

# **WASTE MANAGEMENT PLAN**

## **DEMOLITION, CONSTRUCTION AND USE OF PREMISES**

The applicable sections of this table must be completed and submitted with your Development Application.

Completing this table will assist you in identifying the type of waste that will be generated and in advising Council how you intend to reuse, recycle or dispose of the waste.

The information provided on the form (and on your plans) will be assessed against the objectives of the DCP.

If space is insufficient in the table please provide attachments.

### **Out line of Proposal**

Site Address: 820 Punchbowl Rd Punchbowl NSW 2196

Applicant's name and address: Ahmed AL JAMALI  
G05/101 Clapham Road Sefton NSW 2162

Phone: 0433613566

Fax:

Buildings and other structures currently on the site:

2 storey building with retail shop at the front

Brief Description of Proposal: Alterations and Additions

The details provided on this form are the intentions of managing waste relating to this project.

Date: 20/06/2023

## **SECTION ONE – DEMOLITION**

This is the stage with the greatest potential for waste minimization, particularly in Sydney where there are high levels of development, relatively high tipping charges and where alternative quarry materials are located on the outskirts.

Applicants should consider if it is possible to re-use existing buildings, or parts thereof, for the proposed use.

With careful on-site sorting and storage and by staging work programs, it is possible to re-use many materials, either on-site or off. Instead of simply pulling down a building, waste management encourages the practice of recycling on site. This could require a number of colour-coded or clearly labeled bins on-site rather than one size fits all.

- Location of on-site storage space for materials (for re-use) and containers for recycling and disposal.
- Vehicle access to the site and to storage and container areas.

## Demolition Stage 1

Demolish the garage only

Materials On-Site		DESTINATION		
		RE-USE AND RECYCLING		DISPOSAL
Type of Material	Estimated Volume (m <sup>3</sup> ) or Area (m <sup>2</sup> )	<b>ON-SITE</b> <ul style="list-style-type: none"> <li>Specify proposed reuse or on-site recycling methods.</li> </ul>	<b>OFF-SITE</b> <ul style="list-style-type: none"> <li>Specify contractor and recycling outlet.</li> </ul>	<ul style="list-style-type: none"> <li>Specify contractor and landfill site.</li> </ul>
Excavation Material	2 m3		Off Site TNT demolisher	
Green Waste	0.1	On site		
Bricks	2 m3		Off Site TNT demolisher	
Concrete	0			
Timber – Hardwood/pine	1 m3	On site		
Plasterboard	0			
Metals – Zinc-alum	0.5 m3	On Site		
Tiles and door fitting (incl. roof tile)	0			
Kitchen cupboard, sink & stove	0			
Bathtub vanity and closet pan	0			
Asbestos	-			

Note: Details of site area to be used for on-site separation, treatment and storage (including weather protection) should be provided on the plan drawings accompanying your application.

## **SECTION TWO – CONSTRUCTION AND USE**

### **Section 2(a) – Potential for Waste Minimisation During Construction Stage**

The following measures should be considered when looking to save resources and minimise waste at the construction stage.

- Purchasing Policy – considering measures such as ordering the right quantities of materials and prefabrication of materials where possible;
- Reusing formwork;
- Minimising site disturbance, limiting unnecessary excavation;
- Careful source separation of off-cuts to facilitate re-use, resale or efficient recycling; and
- Co-ordination/sequencing of various trades.

The following details should be shown on your plans.

- Location of temporary storage space within each dwelling unit;
- Location of Waste Storage and recycling Area(s), per dwelling unit or located communally on-site. In the latter case this could be a Garbage and Recycling room;
- Details of design for Waste Storage and Recycling Area(s) or Garbage and Recycling Room(s) and any conveyance of volume reduction equipment; and
- Location of communal composting area.

### **Section 2(b) – Design Of Facilities**

The following details should be shown on your plans:

- Location of Waste Storage and Recycling Area(s) per unit or located communally on-site;
- Details of design of Waste Storage and Recycling Area(s);
- Where appropriate, design details of Garbage and Recycling Room(s);
- Access for vehicles.

Every building shall be provided with a Waste Storage and recycling Area which is flexible in size and layout to cater for future changes in use. The size is to be calculated on the basis of waste generation rates and proposed bin sizes.

### **Section 2(c) – On-going Management**

This section will enable you to describe how you intend to ensure on-going management of waste on-site (e.g. lease conditions, care-taker/manager on-site).

## Construction - Stage 2(a)

Materials On-Site		DESTINATION		
		RE-USE AND RECYCLING		DISPOSAL
Type of Material	Estimated Volume (m <sup>3</sup> ) or Area (m <sup>2</sup> )	<b>ON-SITE</b> <ul style="list-style-type: none"> <li>Specify proposed reuse or on-site recycling methods.</li> </ul>	<b>OFF-SITE</b> <ul style="list-style-type: none"> <li>Specify contractor and recycling outlet.</li> </ul>	<ul style="list-style-type: none"> <li>Specify contractor and landfill site.</li> </ul>
Excavation Material	1m2		Off Site	
Green Waste	0.1 m2			
Hebel Panel	0 m2			
Concrete	2 m2			
Timber – Oregon Pine Timber pallets Particle board finishes	3 m3		Off Site	
Plasterboard	2 m2		Off Site	
Metals – Copper Aluminum	0.5 m3		Off Site	
Other – Electrical fittings Reject trade-ins PVC Plastic	0.4 m2		Off Site	

Note: Details of site area to be used for on-site separation, treatment and storage (including weather protection) should be provided on the plan drawings accompanying your application.

## Design of Facilities – Stage 2(b)

TYPE OF WASTE TO BE GENERATED	EXPECTED VOLUME PER WEEK	PROPOSED ON-SITE STORAGE AND TREATMENT FACILITIES	DESTINATION
Please specify. For example: glass, paper, food waste, off cuts etc.		For example: <ul style="list-style-type: none"> <li>• Waste storage &amp; recycling area</li> <li>• Garbage chute</li> <li>• On-site composting</li> <li>• Compaction equipment</li> </ul>	<ul style="list-style-type: none"> <li>• Recycling</li> <li>• Disposal</li> <li>• Specify Contractor</li> </ul>
<p>A.Recyclables:-</p> <ol style="list-style-type: none"> <li>1.Home paper and cardboard waste.</li> <li>2.Glass, aluminum and plastic (bottles).</li> </ol> <p>B.Non-recycables:-</p> <ol style="list-style-type: none"> <li>1.Foodscraps etc.</li> <li>2.Other plastics (eg wrapping).</li> <li>3.Unrecycabel waste.</li> </ol>		<p>A. 240 Liter Recycle storage bins for paper, cardboard, glass, plastic and aluminum.</p> <p>B. 240 liter Storage bins</p>	<p>Paper/cupboard to recyclers Glass/aluminum &amp; plastic to collected by council appointed contractor</p> <p>To be collected by Council appointed contractors</p>

Note: Details of on-site waste management facilities should be provided on the plan drawings accompanying your application.

## **On-going Management – Stage 2(c)**

Describe how you intend to ensure on-going management of waste on-site (e.g. lease conditions, caretaker/manager on-site).

1. The Builder will prepare an Environmental Management System addressing home waste and recycling. This will include expectations and achievable objects for sorting and separating waste. Also a regular waste audit.
2. The waste storage and recycling area will be located as approved location by Council
3. The builder will be responsible for transferring materials to the Area and the Body Corporate responsible for keeping the area clean and tidy.

Thank you for the information.
