Executive Summary

Stantec Australia Pty Ltd (Stantec) was engaged by The NSW Department of Education NSW (the client) to complete a Preliminary Site Investigation (PSI) for specific portions of the Milton Public School, located at 9 Thomas Street, Milton NSW ('the site').

Upgrades and alterations are proposed at specific locations within the site that will require ground disturbance and earthworks. This PSI was prepared to provide preliminary information on the contamination status of the site for the purpose of supporting the planning process for future redevelopment, and the primary objective of this investigation were therefore to assess whether contamination has the potential to exist on the site and whether further investigation is needed.

Stantec undertook the following scope during completion of the PSI:

- A desktop study of information for the site and surrounds.
- A site walkover by an experienced environmental scientist to identify potential sources of contamination. The inspection was primarily focused on the portions of the site that are proposed for upgrade and alteration, however, the broader site was also inspected to a lesser extent;
- Interviews with relevant site operators, where possible;
- Development of a Preliminary Conceptual Site Model based on the information gathered during the desktop study and site inspection; and
- Preparation of a PSI report detailing the findings, conclusions, and recommendations for the site (this report).

Upon completion of the above scope, the following conclusions were drawn:

- Aerial imagery from 1944 indicates that the site appeared to have an agricultural land use, with buildings and structures limited to the southern portion of the site at the frontage with Thomas Street. The 1959 image shows additional buildings and structures, and historical land titles indicate that the site was established as a school from 1948. From 1959 the infrastructure and buildings within the site continues to expand to present day with some demolition and filling activities evident during that time.
- The site was not subject to regulation by the NSW EPA and appeared to be free of statutory notices and licencing agreements under both the CLM Act 1997 and PoEO Act 1997 and was not included on the List of NSW Contaminated Site;
- During the inspection, it was noted that filling appears to have occurred at locations where a level ground surface has been achieved, with the most filling evident in the central and northern portions of the site. However, localized filling was also noted in the southern portion and toward the eastern boundary. The quality and origin of the fill cannot be determined without further assessment, and latent demolition rubble and other wastes were observed on exposed surface soils at some locations.
- Latent demolition rubble / fragments were observed on visible ground surfaces at some locations where filling is suspected to have occurred. The asbestos register for the site notes that asbestos debris and sheeting are assumed to be present beneath several demountable buildings, which is

PRELIMINARY SITE INVESTIGATION

supported by the observations of waste and anthropogenic materials being present beneath buildings during the inspection.

- The *Asbestos In Grounds Management Plan* (AECOM, 2020) indicates that asbestos impacted soils were previously identified along the southern boundary of the site, which was identified as 'Area A'. The extent of asbestos impacted fill has not been accurately defined and are within relatively close proximity to areas proposed for upgrade and alteration.
- The Stantec (2024) report, summarised in **Section 4.1**, concluded the following:
 - Soils assessed as part of the contamination investigation did not contain concentrations of chemical contaminants above the adopted human health criteria that would preclude the ongoing land use as a primary school.
 - Exceedances of generic ecological criterion were identified for copper and zinc. However, due to the absence of significant ecological receptors under the current site configuration and the unlikely event of establishment of ecological receptors under the proposed upgrades, the generic ecological investigation level (EIL) exceedances were not considered to prohibit the proposed upgrades.
 - Surficial waste beneath buildings and surrounding buildings were considered unsuitable should site occupants, such as students, interact with the materials.
 - Preliminary and indicative classification of soils encountered at the site, for the purpose of informing future off-site disposal, were preliminarily classified as General Solid Waste (non-putrescible).

Mitigation Measures and Recommendations

Based on the findings, and with reference to the purpose and objectives of this investigation, the following mitigation measures and recommendations are outlined below:

- Current observations and data did not warrant further investigation of contamination based on the concept design provided to Stantec. If the design were to alter and encompass areas of the site that were not subjected to intrusive investigation, an additional supplementary investigation may be required.
- All future works should be conducted as per a suitable Construction and Environmental Management Plan (CEMP), which incorporates an Unexpected Finds Protocol (UFP), to minimize potential risks to human health and the environment during construction.
- Any material being removed from site must be classified for off-site disposal in accordance the EPA (2014) Waste Classification Guidelines and/or an applicable NSW EPA Resource Recovery Order. Any future classification must be considerate of the data and information provided in this document and other historical reports relating to contamination.
- Should any soil materials be imported onto the site for the proposed development then they will need to have supporting classification documentation and be validated to meet the adopted validation criteria and meet the definition and requirements of assessment for a NSW EPA Resource Recovery Order, VENM or other suitable material, such as growth medium.

PRELIMINARY SITE INVESTIGATION

Mitigation Measures Table

Project Stage Design (D) Construction (C) Operation (O)	Mitigation Measure	Reason for Mitigation Measure	Section of Report
C	<p>Unexpected find protocol.</p> <p>An unexpected finds protocol is to be incorporated into the contractors CEMP so that previously unidentified contamination is managed appropriately.</p>	<p>If not managed appropriately, unexpected contamination can present potential health risks to human and ecological receptors and can also impact the project delivery program and budget.</p>	Section 6.1
C	<p>Managing spoil proposed for offsite disposal and/or reuse.</p> <p>Any material being removed from site must be classified for off-site disposal in accordance the EPA (2014) Waste Classification Guidelines and/or an applicable NSW EPA Resource Recovery Order. Any future classification must be considerate of the data and information provided in this document and other historical reports relating to contamination.</p>	<p>Negative outcomes including:</p> <ul style="list-style-type: none"> • Regulatory penalties. • Health risks associated with improperly disposed soils. • Legal liabilities associated with non-compliance of waste disposal. 	Section 6.1
C	<p>Validation of imported soils and blended material.</p> <p>Should any soil materials be imported onto the site for the proposed development then they will need to have supporting classification documentation and be validated to meet the adopted validation criteria and meet the definition and requirements of assessment for a NSW EPA Resource Recovery Order, VENM or other suitable material, such as growth medium.</p>	<p>To ensure imported and/or blended material (if required) is suitable for the proposed land-use.</p>	Section 6.1

PRELIMINARY SITE INVESTIGATION

PRELIMINARY SITE INVESTIGATION

Introduction

1.0 INTRODUCTION

Stantec Australia Pty Ltd (Stantec) was engaged by The NSW Department of Education (DoE) (the client) to complete a Preliminary Site Investigation (PSI) for specific portions of the Milton Public School, located at 9 Thomas Street, Milton NSW (herein referred to as ‘the site’). The site locality and layout are shown in **Figure 1** in **Appendix A**. The PSI was prepared in accordance with the scope of works presented in an email proposal submitted to the client on the 13th of June 2023.

This Preliminary Site Investigation (PSI) report has been prepared to support a Review of Environmental Factors (REF) for the NSW Department of Education (DoE) for Milton Public School upgrade (the activity).

The purpose of the REF is to assess the potential environmental impacts of the activity prescribed by *State Environmental Planning Policy (Transport and Infrastructure) 2021* (T&I SEPP) as “development permitted without consent” on land carried out by or on behalf of a public authority under Part 5 of the *Environmental Planning and Assessment Act 1979* (EP&A Act). The activity is to be undertaken pursuant to Chapter 3, Part 3.4, Section 3.37 of the T&I SEPP.

This document has been prepared in accordance with the Guidelines for Division 5.1 assessments (the Guidelines) by the Department of Planning, Housing and Infrastructure (DPHI) as well as the Addendum Division 5.1 guidelines for schools. The purpose of this report is to provide preliminary information on the contamination status of the site for the purpose of supporting the planning process for future redevelopment.

1.1 SITE DESCRIPTION

The site is located at 9 Thomas Street, Milton, NSW, 2538 (the site). The site is legally referred to as Lot 1 in Deposited Plan 861814 and is within the Shoalhaven Local Government Area (LGA) and has an approximate area of 4 hectares. An aerial photograph of the site is provided at **Figure 1**.

The site is zoned SP2 Educational Establishment and existing development comprises various buildings, sports facilities and play space associated with Milton Public School. Milton Public School currently comprises 24 permanent teaching spaces (PTS) and 12 demountable teaching spaces (DTS). The site contains two locally heritage listed buildings (Building A and Q).

The site is predominantly cleared; however there is existing vegetation interspersed throughout the site and significant trees are present along the northern and western boundary of the site. There is a gradual slope downwards from the south-east to the north-east. of the site.

The site is an irregularly shaped lot with a narrow frontage along Thomas Street. Pedestrian and vehicular access is provided from Thomas Street and from Wason Street. Milton Public School is adjoined by low density residential properties to the south, west and east and Milton Rainforest Reserve is located to the north.

PRELIMINARY SITE INVESTIGATION

Introduction

Figure 1 Aerial Photograph

Source: Urbis, January 2024

1.2 PROPOSED ACTIVITY

The proposed activity relates to upgrades to Milton Public School. Specifically, the proposed activity comprises the following:

- Construction of a new two-storey home base building.
- Installation of additional solar panels.
- Relocation of existing cricket nets to the eastern boundary of site.
- Construction of new stairs and covered walkways linking the new building to the existing school.
- Construction of new fencing.
- Construction of new hardstand area.
- Minor alterations to the existing staff car park.
- Disconnection and relocation of existing LPG tank.
- Tree removal.
- External landscape works.

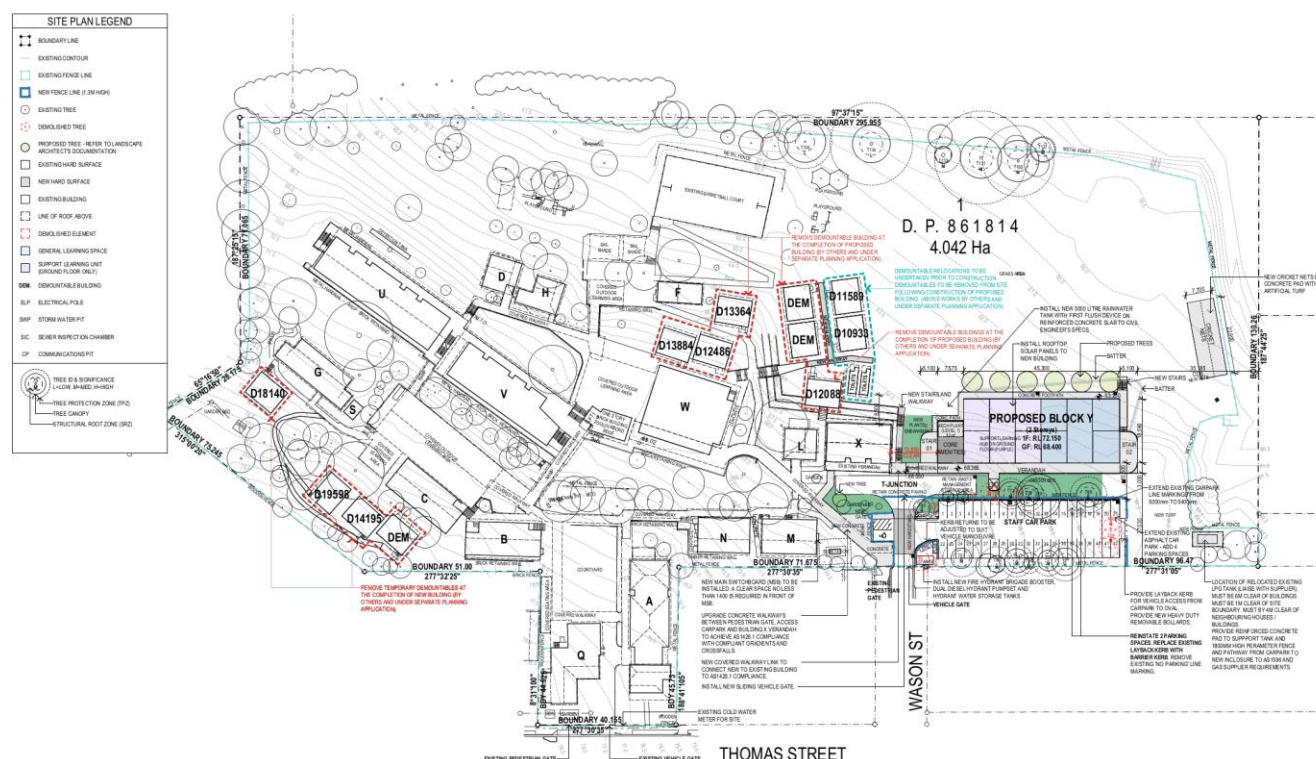

PRELIMINARY SITE INVESTIGATION

Introduction

Any works relating to demountables or the water tank will proceed via a separate planning pathway. Figure 2 provides an extract of the proposed site plan.

Figure 2 Site Plan

Source: Fulton Trotter, 2024

1.3 PURPOSE AND OBJECTIVES

The purpose of this PSI is to provide preliminary information on the contamination status of the site for the purpose of supporting the planning process for future redevelopment.

The objectives of the PSI were to assess whether contamination has the potential to exist on the site and whether further investigation is needed.

