

Waste Management Plan - Part One (Demolition Phase)

Site Address: 3 Shelley Street Campsie

Section 1: Asbestos Declaration

	Does Demolition Contain Asbestos? Yes No <input type="checkbox"/> <input type="checkbox"/>
	All asbestos waste is to be managed in accordance with provisions of the NSW Work Health and Safety Regulation 2011
	Is the asbestos friable <input type="checkbox"/> Yes (go to section 2) <input type="checkbox"/> No
	Is the asbestos non friable and over 10m ² <input type="checkbox"/> Yes (go to section 2) <input type="checkbox"/> No
	Is the asbestos non-friable and under 10m ² <input type="checkbox"/> Yes (go to section 3) <input type="checkbox"/> No

to be confirmed by licensed asbestos inspector.

Site Address: <div style="text-align: center; font-size: 1.2em; margin-top: 5px;">3 Shelley Street Campsie</div>		
<input type="checkbox"/> Residential Flat Building <input type="checkbox"/> Multi Dwelling Houses	<input type="checkbox"/> Boarding House <input type="checkbox"/> Other _____	<input type="checkbox"/> Shop Top Housing <input checked="" type="checkbox"/> Non Residential Development
<i>Please complete Sections 1-3</i>		<i>Please complete Sections 1-4</i>

Section 1: Generation of Waste

RESIDENTIAL						
Number of dwellings	Rubbish generation/week (120L/dwelling)	Allocated rubbish bin size (140L or 240L)	TOTAL number of rubbish bins allocated	Recycling generation/week (80L/dwelling)	Allocated recycling bin size (240L)	TOTAL number of recycling bins allocated
COMMERCIAL (if applicable)						
Premises Type	Rubbish generation/week (Based on type of premises and m ² , see Appendix 3)	Size and number of rubbish bins	Collection frequency per week	Recycling generation/week (Based on type of premises and m ² , see Appendix 3)	Size and number of recycling bins	Collection frequency per week
Place of Worship	TBC	7 x 240Litre rubbish bins	1	TBC	2 x 1,100 Litre recycle bins	0.5

Section 2: Storage of Waste Bins

1.	Is there sufficient space allocated within each dwelling for one day's waste and recycling?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
2.	Is there a waste bin storage room/area provided?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	2a - What is the total area of bin storage provided?	9m ²
	2b - Is there sufficient space provided for the allocated rubbish and recycling bins plus handling? (see clause 6.9.4.1 and 6.9.4.2 for requirements)	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	2c - Has a minimum 4m ² bulky waste storage area been allocated?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	2d - Have you submitted a detailed plan of the waste bin storage room/area, together with the nominated collection point and access pathway marked?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

3.	Are you using a compactor in the bin storage room? If NO, proceed to question 4	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	3a – Please detail the type of system (carousel, lineal, optic sensors, number of bins, automatic bin exchange, size etc.)	

	3b – What is the proposed compactor diameter?	
	3c – What is the ceiling height of the waste bin storage room room?	
	3d – What is the proposed compaction ratio? (Must NOT exceed 2:1)	
4.	Is there a garbage chute system installed? If NO, proceed to Section 3	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	4a – Is there a service room provided on each storey?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	4b – Is there sufficient space allocated for 2x 240L recycling bins in the service room(s)?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
	4c – How many storeys will the chute service?	

Section 3: Collection of Waste

1.	Is there a caretaker on-site responsible for managing waste?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	1a - Designate which body is responsible for cleaning of waste storage areas	Temple volunteer
	1b - Designate which body is responsible for transfer of waste and recycling bins to and from the collection point (if applicable)	
2.	Are you proposing to use a waste bin presentation area for collection of waste?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
3.	What is the maximum distance from the waste bin storage room/area to the street kerb?	15m
4.	Are you proposing for Council's collection contractor to enter the site to collect the bins? (see clause 6.9.4.3)	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

Section 4: Shop Top Housing and Non-Residential Development

1.	Has a separate waste bin storage room/area been provided for commercial/retail tenancies?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	1a - Does the waste bin storage room/area have sufficient space allocated for storage of estimated bins? (as per Section 1)	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	1b - Is the waste bin storage room/area size and layout flexible to allow for future changes in use?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
	1c - Have you provided the necessary requirements for storage and collection of specific wastes types (i.e food, medical, hazardous etc.)	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

2.	Has sufficient space close to retail/commercial premises been allocated for storage of re-usable commercial items such as crates, pallets, kegs etc?	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
----	--	---

