1 Introduction

This report provides the NSW Department of Planning, Housing and Infrastructure's (the Department) assessment of an application to modify the development consent for the construction of Black Bear Inn (MOD 24/14453 (DA 10064 MOD 4)).

The modification application seeks approval for internal changes to the lobby ceiling on Levels 4, 5 and 6, relocation of the roof hatch and provision of communication cable outlets, solar panels and refinements of external cladding.

The application has been lodged by Hidali Pty Ltd (the Applicant) pursuant to section 4.56 of the *Environmental Planning and Assessment Act 1979* (EP&A Act).

Figure 1 | Black Bear Inn site in context of Thredbo Village and adjoining buildings, prior to demolition of the previous building (Source: SIX Maps 2022)

1.1 Background

The subject site is known as the 'Black Bear Inn' site, (Lot 794 DP 1119757), Diggings Terrace, located in Thredbo Village, within Kosciuszko Nation Park (KNP) (**Figure 1**). The site has an area of approximately 687.5 sqm with a frontage to Diggings Terrace of approximately 24 metres (including the part of the site along the access point to the adjacent Candlelight Lodge) and a depth of approximately 28 metres.

The site slopes steeply from Diggings Terrace to the rear, with a north-westerly aspect and views of the Ramshead Range and the Thredbo ski slopes.

Works have commenced on the site following the NSW Land and Environment Court approval of the redevelopment of the former Black Bear Inn (NSW LEC No. 2020/68009). The former building has been demolished and construction has commenced.

The buildings immediately adjacent to the site include Candlelight Lodge to the east, Sasha's Apartments to the west and Mowamba Apartments to the north. Hi Noon Ski Club is located across Diggings Terrace to the south.

1.2 Approval History

On 17 May 2021, the NSW LEC approved DA 10064 (NSW LEC No. 2020/68009) (**Figure 2**) for:

'Demolition of existing building and erection of a 7-storey building comprising four dual key apartments (or eight self-contained apartments); four traditional two-bedroom apartments; car parking; all to be used as tourist accommodation at 30 Diggings Terrace, Thredbo Village'.

The approval included a basement storage area and a future restaurant on Level 1.

Figure 2 | Approved development, southern frontage to Diggings Terrace (Source: NSW LEC approval)

The development has been subject to three modification applications which have been determined by the Department (**Table 1**).

Table 1 | Summary of Modifications

Mod No.	Summary of Modifications	Approval Authority	Modification Type	Approval Date
MOD 1	Deletion of Level 0 (minus required egress), internal reconfiguration of Level 1 and minor RL amendments, and thickened slab on North Elevation.	Department	Section 4.56	14 July 2022
MOD 2	Internal amendments to apartment layout, minor RL amendment to level 2, increase in bed numbers, deletion of chimneys and reconfiguration of roof, addition of louvers in carpark, minor façade amendments and landscaping changes	Department	Section 4.56	23 December 2022
MOD 3	Minor design amendments to the external façade, internal layout of the approved building, and correction to plan errors determined under MOD 2.	Department	Section 4.56	7 September 2023

2 Proposed Modification

The proposed modifications are summarised below and discussed in the following sections:

- Minor internal configuration amendments
- Minor external changes

2.1 Internal configuration amendments

The Applicant has proposed minor internal modifications to rationalise the design and functionality of the building, including:

- Adjustment to the bin room landscaping and door access for accessibility (**Figure 3** and **Figure 4**)
- Refinements of Apartment 402 internal layout (**Figure 3** and **Figure 5**)
- Deletion of the lobby ceiling void at Levels 4, 5 and 6 (**Figure 6** to **Figure 8**)

Figure 8 | Approved (left) and proposed (right) layout of void at Level 6 (Source: Department's Stamped Plans 2023 and Applicant's SEE 2024)

2.2 External amendments

The Applicant has proposed minor external changes to the building, as identified in **Table 2**. The amendments are illustrated in **Figure 9** to **Figure 14** below.