1.4 SCOPE OF WORKS

The following scope of work was undertaken to meet the objectives of the PSI:

- A desktop study of information for the site and surrounds. This desktop study included a review of:
 - A collection of historical data by Lotsearch;
 - Relevant online maps including geology, hydrogeology, topography and acid sulfate soils risk maps;
 - Historical aerial photographs;

PRELIMINARY SITE INVESTIGATION

Introduction

- NSW EPA contaminated land records and Protection of the Environment Operations (PoEO) Licenses; and
 - Information and documentation provided to Stantec by the client, including publicly available asbestos registers for the site.
- The inspection was primarily focused on the portions of the site that are proposed for upgrade and alteration, however, the broader site was also inspected but to a lesser extent;
- Interviews with relevant site operators, where possible;
- Development of a Preliminary Conceptual Site Model based on the information gathered during the desktop study and site inspection; and
- Preparation of a PSI report detailing the findings, conclusions, and recommendations for the site.

1.5 APPLICABLE GUIDELINE AND LEGISLATION

The scope of this PSI has been developed in accordance with the following guidelines and legislation:

- ASSMAC Acid Sulfate Soils Assessment Guidelines, Acid Sulfate Soils Management Advisory Committee, August 1998 (ASSMAC 1998);
- NEPC National Environment protection (Assessment of Site Contamination) Measure 1999. National Environmental Protection Council (NEPC 2013);
- NSW Department of Urban Affairs and Planning (2021) Managing Land Contamination: Planning Guidelines: SEPP Hazards and Resilience, 2021 (SEPP 55);/
- NSW EPA Consultants Reporting on Contaminated Land: Contaminated Land Guidelines. New South Wales Environment Protection Authority, April 2020, Updated May 2020 (NSW EPA 2020)

2.0 SITE DESCRIPTION AND SETTING

2.1 SITE INFORMATION

Information defining the site are provided in **Table 2-1** below, and a site plan is presented in **Figure 1** in **Appendix A** that shows the site boundary, surface contours and significant features.

Table 2-1 Site identification

Item	Details
Site Address	9 Thomas Street, Milton NSW
Approximate overall area (ha) of school	4 ha
Title Details	Lot; 1/DP861814
Local Government Area	Shoalhaven
Current land use	The land is currently used as a primary school with various related infrastructure, open grass and sporadically vegetated areas.
Current Land Zoning	SP2 Educational Establishment

2.2 SITE DESCRIPTION

Site information available from publicly available data sets was provided in Lotsearch Report (LS046788, 2023), which is summarised below in **Table 2-2**. The Lotsearch Report is attached in its entirety in **Appendix B**.

Table 2-2 Site description and public datasets

Item	Details
Site topography and drainage features	The site topography broadly slopes from the south west to north east. The natural topography includes moderate slopes, however, filling, landscaping and terracing within the site has created levelled areas for building construction and establishment of playgrounds.
Nearby water bodies	An unnamed drainage channel is located approximately 80 metres north of the site, which flows in an easterly direction and ultimately the catchment discharges to Narrawallee Creek, located approximately 2km north east. It is inferred that surface water originating at the site, and potentially groundwater, would flow in a north to north easterly direction.
Acid sulfate soil / rock risk	The NSW Government Planning Industry and Environment online mapping tool, eSPADE Version 2.1, indicates that the site is not mapped as being situated within or near an ASS risk area. Furthermore, data presented by Lotsearch indicates that the site is within an area of extremely low probability of acid sulfate soils occurrence. The nearest mapped ASS risk area is approximately 1.35 km east in the vicinity of Bunbury Curran Creek.
Groundwater (BoM, 2021)	Data provided in Lotsearch report (Appendix B) identified that five (5) groundwater wells are situated within 1,500m of the site: <ul style="list-style-type: none"> GW011946, situated 1,237m Northwest, bore type listed as 'Water Supply' GW011945, situated 1,271m Northwest, bore type listed as 'Water Supply' GW011944, situated 1,346m North, bore type listed as 'Water Supply' GW031037, situated 1,773m Southeast, bore type listed as 'unknown' GW111114, situated 1,774m North, bore type listed as 'Water Supply'

PRELIMINARY SITE INVESTIGATION

Site Description and Setting

Site soil landscapes	A review of soil data from MinView v2023.7.17 (minview, 2023) indicated that the site is underlain with Brown Podzolic Soils. Information obtained from, Britannica 2023, suggests that podzolic soils are characterised by moderate leaching, an accumulation of iron and clay content, a higher content of humic acid, and are shallow; occurring at less than 50cm from the surface.
Site upper geology	The site geology is identified as being underlain by Milton Mesozoic shale formations of Monzonite (MZ__m). This is described as porphyritic monzonite with phenocrysts of glassy plagioclase in a black fine grained (and sporadically sub-aphanitic) matrix; variable to a monzonite porphyry; weathers to a light colour; small zones of olivine basalt dyke material.

PRELIMINARY SITE INVESTIGATION

Site Walkover and Observations

3.0 SITE WALKOVER AND OBSERVATIONS

3.1 SITE WALKOVER

An inspection of the site was undertaken by an Environmental scientist from Stantec on the 4th of September 2023. The site inspection information has been incorporated within the summary below, as appropriate. Relevant observations made during the site inspection are provided below in **Table 3-1**, and photographs taken during the inspection are contained in **Appendix C**. The boundary of the school and notable features are shown on **Figure 1** in **Appendix A**.

Table 3-1 Site Description

Item	Details	Photo Reference (Appendix C)
Weather condition	The weather conditions at the time of the inspection were fine and sunny, approximate temperature of 24 degrees Celsius.	-
Site slope and drainage features	The natural topography of the broader area is characterized by moderate slopes to the north and north east with the highest elevations being situated in the south of the site. The school site has been subjected to filling, landscaping and terracing to create levelled areas for construction of buildings, structures and facilities, and for establishment of playgrounds.	4, 5, 7
Site surface coverings	Site surface coverings were variable and included: <ul style="list-style-type: none">▪ Paved areas to the south surrounding the school office and at discrete locations throughout the school grounds including the outdoor basketball court and covered slab / assembly area;▪ Building footprints are generally constructed on concrete slab in the southern portion of the site, whereas buildings in the central portion of the site were typically constructed on brick piers due to the ground slope; and▪ Playgrounds were typically vegetated with grass.	2, 7, 9, 11
Surface soils	Observations of surface soils were limited due to pavement and grass cover, however, where visible appeared to comprise of silty sand and silty gravel. Fragments of demolition rubble and waste were observed within surface soils at some locations, including beneath buildings and structures.	1, 2, 3
Site cut and fill	Due to the natural topography of the site having a moderate slope, bulk filling appears to have occurred at locations where a level ground surface has been achieved, with the most filling evident in the central and northern portions of the site. However, localized filling was also noted in the southern portion.	4, 5, 7
Buildings and structures	The site contained numerous buildings and structures including the following: <ul style="list-style-type: none">▪ Original buildings toward the southern portion of the site generally constructed of brick, stone and timber;▪ Demountable buildings and structures throughout the school grounds that are utilized as classrooms and toilet blocks;▪ Multi-storey brick buildings located toward the western extent of the school grounds that are utilized as class rooms;▪ Outdoor play equipment and basketball court located toward the northern site boundary;	4, 5, 7, 10, 11

PRELIMINARY SITE INVESTIGATION

Site Walkover and Observations

Item	Details	Photo Reference (Appendix C)
	<ul style="list-style-type: none"> Cricket nets and a water tank toward the south eastern corner of the site; and An asphalt carpark located along the southern boundary of the site. 	
Potential asbestos in building materials	The building materials contained within each building were observed to the extent practicable but did not constitute a HAZMAT assessment. It was considered that some buildings may contain asbestos products including cement sheeting.	-
Manufacturing, industrial or chemical processes and infrastructure	Chemical processes and infrastructure on site were limited to small quantities of chemicals utilized during maintenance and groundskeeping of school facilities. These were observed within a small structure within the central portion of the site, which was lockable and had ventilation. The chemicals observed appeared to be stored appropriately and no significant staining was evident.	8
Fuel storage tanks (USTs/ASTs)	Fuel storage tanks were not observed at the site. Storage of petroleum based products were limited to small quantities of fuel and oils stored within the groundskeepers facility.	8
Dangerous goods	As noted above, dangerous goods were stored in small quantities within the groundskeepers facility.	8
Solid waste deposition	Solid waste appeared to be managed by the municipal garbage collection, with bins observed throughout the site. Evidence of residual building materials and waste were observed on ground surfaces within fill areas and beneath structures, where visible.	1, 2, 3, 9
Liquid waste disposal features	No liquid waste disposal features were observed on site. Wastewater from toilet blocks appeared to be connected to the local municipal sewerage network.	-
Evidence of previous site contamination investigations	None observed, however, it is noted that a portion of the site along the southern boundary is reported to have contained asbestos in soil. The information is provided in Section 4.7 .	-
Evidence of land contamination (staining or odours)	None observed.	-
Evidence of groundwater contamination	None observed.	-
Groundwater use	Groundwater bores were not observed and groundwater extraction at the site is unlikely to occur.	-
Vegetation	Vegetation was generally limited to grassed areas, however, some mature trees were observed around the perimeter of the site and within the central portion amongst buildings and structures. The vegetation observed appeared to be in reasonable condition and did not appear stressed.	4, 5, 6, 10
Site fencing	The entire site is fenced and comprises a mixture of fence types, including a metal fence around the western, northern and eastern boundaries. The southern site boundary is shared with low-density residential neighbours and the shared fences are variable and include timber palings, sheet metal and wire.	6
Interview information	A phone interview was conducted with the grounds staff on the 22 nd of September 2023 to confirm if evidence of contamination had been previously identified during historical earthworks and maintenance activities. The following information was provided during the phone interview:	-

PRELIMINARY SITE INVESTIGATION

Site Walkover and Observations

Item	Details	Photo Reference (Appendix C)
	<ul style="list-style-type: none">Indicators of contamination such as odorous, discoloured and stained soils had not been encountered.The fill quality around the oval and water tanks toward the southeastern corner contains large quantities of demolition rubble including concrete.Asbestos has not been observed in or on the ground during their activities.	

3.2 SURROUNDING LAND USE

The surrounding land uses and potential sensitive receptors were determined based on site observations and from a review of aerial imagery provided in the Lotsearch report in **Appendix B**. A summary of the surrounding land uses are provided below in **Table 3-2**.

Table 3-2 Surrounding land uses

Direction from Site	Description	Sensitive Receptors	Distance / Direction to Sensitive Receptor
North	Immediately north of the site is the Milton Rainforest Reserve, which contains a waterbody that drains into the Narrawallee Creek.	Vegetation within the rainforest and biological receptors within the down-gradient water bodies may be considered potential sensitive receivers.	Immediately north of the site and downstream water bodies.
South	Several low-density residential properties are located south of the site, many of which have a shared fence. A portion of the site also fronts directly onto Thomas Street.	Nearby residents are considered a potential sensitive receptor.	Immediately south of the site, and further south across Thomas Street.
East	Similar to above, low-density residential properties are located east of the site, many of which have a shared fence.	Nearby residents are considered a potential sensitive receptor.	Immediately east of the site.
West	The area to the west of the site appears to be utilized for agricultural purposes, specifically livestock grazing. Whilst not observed during the inspection, a resident advised the inspector from Stantec that cattle are frequently observed within the paddock.	The land use to the west is a highly disturbed agricultural paddock without obvious receptors, however, it is inferred that the paddock is an upper catchment of the rainforest noted above.	Immediately west of the site.

3.3 AREAS NOT ACCESSED

The inspection was primarily focused on portions of the site that were proposed for upgrade and alteration in accordance with the concept design drawings provided by the client (see **Section 1.1**). Despite this, the broader school was also subjected to a less detailed inspection to attempt to identify potential sources of contamination that could impact on the proposed upgrades and alterations. A summary of the inaccessible areas is provided in **Table 3-3**, which should be considered in relation to the further data gaps detailed in **Section 5.2**.

PRELIMINARY SITE INVESTIGATION

Site Walkover and Observations

Table 3-3 Inaccessible areas during site walkover

Area	Justification / Notes
Within occupied classrooms	The inspection was conducted during school hours on a weekday. As such, inspections of classrooms and locations occupied by students did not occur.
Soil beneath vegetation and structures	Soil properties were inspected to the extent practicable but was constrained by the presence of surface vegetation, pavement, buildings and structures. Where possible, the inspector visually assessed ground surfaces beneath buildings and structures, however, generally the ability to inspect soil properties was highly constrained.

4.0 SITE HISTORY ASSESSMENT

A desktop site history review of the following was undertaken:

- Historical reports;
- Contamination registers and records;
- Historical business directories; and
- Historic aerial photographs.

4.1 HISTORICAL REPORTS

This PSI report was initially prepared in December 2023, prior to completion of the Contamination Investigation (Stantec, 2024):

- Stantec (2024) *Contamination Investigation*, Milton Public School, Milton NSW, prepared for School Infrastructure New South Wales, dated 19 January 2024.

An update to this PSI report is occurring following completion of the Contamination Investigation report, and as such the findings of the investigation are being considered.

A summary of the previous report is provided in **Table 4-1**.

