Lot 125 DP 1297613

A Preliminary Site Investigation was undertaken by Douglas Partners in December 2016 and an addendum issued in September 2017 for Lot 1 DP 798111. Based on the findings of the investigation, the potential for significant contamination to be present within the site from on-site sources is considered to be low. However, risks from off-site sources, in particular the adjacent unlined landfill, include migrating leachate contaminated groundwater and landfill gas (particularly methane) and cannot be discounted. The investigation concluded that the site is suitable for the intended low density residential subject to the ongoing monitoring of the Bungendore Landfill Site to determine that a 250m no-build buffer is appropriate and the implementation of an unexpected finds protocol (UFP) to address potential contamination and bonded asbestos containing materials (ACM) encountered. It is also noted that during development and after the removal of the concrete slab from the former toilet, any hole used for septic waste, should be validated. Council has required the UFP as a condition of its approval for the subdivision of the land (DA.2020.1469). This condition is to address potential contamination for any bonded Asbestos Containing Material should it be uncovered on site during construction.

Some buildings located in the Queanbeyan-Palerang local government area have been identified as containing loose-fill asbestos insulation (sometimes referred to as “Mr Fluffy” insulation), for example, in the roof space. You should make your own enquiries as to the age of the buildings on the land to which this certificate relates.

If the land contains a building constructed prior to 1980, Queanbeyan-Palerang Regional Council strongly recommends that any potential purchaser obtains advice from a licensed asbestos assessor to determine whether loose-fill asbestos is present in any building on the land; and, if so, the health risks (if any) this may pose for the building’s occupants.

Nothing in this statement relates to information about the presence of bonded asbestos materials such as asbestos cement sheeting that may have been used at this site.
