Subject: Renovation to Cancer Centre

Dear Prof. Chantrill and Nicola Ryan

It is with great concern that I write this email to you.

On Thursday 17th April I received a letter from Benjamin Ferry Senior Project Director for the renovation at Milton Hospital / Cancer Centre advising the neighbours of the hospital, of the proposed works at the Hospital. (see attached)

At the start of this project, I was advised by our local member and Margot Mains that as a stakeholder the CSF would be consulted on renovations at the Cancer Centre. To date, there has been no consultation with the CSF even though these renovations will have a direct impact on the patients and our services offered to patients.

Although, the plans that have been forwarded to the neighbours of the hospital lack considerable detail, the drawing of the cancer centre would indicate that the plan is to build across the windows facing north and block the view from the patients. This not only shows a complete lack of empathy by the designers for the patients' wellbeing, but also a lack of understanding on their part.

The reaction I have received thus far from past and present patients and members of the CSF is condemnation of this proposal.

All efforts must be made to preserve this view for the patients wellbeing.

Regards

Peter Still