Table 4-1 Previous Report Review

Item	Description
Objectives	<p>Stantec identified the objectives as:</p> <ul style="list-style-type: none"> • Assess for potential soil contamination at the site in consideration of the potential sources identified in the Preliminary Site Investigation (Stantec, 2024). • Identify the associated risks related to the proposed upgrades and alterations. • Provide a preliminary and indicative waste classification for the soils encountered as part of the investigation.
Scope of works	<p>Stantec completed the following scope of works as part of the investigation:</p> <ul style="list-style-type: none"> • Fieldworks including soil sampling from five (5) boreholes (drill rig) and two (2) soil bores (hand auger). • Submission of select soil samples to a NATA accredited laboratory for assessment of contaminants of concern. • Review of laboratory results to appropriate screening criteria (HIL/HSL A thresholds) and waste classification guidelines.
Findings	<p>The following findings were made:</p> <ul style="list-style-type: none"> • Fill encountered at the site did not appear to contain properties that would be considered aesthetically unsuitable, as per the guidance of the ASC NEPM (2013), with the exception of glass in topsoil at one location. • Surficial waste beneath buildings and surrounding buildings were considered unsuitable should site occupants, such as students, interact with the materials. • The soils assessed did not contain concentrations of chemical contaminants above the adopted human health criteria that would preclude the ongoing land use as a primary school. • Exceedances of the generic ecological investigation levels for copper and zinc were reported in numerous soil samples. Due to the absence of significant ecological receptors under the current site configuration and the unlikely event of establishment of ecological receptors under the proposed upgrades, the generic EIL exceedances were not considered to prohibit the proposed upgrades.

PRELIMINARY SITE INVESTIGATION

Site History Assessment

Item	Description
	<ul style="list-style-type: none"> The preliminary and indicative classification of soils encountered at the site, for the purpose of informing future off-site disposal, were preliminarily classified as General Solid Waste (non-putrescible).
Recommendations	<p>Stantec made the following recommendations:</p> <ul style="list-style-type: none"> Current observations and data did not warrant further investigation of contamination based on the concept design provided to Stantec. If the design were to alter and encompass areas of the site that were not subjected to intrusive investigation, an additional supplementary investigation may be required. Due to the potential for unexpected finds to be encountered during construction, an Unexpected Finds Protocol (UFP) must be in place to appropriately manage materials considered to be potentially contaminated.
Data gaps and ambiguities	<p>The following data gaps and ambiguities have been identified by Stantec:</p> <ul style="list-style-type: none"> Some areas of site could not be accessed during the investigation. There is still potential for contaminated material to exist within the site at unassessed areas, particularly at locations that were inaccessible and where filling is present.

4.2 LAND TITLE DOCUMENT REVIEW

Historical land title documents were obtained to assess for potential historical site uses that may have resulted in contamination. The land title documents are provided in **Appendix B** and summarised in **Table 4-2** below:

Table 4-2 Land Title Summary

Date of Acquisition and Term Held	Registered Proprietor(s) and Occupation / Land Use	Title Reference
As regards to part tinted green within D.P.861814		
11.02.1876 (1876 to 1937)	John Fisher Cambage (Farmer)	Book 157 No. 140

4.3 REGISTERS AND RECORDS

A search of the following databases was undertaken on behalf of Stantec by Lotsearch Report (Report ID – LS046788, **Appendix B**) to identify properties within 1,000 metres of the site that may present a potential contaminant risk:

- List of NSW contaminated sites notified to NSW EPA;
- NSW EPA Contaminated land records of notice;
- NSW EPA locations of former gasworks sites;
- NSW EPA per and poly fluoroalkyl substance (PFAS) Investigations program;
- NSW EPA other sites with contamination issues;
- NSW EPA Licensed activities under the PoEO Act;
- NSW EPA Delicensed PoEO activities now revoked or surrendered;
- Defence PFAS investigation & Management Program;
- Airservices Australia National PFAS Management Program;
- Geoscience Australia National Waste Management Facilities Database; and
- Geoscience Australia National Liquid Fuel Facilities.

Records identified within 1,000 metres of the site are summarised in **Section 4.1.1** to **Section 4.1.4**, while the full results of searches including records outside the 1,000 m buffer and results for databases with no records identified are included in **Appendix B**.

4.3.1 Contaminated Land Record of Notices

The Contaminated Land Record of Notices is maintained by the Office of Environment and Heritage (OEH) in accordance with Part 5 of the Contaminated Land Management (CLM) Act 1997 and contains regulatory notices issued by the Environment Protection Authority (EPA) in relation to contaminated sites. The Lotsearch Report LS046788 did not identify any Contaminated Land Record of Notices within a 1,000 m buffer of the site.

4.3.2 Protection of the Environment Operations Public Register

The Protection of the Environment Operations (PoEO) Public Register under Section 308 of the *Protection of the Environment Operations Act 1997* (PoEO Act) contains Environment Protection Licenses, applications and notices issued by the EPA. A search of the PoEO public register was undertaken on 11 August 2023 and results are summarised below in **Table 4-3** and

Table 4-4. The full results can be viewed in **Appendix B**.

PRELIMINARY SITE INVESTIGATION

Site History Assessment

Table 4-3 PoEO Act Licenses and status

Licence Number	Licence Holder	Location	Activity	Status	Distance (m) / Direction
4653	Luhrmann Environment Management PTY LTD	Waterways throughout NSW	Other activities / Non Scheduled Activity – Application of Herbicides	Surrendered	0m On-site
4838	Robert Orchard	Waterways throughout NSW – Sydney NSW 2000	Other activities / Non Scheduled Activity – Application of Herbicides	Surrendered	0m On-site
6630	Sydney Weed & Pest Management PTY LTD	Waterways throughout NSW – Prospect NSW 2148	Other activities / Non Scheduled Activity – Application of Herbicides	Surrendered	0m On-site

Table 4-4 PoEO Act - Clean up and Penalty Notices

No PoEO penalty notices have been identified within 1,000m of the site at the time of the searches, as specified within the *LS046788* report and *Protection of the Environment Operations Act (POEO)* public register online.

4.3.3 List of NSW Contaminated Sites Notified to the EPA

The list of NSW contaminated sites notified to the EPA are properties that are contaminated to an extent that warranted reporting to the NSW EPA; however, contamination may or may not be significant enough to warrant regulation by the EPA. The EPA needs to review and, if necessary, obtain more information before it can determine the requirements for regulation.

A search of the List of NSW Contaminated Sites Notified to the EPA was undertaken by Lotsearch which identified no contaminated sites within a 1,000 m radius of the site.

4.3.4 National Waste Management and Liquid Fuel Facilities

A search of Geoscience Australia, Waste Management and Liquid Fuel Facilities identified two (2) National Liquid Fuel Facilities within the buffer. A summary of the search is provided in **Table 4-5** and a copy of the search is provided in **Appendix B**.

Table 4-5 National Liquid Fuel Facilities

Site	Location	Category	Status	Distance (m) / Direction
Shell Milton	32-36 Princes Highway	Petrol Station	Operational	57 m / West
Independent Milton	59 Princes Highway	Petrol Station	Operational	57 m / Southwest

The geographical location of the site in relation to each Liquid Fuel Facility may indicate potential for contamination to migrate beneath the site, however, this has not been assessed.

PRELIMINARY SITE INVESTIGATION

Site History Assessment

4.4 HISTORICAL AERIAL PHOTOGRAPHY REVIEW

Seventeen (17) historical aerial photographs taken in the years 1944, 1959, 1967, 1975, 1987, 1991, 2003, 2009, 2013, 2018, and 2023 were reviewed to identify historical land uses that may present potential contaminant sources. The aerial photograph summary is provided below in **Table 4-5**. Historical photographs are presented in the Lotsearch report in **Appendix B**.

Table 4-6 Summary of Aerial Photograph Review

Year	Onsite	Offsite
1944 (B&W)	The site appears to be primarily grass land with limited trees in the central portion of the site	North: Small forested area within outer site boundary.
		East: Grassy fields appear to be adjacent to site.
		West: Grassy field and small buildings appear to be between Princes Highway and the site.
		South: Small buildings appear to be directly adjunct to the site as well further south.
1959 (B&W)	Image quality creates uncertainty for interpretation of the image. However, there appears to be several buildings within the central portion of the site.	North: Forested area appears to be extending / growing.
		East: Southeast building constructed.
		West: No visible changes.
		South: No visible changes.
1967 (B&W)	Six (6) new buildings appear to have been constructed on site, majority of which are in the southwestern portion. The northeastern site boundary appears to have undergone large clearing.	North: Forested area appears to be extending / growing.
		East: No visible changes.
		West: Minor building construction appears to have occurred between Princes Highway and the site.
		South: Small buildings appear to have been constructed in the southern central portion of the site buffer.
1975 (B&W)	Several small buildings appear to have been constructed in the southwestern portion of the site, adjacent to the previously constructed buildings.	North: Forested area appears to be extending / growing.
		East: Appears to have been a building constructed near the outer site boundary.
		West: Minor building construction appears to have occurred on the opposite side of Princes Highway.
		South: Similar minor developments appear to have been built.
1987 (B&W)	The western site boundary buildings appear to have been demolished. The central portion of the site appears to have undergone construction activities.	North: Forested area appears to be extending / growing.
		East: No visible changes.
		West: Several buildings appear to have been constructed along the Princes Highway.
		South: No visible changes.
1991 (Colour)	Very similar to previous aerial shot, with an additional rectangular building having been constructed.	North: Forested area appears to be extending / growing.
		East: No visible changes.
		West: No visible changes.
		South: No visible changes.
2003 (Colour)	More smaller buildings appear to have been constructed in the central, western and central east portions of the site.	North: Forested area appears to be extending / growing.
		East: Several buildings constructed directly adjacent to the eastern site boundary.

PRELIMINARY SITE INVESTIGATION

Site History Assessment

		West: No visible changes.
		South: Minor property developments appear to have been constructed in the southeastern portion of the site.
2009 (Colour)	The site appears to have connected the smaller buildings into three large buildings on the western portion of the site. Similarly, the entrance / southern central portion of the site appears to also have conjoined into several large buildings. Furthermore, there appears to have been a car park constructed in the southeastern corner and a sports field in the northern central portion.	North: Forested area appears to be extending / growing.
		East: No visible changes.
		West: No visible changes.
		South: Minor property developments appear to have been constructed in the southern central portion of the site.
2013 (Colour)	The site appears to have undergone construction in the southeastern portion of the site with three new buildings having been constructed adjacent to the parking lot.	North: Forested area appears to be extending / growing.
		East: No visible changes.
		West: No visible changes.
		South: No visible changes.
2018 (Colour)	One small building appears to have been constructed in the southwestern portion of the site.	North: No visible changes.
		East: No visible changes.
		West: No visible changes.
		South: No visible changes.
2023 (Colour)	No visible changes.	North: No visible changes.
		East: No visible changes.
		West: No visible changes.
		South: No visible changes.

4.5 HERITAGE

Environmental planning instrument heritage items are provided in lot search report LS046788 (**Appendix B**). Stantec did not identify any heritage items that may be potential sources of contamination to the site, though it is noted that the Shoalhaven LEP (2014) lists a portion of the site as having heritage value, including the 'Victorian Rendered Masonry School and Schoolmaster's Cottage' and the 'Remnant Rainforest'.

4.6 HISTORICAL BUSINESS DIRECTORY

Historical business directory records for the years 1950, 1961, 1965, 1970, 1975, 1978, 1982, 1986 and 1991 were presented in the Lot Search report LS046788 (**Appendix B**) identifying historical land uses at or surrounding the site that could present potential contaminant sources. A summary of the identified business that could present a potential contaminant risk are provided below in **Table 4-7**.

Table 4-7 Industries, businesses and activities that may cause contamination within 1,000 m of the site

Business Activity	Address	Year Active	Distance(m)/ Direction (m)
Motor Car Dealers – New &/or Used	Dison Barry Holden., 57 Princes Highway., Milton 2538	1991	57m / Southwest
Motor Cycle Accessories &/or Spare parts dealers &/or Repairers	South Coast Cycles., 67 Princes Highway	1991	58m / Southwest

PRELIMINARY SITE INVESTIGATION

Site History Assessment

Business Activity	Address	Year Active	Distance(m)/ Direction (m)
Motor Body Builders	Barclay's Service Station., 36 Princes Highway Milton	1991	66m / West
Agricultural Chemicals MFRS. &/or imps. &/or Dists	Turnbull S M., 4 Son 83 Princes Highway Milton	1991	125m / South

4.7 SECTION 10.7 PLANNING INFORMATION

The site is zoned as SP2 School Infrastructure under the Shoalhaven Local Environmental Plan 2014. The LEP states the following objectives for SP2:

- To provide for infrastructure and related uses.
- To prevent development that is not compatible with or that may detract from the provision of infrastructure.

