Chalet 1/11 Crackenback Drive, Thredbo
NSW, 2625

Attention: Mark Brown

Dear Mark

RE: Structural Engineering Assessment Chalet 1/11 Crackenback Drive, Thredbo – Loadbearing Capacity Existing Building.

Stantec have been engaged to review the proposed alterations to the internal works for a new mezzanine floor for the loadbearing capacity of the building as denoted on plan.

A structural assessment has been done and the proposed works reviewed in accordance with the existing structural arrangements as per site photos and provided drawing. The load bearing capacity of the existing foundations for the proposed construction is suitable and the proposed works present no geotechnical impact on the site or related land. It is noted that proposed works will be completed by an appropriately qualified and licenced contractor.

Stantec have reviewed, assessed and deem the proposed alterations as feasible.

Yours sincerely

Francisco Toledo Silva
