

10000mm Construction Corridor

NOTES:  
Stockpiling and trenching methods are to consider the NSW National Parks & Wildlife Services document; 'Soil Stockpile Guidance for the Resort Areas of Kosciuszko Nation Parks'

Specifically applicable to site are the details listed below, but not limited to;

- Recommended Stockpiling Methods:
- Not exceed 2 meters in height
  - Have a slope less than 50% (26°)
  - Be at least 2 meters (preferably 5 meters) from vegetation, concentrated water flows, roads, publicly accessible areas or hazardous areas.
  - Be contained by appropriate sediment control structures as required.
  - Topsoil shall not be incorporated into other soil layers and shall therefore be stockpiled separately.

Example of 30T excavator that may be used during civil construction and trenching

3190mm Overall Width of Machine

3050mm Machine Height

2000mm Minimum Distance From Vegetation, Water Roads, Public Accessible Areas, Etc.

2000mm Maximum Height For Stockpiled Material

50° Maximum Angle For Stockpiled Material

Detailed Trench Section as per Trench Cross Section Drawings