The Section 10.7 Planning Certificate provided by Shoalhaven City Council is attached in **Appendix B** and includes the following pertinent information relating to contamination:

- *Council has adopted by resolution a policy on contaminated land which may restrict the development of the land subject of this certificate. This policy is implemented when zoning or land use changes are proposed on lands which have previously been used for certain purposes. Council records do not have sufficient information about previous use of this land to determine whether the land is contaminated. Consideration of Council's adopted policy and the application of provisions under relevant State legislation is warranted.*
- *HMAS albatross Military aircraft operating area is one area of concern as advice to Council on 3 November 2006 confirms information previously provided by The Department of Defence (DOD), that the subject land is within HMAS Albatross Military Aircraft Operating Area. Specific heights can be obtained by contacting HMAS Albatross at Nowra. However, this is not indicative of direct contamination within the site.*
- *No residential dwelling erected on the land subject of this certificate has been identified in the Loose-Fill Asbestos Insulation Register as containing loose-fill asbestos ceiling insulation.*

4.8 SCHOOL ASBESTOS REGISTER

The asbestos register found on the School Infrastructure website (link:

<https://www.schoolinfrastructure.nsw.gov.au/content/infrastructure/www/what-we-do/we-look-after-our-schools/schools-asbestos-register.html>) was accessed on the 15th of August 2023. Historical findings of asbestos on site have been summarised in **Table 4-7** below.

Table 4-8 Asbestos Register Summary

Asbestos Type	Area Found	Building No.	Risk Status*
Chrysotile (white asbestos)	Exterior; Eaves Linings, interior; Ceiling structures/linings, Plant / Equipment – Flue, floor coverings Res/Textile, electrical backing board,	B00B, B00C, B00D, B00F, B00H, B00L, B00N, B00Q.	Low
Amosite (brown asbestos)	Exterior; Eaves Linings,	B00B, B00C, B00D, B00L, B00Q.	Low

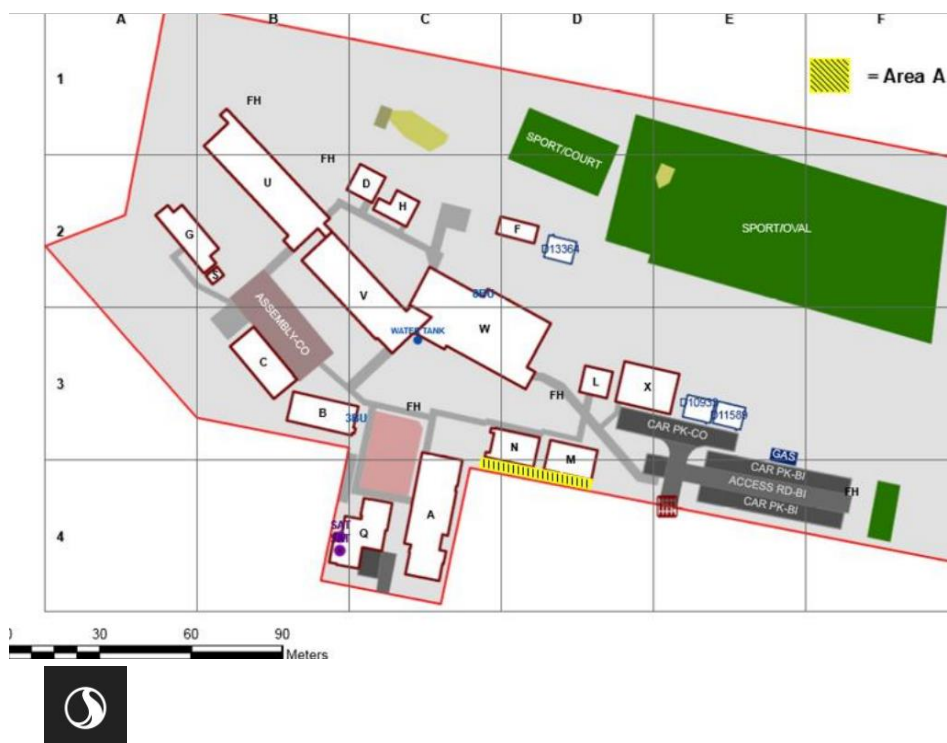

PRELIMINARY SITE INVESTIGATION

Site History Assessment

Asbestos Type	Area Found	Building No.	Risk Status*
	interior; Ceiling structures/linings, Plant / Equipment – Flue, floor coverings Res/Textile, electrical backing board,		
Crocidolite (blue asbestos)	Not reported	n/a	Low
Assumed asbestos	Asbestos fragments / debris and flat asbestos sheeting in underfloor voids of demountable building	D11447	Not assessed
	Compressed asbestos sheeting within ramp, landing and entry steps; flat asbestos sheeting in awnings, underfloor voids and wall cladding; asbestos fragments / debris in underfloor voids	D13364	Not assessed
	Compressed asbestos sheeting within ramp, landing and entry steps; flat asbestos sheeting in awnings, underfloor voids and wall cladding; asbestos fragments / debris in underfloor voids	D14195	Not assessed
	Asbestos fragments / debris within underfloor voids; flat asbestos sheeting within underfloor voids	D16310	Not assessed
	Asbestos fragments / debris within underfloor voids; flat asbestos sheeting within underfloor voids	D19598	Not assessed

In addition to the above, an Asbestos in Grounds Management Plan (AECOM, 2020) was available online and reviewed. **Appendix B** of the document provides the following information:

In February 2005, an area of possible asbestos impacted fill material and exposed fill material was identified to the ground located between Blocks M and N and the residential properties at Milton Public School, Thomas St, Milton, NSW 2538 (see 'Area A').

PRELIMINARY SITE INVESTIGATION

Site History Assessment

In order to manage the risk of exposure to asbestos, any fibrous cement fragments found are to be removed from the ground surfaces. The areas where fibrous cement fragments have been identified within the fill material (and further in-situ asbestos fragments may be present) have been designated as “asbestos zones”.

In the previous ground inspection report, reference 2116240A/019/LT_3127/AP/ks dated 6 February 2005, it was proposed that the following remediation measures be carried out at the grounds located between Blocks M and N and the residential properties:

- *The area should be encapsulated with a layer of geofabric followed by a topsoil and turf.*
- *Appropriate drainage may need to be installed, due to the slope of the area, to divert storm water.*
- *Access to the area may need to be restricted.*

At the time of updating the Management Plan, July 2013, no further occurrence of asbestos in grounds had been reported to PB. From the information provided to PB it appears that the asbestos removal/ clean up works completed in March 2005 comprised only the following:

- *The removal, clean-up and disposal of the visible fragments of fibrous cement on the ground surface. Removal was limited to the accessible surface areas only.*

4.9 CONTROLLED CHEMICALS ASSESSMENT

The NSW EPA uses Chemical Control Orders (CCO) as a primary legislative tool under the Environmentally Hazardous Chemicals Act 1985 to manage chemicals of concern and limit their potential impact on the environment. Stantec provide a preliminary screening of the site history for the likelihood of chemicals of concern within the CCO framework in **Table 4-9** below.

Table 4-9 Preliminary Controlled Chemicals Screening

Chemical of Concern	Likelihood of Occurrence
Were aluminum smelter wastes used or stored on the site (CCO, 1986)?	Low
Do dioxin contaminated wastes (CCO, 1986) have the potential to impact the site?	Low
Were organotin products (CCO 1989) used or stored on site?	Low
Were polychlorinated biphenyls (PCBs) used or PCB waste (CCO 1997) stored on site?	Low

4.10 PER- AND POLY-FLUOROALKYL SUBSTANCES (PFAS)

A PFAS probability of occurrence qualitative desktop survey is provided in **Table 4-10** and has been undertaken on the basis of information provided in the PFAS National Environmental Management Plan (NEMP 2020). PFAS are known to be present in Aqueous Film Forming Firefighting Foams (AFFF) and Alcohol-Type Concentrate (ATC). The historic use of AFFF is reported as being used by Fire & Rescue NSW between 1976 and 2007, while other agencies used AFFF during training exercises as late as 2010 (Source: Fire & Rescue NSW, Information Sheet, Firefighting Foam and PFAS, reference D16/82523).

PRELIMINARY SITE INVESTIGATION

Site History Assessment

Table 4-10 PFAS Desktop Survey

Preliminary Screening Questions	Likelihood of Occurrence ^{1,2,3}
Is the past or present site activity listed in the NEMP 2020 as being an activity with risk of fire. If so, list activity:	Low
Is the past or present off-site activity up-gradient or adjacent to the site listed in the NEMP 2020 as being an activity with risk of fire. If so list activity:	Low
Did fire training involving the use of suppressants occur on-site between 1970 and 2010?	Low
Did fire training occur up-gradient of or adjacent to the site between 1970 and 2010?	Low
Have "fuel" fires ever occurred on site between 1970 and 2010? (i.e. ignition of fuel storage tanks - solvent, petrol diesel, kerosene, other)?	Low
Have PFAS been used in manufacturing or stored on-site?	Low
Could PFAS have been imported to the site in fill materials from a site with activity listed in NEMP 2020 and subject to exposure to PFAS from 1970 to 2010?	Medium. The site appears to have been filled at numerous locations and the origin of the fill is unknown.
Could PFAS-contaminated groundwater or run-off have migrated beneath or on to the site?	Low
Is the site or adjacent sites listed in the NSW EPA PFAS Investigation program 4?	Low
Does the site analytical suite need to be optimised to include preliminary sampling and testing for PFAS in soil and waters (incl. ASLP or TCLP)? Provide rationale.	Low

Notes:

1 - Likelihood: Low – All necessary documentation has been reviewed and there is no recorded instance of potential PFAS use or exposure

2 - Medium - All necessary documentation has been reviewed and there is potential evidence of a recorded instance of potential PFAS use or exposure

3 - High - All necessary documentation has been reviewed and there is evidence of a recorded instance of potential PFAS use or exposure

4 - <https://www.epa.nsw.gov.au/your-environment/contaminated-land/pfas-investigation-program>

4.11 SAFEWORK DANGEROUS GOODS SEARCH

A SafeWork NSW Site Search for Schedule 11 Hazardous Chemicals on premises was conducted and found one (1) above ground storage tank within the premises, as summarized in **Table 4-11**.

Table 4-11 SafeWork NSW Schedule 11 Search

Identifier	Type	Class	Quantity (L)	Capacity (L)	Location
LPG1	Liquefied Petroleum Gas	2.1	5600	7000	Above ground in central portion of the site

Records indicate that the above ground tank has been stored on the premises since 6 April 1978.

4.12 SUITABILITY OF SITE HISTORY RECORDS

The site history information collected during this investigation is considered of a suitable quality for the purposes of a PSI.

5.0 CONCEPTUAL SITE MODEL

Table 5-1 summarises the contamination sources identified within the site based on the desktop assessment and site walkover that have potential to impact portions of the site proposed for upgrade and alteration.

Table 5-1 Contamination Sources Summary

Contamination Source	Description	Contaminants of Concern	On/off Site
Weathering of building materials within current and former buildings and structures Demolition of buildings and structures that may have resulted in latent hazardous building materials	The buildings and structures within the site were constructed from 1930 and have the potential to contain hazardous building materials, including asbestos and lead based paint. Demolition of buildings and structures appears to have occurred at some locations within the site. Structures that have been demolished may have contained hazardous building materials and there is potential for latent materials to remain post-demolition.	Lead, PCBs, Synthetic Mineral Fibres (SMF), Asbestos	On site
Potentially contaminated fill materials imported to the site / coincident with the site boundary	Filling appears to have occurred at locations where a level ground surface has been achieved, with the most filling evident in the central and northern portions of the site. However, localized filling was also noted in the southern portion and toward the eastern boundary. Asbestos impacted soils were identified along the southern boundary, identified as 'Area A' within the <i>Asbestos In Grounds Management Plan</i> (AECOM, 2020). The extent of asbestos impacted fill has not been accurately defined.	Metals, total recoverable hydrocarbons (TRH), benzene, toluene, ethylene and xylene (BTEX), polycyclic aromatic hydrocarbons (PAH), organochlorine / organophosphorus pesticides (OCP/OPP), asbestos	On site and off site
Pest control, application of chemicals around / beneath buildings	Chemical pesticides, herbicides and insecticides are commonly applied to the perimeter and beneath buildings and structures. This activity could have occurred at the site resulting in chemical residues in shallow soils	Pesticides, herbicides, insecticides	On site
Off-site commercial land uses storing, handling or using chemical products	Nearby offsite land uses, such as commercial petrol stations, may be a potential source of contamination with potential to migrate onto the site, such as through migration of contaminated groundwater.	Chlorinated hydrocarbons (CHCs), volatile organic compounds (VOCs), Metals, BTEX, PAH TRH, asbestos, and organochlorine / organophosphorus pesticides (OCP/OPP), asbestos	Off site

5.1 PRELIMINARY CONCEPTUAL SITE MODEL

A Conceptual Site Model (CSM) provides the framework for identifying sources of contamination, contaminant migration pathways, human and ecological receptors and exposure mechanisms. Risk to human health and the environment is identified through complete Source – Pathway – Receptor (SPR) linkages. In order to identify SPR linkages the CSM considers site specific factors, including:

PRELIMINARY SITE INVESTIGATION

Conceptual Site Model

- Source(s) of contamination;
- Identification of Contaminants of Potential Concern (CoPCs) associated with past (and present) source(s);
- Site specific information including soil type(s), depth to groundwater, inferred groundwater flow direction and surface water bodies and interactions;
- Location of any identified sources relative to the proposed site development; and
- Actual or potential receptors considering both current and future land use both for the site, adjacent properties and any sensitive ecological receptors.

