

Cladding mesh to be fine weave so you cannot see inside.  
All Externally visible steelwork to be powder coated black or finished in "Brumby Charcoal" ;) to match building

Cut stump to below mesh floor level

Aim to minimise earthworks but want to maximise clearance for people. Also need to allow for skis and bikes to be stored on walls

Mesh flooring on steel beams

Remove this.  
Becomes entry to the new  
storage area with steps and a  
mesh security door

Install new mesh stairs to enter new storage area

Steel framing and new mesh flooring to use existing footings where possible. Tree stump just gets cut to below new floor level

Mesh walls  
for secure  
area

Security door (mesh) with  
code entry.  
Levels to suit stairs. Needs to  
be safe for entry.

Stairs
