1 Industry and Employment SEPP Assessment

Industry and Employment SEPP Provision	Comment	Compliance
3.1. Aims, objectives etc.		
<p>(1) <i>This Policy aims:</i></p> <p>(a) <i>To ensure that signage (including advertising):</i></p> <p>(i) <i>is compatible with the desired amenity and visual character of an area, and</i></p> <p>(ii) <i>provides effective communication in suitable locations, and</i></p> <p>(iii) <i>is of high quality design and finish, and</i></p> <p>(b) <i>to regulate signage (but not content) under part 4 of the Act, and</i></p> <p>(c) <i>to provide time-limited consents for the display of certain advertisements, and</i></p> <p>(d) <i>to regulate the display of advertisements in transport corridors, and</i></p> <p>(e) <i>to ensure that public benefits may be derived from advertising in and adjacent to transport corridors.</i></p> <p>(2) <i>This Policy does not regulate the content of signage and does not require consent for a change in the content of signage.</i></p>	<p>(a) The proposal is assessed to be compatible with the visual character and desired amenity of the locality as it is proposed to install digital advertising signage. The sign will have a high design quality and is compatible with the land use character of the location, noting the proposed sign consolidates existing signage in the vicinity but importantly results in an overall reduction of signage area.</p> <p>(b) As detailed within the HIS, the proposed signage will have minimal impact on the heritage significance of the areas within the immediate vicinity.</p> <p>(c) The proposal will be assessed and regulated under Part 4 of the EP&A Act and will be appropriately managed by the Minister's conditions of consent.</p> <p>(d) Duration of consent for the proposal will be controlled by Clause 3.12 of Industry and Employment SEPP and will be consistent with the Minister's conditions of consent.</p> <p>(e) The proposal does not present any significant road safety issues and is not expected to compromise road safety in its vicinity. The proposal is also regulated against the Guidelines.</p> <p>(f) The proposal demonstrates public benefit by providing a revenue stream for the State Government and by providing important information to customers in special events and circumstances.</p>	✓

2 Transport Corridor Advertising and Signage Guidelines Assessment

2.1 Land Use Compatibility Criteria – Transport Corridor Advertising

Land Use Compatibility Criteria	Response	Compliance
i. <i>The use of outdoor advertising in a given locality should not be inconsistent with the land use objectives for the area outlined in the relevant LEP.</i>	<p>The proposal is located on land zoned SP2 Railway Infrastructure under the <i>Ashfield Local Environmental Plan 2013</i> (ALEP 2013).</p> <p>The proposed advertising signage is permissible within the SP2 zone under the ALEP.</p> <p>The proposal is consistent with the SP2 zone objectives in the ALEP 2013 as it is compatible with and will not detract from the major road corridor.</p>	✓
ii. <i>Advertisements must not be placed on land where the signage is visible from the following areas, if it is likely to significantly impact on the amenity of those areas:</i> <ul style="list-style-type: none"> • <i>environmentally sensitive area</i> • <i>heritage area (excluding railway stations)</i> • <i>natural or other conservation area</i> • <i>open space (excluding sponsorship advertising at sporting facilities in public recreation zones)</i> • <i>waterway</i> • <i>residential area (but not including a mixed residential and business zone, or similar zones)</i> • <i>scenic protection area</i> • <i>national park or nature reserve.</i> 	<p>The proposal is not located in an environmentally sensitive area and it is unlikely the sign will have tangible impacts to the nearby <i>Federal-Fyle Conservation Area</i> in which it faces.</p> <p>Due to the existing mature vegetation located opposite the sign within the SP2 road widening zone and the R2 zone at the end of Bruce Street, the sign is well screened and is unlikely to result in any additional impacts to surrounding areas.</p> <p>The proposal is unlikely to comprise any additional adverse visual impact to what is currently occurring on site from the Hume Highway.</p>	✓
iii. <i>Advertising structures should not be located so as to dominate or protrude significantly above the skyline or to obscure or compromise significant scenic views or views that add to the character of the area.</i>	<p>The sign will be located within the railway corridor adjacent to the Hume Highway railway overpass. It will remain below the existing tree canopy and will not comprise any significant scenic views.</p>	✓
iv. <i>Advertising structures should not be located so as to diminish the heritage values of items or areas of local, regional or state heritage significance.</i>	<p>As detailed within the HIS, the proposal will not impact on any items of heritage significance.</p>	✓

Land Use Compatibility Criteria	Response	Compliance
v. <i>Where possible, advertising structures should be placed within the context of other built structures in preference to non-built areas. Where possible, signage should be used to enhance the visual landscape. For example, signs may be positioned adjacent to, or screening, unsightly aspects of a landscape, industrial sites or infrastructure such as railway lines or power lines.</i>	The proposal is considered to be consistent with the context of the existing setting, being an established road corridor, and will provide visual interest to motorists along Hume Highway.	✓