Based on a review of the desktop site history information and site walk-over observations, the following preliminary CSM has been developed showing potential SPR linkages considered to be potentially complete or incomplete under our understanding of the current and future land use.

The preliminary CSM for the site is summarised in **Table 5-2** and applies to the current and future land use as a primary school. The CSM provides an assessment of the likelihood of a complete contaminant exposure pathway, which has been considered in the context of the location and nature of the proposed upgrades and alterations as per the concept design drawings provided to Stantec.

PRELIMINARY SITE INVESTIGATION

Conceptual Site Model

Table 5-2 Preliminary CSM

Contaminant Source	Potential Impacted Media	Contaminants of Potential Concern	Potential Exposure Pathways	Receptors	Likelihood of complete exposure pathway
Potentially contaminated fill materials imported to the site / coincident with the site boundary	<ul style="list-style-type: none"> • Surficial Soils 	<ul style="list-style-type: none"> • Metals • TRH • PAH • BTEX • OCP • OPP • PCB • Asbestos 	<ul style="list-style-type: none"> • Direct contact • Incidental ingestion • Incidental inhalation of fibres (asbestos) • Vapour intrusion (volatiles only) 	<p>Human:</p> <ul style="list-style-type: none"> • Current and ongoing site users • Future Site workers (including maintenance workers) • Neighbouring site users <p>Ecological:</p> <ul style="list-style-type: none"> • Existing and future plant-based biota within the site • Offsite receptors including the Milton Rainforest Reserve 	Potentially contaminated fill, <u>low-medium</u> : filling was evident across much the site, with evidence of waste evident at ground surface at some locations, including beneath current buildings and structures. The asbestos register for the site notes that asbestos debris and sheeting are assumed to be present beneath several demountable buildings. Asbestos impacted soil was also previously identified near the southern site boundary, which is relatively close to locations proposed for disturbance under the proposed upgrades. Current data indicates that the fill soil profile is not impacted by contaminants that would constrain the construction or ongoing land use, however, there is potential for unidentified contamination to exist within the fill profile.
Off-site commercial land uses storing, handling or using chemical products					<u>Migration of contamination from off-site, low</u> : upgradient land uses are considered a low likelihood of sourcing contamination that could migrate onto the site that would impact on the proposed upgrades. Current data indicates that contaminants are not migrating onto the site that would constrain the construction or ongoing land use.
Pest control, application of chemicals around / beneath buildings					<u>Pest control, low</u> : chemical products may have been applied directly to the ground surface around and beneath buildings and structures as part of an ongoing maintenance schedule. Current data indicates that contaminants associated with pest control are not present in soils at the site.
Weathering of building materials within current and former buildings and structures	<ul style="list-style-type: none"> • Air • Surficial Soils 	<ul style="list-style-type: none"> • Asbestos • Lead • PCB • Synthetic mineral fibres 	<ul style="list-style-type: none"> • Direct Contact • Incidental Inhalation of fibres (asbestos) 		<u>Weather of building materials and latent building materials post-demolition, low</u> : whilst hazardous building materials were not observed during the inspection, latent demolition rubble and other wastes were observed in surface soils where visible, including beneath and surrounding buildings.

PRELIMINARY SITE INVESTIGATION

Conceptual Site Model

Demolition of buildings and structures that may have resulted in latent hazardous building materials			<ul style="list-style-type: none">• Incidental Ingestion		The asbestos register for the site notes that asbestos debris and sheeting are assumed to be present beneath several demountable buildings. Current data indicates that hazardous building materials are not present.
--	--	--	--	--	---

5.2 DATA GAPS

Based on Stantec's assessment of the site historical information, which included a historical review and inspection, the following data gaps were identified:

- Some areas of site could not be accessed during the site walkover and therefore not inspected as part of the investigation, as outlined in **Section 3.3**. It is noted that inaccessibility of classrooms and buildings occupied by students is unlikely to alter the outcome of this assessment;
- The potential for contamination to exist in groundwater has not been assessed, however, based on current data the likelihood of groundwater contamination originating from an on-site source is low;
- It is unknown if buildings historically demolished contained hazardous materials and whether a clearance certificate (for asbestos) was provided.
- Soil properties were inspected to the extent practicable but was constrained by the presence of surface vegetation, pavement, buildings and structures. Where possible, the inspector visually assessed ground surfaces beneath buildings and structures, however, generally the ability to inspect soil was highly constrained.
- In reference to Stantec (2024) presented in **Section 4.1**, soil properties were assessed at the locations where samples were collected, which did not identify elevated concentrations of contaminants. There is still potential for contaminated material to exist within the site at unassessed areas, particularly at locations that were inaccessible and where filling is present.
- Stantec (2024) contamination site investigation was completed in reference to designs presented in NBRS (2023) *Milton Public School Upgrade Study*, revision_04_19/09/2023. Drawing number MPS-FTA-00-00-DR-A-1101, revision 05, has since been provided to Stantec following completion of the investigation. Review of updated drawings and comparison to the previous design indicates that some areas remain unassessed that are now subject to development activities. Whilst the contamination status of soils within these areas is unassessed, Stantec consider there to be a low likelihood of unacceptable contamination based on the investigation of the nearby surrounding areas. If contaminated materials were to be encountered during construction, an unexpected finds protocol would be an appropriate mechanism to manage such materials.

6.0 CONCLUSIONS

Stantec Australia Pty Ltd (Stantec) was engaged by The NSW Department of Education (the client) to complete a Preliminary Site Investigation (PSI) for specific portions of the Milton Public School, located at 9 Thomas Street, Milton NSW ('the site').

Upgrades and alterations are proposed at specific locations within the site that will require ground disturbance and earthworks. This PSI was prepared to provide preliminary information on the contamination status of the site for the purpose of supporting the planning process for future redevelopment, and the primary objective of this investigation were therefore to assess whether contamination has the potential to exist on the site and whether further investigation is needed.

Stantec undertook the following scope during completion of the PSI:

- A desktop study of information for the site and surrounds.
- A site walkover by an experienced environmental scientist to identify potential sources of contamination. The inspection was primarily focused on the portions of the site that are proposed for upgrade and alteration, however, the broader site was also inspected to a lesser extent;
- Interviews with relevant site operators, where possible;
- Development of a Preliminary Conceptual Site Model based on the information gathered during the desktop study and site inspection; and
- Preparation of a PSI report detailing the findings, conclusions, and recommendations for the site (this report).

Upon completion of the above scope, the following conclusions were drawn:

- Aerial imagery from 1944 indicates that the site appeared to have an agricultural land use, with buildings and structures limited to the southern portion of the site at the frontage with Thomas Street. The 1959 image shows additional buildings and structures, and historical land titles indicate that the site was established as a school from 1948. From 1959 the infrastructure and buildings within the site continues to expand to present day with some demolition and filling activities evident during that time.
- The site was not subject to regulation by the NSW EPA and appeared to be free of statutory notices and licencing agreements under both the CLM Act 1997 and PoEO Act 1997 and was not included on the List of NSW Contaminated Site;
- During the inspection, it was noted that filling appears to have occurred at locations where a level ground surface has been achieved, with the most filling evident in the central and northern portions of the site. However, localized filling was also noted in the southern portion and toward the eastern boundary. The quality and origin of the fill cannot be determined without further assessment, and latent demolition rubble and other wastes were observed on exposed surface soils at some locations.
- Latent demolition rubble / fragments were observed on visible ground surfaces at some locations where filling is suspected to have occurred. The asbestos register for the site notes that asbestos debris and sheeting are assumed to be present beneath several demountable buildings, which is supported by the observations of waste and anthropogenic materials being present beneath buildings during the inspection.
- The *Asbestos In Grounds Management Plan* (AECOM, 2020) indicates that asbestos impacted soils were previously identified along the southern boundary of the site, which was identified as 'Area A'. The

PRELIMINARY SITE INVESTIGATION

Conclusions

extent of asbestos impacted fill has not been accurately defined and are within relatively close proximity to areas proposed for upgrade and alteration.

- Stantec (2024) report, summarised in **Section 4.1**, concluded the following:
 - Soils assessed as part of the contamination investigation did not contain concentrations of chemical contaminants above the adopted human health criteria that would preclude the ongoing land use as a primary school.
 - Exceedances of generic ecological criterion were identified for copper and zinc. However, due to the absence of significant ecological receptors under the current site configuration and the unlikely event of establishment of ecological receptors under the proposed upgrades, the generic ecological investigation level (EIL) exceedances were not considered to prohibit the proposed upgrades.
 - Surficial waste beneath buildings and surrounding buildings were considered unsuitable should site occupants, such as students, interact with the materials.
 - Preliminary and indicative classification of soils encountered at the site, for the purpose of informing future off-site disposal, were preliminarily classified as General Solid Waste (non-putrescible).

6.1 MITIGATION MEASURES AND RECOMMENDATIONS

Based on the findings, and with reference to the purpose and objectives of this investigation, the following mitigation measures are identified in **Table 6-1** and recommendations as outlined below:

- Current observations and data did not warrant further investigation of contamination based on the concept design provided to Stantec. If the design were to alter and encompass areas of the site that were not subjected to intrusive investigation, an additional supplementary investigation may be required.
- All future works should be conducted as per a suitable Construction and Environmental Management Plan (CEMP), which incorporates an Unexpected Finds Protocol (UFP), to minimize potential risks to human health and the environment during construction.
- Any material being removed from site must be classified for off-site disposal in accordance the EPA (2014) Waste Classification Guidelines and/or an applicable NSW EPA Resource Recovery Order. Any future classification must be considerate of the data and information provided in this document and other historical reports relating to contamination.
- Should any soil materials be imported onto the site for the proposed development then they will need to have supporting classification documentation and be validated to meet the adopted validation criteria and meet the definition and requirements of assessment for a NSW EPA Resource Recovery Order, VENM or other suitable material, such as growth medium.

PRELIMINARY SITE INVESTIGATION

Conclusions

Table 6-1 Mitigation Measures

Project Stage Design (D) Construction (C) Operation (O)	Mitigation Measure	Reason for Mitigation Measure	Section of Report
C	Unexpected find protocol. An unexpected finds protocol is to be incorporated into the contractors CEMP so that previously unidentified contamination is managed appropriately.	If not managed appropriately, unexpected contamination can present potential health risks to human and ecological receptors and can also impact the project delivery program and budget.	Section 6.1
C	Managing spoil proposed for offsite disposal and/or reuse. Any material being removed from site must be classified for off-site disposal in accordance the EPA (2014) Waste Classification Guidelines and/or an applicable NSW EPA Resource Recovery Order. Any future classification must be considerate of the data and information provided in this document and other historical reports relating to contamination.	Negative outcomes including: <ul style="list-style-type: none">• Regulatory penalties.• Health risks associated with improperly disposed soils.• Legal liabilities associated with non-compliance of waste disposal.	Section 6.1
C	Validation of imported soils and blended material. Should any soil materials be imported onto the site for the proposed development then they will need to have supporting classification documentation and be validated to meet the adopted validation criteria and meet the definition and requirements of assessment for a NSW EPA Resource Recovery Order, VENM or other suitable material, such as growth medium.	To ensure imported and/or blended material (if required) is suitable for the proposed land-use.	Section 6.1

6.2 EVALUATION OF ENVIRONMENTAL IMPACTS

Based on the findings of this assessment and in consideration to the data gaps presented in **Section 5.2**, the potential risks associated with contamination are considered low and acceptable.

Potential impacts can be appropriately mitigated or managed to ensure that there is minimal impact on the locality, community and/ or the environment.

7.0 LIMITATIONS

This assessment has been undertaken in general accordance with the current “industry standards” for a PSI for the purpose and objectives and scope identified in this report. These standards are set out in:

- National Environment Protection (Assessment of Site Contamination) Measure (NEPM) 1999 (NEPC, 1999) as varied May 2013 (the ‘NEPM 2013’).
- AS4482.1- 2005: Guide to the sampling and investigation of potentially contaminated soil Part 1: Non-volatile and semi-volatile compounds. Standards Australia (2005).

The agreed scope of this assessment has been limited for the current purposes of the Client. The assessment may not identify contamination occurring in all areas of the site, or occurring after sampling was conducted. Subsurface conditions may vary considerably away from the sample locations where information has been obtained.