2: Waste Generation Rates

Guide Only

Type of Premises	Waste Generation	Recycling Generation
Backpackers accommodation	40Litres(L)/Occupant/week	20L/occupant/week
Boarding house, Guest house	60L/Occupant/week	20L/occupant/week
Food Premises:		
Butcher	80L/100m ² floor area/day	Discretionary
Delicatessen	80L/100m ² floor area/day	Discretionary
Fish Shop	80L/100m ² floor area/day	Discretionary
Greengrocer	240L/100m ² floor area/day	120L/100m ² floor area/day
Hairdresser	60L/100m ² floor area/day	Discretionary
Restaurants	10L/1.5m ² floor area/day	2L/1.5m ² floor area/day dining
Supermarket	660L/100m ² floor area/day	240L/100m ² floor area/day
Takeaway	80L/100m ² floor area/day	Discretionary
Hotel	5L/bed/day 50L/100m ² bar area/day 10L/1.5m ² of dining area/day	50L/100m ² of bar and dining areas/day
Licensed Club	5L/100m ² bar area/day 10L/1.5m ² of dining area/day	
Motel (without public restaurant)	5L/bed/day 10L/1.5m ² of dining area/day	1L/bed/day
Offices	10L/100m ² /day	10L/100m ² /day
Retail (other than food sales):		
Shop less than 100m ² floor area	50L/100m ² floor area/day	25L/100m ² floor area/day
Shop over 100m ² floor area	50L/100m ² floor area/day	50L/100m ² floor area/day
Showrooms	40L/100m ² floor area/day	10L/100m ² floor area/day

3: Guidelines for Garbage Chutes, Service Rooms and Compactors

Garbage Chutes

Garbage chutes are only suitable to transfer garbage, and not suitable to transfer recyclables for a range of safety reasons, including potential fire hazard. Garbage chutes must be designed and constructed in accordance with the following requirements:

1. The chute must be cylindrical in shape with a diameter of at least 500mm;
2. The chute must be constructed of non-corrosive metal or other suitable smooth impervious material;
3. The chute must be vertical with no bends, off-sets or restrictions and all internal joints and seams finished to a smooth even surface to allow the free flow of garbage through the chute;
4. Chutes should not open onto any habitable or public space. The service openings for depositing garbage into the chute must be located in a dedicated service room (refer to Service Room guidelines below);
5. The service openings must be fitted with a charging device between one (1) metre and one and a half (1.5) metres above floor level and have a cross-sectional area not more than half that of the garbage chute;
6. The charging devices must be self-closing and designed to permit free flow of garbage into the chute;
7. The chute branches from the charging devices must not exceed one (1) metre in length and must be angled to allow the free flow of garbage into the chute;
8. The chute must terminate in a waste bin storage room and discharge the garbage directly into a waste container in such a way that no spillage occurs. This room must not be accessible by residents;
9. A suitable waste bin carousel (or lineal) system is to be fitted in the waste bin storage room which may be used in addition to a waste compactor (refer to Compactors guidelines below);
10. A suitable cut-off device must be provided at or near the base of the chute to effectively close off the chute while the waste containers are being serviced or the compaction equipment is being maintained;
11. The chute, charging devices and service openings must be capable of being easily cleaned;
12. The chute must be ventilated so that air does not flow from the chute through any service opening and the flow of air through the chute does not impede the downward movement of garbage; and
13. The vent at the top of the chute must extend above the roof level and be fitted a weather-proof cowl and wire mesh screen to prevent the entry of rainwater and birds.

Figure W.1: Garbage Chute

Service Rooms

Service rooms are to be located on each floor of a building to allow access to the garbage chute. Service rooms must be designed and constructed in accordance with the following requirements:

1. Each service room must be located for convenient access by users and must be well ventilated and well lit.
2. Each service room must include space for two 240 litre bins for the reception of recyclable materials.
3. The floors, walls and ceilings of the service rooms must be finished with smooth impervious materials that are capable of being easily cleaned.
4. The service rooms must contain clear signage that describes the types of wastes that can be deposited into the garbage chute and the types of wastes which should be deposited into the recycling bins.

Compactors

Compactors are used to compress the waste into smaller collection containers. The compaction ratio must be set at 2:1. Higher ratios must not be used as they may result in heavier bins, causing WH&S problems, as well as damage to the bins. Best practice compaction systems compact directly into a 240 litre MGB, reducing the requirement of manually loading the compacted waste into bins.

Compactors should only ever be used for the garbage waste, not for recycling as they can damage the material.

Compactors require regular maintenance. In particular, systems fed from a chute can be prone to blockages or failure of the “electronic eye”, which can result in garbage overflowing or backing up the chute. To ensure this does not happen, a full-time caretaker should be employed to maintain the bin rooms and the garbage chute system.
