

Waste Management Plan – Demolition and Constuction Waste

The applicable sections of this Waste Management Plan (WMP) must be completed and submitted with your Development Application.

Completing this Plan will assist you in identifying the type(s) of demolition and construction waste that will be generated and will inform Council how you intend to reuse, recycle or dispose of this waste. The more detail you provide with your application will assist Council in reviewing your application. The amount of detail you provide with your application impacts the number of revisions and time taken with processing the DA.

The information you provide will be assessed against the objectives of the Development Control Plan 2021.

If you require assistance completing your WMP, please contact Council's Waste Assessment Officers in the Resource Recovery Team on **9707 9000**.

* Council has a target of diverting 80% of waste from landfill. To contribute to this target, all developments are required to achieve best practise in the design, construction and maintenance of waste management facilities and infrastructure.

I certify that:

- Any material moved off-site will be transported in accordance with the requirements of the *Protection of the Environment Operations Act 1997*;
- Waste will only be transported to a place that can lawfully be used as a waste facility;
- Generation, storage, treatment and disposal of hazardous waste and special waste (including asbestos) will be conducted in accordance with relevant waste legislation administered by the EPA and relevant Work Health and Safety legislation administered by WorkCover NSW; and
- All records demonstrating lawful disposal of waste and evidence such as weighbridge dockets and invoices for waste disposal or recycling services will be retained and kept readily accessible for inspection by regulatory authorities such as Council, NSW EPA or WorkCover NSW.