This Document has been provided by Stantec subject to the following limitations:

- This Document has been prepared for the particular purpose outlined in Stantec’s proposal and no responsibility is accepted for the use of this Document, in whole or in part, in other contexts or for any other purpose.
- The scope and the period of Stantec’s services are as described in Stantec’s proposal, and are subject to restrictions and limitations. Stantec did not perform a complete assessment of all possible conditions or circumstances that may exist at the site referenced in the Document. If a service is not expressly indicated, do not assume it has been provided. If a matter is not addressed, do not assume that any determination has been made by Stantec in regards to it.
- Conditions may exist which were undetectable given the limited nature of the enquiry Stantec was retained to undertake with respect to the site. Variations in conditions may occur between investigatory locations, and there may be special conditions pertaining to the site which have not been revealed by the investigation and which have not therefore been taken into account in the Document. Accordingly, additional studies and actions may be required.
- In addition, it is recognised that the passage of time affects the information and assessment provided in this Document. Stantec’s opinions are based upon information that existed at the time of the production of the Document. It is understood that the services provided allowed Stantec to form no more than an opinion of the actual conditions of the site at the time this Document was prepared and cannot be used to assess the effect of any subsequent changes in the quality of the site, or its surroundings, or any laws or regulations.
- Any assessments made in this Document are based on the conditions indicated from published sources and the investigation described. No warranty is included, either express or implied, that the actual conditions will conform exactly to the assessments contained in this Document.
- Where data supplied by the client or other external sources, including previous site investigation data, have been used, it has been assumed that the information is correct unless otherwise stated. No responsibility is accepted by Stantec for incomplete or inaccurate data supplied by others.
- Stantec may have retained sub consultants affiliated with Stantec to provide services for the benefit of Stantec. To the maximum extent allowed by law, the Client acknowledges and agrees it will not have any direct legal recourse to, and waives any claim, demand, or cause of action against, Stantec’s affiliated companies, and their employees, officers and directors.

PRELIMINARY SITE INVESTIGATION

Limitations

This assessment report is not any of the following:

- A Site Audit Report or Site Audit Statement as defined under the *Contaminated Land Management Act, 1997*.
- A site investigation sufficient for an Site Auditor to be able to conclude a Site Audit Report and Site Audit Statement.
- A geotechnical report and the bore logs or test pit logs may not be sufficient as the basis for geotechnical advice.
- A detailed hydrogeological assessment in conformance with NSW DEC (2007) Contaminated Sites: Guidelines for the Assessment and Management of Groundwater Contamination.
- A hazardous building material survey that will identify any specific building materials on site, which may pose a risk to human health or the environment.
- A waste classification certificate in conformance with NSW EPA Waste Classification Guidelines (NSW EPA, 2014).

List of NSW contaminated sites notified to EPA

Records from the NSW EPA Contaminated Land list within the dataset buffer:

Map Id	Site	Address	Suburb	Activity	Management Class	Status	Location Confidence	Dist	Direction
N/A	No records in buffer								

The values within the EPA site management class in the table above, are given more detailed explanations in the table below:

EPA site management class	Explanation
Contamination being managed via the planning process (EP&A Act)	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the Environmental Planning and Assessment Act 1979 (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment.
Contamination currently regulated under CLM Act	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record of Notices.
Contamination currently regulated under POEO Act	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the Protection of the Environment Operations Act 1997 (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register.
Contamination formerly regulated under the CLM Act	The EPA has determined that the contamination is no longer significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). The contamination was addressed under the CLM Act.
Contamination formerly regulated under the POEO Act	The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the Protection of the Environment Operations Act 1997 (POEO Act).
Contamination was addressed via the planning process (EP&A Act)	The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the Environmental Planning and Assessment Act 1979 (EP&A Act).
Ongoing maintenance required to manage residual contamination (CLM Act)	The EPA has determined that ongoing maintenance, under the Contaminated Land Management Act 1997 (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record of Notices.
Regulation being finalised	The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997. A regulatory approach is being finalised.
Regulation under the CLM Act not required	The EPA has completed an assessment of the contamination and decided that regulation under the Contaminated Land Management Act 1997 is not required.
Under assessment	The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or Protection of the Environment Operations Act 1997. Alternatively, the EPA may require information via a notice issued under s77 of the Contaminated Land Management Act 1997 or issue a Preliminary Investigation Order.

Soils

9 Thomas Street, Milton, NSW 2538

Atlas of Australian Soils

Soil mapping units and Australian Soil Classification orders within the dataset buffer:

Map Unit Code	Soil Order	Map Unit Description	Distance	Direction
Me1	Dermosol	Hilly with some steep slopes and small graded valleys: moderately steep rounded hills of brown and red friable earths (Gn3.21 and Gn3.22 and Gn3.11 and Gn3.12) in association with less rounded hill slopes of hard acidic yellow mottled soils (Dy3.41), hard acidic red soils (Dr2.21), and yellow leached earths (Gn3.54), and also other hill slopes of loamy soils having an A2 horizon (Um4.2) with yellow-brown earths (Gn2.44); stream valleys of various soils including (Dy4.41), (Dy5.41), and (Um6.11).	0m	On-site
Mb5	Kandosol	Dissected sandstone plateau--"terraced" ridges with flat to hilly crests and steep side slopes, scarps, canyons, rock walls, pillars, and slabs of sandstone: chief soils are acid yellow leached earths and acid yellow earths as follows: (i) flat to undulating areas of the original plateau surface--yellow leached earths (Gn2.74) and yellow earths (Gn2.21) and (Gn2.24) all containing large amounts of ironstone gravels and/or boulders; (ii) gently undulating ridge tops of leached sands (Uc2.12) and (Uc2.3) with open (treeless) areas of acid peats (O) and yellow leached earths (Gn2.74) and (Gn2.34), these areas are in part comparable with unit NZ1; (iii) hilly areas of the (Uc) soils and shallow forms of the (Gn2) soils; (iv) areas of (Dy3.41) and (Dy2.41) soils sometimes containing ironstone gravels on some ridge slopes; and (v) steep slopes with pockets of soil materials from the above soils. The unit has many features comparable with those of unit Mb2. Data are limited.	987m	East

Location Confidences

Where Lotsearch has had to georeference features from supplied addresses, a location confidence has been assigned to the data record. This indicates a confidence to the positional accuracy of the feature. Where applicable, a code is given under the field heading “LC” or “LocConf”. These codes lookup to the following location confidences:

LC Code	Location Confidence
Premise Match	Georeferenced to the site location / premise or part of site
Area Match	Georeferenced to an approximate or general area
Road Match	Georeferenced to a road or rail corridor
Road Intersection	Georeferenced to a road intersection
Buffered Point	A point feature buffered to x metres
Adjacent Match	Land adjacent to a georeferenced feature
Network of Features	Georeferenced to a network of features
Suburb Match	Georeferenced to a suburb boundary
As Supplied	Spatial data supplied by provider

USE OF REPORT - APPLICABLE TERMS

The following terms apply to any person (End User) who is given the Report by the person who purchased the Report from Lotsearch Pty Ltd (ABN: 89 600 168 018) (Lotsearch) or who otherwise has access to the Report (Terms). The contract terms that apply between Lotsearch and the purchaser of the Report are specified in the order form pursuant to which the Report was ordered and the terms set out below are of no effect as between Lotsearch and the purchaser of the Report.

1. End User acknowledges and agrees that:
 - (a) the Report is compiled from or using content (**Third Party Content**) which is comprised of:
 - (i) content provided to Lotsearch by third party content suppliers with whom Lotsearch has contractual arrangements or content which is freely available or methodologies licensed to Lotsearch by third parties with whom Lotsearch has contractual arrangements (**Third Party Content Suppliers**); and
 - (ii) content which is derived from content described in paragraph (i);
 - (b) Neither Lotsearch nor Third Party Content Suppliers takes any responsibility for or give any warranty in relation to the accuracy or completeness of any Third Party Content included in the Report including any contaminated land assessment or other assessment included as part of a Report;
 - (c) the Third Party Content Suppliers do not constitute an exhaustive set of all repositories or sources of information available in relation to the property which is the subject of the Report (**Property**) and accordingly neither Lotsearch nor Third Party Content Suppliers gives any warranty in relation to the accuracy or completeness of the Third Party Content incorporated into the report including any contaminated land assessment or other assessment included as part of a Report;
 - (d) Reports are generated at a point in time (as specified by the date/time stamp appearing on the Report) and accordingly the Report is based on the information available at that point in time and Lotsearch is not obliged to undertake any additional reporting to take into consideration any information that may become available between the point in time specified by the date/time stamp and the date on which the Report was provided by Lotsearch to the purchaser of the Report;
 - (e) Reports must be used or reproduced in their entirety and End User must not reproduce or make available to other persons only parts of the Report;
 - (f) Lotsearch has not undertaken any physical inspection of the property;
 - (g) neither Lotsearch nor Third Party Content Suppliers warrants that all land uses or features whether past or current are identified in the Report;
 - (h) the Report does not include any information relating to the actual state or condition of the Property;
 - (i) the Report should not be used or taken to indicate or exclude actual fitness or unfitness of Land or Property for any particular purpose
 - (j) the Report should not be relied upon for determining saleability or value or making any other decisions in relation to the Property and in particular should not be taken to be a rating or assessment of the desirability or market value of the property or its features; and
 - (k) the End User should undertake its own inspections of the Land or Property to satisfy itself that there are no defects or failures
2. The End User may not make the Report or any copies or extracts of the report or any part of it available to any other person. If End User wishes to provide the Report to any other person or make extracts or copies of the Report, it must contact the purchaser of the Report before doing so to ensure the proposed use is consistent with the contract terms between Lotsearch and the purchaser.
3. Neither Lotsearch (nor any of its officers, employees or agents) nor any of its Third Party Content Suppliers will have any liability to End User or any person to whom End User provides the Report and End User must not represent that Lotsearch or any of its Third Party Content Suppliers accepts liability to any such person or make any other representation to any such person on behalf of Lotsearch or any Third Party Content Supplier.
4. The End User hereby to the maximum extent permitted by law:
 - (a) acknowledges that the Lotsearch (nor any of its officers, employees or agents), nor any of its Third Party Content Supplier have any liability to it under or in connection with the

- Report or these Terms;
- (b) waives any right it may have to claim against Third Party Content Supplier in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms; and
 - (c) releases each Third Party Content Supplier from any claim it may have otherwise had in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms.
5. The End User acknowledges that any Third Party Supplier shall be entitled to plead the benefits conferred on it under clause 4, despite not being a party to these terms.
 6. End User must not remove any copyright notices, trade marks, digital rights management information, other embedded information, disclaimers or limitations from the Report or authorise any person to do so.
 7. End User acknowledges and agrees that Lotsearch and Third Party Content Suppliers retain ownership of all copyright, patent, design right (registered or unregistered), trade marks (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right in any Report or any other item, information or data included in or provided as part of a Report.
 8. To the extent permitted by law and subject to paragraph 9, all implied terms, representations and warranties whether statutory or otherwise relating to the subject matter of these Terms other than as expressly set out in these Terms are excluded.
 9. Subject to paragraph 6, Lotsearch excludes liability to End User for loss or damage of any kind, however caused, due to Lotsearch's negligence, breach of contract, breach of any law, in equity, under indemnities or otherwise, arising out of all acts, omissions and events whenever occurring.
 10. Lotsearch acknowledges that if, under applicable State, Territory or Commonwealth law, End User is a consumer certain rights may be conferred on End User which cannot be excluded, restricted or modified. If so, and if that law applies to Lotsearch, then, Lotsearch's liability is limited to the greater of an amount equal to the cost of resupplying the Report and the maximum extent permitted under applicable laws.
 11. Subject to paragraph 9, neither Lotsearch nor the End User is liable to the other for:
 - (a) any indirect, incidental, consequential, special or exemplary damages arising out of or in relation to the Report or these Terms; or
 - (b) any loss of profit, loss of revenue, loss of interest, loss of data, loss of goodwill or loss of business opportunities, business interruption arising directly or indirectly out of or in relation to the Report or these Terms,
 irrespective of how that liability arises including in contract or tort, liability under indemnity or for any other common law, equitable or statutory cause of action or otherwise.
 12. These Terms are subject to New South Wales law.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Applicant: Franco Palazzolo
25/100 Mount Street
North Sydney NSW 2060

Receipt No.: Ext: 165935
Date: 11/08/2023

Applicant reference: LS046788

The land to which this Certificate relates is:
Lot 1 DP 861814, 9 Thomas St, MILTON
Parish of ULLADULLA, County of ST. VINCENT

The above information is as recorded by Council.

DISCLAIMER AND CAUTION:

1. The information on zones, controls etc given below relates to the land for which the certificate was sought. If enquirers wish to know what zones, other controls, etc apply or are proposed on nearby land then they should make enquiries in person at Council's offices.
2. The information contained in this certificate is accurate as at the date of this certificate.
3. In providing this certificate Council has in good faith relied upon information provided to it or sourced from third parties. Where Council has obtained the information from third parties, either exclusively or in conjunction with information held by Council, the Certificate details the source of that third party information. Council cautions persons against relying upon information in the Certificate sourced from third parties as to its accuracy, applicability to specific lands and its currency without verification from the specified third party and, where appropriate, professional advice and the adoption of prudent land acquisition measures and appropriate professional advice. To the full extent permitted by law Council disclaims liability with respect to any information in this Certificate sourced from third parties.

The information contained in this certificate is prepared in accordance with the Environmental Planning and Assessment Act 1979 (as amended) and the Environmental Planning Assessment Regulation 2021 (as amended).

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

Certificate No: 2023/03052

This is a Planning Certificate issued by Shoalhaven City Council under Section 10.7(2) of the *Environmental Planning and Assessment Act 1979* on the application of the person described above in respect of the land described above.

