Requirement for a Building Code of Australia Report - NSW Planning Portal

The following is in reference to the requirement on the NSW Planning Portal at submission of a development application for the inclusion of a Building Code of Australia Report under the “Secretary’s Approved Form Required Documents”.

The subject development application PAN-439516, is for the temporary use of land, the installation of aluminium picnic tables and does not involve the erection of structure. As a result the development does not have a building classification under the BCA and such a report is not required.

This correspondence is being uploaded to allow for progression of the application through the portal as the BCA report is a required field.

Should you require any further clarification with respect to the content of this correspondence please contact Sophie Ballinger on 6459 4419, via email (sophie.ballinger@vailresorts.com.au) or through the planning portal.

Yours Sincerely

Sophie Ballinger
Mountain Planning Manager
