Report for Cultural Survey

For proposed development of stage 1 at Narromine Airport

As requested by Mitch Hanlon a survey of the proposed site was done on Friday 21/01/2022

All the area was surveyed and all trees were inspected for any cultural modification, there nothing found on the inspection of the trees, however there are some small Kurrajong trees in the area that should be preserved if possible as they are a tree that was and still is part of our Aboriginal culture.

All other areas were surveyed and nothing of significance was found bearing in mind that this area has been farmed for many years.

Should any objects be found during development it would be appreciated if I were to be contacted.