1 Names of relevant planning instruments and development control plans

- (1) The name of each environmental planning instrument and development control plan that applies to the carrying out of development on the land:

State Environmental Planning Policies

State Environmental Planning Policy (Resilience and Hazards) 2021
State Environmental Planning Policy (Biodiversity and Conservation) 2021
State Environmental Planning Policy (Industry and Employment) 2021
State Environmental Planning Policy (Precincts - Regional) 2021
State Environmental Planning Policy (Transport and Infrastructure) 2021
State Environmental Planning Policy (Resources and Energy) 2021
State Environmental Planning Policy (Exempt and Complying Development Codes) 2008
State Environmental Planning Policy (Planning Systems) 2021
State Environmental Planning Policy (Primary Production) 2021
State Environmental Planning Policy (Housing) 2021
State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004
State Environmental Planning Policy No 65 - Design Quality of Residential Apartment Development

Local Environmental Plans

Shoalhaven Local Environmental Plan 2014 (as amended)

Development Control Plans

Shoalhaven Development Control Plan 2014 (as amended)

Note: a copy of Shoalhaven Development Control Plan 2014 is available on the internet at www.dcp2014.shoalhaven.nsw.gov.au or can be inspected at Council's Nowra office during normal business hours.

- (2) The name of each proposed environmental planning instrument and draft development control plan, which is or has been subject to community consultation or public exhibition under the Act, that will apply to the carrying out of development on the land.

Proposed State Environmental Planning Policies and other Environmental Planning Instruments

Explanation of Intended Effect - Proposed amendments to the in-fill affordable housing, group homes, supportive accommodation and social housing provisions of the State Environmental Planning Policy (Housing) 2021 - exhibition 22/11/2022 to 13/01/2023.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Explanation of Intended Effect - Special Flood Considerations Clause - exhibition 17/01/2023 to 14/02/2023.

Explanation of Intended Effect - Amendment to Infrastructure SEPP - Changes to protect fuel pipelines - exhibition 13/04/2022 to 18/05/2022.

Explanation of Intended Effect - Review of clause 4.6 of the Standard Instrument LEP - exhibition 31/03/2021 to 12/05/2021.

Planning Proposals for Local Environmental Plans

PLANNING PROPOSAL - PP048 TO AMEND SHOALHAVEN LOCAL ENVIRONMENTAL PLAN 2014 - MOSS VALE ROAD NORTH URBAN RELEASE AREA (URA) - PUBLIC EXHIBITION 18 MAY 2022 TO 1 JULY 2022 (55387E) (MIN21.447)

The Planning Proposal (PP) seeks to amend the Shoalhaven Local Environmental Plan 2014 (LEP) to meet the changing housing needs of the wider Nowra-Bomaderry community and facilitate development of the Moss Vale Road North URA. The proposed changes include (not exclusively) modifications to existing zones, heights and minimum lot sizes, as well as the application of Clause 4.1H of the LEP in identified locations close to the retail centre, open space, and main roads to permit subdivision into 300-499m² lots.

PLANNING PROPOSAL - PP058 TO AMEND SHOALHAVEN LOCAL ENVIRONMENTAL PLAN 2014 - 2022 HOUSEKEEPING - PUBLIC EXHIBITION 8 MARCH 2023 TO 7 APRIL 2023 (64164E) (MIN22.602)

The Planning Proposal (PP) seeks to amend a number of clauses and maps in Shoalhaven LEP 2014 in order to correct identified anomalies or inconsistencies within the LEP and improve the Plan's operation. These anomalies or inconsistencies have arisen since the Plan's commencement in 2014 and have been identified through staff feedback, development assessment processes, the registration of new land titles, landowner requests and as resolved by Council.

PLANNING PROPOSAL - PP068 TO AMEND SHOALHAVEN LOCAL ENVIRONMENTAL PLAN 2014 - HERITAGE LISTING - FORMER HUSKISSON ANGLICAN CHURCH AND SITE (comprising the land identified as Lots 7-9 Section 3 DP 758530) - PUBLIC EXHIBITION 26 JULY 2023 TO 25 AUGUST 2023 (72148E) (MIN22.618)

The Planning Proposal seeks to amend the Shoalhaven Local Environmental Plan (LEP) 2014 to include the Former Huskisson Anglican Church and Site (comprising the land identified as Lots 7-9 Section 3 DP 758530) as an item of local heritage significance. This is proposed to be achieved by including Lots 7-9 Section 3 DP 758530 (17 Hawke Street and 22-26 Currumbene Street, Huskisson) in Schedule 5 Environmental heritage of the LEP and updating the corresponding LEP Map Sheet (HER_020C) to apply the heritage layer over the subject lots.

Note: In this section - **proposed environmental planning instrument** means a draft environmental planning instrument and includes a planning proposal for a local environmental plan.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Draft Development Control Plans

SHOALHAVEN DEVELOPMENT CONTROL PLAN 2014 - DRAFT AMENDMENT NO 52 - 45 DEGREE RULE EXEMPTION AMENDMENT - PUBLIC EXHIBITION 6 FEBRUARY 2023 to 31 MARCH 2023 (49987E) (MIN22.790)

The draft Amendment proposes a refinement of the existing 45 Degree Rule exemption in Chapter G4: Tree & Vegetation Management of Shoalhaven Development Control Plan (DCP) 2014 for a 12 month trial period, to address a range of concerns raised overtime by the community and industry. The draft Amendment also includes minor administrative changes to reflect adjustments that have been made to legislation and policy since the last amendment to Chapter G4. Chapter G4 applies to all land within the Shoalhaven Local Government Area, except for land zoned rural (RU1-RU4).

2 Zoning and land use under relevant planning instruments

For Shoalhaven Local Environmental Plan 2014 (as amended)

a. The identity of the zone in which the land is included under Shoalhaven Local Environmental Plan 2014:

Zone SP2 Infrastructure

b. The purposes for which development in the zone

i. may be carried out without development consent:

Nil

ii. may not be carried out except with development consent:

Aquaculture; Roads; The purpose shown on the Land Zoning Map, including any development that is ordinarily incidental or ancillary to development for that purpose.

iii. is prohibited:

Any development not specified in item i or ii.

c. Additional permitted uses **DO NOT apply to the land**

d. Development standards applying to the land under Shoalhaven Local Environmental Plan 2014 **DO NOT fix minimum land dimensions for the erection of a dwelling-house on the land.**

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

- e. The land **IS NOT** in an area of outstanding biodiversity value under the *Biodiversity Conservation Act 2016*.
- f. The land **IS NOT** in a conservation area (however described) under Shoalhaven Local Environmental Plan 2014.

Note: this item relates to "heritage conservation areas" as defined in the LEP.

- g. An item of environmental heritage (however described) under Shoalhaven Local Environmental Plan 2014 **IS** located on the land.

HERITAGE

Heritage Item - General

Note: "environmental heritage" relates to matters/items of cultural heritage, for example, items listed on the State Register, items specifically listed in the LEP or matters subject to an "interim heritage order" under the *Heritage Act 1977*.

Other provisions under Shoalhaven Local Environmental Plan 2014 may also apply to the development of this land. You can view the Shoalhaven Local Environmental Plan 2014 at the website www.legislation.nsw.gov.au or at Council's offices.

3 Contributions plans

- 1) The name of each contributions plan under the Act, Division 7.1 applying to the land, including draft contributions plans:

Shoalhaven Contributions Plan 2019 (as amended)

- 2) The land **IS NOT** in a special contributions area under the Act, Division 7.1

4 Complying development

Qualifying Statement on Council Data Affecting this Item

Shoalhaven City Council does not have sufficient information to ascertain the extent to which complying development may or may not be carried out on the land, however specific land restrictions may not apply to all of the land. The information included in this Planning Certificate is provided in accordance with the Environmental Planning & Assessment Regulation 2021 (as amended). It is strongly suggested that you review the State Environmental Planning Policy (Exempt and Complying Developments Codes) 2008 and supporting information before proceeding with the lodgement of a Complying Development Certificate application to either Council or a private certifier. The NSW Department of Planning, Industry and Environment has provided a series of information sheets on its website <http://www.planning.nsw.gov.au/exemptandcomplying>

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Note: There are other provisions in State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 that must be complied with in order for development on the land to be complying development. Refer to State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 to identify if a Code applies to your land.

Whether the extent to which the land is land on which complying development may be carried out under the following codes for complying development of State Environmental Planning Policy (Exempt Complying Development Codes) 2008 is restricted by the following provisions of clauses 1.17A (1)(c) to (e), (2), (3) and (4), 1.18(1) (c3) and 1.19 of State Environmental Planning Policy (Exempt and Complying Development Codes) 2008:

Housing Code, Rural Housing Code, Agritourism and Farm Stay Accommodation Code and Greenfield Housing Code: **IS RESTRICTED**

Under the Housing Code , Rural Housing Code, Agritourism and Farm Stay Accommodation Code and Greenfield Housing Code the land is affected by specific land exemptions -

Clause 1.17A(1)(d)(iii) because the land is identified as an item of environmental heritage or a heritage item by an environmental planning instrument or on which is located an item that is so identified.

Note: If an item listed in the environmental planning instrument is not located on, or does not comprise, the whole of the relevant land, only the part of the land that is described and mapped in that environmental planning instrument is affected.

Housing Alterations Code and General Development Code: **IS RESTRICTED**

Under the Housing Alterations Code and the General Development Code the land is affected by specific land exemptions -

Clause 1.17A(1)(d)(iii) because the land is identified as an item of environmental heritage or a heritage item by an environmental planning instrument or on which is located an item that is so identified.

Note: If an item listed in the environmental planning instrument is not located on, or does not comprise, the whole of the relevant land, only the part of the land that is described and mapped in that environmental planning instrument is affected.

Industrial and Business Buildings Code: **IS RESTRICTED**

Under the Industrial and Business Buildings Code the land is affected by specific land exemptions -

Clause 1.17A(1)(d)(iii) because the land is identified as an item of environmental heritage or a heritage item by an environmental planning instrument or on which is located an item that is so identified.

Note: If an item listed in the environmental planning instrument is not located on, or does not comprise, the whole of the relevant land, only the part of the land that is described and mapped in that environmental planning instrument is affected.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Low Rise Housing Diversity Code: **IS RESTRICTED**

Under the Low Rise Housing Diversity Code the land is affected by specific land exemptions -

"Clause 1.17A(1)(d)(iii) because the land is identified as an item of environmental heritage or a heritage item by an environmental planning instrument or on which is located an item that is so identified.

Note: If an item listed in the environmental planning instrument is not located on, or does not comprise, the whole of the relevant land, only the part of the land that is described and mapped in that environmental planning instrument is affected. "

Clause 1.19(3A) because the land comprises, or on which there is, a heritage item or draft heritage item

The complying development codes **ARE NOT** varied, under that Policy, clause 1.12, in relation to the land.

5 Exempt Development

Qualifying Statement on Council Data Affecting this Item

Shoalhaven City Council does not have sufficient information to ascertain the extent to which exempt development may or may not be carried out on the land, however specific land restrictions may not apply to all of the land. The information included in this Planning Certificate is provided in accordance with the Environmental Planning & Assessment Regulation 2021 (as amended). It is strongly suggested that you review the State Environmental Planning Policy (Exempt and Complying Developments Codes) 2008 and supporting information before proceeding with exempt development. The NSW Department of Planning and Environment has provided a series of information sheets on its website <http://www.planning.nsw.gov.au/exemptandcomplying>

Note: There are other provisions in State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 that must be complied with in order for development on the land to be exempt development. Refer to State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 to identify if a Code applies to your land.

Whether the extent to which the land is land on which exempt development may be carried out under each of the exempt development codes under State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 is restricted by the following provisions of that Policy, clause 1.16(1)(b1)–(d) or 1.16A of State Environmental Planning Policy (Exempt and Complying Development Codes) 2008:

General Exempt Development Code, Advertising and Signage Exempt Development Code and Temporary Uses and Structures Exempt Development Code: **IS NOT RESTRICTED**

The exempt development codes **ARE NOT** varied, under that Policy, clause 1.12, in relation to the land.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

6 Affected building notices and building product rectification orders

- a) Council **IS NOT** aware that an affected building notice is in force in relation to the land.
- b) Council **IS NOT** aware that a building product rectification order is in force in relation to the land that has not been fully complied with.
- c) Council **IS NOT** aware that a notice of intention to make a building product rectification order given in relation to the land is outstanding.

Note: In this section, **affected building notice** has the same meaning as in the *Building Products (Safety) Act 2017*, Part 4. **building product rectification order** has the same meaning as in the *Building Products (Safety) Act 2017*.

7 Land reserved for acquisition

The land **IS NOT** reserved for acquisition by an authority of the State, as referred to in section 3.15 of the Act under any environmental planning instrument, or proposed environmental planning instrument referred to in Section 1.

8 Road widening and road realignment

- a) The land **IS NOT** affected by any road widening or road realignment under the *Roads Act 1993*, Part 3, Division 2.

- b) The land **IS NOT** affected by road widening or road realignment under an environmental planning instrument.

