Dear Trystan,

Cowra Hospital Redevelopment
REF Amendment – Acoustics

We refer to the following documents:

- Operational Noise Management Plan, prepared by Acoustic Logic dated 14 December 2022 (ONMP)
- Construction Noise and Vibration Management Plan, prepared by Acoustic Logic dated 25 July 2022 (CNVMP)
- REF Amendment Issue Package by DJRD dated 12 December 2023 (REF Amendment Pack)

Based on our review of the current (including the revised architectural drawings) and other relevant documentation, the changes are not significant enough to require that any acoustic changes to the revised design, with reference to the assessments and recommendations presented in the ONMP and CNVMP. Therefore the ONMP and CNVMP are considered applicable to the revised scheme.

We believe that there is sufficient provision in the modification to meet the noise criteria of conditioned ONMP and CNVMP, and subsequently the relevant acoustic conditions within the REF Consent Conditions. As such, it is recommended that the changes as part of the modification submission are not rejected on the basis of noise and vibration, under implementation of the recommendations outlined with the ONMP and CNVMP.

If you have any questions, please don't hesitate to contact the undersigned.

Kind Regards,

E-LAB Consulting

Teresa D Nguyen | Associate
