RESOLUTION TO PREPARE PLANNING PROPOSAL

Council on 17 July 2017 resolved to commence the preparation of a draft Planning Proposal to introduce Housing Affordability provisions or SEPP 70 Housing Affordability provisions into the Wollongong Local Environment Plan 2009. The form of the provisions will be subject to a future report and subsequent community consultation.

Council on 3 February 2025 resolved that a Planning Proposal be prepared to amend the Wollongong Local Environment Plan 2009 by including in Schedule 2 Exempt Development: Temporary events (commercial and community) on Council owned and/or managed land, including Crown Land and within the road reserve for which Council is the road authority, subject to being consistent with an adopted Plan of Management over the land where applicable.

If you have any doubt as to whether the land is affected by landslip and/or subsidence the services of a suitably qualified engineer should be obtained.

Note: the advice provided by Council in respect of the stability of the land is based on information contained in Council's land constraint maps. The maps have been compiled from data received by Council and considered by Council to be reasonably reliable. Council does not warrant that its land constraint maps contain all information ever received by Council relating to the stability of the land.

FLOOD AND DRAINAGE

1. Classification of Flood Risk

From Council records, Council has determined that this property is located within a **Flood Affected - Low and Medium Flood Risk area**. The property is within a flood planning area and/or between the flood planning area and the probable maximum flood, and is thus subject to flood related development controls.

Land that is potentially subject to inundation is classified as low, medium or high flood risk. Council has prepared a development control plan known as Wollongong Development Control Plan 2009 that provides details of flood related development controls that may be applicable.

Where the owner/applicant has detailed survey available which identifies the property to be within another risk precinct or not in one at all, it may be presented to Council for reassessment.

Definitions:

High Flood Risk (and Interim Riverine Corridor) Precinct

This has been defined as the area within the envelope of land subject to a high hydraulic hazard (in accordance with the provisional criteria outlined in the Floodplain Management Manual) in a 100 year flood event plus all land within a corridor 10m from the top of the creek bank (Interim Riverine Corridor). The high flood risk precinct is where high flood damages, potential risk to life, evacuation problems would be anticipated or development would significantly and adversely effect flood behaviour. Most development should be restricted in this precinct. In this precinct, there would be a significant risk of flood damages without compliance with flood related building and planning controls.

Medium Flood Risk Precinct

This has been defined as land below the 100 year flood level (plus 0.5m freeboard) that is not within the High Flood Risk (and Interim Riverine Corridor) Precinct. It is land subject to low hydraulic hazard (in accordance with the provisional criteria outlined by the Floodplain Management Manual). In this precinct there would still be a significant risk of flood damage, but these damages can be minimised by the application of appropriate development controls.

Low Flood Risk Precinct

This has been defined as all other land within the floodplain (i.e. within the extent of the probable maximum flood) but not identified within either the High Flood Risk (and Interim Riverine Corridor) or the Medium Flood Risk Precinct, where risk of damages are low for most land uses. The Low Flood Risk Precinct is that area above the 100 year flood (plus 0.5m freeboard) and most land uses would be permitted within this precinct.

2. Estimated Flood Levels

Council is aware that it may hold estimated and/or historical flood levels in the vicinity of this property. In order to pursue this matter further, please complete a Flood Level Information Advice form or apply online which are both available on Council website or at Customer Service front counter of the Administration Building. A cost is involved for this service. Payment must be made prior to information being provided.

Please note that flood information may change following a review of Council's flood study and Floodplain Risk Management Study. As part of the review, design parameters for these studies may change, and therefore the flood levels, velocities and flood risks may vary from the current studies.

GENERAL INFORMATION

The following general information is brought to the attention of land owners.

1. Tree Management Policy

Wollongong DCP Chapter E17 - Tree and Vegetation Management along with Council's Tree Management Policy outline Council's requirements for the preservation and management of trees and other vegetation within the Wollongong Local Government Area. A person must not undertake clearing, pruning or removal of a declared tree or vegetation without development consent through a Development Application, or a Permit granted by Council.

A declared tree is defined as -

- a) Five (5) metres or more in height; or
- b) Have a diameter of 30 cm (300mm) or more measured at ground level.

Please note that:

- A permit is also required for any dead or dying trees.
- Pruning of major structural roots or anchor roots are also subject to a Permit.

Some trees may be exempt and do not require a permit to prune and/or remove them.

Information on permit and development application requirements, including other exemptions please refer to the Wollongong Development Control Plan Chapter E17 – Tree and Vegetation Management.

Further information regarding a tree permit application process and trees and development can be obtained from Council's website: <http://www.wollongong.nsw.gov.au/trees> or by contacting Council's Customer Service on 4227 7111.

