WATER HOUSE CONNECTION	— WH — WH —
LOW PRESSURE GAS	— — —
GAS HOUSE CONNECTION	— GH — GH —
SEWER MAIN	— S — S —
STORMWATER PIPE	— — —
OVERHEAD ELECTRICITY	— OH — OH — OH —

UTILITY MAPPING NOTES:

1. Subsurface utility investigation was undertaken by Atmos Phd Ltd. The plan is to be completed in accordance with the subsurface utility engineering code of practice.

2. Positions are based on Astrea C&A 6 point surface indicator(s) located during field survey. Confirmation of the exact position should be made to the landowner or the relevant utility company.

3. This plan shows a representation of the dig/mound; this model should be viewed in a 3d environment to interpret this information.

4. This plan is valid for the duration of the project and the issue, as underground utility locations are often updated.

5. This plan does not necessarily encompass all conduits and are not necessarily covered with markers or other indicators of their presence.

6. All services have been electronically traced in the field and are shown here for information only. Depths shown are approximate only and should be verified prior to works.

7. This plan includes information describing the location of subsurface features, which may be used to plan and execute any excavation or other works, in compliance from a combination of field techniques and available data from cooperating utility authorities. Whilst all care has been taken in the preparation of this plan, we cannot accept any liability for the accuracy of any of the data.

SUB/SURFACE UTILITY INFORMATION (UPL) AS46848 (LOCATION CLASS)

Labelling utility information by a classification code allows the user of this information to understand clearly how the information was collected and then place an appropriate level of confidence in the information.

CLASS 4: Information is the highest possible level of accuracy and is obtained by getting the underground utility using a non-destructive excavation (pot hole) technique. The vertical information for this locating method is the top or shallowest part of the pipe. This is the most accurate method for locating underground utilities.

CLASS 5: Information is collected by designing the horizontal and vertical location underground utilities by using electromagnetic pipe and cable locators, sondes or free-trace, ground penetrating radar and acoustic pipe survey equipment. This is the most common form of utility locating and although Class 5 and Class 6 can be established as a service only and should not be used for design. GPS scans are also represented as Class 5.

CLASS 6: Information is collected by considering the survey of visible utility features (surface features) and the use of historical data and acquired Data-Before-You-Dig plan to "draw" a string which shows the approximate position of the utility. This method does not use electronic tracing and although Class 5 and Class 6 can be established as a service only and should not be used for design. GPS scans are also represented as Class 6.

CLASS 7: Information is the most basic level of utility locations using only information obtained by existing Data-Before-You-Dig plans and by measuring boundary offsets. The resulting information is not accurate enough to be used for design. GPS scans are also represented as Class 7.

CLASS 8: Information is the lowest possible level of utility location information. This is a service only and should not be used for design. GPS scans are also represented as Class 8. The GPS image cannot be confirmed to its origin point. Depths on GPS scans are represented as QLC.

(GENERAL SURVEY LEGEND)

DP - DRAINAGE PIT
DMJ - DRAINAGE JUNCTION MANHOLE
PMH - SEWER MANHOLE
PHY - HYDRANT
PVS - STOP VALVE
PGUL - GULLY PIT

GENERAL SURVEY NOTES:

- * THIS TITLEBLOCK IS AN INTEGRAL PART OF THIS DWG AND SHOULD NOT BE REMOVED
- * COORDINATE SYSTEM MGA 2020
- * LEVEL DATUM IS AHD
- * IT IS THE RESPONSIBILITY OF ANY USER OF THIS DATA TO ENSURE ANY OTHER DATA BEING INTEGRATED IS ON THE SAME COORDINATE SYSTEM
- * REFER TO THE FACE OF THE PLAN FOR TITLE NOTATIONS
- * DESKTOP EXERCISE ONLY
- * THE SITE HAS NOT BEEN VISITED
- * NO BOUNDARIES HAVE BEEN DEFINED BY SURVEY

SCALE 1:1000
