2. Does the bin storage area(s) have sufficient space to store the required number of bins?
3. Does the development ensure the bin storage area is located:
  - a) behind the building line of the dwelling where it is screened or cannot be viewed from the public domain?
  - b) away from habitable windows and doors of adjoining dwellings to reduce noise and odour?
  - c) such that residents are able to conveniently carry their waste to the correct bin from their dwelling?
  - d) such that the bin-carting route to the collection point does not pass through any internal rooms of the dwelling?
  - e) such that the bin-carting route to the collection point avoids steps and slopes?
  - f) such that the bins can be moved safely to the collection point?
4. Has the design ensured that any door and pathway from the bin storage area to the collection point is a minimum of 2 metres in width?
5. Has the bin-carting route been illustrated on the plans accompanying the DA?
6. Is the bin-carting route:
  - a) non-slip?
  - b) free from obstructions and steps?