2. Termite Management for Buildings

Australian Standards 3660.1-2000 (New Buildings) AS 3660.2-2000 (Existing Buildings) Termite Management, recommends that buildings be inspected and be maintained in order to achieve termite management of buildings. Licensed Pest Control Contractors should be contacted to achieve necessary termite control.

3. Lead Paint and Building Renovations

Your attention is drawn to the hazards associated with lead-based paints during building renovation. Suitable precautions should be taken when removing flaking paint or sanding painted surfaces suspected to have been treated with lead-based paint to prevent contamination of the immediate environment and associated health risk from lead dust.

AS 4361 – Part 2 – Guide to Lead Paint Management – Residential and Commercial.

4. Sewage Management Systems

Where a property has on-site sewage management system (this includes septic tanks, disposal trenches, aerated waste water treatment systems, composting toilets and pump out systems) the new owner must obtain an "Approval to Operate" from Council within 3 months of land ownership being transferred or otherwise conveyed.

5. Asbestos

Exposure to asbestos is a serious health hazard. In Australia, asbestos was gradually phased out of building materials in the 1980s and the supply and installation of asbestos containing goods has been prohibited since 31 December 2003. However, asbestos legacy materials still exist in many homes, buildings and other assets and infrastructure.

Council on the 6 February 2023 adopted the Asbestos Management Policy, which states Council's commitment to and responsibilities for safely managing asbestos and provides information for Council

and the local community on safely managing asbestos. The policy can be viewed on Council's website: www.wollongong.nsw.gov.au.

6. Building Product Use Ban

On 10 August 2018, the Commissioner of Fair Trading, Department of Finance, Services and Innovation issued, by way of a notice, a Building Product Use Ban under Section 9(1) of the Building Products (Safety) Act 2017. This notice prohibited the use of Aluminium Composite Panels (ACPs) with a core of greater 30 percent Polyethylene (PE) by mass ("the building product") in any external cladding, external wall, external insulation, faced or rendered finish in certain classes of buildings under the National Construction Code and subject to certain exceptions. The ban commenced operation on Wednesday 15 August 2018.

You should undertake your own inquiries as to whether any of the Panels referenced in the Building Product Use Ban have been utilised in the building.

RESOLUTION TO PREPARE PLANNING PROPOSAL

Council does not warrant that its land constraint maps contain all information ever received by Council relating to the stability of the land.

FLOOD AND DRAINAGE

1. Classification of Flood Risk

From Council records, Council has determined that this property is located within a **Flood Affected - Medium Flood Risk area**. The property is within a flood planning area and is thus subject to flood related development controls.

Land that is potentially subject to inundation is classified as low, medium or high flood risk. Council has prepared a development control plan known as Wollongong Development Control Plan 2009 that provides details of flood related development controls that may be applicable.

Where the owner/applicant has detailed survey available, which identifies the property to be within another risk precinct or not in one at all, it may be presented to Council for reassessment.

Definitions:

High Flood Risk (and Interim Riverine Corridor) Precinct

This has been defined as the area within the envelope of land subject to a high hydraulic hazard (in accordance with the provisional criteria outlined in the Floodplain Management Manual) in a 100 year flood event plus all land within a corridor 10m from the top of the creek bank (Interim Riverine Corridor). The high flood risk precinct is where high flood damages, potential risk to life, evacuation problems would be anticipated or development would significantly and adversely affect flood behaviour. Most development should be restricted in this precinct. In this precinct, there would be a significant risk of flood damages without compliance with flood related building and planning controls.

Medium Flood Risk Precinct

This has been defined as land below the 100 year flood level (plus 0.5m freeboard) that is not within the High Flood Risk (and Interim Riverine Corridor) Precinct. It is land subject to low hydraulic hazard (in accordance with the provisional criteria outlined by the Floodplain Management Manual). In this precinct there would still be a significant risk of flood damage, but these damages can be minimised by the application of appropriate development controls.

Low Flood Risk Precinct

This has been defined as all other land within the floodplain (i.e. within the extent of the probable maximum flood) but not identified within either the High Flood Risk (and Interim Riverine Corridor) or the Medium Flood Risk Precinct, where risk of damages are low for most land uses. The Low Flood Risk Precinct is that area above the 100 year flood (plus 0.5m freeboard) and most land uses would be permitted within this precinct.

2. Estimated Flood Levels

Wollongong DCP Chapter E17 - Tree and Vegetation Management along with Council's Tree Management Policy outline Council's requirements for the preservation and management of trees and

other vegetation within the Wollongong Local Government Area. A person must not undertake clearing, pruning or removal of a declared tree or vegetation without development consent through a Development Application, or a Permit granted by Council.

