Hi Alastair

Thanks for your email and update.

The Engineering Certification is required at the DA stage for this application as the subject structure was previously erected without required development consent and therefore a CC is unable to be issued for the structure.

Noting the above, Council agrees to receive the required Structural Engineered Plans and Structural Certification prepared by a suitably qualified person during the assessment of the application, subject to all other relevant outstanding information being provided by the due date. It is noted once the Structural Engineered Plans and Structural Certification is provided, this information will then be required to be referred to Council's Building Surveyors for comment prior to any determination.

Thanks

Chris