Table 2 | Summary of proposed external modifications

Level	Summary of Modifications
Roof	<ul style="list-style-type: none">• Provision of solar panels 10kW max photovoltaic• Relocation of roof hatch• Provision for communication cable outlets behind approved parapet• Clarification for ventilation outlets behind approved parapet

3 Strategic Context

The Snowy Mountains region offers a diverse and unique mix of visitor destinations including the KNP, the alpine resorts, the iconic Snowy River and the highest mountains on the Australian continent. A strong tourism economy is driven mainly by skiing and related winter sport experiences during the peak winter season. The region, including the alpine resorts, also provides opportunities for a range of other recreational activities during the warmer months such as hiking, fishing, kayaking and mountain-biking. The resorts are important to NSW due to their economic and social contribution as well as their location within a unique alpine environment. The three main documents that support the strategic context of the alpine resorts are the *South East and Tableland Regional Plan 2036*, the *Draft South East and Tableland Regional Plan 2041*, the *Snowy Mountains Special Activation Precinct Master Plan* and the *Precincts - Regional SEPP*.

South East and Tableland Regional Plan 2036

The South East and Tableland Regional Plan 2036 describes the vision, goals and actions that will deliver greater prosperity for those who live, work and visit the region. The Plan provides an overarching framework to guide more detailed land use plans, development proposals and infrastructure funding decisions. In relation to the alpine resorts, the Regional Plan seeks to promote more diverse tourism opportunities in the Snowy Mountains that will strengthen long-term resilience while acknowledging the environmental and cultural significance of the locality.

The Department considers the proposal continues to be consistent with the Regional Plan as the proposal maintains the approved use of the site for tourist accommodation and a restaurant, such that the proposed development continues to support visitation to the NSW ski resorts.

Draft South East and Tableland Regional Plan 2041

The draft plan was publicly exhibited originally between 8 August 2022 until 23 September 2022. The draft plan underwent extensive consultation with the community and stakeholders with feedback incorporated into an updated version of the draft plan that was re-exhibited from 9 December 2022 to 31 January 2023. The draft plan identifies the alpine areas as providing important biodiversity to the region and acknowledges the alpine area's contribution to the region's tourism economy.

The proposal continues to be consistent with the draft Regional Plan as it will not result in adverse biodiversity impacts and supports the maintenance of visitation to the resort, along with the local and regional economy.

Snowy Mountains Special Activation Precinct Master Plan

The Snowy Mountains Special Activation Precinct Master Plan outlines the 40-year vision for the Snowy Mountains as a year-round tourist destination with new business opportunities, services and community infrastructure for the people that live, work and visit the region.

Section 9.1.1 of the Master Plan relates to Thredbo. The Department considers the proposal to be consistent with the Master Plan as the proposal, once constructed, provides a new visitor accommodation premises while maintaining the environmental, cultural and streetscape attributes of Thredbo.

Precincts – Regional SEPP

The Precincts – Regional SEPP governs development on land within the ski resort areas of KNP. Chapter 4 of the SEPP aims to protect and enhance the natural environment, to protect cultural heritage within the resorts and to ensure that development in the resorts is managed in a way that is compatible with the principles of ecologically sustainable development. Under the provisions of section 4.27 of the Precincts – Regional SEPP, the NPWS has a commenting role as the land manager, which includes administering the Plan of Management framework for KNP that incorporates objectives, principles and policies to guide the long-term management of the KNP.

The Department considers the proposal continues to be consistent with Chapter 4 of the Precincts – Regional SEPP as the modification does not increase the adverse impacts of the development on the environment or detract from the character of the approved development. The proposal would also continue to contribute to the ongoing range of accommodation options available for visitors to the KNP.

