#### GFA (Gross Floor Area)

above the floor, and includes-(a) the area of a mezzanine, and (b) habitable rooms in a basement or an attic, and (c) any shop, auditorium, cinema, and the like, in a basement or attic,

but excludes-

(d) any area for common vertical circulation, such as lifts and stairs, and (e) any basement-

(i) storage, and

(ii) vehicular access, loading areas, garbage and services, and (f) plant rooms, lift towers and other areas used exclusively for mechanical services or ducting, and (g) car parking to meet any requirements of the consent authority (including access to that car parking), and (h) any space used for the loading or unloading of goods (including access to it), and (i) terraces and balconies with outer walls less than 1.4 metres high, and (j) voids above a floor at the level of a storey or storey above.

#### POS (private open space)

Means an area external to a building (including an area of land, terrace, balcony or deck) that is used for private outdoor purposes ancillary to the use of the building.

#### GBA (Gross Building Area)

The total enclosed and unenclosed area of the building at all building floor levels measured between the normal outside face of any enclosing walls, balustrades and supports GBA measurement also includes external verandahs, balconies, porches & structural columns. Upper portions of rooms/voids/shafts etc are also included in GBA measurement.

Means the sum of the floor area of each floor of a building measured from the internal face of external walls, or from the internal face of walls separating the building from any other building, measured at a height of 1.4 metres

Lismore, a prosperous service town and the main commercial and administrative centre for the Northern Rivers, lies only nine metres above sea-level on the narrow and winding North Arm of the upper Richmond River known as Wilsons River. In recent times it has attracted people who come to the area to pursue creative endeavours and alternative lifestyles.

Located 738 km north of Sydney via the Pacific Highway and 197 km south of Brisbane via the Pacific Motorway. It is 9 metres above sea level.

Prior to the arrival of Europeans the district was known as "Tchukarmboli" or "Tuckurimba" to the local Bundjalung Aborigines. When Scotsman William Wilson settled in the area in 1845 he named his property "Lismore" after the island of Lismore in Loch Linnhe, Scotland which he had visited on his honeymoon. Wilson remained in the district for a decade and when a townsite was surveyed it was located on what had been Wilsons' home paddock.

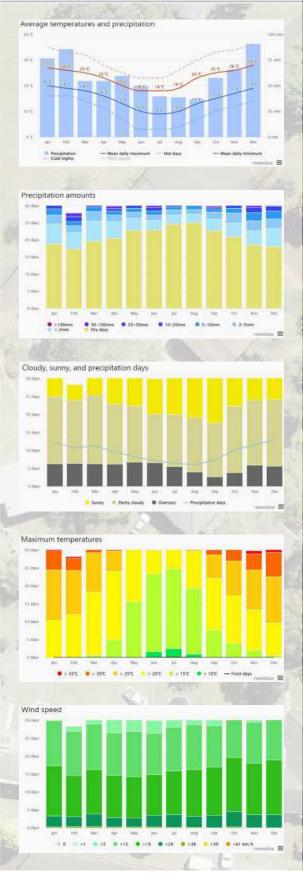

The district is known for its rich soils and high quality produce. There is an organic food market once a week. The town's primary appeal to the traveller lies in its centrality to a region rather than its specific attractions.

#### **Objective 4F-1**

Common circulation spaces achieve good amenity and properly service the number of apartments

#### Design criteria

- 1. The maximum number of apartments off a circulation core on a single level is eight
- 2. For buildings of 10 storeys and over, the maximum number of apartments sharing a single lift is 40

#### Design guidance

Greater than minimum requirements for corridor widths and/ or ceiling heights allow comfortable movement and access particularly in entry lobbies, outside lifts and at apartment entry doors

Daylight and natural ventilation should be provided to all common circulation spaces that are above ground

Windows should be provided in common circulation spaces and should be adjacent to the stair or lift core or at the ends of corridors

Longer corridors greater than 12m in length from the lift core should be articulated. Design solutions may include:

- a series of foyer areas with windows and spaces for seating
- · wider areas at apartment entry doors and varied ceiling heights

Design common circulation spaces to maximise opportunities for dual aspect apartments, including multiple core apartment buildings and cross over apartments

Achieving the design criteria for the number of apartments off a circulation core may not be possible. Where a development is unable to achieve the design criteria, a high level of amenity for common lobbies, corridors and apartments should be demonstrated, including:

- sunlight and natural cross ventilation in apartments
- access to ample daylight and natural ventilation in common circulation spaces
- common areas for seating and gathering
- · generous corridors with greater than minimum ceiling heights
- other innovative design solutions that provide high levels of amenity

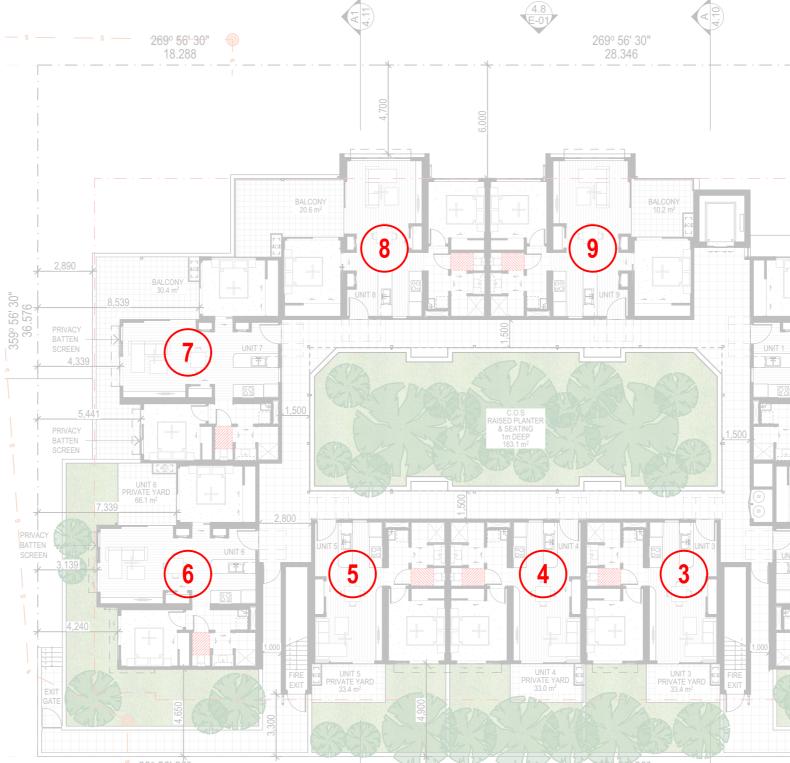

Where design criteria 1 is not achieved, no more than 12 apartments should be provided off a circulation core on a single level

Primary living room or bedroom windows should not open directly onto common circulation spaces, whether open or enclosed. Visual and acoustic privacy from common circulation spaces to any other rooms should be carefully controlled
