BCA and to provide compliance recommendations to overcome the DTS non-compliances.

This report provided a BCA assessment table in Section 3.0 that summarises the identified non-compliance matters and offers specific recommendations that are also outlined in the Executive Summary.

Further, if compliance with the deemed-to-satisfy provisions is not achievable or desirable, Alternative Solutions could be further developed and verified by an appropriately qualified BCA Consultant or Fire Safety Engineer.

## 6.0 ATTACHMENT A - INSPECTION & MAINTENANCE

---

### 6.1 Fire Safety Measures

---

The fire safety measures within the building must be maintained to ensure correct operation at all times the building is occupied. All firefighting equipment should be tagged when tested/inspected and log books kept up-to-date for all smoke detection, warning systems and sprinkler systems (where installed).

An annual fire safety certificate must be submitted to the local consent authority and the NSW Fire Brigade each year indicating satisfactory performance of the fire safety measures contained within the building. The annual fire safety statement should be displayed in a prominent place within the building (i.e. the main entry foyer)

The correct operation and maintenance of the buildings fire safety measures is critical in affording an adequate level of fire safety.

### 6.2 Good Housekeeping

---

The ongoing management of the building should ensure good housekeeping procedures. The following matters should be considered by building management:

- ❖ Ensure exits and paths of travel to exits remain unobstructed (in particular stairways)
- ❖ Avoid storage of materials in unoccupied areas
- ❖ Limit storage of flammable/combustible materials to designated and approved areas
- ❖ Prevent chocking open fire/smoke doors
- ❖ Prevent storage of materials that could hinder access to firefighting equipment

## 7.0 ATTACHMENT B – TYPE A FIRE-RESISTING CONSTRUCTION

### S5C11 Type A fire-resisting construction — fire-resistance of building elements

[2019: Spec C1.1: 3.1 and Table 3]

(1) In a building required to be of Type A construction—

(a) each building element listed in Tables S5C11a, S5C11b, S5C11c, S5C11d, S5C11e, S5C11f and S5C11g, and any beam or column incorporated in it, must have an FRL not less than that listed in those Tables for the particular class of building concerned; and

(b) any internal wall required to have an FRL with respect to integrity and insulation must extend to—

(i) the underside of the floor next above; or

(ii) the underside of a roof complying with Table S5C11g; or

(iii) if under S5C15 the roof is not required to comply with Table S5C11g, the underside of the non-combustible roof covering and, except for roof battens with dimensions of 75 mm x 50 mm or less or sarking-type material, must not be crossed by timber or other combustible building elements; or

(iv) a ceiling that is immediately below the roof and has a resistance to the incipient spread of fire to the roof space between the ceiling and the roof of not less than 60 minutes; and

(c) a loadbearing internal wall and a loadbearing fire wall (including those that are part of a loadbearing shaft) must be constructed from—

(i) concrete; or

(ii) masonry; or

(iii) subject to (2), fire-protected timber; or

(iv) any combination of (i) to (iii); and

(d) the FRLs specified in Table S5C11c for an external column apply also to those parts of an internal column that face and are within 1.5 m of a window and are exposed through that window to a fire-source feature.

(2) For the purposes of (1)(c)(iii), fire-protected timber may be used, provided that—

(a) the building is—

(i) a separate building; or

(ii) a part of a building—

(A) which only occupies part of a storey, and is separated from the remaining part by a fire wall; or

(B) which is located above or below a part not containing fire-protected timber and the floor between the adjoining parts is provided with an FRL not less than that prescribed for a fire wall for the lower storey; and

(b) the building has an effective height of not more than 25 m; and

(c) the building has a sprinkler system (other than a FPAA101D or FPAA101H system) throughout complying with Specification 17; and

(d) any insulation installed in the cavity of the timber building element required to have an FRL is non-combustible; and

(e) cavity barriers are provided in accordance with Specification 9.

(3) For the purposes of Table S5C11a and Table S5C11b, external wall includes any column and other building element incorporated within it or other external building element.

**Table S5C11a: Type A construction: FRL of loadbearing parts of external walls**

Distance from a fire-source feature	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
Less than 1.5 m	90/90/90	120/120/120	180/180/180	240/240/240
1.5 to less than 3 m	90/60/60	120/90/90	180/180/120	240/240/180
3 m or more	90/60/30	120/60/30	180/120/90	240/180/90

**Table S5C11b: Type A construction: FRL of non-loadbearing parts of external walls**

Distance from a fire-source feature	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
Less than 1.5 m	-/90/90	-/120/120	-/180/180	-/240/240
1.5 to less than 3 m	-/60/60	-/90/90	-/180/120	-/240/180
3 m or more	-/-/-	-/-/-	-/-/-	-/-/-

**Table S5C11c: Type A construction: FRL of external columns not incorporated in an external wall**

Column type	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
<i>Loadbearing</i>	90/-/-	120/-/-	180/-/-	240/-/-
<i>Non-loadbearing</i>	-/-/-	-/-/-	-/-/-	-/-/-

**Table S5C11d: Type A construction: FRL of common walls and fire walls**

Wall Type	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
<i>Loadbearing or non-loadbearing</i>	90/90/90	120/120/120	180/180/180	240/240/240

**Table S5C11e: Type A construction: FRL of loadbearing internal walls**

Distance from a fire-source feature	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
Fire-resisting lift and stair shafts	90/90/90	120/120/120	180/120/120	240/120/120
Bounding public corridors, public lobbies and the like	90/90/90	120/-/-	180/-/-	240/-/-
Between or bounding sole-occupancy units	90/90/90	120/-/-	180/-/-	240/-/-
Ventilating, pipe, garbage, and like shafts not used for the discharge of hot products of combustion	90/90/90	120/90/90	180/120/120	240/120/120

**Table S5C11f: Type A construction: FRL of non-loadbearing internal walls**

Distance from a fire-source feature	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
Fire-resisting lift and stair shafts	-/90/90	-/120/120	-/120/120	-/120/120
Bounding public corridors, public lobbies and the like	-/60/60	-/-/-	-/-/-	-/-/-
Between or bounding sole-occupancy units	-/60/60	-/-/-	-/-/-	-/-/-
Ventilating, pipe, garbage, and like shafts not used for the discharge of hot products of combustion	-/90/90	-/90/90	-/120/120	-/120/120

**Table S5C11g: Type A construction: FRL of other building elements not covered by Tables S5C11a to S5C11f**

Distance from a fire-source feature	FRL (in minutes): <i>Structural adequacy / Integrity / Insulation</i>			
	Class 2, 3 or 4 part	Class 5, 7a or 9	Class 6	Class 7b or 8
Other loadbearing internal walls, internal beams, trusses and columns	90/-/-	120/-/-	180/-/-	240/-/-
Floors	90/90/90	120/120/120	180/180/180	240/240/240
Roofs	90/60/30	120/60/30	180/60/30	240/90/60
