

ADDENDUM REPORT

DA 24/6965 (PAN-430592)

Cruiser Terrain Park Upgrades, Thredbo Alpine Resort

This addendum relates to the Cruiser Terrain Park Upgrades, Thredbo Alpine Resort.

Initial Proposal

The initial proposal included (refer Section 3.2.1 of the SEE, Rev 0):

3.2.1 Construction of earth mounds

- Placement of fill in areas for bulking and excavation of fill for shaping into pads to reach a height of approximately 1.5 m, and up to a maximum height of 2.1 m.
- Addition of approximately 1.0 m, and up to a maximum height of 1.6 m extra fill onto two existing mounds.
- Construction of earth mounds to be in accordance with the recommendations outlined in the Geotechnical Assessment (Assetgeoenviro 2024).

Fill will be imported from Thredbo's approved stockpile sites within the resort to construct the earth mounds.

Revised Proposal

The revised proposal includes the following (refer Section 3.2.1 of the SEE, Rev 1):

Earthworks are proposed within the disturbed ski slope to create a more level ground surface and safer landings for terrain park features. The land grading will also improve snow grooming operations in the locality. Works will include:

- Earthworks (cut and fill, reshaping) within disturbed ski slope to fill in depressions and level ground surface. Cut and fill not in excess of 1m.
- Addition of approximately 1.0 m, and up to a maximum height of 1.6 m extra fill onto two existing mounds (1 & 2). Mound 2 take-off to be shifted uphill of existing.
- Earthworks to be in accordance with the recommendations outlined in the Geotechnical Assessment (Assetgeoenviro 2024).

Fill (where required) will be imported from Thredbo's approved stockpile sites within the resort.
