**Submission of BCA Report in Secretary's Approved Form Required Documents – NSW Planning portal  
Modification (s4.55(2)) to DA10115 – Temporary Mobile Concrete Batching Plant.**

Dear Daniel,

In order to permit submission of the subject application, the portal is requiring under the required documents a Building Code of Australia report.

The subject modification application is for a temporary mobile concrete batching plant which will not be subject to the requirements of the BCA. This modification does not include any structural changes to the original development which would trigger the need for a BCA report.

As such this correspondence is being uploaded by way of explanation and to allow progression of the application through the portal

Yours Sincerely

Sophie Ballinger  
**Mountain Planning Manager**