A declared tree is defined as -

Please note that:

- A permit is also required for any dead or dying trees.
- Pruning of major structural roots or anchor roots are also subject to a Permit.

Some trees may be exempt and do not require a permit to prune and/or remove them.

Information on permit and development application requirements, including other exemptions please refer to the Wollongong Development Control Plan Chapter E17 – Tree and Vegetation Management.

Australian Standards 3660.1-2000 (New Buildings) AS 3660.2-2000 (Existing Buildings) Termite Management, recommends that buildings be inspected and be maintained in order to achieve termite management of buildings. Licensed Pest Control Contractors should be contacted to achieve necessary termite control.

3. Lead Paint and Building Renovations

Your attention is drawn to the hazards associated with lead-based paints during building renovation. In Australia, asbestos was gradually phased out of building materials in the 1980s and the supply and installation of asbestos containing goods has been prohibited since 31 December 2003. However, asbestos legacy materials still exist in many homes, buildings and other assets and infrastructure.

Council on the 6 February 2023 adopted the Asbestos Management Policy, which states Council's commitment to and responsibilities for safely managing asbestos and provides information for Council and the local community on safely managing asbestos. The policy can be viewed on Council's website: www.wollongong.nsw.gov.au.

RESOLUTION TO PREPARE PLANNING PROPOSAL

Council on 3 February 2025 resolved that a Planning Proposal be prepared to amend the Wollongong Local Environment Plan 2009 by including in Schedule 2 Exempt Development: Temporary events (commercial and community) on Council owned and/or managed land, including Crown Land and within the road reserve for which Council is the road authority, subject to being consistent with an adopted Plan of Management over the land where applicable.

Council on 17 July 2017 resolved to commence the preparation of a draft Planning Proposal to

introduce Housing Affordability provisions or SEPP 70 Housing Affordability provisions into the Wollongong Local Environmental Plan 2009. The form of the provisions will be subject to a future report and subsequent community consultation.

LAND STABILITY

Council's land constraint/stability assessment maps do not show that the land is located in an area where landslip and/or subsidence have occurred, or where land instability is suspected. If you have any doubt as to whether the land is affected by landslip and/or subsidence the services of a suitably qualified engineer should be obtained.

Note: the advice provided by Council in respect of the stability of the land is based on information contained in Council's land constraint maps. The maps have been compiled from data received by Council and considered by Council to be reasonably reliable. Council does not warrant that its land constraint maps contain all information ever received by Council relating to the stability of the land.

FLOOD AND DRAINAGE

1. Classification of Flood Risk

From Council records, Council has determined that this property is located within a **Flood Affected - Medium Flood Risk area**. The property is within a flood planning area and is thus subject to flood related development controls.

Land that is potentially subject to inundation is classified as low, medium or high flood risk. Council has prepared a development control plan known as Wollongong Development Control Plan 2009 that provides details of flood related development controls that may be applicable.

Where the owner/applicant has detailed survey available, which identifies the property to be within another risk precinct or not in one at all, it may be presented to Council for reassessment.

Definitions:

High Flood Risk (and Interim Riverine Corridor) Precinct

This has been defined as the area within the envelope of land subject to a high hydraulic hazard (in accordance with the provisional criteria outlined in the Floodplain Management Manual) in a 100 year flood event plus all land within a corridor 10m from the top of the creek bank (Interim Riverine Corridor). The high flood risk precinct is where high flood damages, potential risk to life, evacuation problems would be anticipated or development would significantly and adversely affect flood behaviour. Most development should be restricted in this precinct. In this precinct, there would be a significant risk of flood damages without compliance with flood related building and planning controls.

Medium Flood Risk Precinct

This has been defined as land below the 100 year flood level (plus 0.5m freeboard) that is not within the High Flood Risk (and Interim Riverine Corridor) Precinct. It is land subject to low hydraulic hazard (in accordance with the provisional criteria outlined by the Floodplain Management Manual). In this precinct there would still be a significant risk of flood damage, but these damages can be minimised by the application of appropriate development controls.

Low Flood Risk Precinct

This has been defined as all other land within the floodplain (i.e. within the extent of the probable maximum flood) but not identified within either the High Flood Risk (and Interim Riverine Corridor) or the Medium Flood Risk Precinct, where risk of damages are low for most land uses. The Low Flood Risk Precinct is that area above the 100 year flood (plus 0.5m freeboard) and most land uses would be permitted within this precinct.

2. Estimated Flood Levels

Council is aware that it may hold estimated and/or historical flood levels in the vicinity of this property. In order to pursue this matter further, please complete a Flood Level Information Advice form or apply

online which are both available on Council website or at Customer Service front counter of the Administration Building. A cost is involved for this service. Payment must be made prior to information being provided.