- c) The land **IS NOT** affected by any road widening or road realignment under a resolution of Council.

Note: Information in item 8 relates only to proposed plans by the Council for the widening of a public road that would affect the land and have been submitted to the Minister by the Council and any road widening orders affecting the land that the Council has caused to be published in the NSW Government Gazette under section 25 of the *Roads Act 1993*. Other authorities e.g. Transport for NSW, may have proposals not set out herein.

9 Flood related development controls

(1) Council's adopted flood information **DOES NOT** identify the land or part of the land as being within the flood planning area and subject to flood related development controls. Note that not all areas within the Shoalhaven LGA are covered by an adopted flood investigation.

(2) Council's adopted flood information **DOES NOT** identify the land or part of the land as being between the flood planning area and the probable maximum flood and subject to flood related development controls. Note that not all areas within the Shoalhaven LGA are covered by an adopted flood investigation.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Flood Planning Area has the same meaning as in the Floodplain Development Manual.
Floodplain Development Manual Means the Floodplain Development Manual (ISBN 0 7347 5476 0) published by the NSW Government in April 2005.
Probable Maximum Flood has the same meaning as in the Floodplain Development Manual.

Note: In relation to sub clause (1) and (2) above, if the land or part of the land is within 40 metres of a creek; or is within 10 metres of a major drainage system, local overland flow path or drainage easement; or has a history of flooding then a flood assessment report may need to be submitted with any development application under the requirements of the Shoalhaven Development Control Plan 2014. The flood assessment report is to identify whether or not the land or part of the land is flood prone and determine, if flood prone, the probable maximum flood extent and the flood planning level.

For further information or to request a flood certificate, please contact Council's Coast and Floodplains Unit.

10 Council and other public authority policies on hazard risk restrictions

The land **IS** affected by the following adopted policy or policies that restrict the development of the land because of the likelihood of land slip, bushfire, tidal inundation, subsidence, acid sulfate soils, contamination, aircraft noise, salinity, coastal hazards, sea level rise or any other risk (other than flooding).

Shoalhaven Development Control Plan 2014

Shoalhaven City Council - Contaminated Land Policy

Shoalhaven Coastal Zone Management Plan 2018

Planning for Bush Fire Protection 2019

Note: The policies above apply across the City. If certain specific hazards are known to apply to the land, those hazards may be noted below .

Note: In this section **adopted policy** means a policy adopted

(a) by the council, or

(b) by another public authority, if the public authority has notified the council that the policy will be included in a planning certificate issued by the council.

11 Bush fire prone land

The land **IS** bushfire prone land, either in whole or in part (as designated by the Commissioner of the NSW Rural Fire Service under the Act, section 10.3).

12 Loose-fill asbestos insulation

The land **DOES NOT** include any residential premises (within the meaning of the *Home Building Act 1989*, Part 8, Division 1A) that are listed on the Register kept under that Division.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

13 Mine subsidence

The land **IS NOT** declared to be a mine subsidence district within the meaning of the *Coal Mine Subsidence Compensation Act 2017*.

14 Paper subdivision information

1) The land **IS NOT** affected by a development plan adopted by a relevant authority that applies to the land or is proposed to be subject to a ballot.

2) The land **IS NOT** affected by a subdivision order.

Note: Words and expressions used in this section have the same meaning as in the Regulation, Part 10 and the Act, Schedule 7.

15 Property vegetation plans

The Council **HAS NOT** been notified that the land is land to which a property vegetation plan is approved and in force under the *Native Vegetation Act 2003*, Part 4.

16 Biobanking stewardship sites

The Council **HAS NOT** been notified by the Biodiversity Conservation Trust that the land is a biodiversity stewardship site under a biodiversity stewardship agreement under the *Biodiversity Conservation Act 2016*, Part 5.

Note: Biodiversity stewardship agreements include biobanking agreements under the *Threatened Species Conservation Act 1995*, Part 7A that are taken to be biodiversity stewardship agreements under the *Biodiversity Conservation Act 2016*, Part 5.

17 Biodiversity certified land

The land **IS NOT** biodiversity certified land under the *Biodiversity Conservation Act 2016*, Part 8.

Note: Biodiversity certified land includes land certified under the *Threatened Species Conservation Act 1995*, Part 7AA that is taken to be certified under the *Biodiversity Conservation Act*, Part 8.

18 Orders under Trees (Disputes Between Neighbours) Act 2006

The Council **HAS NOT** been notified that an order has been made under the *Trees (Disputes Between Neighbours) Act 2006* to carry out work in relation to a tree on the land.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

19 **Annual charges under Local Government Act 1993 for coastal protection services that relate to existing coastal protection works**

The owner (or any previous owner) of the land **HAS NOT** given written consent to the land being subject to annual charges under the *Local Government Act 1993*, section 496B, for coastal protection services that relate to existing coastal protection works.

Note: In this section - **existing coastal protection works** has the same meaning as in the *Local Government Act 1993*, section 553B.

Note: Existing coastal protection works are works to reduce the impact of coastal hazards on land such as seawalls, revetments, groynes and beach nourishment, that existed before 1 January 2011.

20 **Western Sydney Aerotropolis**

State Environmental Planning Policy (Precincts – Western Parkland City) 2021 **DOES NOT** apply to this land.

21 **Development consent conditions for seniors housing**

The Council **IS NOT** aware of any terms of a kind referred to in clause 88(2) of State Environmental Planning Policy (Housing) 2021 that have been imposed as a condition of development consent granted after 11 October 2007 in relation to the land.

22 **Site compatibility certificates and development consent conditions for affordable rental housing**

(1) The Council **IS NOT** aware of a current site compatibility certificate under State Environmental Planning Policy (Housing) 2021, or a former site compatibility certificate, in relation to proposed development on the land.

(2) The Council **IS NOT** aware of any conditions of development consent in relation to the land that are of a kind referred to in State Environmental Planning Policy (Housing) 2021, section 21(1) or 40(1).

(3) The Council **IS NOT** aware of any conditions of a development consent in relation to the land that are of a kind referred to in State Environmental Planning Policy (Affordable Rental Housing) 2009, clause 17(1) or 38(1).

Note: in this section -

former site compatibility certificate means a site compatibility certificate issued under State Environmental Planning Policy (Affordable Rental Housing) 2009.

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979
Certificate No: 2023/03052

Note: Contaminated Land Management Act 1997: The following matters are prescribed by Section 59(2) of the *Contaminated Land Management Act 1997* as additional matters to be specified in a planning certificate:

- a) The Council **HAS NOT** been informed by the Environment Protection Authority that the land is significantly contaminated land within the meaning of the *Contaminated Land Management Act 1997*.
- b) The Council **HAS NOT** been informed by the Environment Protection Authority that the land is subject to a management order within the meaning of the *Contaminated Land Management Act 1997*.
- c) The Council **HAS NOT** been informed by the Environment Protection Authority that the land is subject of an approved voluntary management proposal within the meaning of the *Contaminated Land Management Act 1997*.
- d) The Council **HAS NOT** been informed by the Environment Protection Authority that the land is subject of an ongoing maintenance order within the meaning of the *Contaminated Land Management Act 1997*.
- e) The land **IS NOT** the subject of a site audit statement within the meaning of the *Contaminated Land Management Act 1997* that has been provided to the Council.

Information under Section 10.7(5)

As at the date of this certificate, the abovementioned land is also affected as follows:

(NOTE: SECTION 10.7(6) STATES THAT A COUNCIL SHALL NOT INCUR ANY LIABILITY IN RESPECT OF ANY ADVICE PROVIDED IN GOOD FAITH PURSUANT TO SECTION 10.7(5))

Matters Affecting This Land

HMAS ALBATROSS MILITARY AIRCRAFT OPERATING AREA

Advice to Council on 3 November 2006 confirms information previously provided by The Department of Defence, that the subject land is within HMAS Albatross Military Aircraft Operating Area. Specific heights can be obtained by contacting HMAS Albatross at Nowra.

MILTON ULLADULLA STRUCTURE PLAN REVIEW

This property is located within the area covered by the Milton-Ulladulla Structure Plan (MUSP), which was prepared by Council in 1996. The MUSP provides strategic direction and guidance for growth, development opportunities and conservation measures in the Milton-Ulladulla area over a period of approximately 25 years. In September 2020, Council resolved (MIN20.580) to undertake an urgent review of the MUSP to inform Council's response in managing future population growth and the delivery of infrastructure over the next 25-30 years. For further information on this review, including project timelines, please view the [Get Involved project webpage](#).

PLANNING CERTIFICATE UNDER SECTION 10.7
ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

Certificate No: 2023/03052

Matters Affecting The Whole Of The City

ACID SULFATE SOILS - Large areas of the coastal zone of NSW have the potential to be affected by acid sulfate soils which become problematic if exposed during excavations or similar activities. The Dept of Land & Water Conservation have maps which indicate the potential occurrence of acid sulfate soils. Prior to undertaking work which involves substantial soil disturbance, you should ascertain the possibility of acid sulfate soils existing on your property. Enquiries to NSW Department of Planning and Environment.

INTERIM POLICY - DEVELOPMENT ADJOINING NARROW LANEWAYS

Council resolved on 6 November 2018 to adopt an interim policy position regarding development adjoining narrow laneways. The Interim Policy provides direction regarding access, servicing, design and use of narrow laneways as a primary frontage. Contact Council's - Strategic Planning for further information. (MIN18.891) (57914E)

POLICY - PROVISION OF WATER AND SEWERAGE INFRASTRUCTURE - DEVELOPMENT NOT INCLUDED IN DEVELOPMENT SERVICING PLANS

This Policy shall apply to all lands which have not been included in water supply and/or sewerage services development servicing plans.

POLICY - COMPANION ANIMALS (IMPACTS ON NATIVE FAUNA) - CONDITIONS OF DEVELOPMENT CONSENT

Council resolved on 21 February 2017, in order to protect populations of native fauna, including threatened species, from impacts associated with the keeping of domestic cats and dogs within certain development, that appropriate restrictions on title or conditions of consent for the management of companion animals may be applied in sensitive environmental locations (23139E) (MIN17.95)

INFORMATION REGARDING LOOSE-FILLED ASBESTOS INSULATION

Some residential homes located in NSW have been identified as containing loose-fill asbestos insulation, for example in the roof space. NSW Fair Trading maintains a Register of homes that are affected by loose-fill asbestos insulation.

You should make your own enquiries as to the age of the buildings on the land to which this certificate relates and, if it contains a building constructed prior to 1980, Council recommends that any potential purchaser obtain advice from a licensed asbestos assessor to determine whether loose-fill asbestos is present in any building on the land and, if so, the health risks (if any) this may pose for the building's occupants.

Contact NSW Fair Trading for further information.

INFORMATION REGARDING FOSSICKING DISTRICT 68.

Pursuant to section 369A of the Mining Act 1992, the NSW Department of Planning and Environment have declared all land within the Shoalhaven City Council Local Government Area to be a Fossicking District (Fossicking District 68). Contact the NSW Department of Planning and Environment for further information.

Notification of dangerous goods on premises form

This form is to be used by the occupier of a site where dangerous goods are stored and handled in quantities that, in total, exceed or are likely to exceed quantities specified in the column headed 'Manifest quantity' in schedule 5 of the OHS Regulation.

If you are taking over an existing dangerous goods site during a current notification period, do not use this form. Instead, please use the *Amendment to notification of dangerous goods on premises* (DG – 03) form (catalogue no. WC00902).

If you are notifying of the abandonment of a tank at a workplace that is underground, partially underground or fully mounded and the tank was used to store flammable gasses or flammable liquids use the *Notification of abandonment of tank* (NFTAT) form (catalogue no. WC03413).

For more information, please refer to the *Notification of dangerous goods on premises guide* (catalogue no. WC01385).

Fee

A \$100 fee is payable when submitting this form.

How to fill in this form

Please use **black** ink only and print within the boxes in BLOCK LETTERS.

Where options are provided, please mark box(es) with an ☒ to indicate selection(s).

Only persons over the age of 18 years can notify on behalf of the occupier of premises where dangerous goods are stored.

'Business name' means trading name and refers to registrations made to the Office of Fair Trading.

Enquiries – 13 10 50

Privacy compliance statement

This information is collected by WorkCover NSW for the purposes of undertaking the evaluation, assessment and processing of a notification of dangerous goods on premises as required by the OHS Act.

WorkCover may also use this information for the purposes of confirming applicant details and it may also be used to establish and maintain a database and to assist the WorkCover inspectorate with their work generally. This information may also be made available to other state or territory or the commonwealth regulatory agencies including Trade and Investment NSW.

Except for the purpose of prosecution and unless such disclosure is otherwise required or permitted by law, the information will not be otherwise accessed by any third parties in a way that would identify the individual, without the consent of that individual. Applicants are able to gain access to personal information pertaining to their application that is held by WorkCover. You may also apply to WorkCover to access and correct any of your own personal information WorkCover holds if that information is inaccurate, incomplete, not relevant or out of date. Applications should be made in writing to the Privacy Contact Officer, WorkCover NSW, Gosford Office, Locked Bag 2906, Lisarow, NSW 2252.
