Addendum Report

DA 22/458 – Friday Flat and Middle Slopes Fan Gun Project

This addendum relates to the following documents:

- Statement of Environmental Effects – Friday Flat and Middles Slopes Fan Gun Project, Thredbo Alpine Resort, Kosciuszko National Park, NSW, March 2022, Rev 2; and
- Site Environmental Management Plan (SEMP) – Friday Flat and Middles Slopes Fan Gun Project, Thredbo Alpine Resort, Kosciuszko National Park, NSW, March 2022, Rev 2.

The previously intended works comprising construction of temporary mountain bike (MTB) trail diversions to sections of the Friday Flat Loop MTB Trail within Friday Flat and the Cannonball Downhill MTB Trail within Middle Slopes is no longer proposed as part of this Development Application (DA 22/458).

The MTB trail diversions are no longer required as the subject MTB Trails will be closed for use when construction works are in proximity to the MTB Trails.

As such, where the Statement of Environmental Effects and Site Environmental Management Plan documentation refer to the temporary diversion of the MTB Trails, this should be disregarded as they do not form part of the proposal.

	Department of Planning and Environment