Please note that flood information may change following a review of Council's flood study and Floodplain Risk Management Study. As part of the review, design parameters for these studies may change, and therefore the flood levels, velocities and flood risks may vary from the current studies.

Aboriginal Heritage

All development within the Wollongong Local Government Area is subject to the Aboriginal Heritage requirements of the National Parks and Wildlife Act 1974. To determine if your property is affected by an Aboriginal Site, it is recommended that an Aboriginal Heritage Information Management System (AHIMS) search be undertaken by contacting the AHIMS Administrator on (02) 9995 5000. Further detail on Council's Aboriginal Heritage requirements for Development is contained within Chapter E10 of the Wollongong Development Control Plan 2009.

DEVELOPMENT HISTORY

Application may be made for a Building Certificate under section 10.7B of Environmental Planning and Assessment Act 1979 if written certification of existing buildings on the land is required.

The history of development consent approval applicable to the land may be obtained by consulting the Development Consent Register. Enquiries concerning the register may be made at Council's Customer Service Centre, 41 Burelli Street Wollongong during office hours.

LOOSE-FILL ASBESTOS

Council recommends you make your own enquiries as to the age of the buildings on the land to which this certificate relates and, if it contains a building constructed prior to 1980, the Council also strongly recommends that any potential purchaser obtain advice from a licensed asbestos assessor to determine whether loose-fill asbestos is present in any building on the land and, if so, the health risks (if any) this may pose for the building's occupants.

GENERAL INFORMATION

The following general information is brought to the attention of land owners.

1. Tree Management Policy

Wollongong DCP Chapter E17 - Tree and Vegetation Management along with Council's Tree Management Policy outline Council's requirements for the preservation and management of trees and other vegetation within the Wollongong Local Government Area. A person must not undertake clearing, pruning or removal of a declared tree or vegetation without development consent through a Development Application, or a Permit granted by Council.

A declared tree is defined as -

- a) Five (5) metres or more in height; or
- b) Have a diameter of 30 cm (300mm) or more measured at ground level.

Please note that:

- A permit is also required for any dead or dying trees.
- Pruning of major structural roots or anchor roots are also subject to a Permit.

Some trees may be exempt and do not require a permit to prune and/or remove them.

Information on permit and development application requirements, including other exemptions please refer to the Wollongong Development Control Plan Chapter E17 – Tree and Vegetation Management.

Further information regarding a tree permit application process and trees and development can be obtained from Council's website: <http://www.wollongong.nsw.gov.au/trees> or by contacting Council's Customer Service on 4227 7111.

2. Termite Management for Buildings

Australian Standards 3660.1-2000 (New Buildings) AS 3660.2-2000 (Existing Buildings) Termite Management, recommends that buildings be inspected and be maintained in order to achieve termite management of buildings. Licensed Pest Control Contractors should be contacted to achieve necessary termite control.

3. Lead Paint and Building Renovations

Your attention is drawn to the hazards associated with lead-based paints during building renovation. Suitable precautions should be taken when removing flaking paint or sanding painted surfaces suspected to have been treated with lead-based paint to prevent contamination of the immediate environment and associated health risk from lead dust.

AS 4361 – Part 2 – Guide to Lead Paint Management – Residential and Commercial.

4. Sewage Management Systems

Where a property has on-site sewage management system (this includes septic tanks, disposal trenches, aerated waste water treatment systems, composting toilets and pump out systems) the new owner must obtain an "Approval to Operate" from Council within 3 months of land ownership being transferred or otherwise conveyed.

5. Asbestos

Exposure to asbestos is a serious health hazard. In Australia, asbestos was gradually phased out of building materials in the 1980s and the supply and installation of asbestos containing goods has been prohibited since 31 December 2003. However, asbestos legacy materials still exist in many homes, buildings and other assets and infrastructure.

Council on the 6 February 2023 adopted the Asbestos Management Policy, which states Council's commitment to and responsibilities for safely managing asbestos and provides information for Council and the local community on safely managing asbestos. The policy can be viewed on Council's website: www.wollongong.nsw.gov.au.

6. Building Product Use Ban

On 10 August 2018, the Commissioner of Fair Trading, Department of Finance, Services and Innovation issued, by way of a notice, a Building Product Use Ban under Section 9(1) of the Building Products (Safety) Act 2017. This notice prohibited the use of Aluminium Composite Panels (ACPs) with a core of greater 30 percent Polyethylene (PE) by mass ("the building product") in any external cladding, external wall, external insulation, faced or rendered finish in certain classes of buildings under the National Construction Code and subject to certain exceptions. The ban commenced operation on Wednesday 15 August 2018.

You should undertake your own inquiries as to whether any of the Panels referenced in the Building Product Use Ban have been utilised in the building.