Table 1: Land Use Compatibility Criteria – SEPP Guidelines

2.2 Digital Sign Criteria

Design Sign Criteria	Comment	Compliance
a. <i>Each advertisement must be displayed in a completely static manner, without any motion, for the approved dwell time as per criterion (d) below</i>	Static digital advertisements will appear on the screen for a 15 second dwell time before changing to a new static digital image. This is a 5 second increase to the 10 second minimum.	✓
b. <i>Message sequencing designed to make a driver anticipate the next message is prohibited across images presented on a single sign and across a series of signs.</i>	The signage content will be managed in order to comply with the requirements for message sequencing.	✓
c. <i>The image must not be capable of being mistaken:</i> i. <i>For a prescribed traffic control device because it has, for example, red, amber or green circles, octagons, crosses or triangles or shapes or patterns that may result in the advertisement being mistaken for a prescribed traffic control device.</i> ii. <i>As text providing driving instructions to drivers.</i>	The signage content will be managed in order to ensure images are not capable of being mistaken for a traffic control device or as text providing driving instructions to drivers.	✓
d. <i>Dwell times for image display must not be less than:</i> i. <i>10 seconds for areas where the speed limit is below 80km/h</i> ii. <i>25 seconds for areas where the speed limit is 80km/h and over</i>	A compliant dwell time of 15 seconds is proposed. As mentioned, the dwell time provides an additional 5 second increase to the 10 second minimum requirement.	✓

Design Sign Criteria	Comment	Compliance
e. <i>The transition time between messages must be no longer than 0.1 seconds, and in the event of image failure, the default image must be a black screen.</i>	The transition time between messages will be no longer than 0.1 seconds and the default image in the event of image failure will be a black screen.	✓
f. <i>Luminance levels must comply with the requirements in Section 3 below.</i>	The luminance criteria is addressed within the revised LIA (Attachment F)	✓
g. <i>The images displayed on the sign must not otherwise unreasonably dazzle or distract drivers without limitation to their colouring or contain flickering or flashing content.</i>	The signage content will be managed in order to ensure drivers are not unreasonably distracted.	✓
h. <i>The amount of text and information supplied on a sign should be kept to a minimum (e.g. no more than a driver can read at a short glance).</i>	The signage content will be managed in order to ensure text and information is kept to a minimum.	✓
i. <i>Any sign that is within 250m of a classified road and is visible from a school zone must be switched to a fixed display during school zone hours.</i>	<p>The proposal is within 250m of a school zone. However, the proposed sign is not visible from any school zones.</p> <p>As outlined in the SSA at Appendix G. the sign will not be switched to a fixed display during school hours as it will not be readable from the school zone.</p>	No, but acceptable
j. <i>Each sign proposal must be assessed on a case-by-case basis including replacement of an existing fixed, scrolling or tri-vision sign with a digital sign, and in the instance of a sign being visible from each direction, both directions for each location must be assessed on their own merits.</i>	This SEE provides a comprehensive assessment of the proposal and considers impacts of the digital advertising sign from the westbound direction of Hume Highway.	✓
k. <i>At any time, including where the speed limit in the area of the sign is changed, if detrimental effect is identified on road safety post installation of a digital sign, RMS reserves the right to re-assess the site using an independent RMS-accredited road safety auditor. Any safety issues identified by the auditor and options for rectifying the issues are to be</i>	This requirement is noted.	✓

Design Sign Criteria	Comment	Compliance
<i>discussed between RMS and the sign owner and operator.</i>

2.3 Freestanding Signage Criteria

Freestanding Signage Criteria	Response	Compliance
a. <i>The advertising structure must not protrude above the dominant skyline, including any buildings, infrastructure or tree canopies, when viewed from ground level within a visual catchment of 1km. Note: This impact should be measured from the vehicle approach location and any other critical viewpoints.</i>	As demonstrated in the accompanying Traffic Safety Assessment at Appendix G, upon vehicle approach the advertising structure does not protrude above the dominant skyline.	✓
b. <i>For a freestanding advertisement greater than 45sqm that requires consent from local council, a DCP must be in force that has been prepared on the basis of an advertising design analysis for the relevant area or precinct.</i>	The proposed sign is less than 45sqm (14.93m ²).	✓
c. <i>Where the sign is in a transport corridor a landscape management plan may be required as part of the DA approval for a freestanding advertisement. This may include requirements to provide appropriate vegetation behind and adjacent to the advertising structure to minimise unintended visual impacts. Landscaping should include trees, shrubs and ground covers to provide adequate screening, softening, colour, soil stabilisation and weed reduction.</i>	<p>The sign is located within the rail corridor which has existing, mature vegetation.</p> <p>The existing vegetation is positioned to compliment the railway line without obstructing the ongoing operation.</p> <p>As requested by DPE, a landscape management plan has been prepared and provided at Attachment E.</p>	✓