4 Statutory context

4.1 Scope of modifications

Section 4.56 of the EP&A Act provides that a consent authority may, on an application being made by the applicant or any other person entitled to act on a consent granted by the Court, and subject to and in accordance with the *Environmental Planning and Assessment Regulations 2021* (EP&A Regulations), modify a consent if the following requirements in **Table 3** are met:

Table 3 | Consideration under Section 4.56(1) of the EP&A Act

Section 4.56(1)	Summary of Modifications
(a) The development to which the consent as modified relates is substantially the same development as the development for which the consent was originally granted and before that consent as originally granted was modified (if at all)	<p>The proposed internal and external changes to the built form are minor in nature and are not considered to vary significantly from the original consent with regard to either site impacts or the presentation of the development when viewed from the public domain. The internal changes proposed improve the functionality and amenity for the occupants of the apartments and are supported.</p> <p>The Department is satisfied that the development to which the consent as modified relates is substantially the same development as the development for which consent was originally granted and before that consent as originally granted was modified.</p>
(b) The application has been notified in accordance with: <ul style="list-style-type: none"> (i) the regulations, if the regulations so require, and (ii) a development control plan, if the consent authority is a council that has made a development control plan that requires the notification or advertising of applications for modification of a development consent, and 	<p>Consistent with Part 5 the EP&A Regulation 2021 and in accordance with the Department's Community Participation Plan (CPP) of November 2019, the Department publicly exhibited the modification application for a minimum of fourteen (14) days to nearby lodges and previous submitters, and it was made publicly available on the NSW Planning Portal website (refer to Section 5 of this report).</p> <p>No DCP applies to the site.</p>
(c) Whether the consent authority has notified, or made reasonable attempts to notify, each person who made a submission in respect of the relevant development application of the proposed modification by sending	<p>The Department notified each person who previously made a submission to the approved development. Two (2) submissions to the modification were received, which is considered in Section 5 and 6 of this report.</p>

written notice to the last address known to the consent authority of the objector or other person, and

-
- | | |
|---|--|
| (d) Consideration of any submissions made concerning the proposed modification within the period prescribed by the regulations or provided by the development control plan, as the case may be. | The Department has considered the agency submissions and the two (2) public submissions received during the exhibition period (refer to Section 5 and 6 of this report). |
|---|--|
-

Section 4.56(1A) of the EP&A Act provides that in determining an application for modification of a consent under this section, the consent authority must take into consideration such of the matters referred to in section 4.15(1) as are of relevance to the development the subject of the application. The consent authority must also take into consideration the reasons given by the consent authority for the granting of the consent that is sought to be modified.

The relevant consideration under section 4.15(1) of the EP&A Act in relation to the proposed modifications is whether the impacts of the amendments upon the existing environment and built form are acceptable. The Department's assessment in **Section 6** concludes that the impacts are acceptable and do not deviate significantly (if at all) from the likely impacts of the development as considered in the NSW LEC approval of the development, including environmental impacts on both the natural and built environments, and social and economic impacts in the locality.

Therefore, the Department is satisfied the proposed modification is within the scope of section 4.56 of the EP&A Act and does not constitute a new development application. Accordingly, the Department considers that the application should be assessed and determined under section 4.56 of the EP&A Act rather than requiring a new development application to be lodged.

4.2 Consent authority

The original application was determined by the NSW LEC with the Applicant taking the Minister for Planning and Public Spaces to the NSW LEC to seek resolution of Development Application DA 10064. While the original development application was determined by the Court, the Minister remains the consent authority for any subsequent applications to modify the consent under section 4.56 of the EP&A Act.

Under section 4.4 of the Precincts – Regional SEPP, the Minister for Planning is the consent authority for the application as the development takes place within a ski resort area as referred to in section 32C (2)(a) of Schedule 1 to the *Environmental Planning and Assessment (Savings, Transitional and Other Provisions) Regulation 2017*.

In accordance with the Minister's delegation dated 9 March 2022, the Team Leader - Assessments, Alpine Resorts Team may determine the application as:

- no reportable political donation has been disclosed,
- there are less than 15 public submissions in the nature of objections, and
- the application is in relation to land to which Chapter 4 of the Precincts – Regional SEPP applies.

4.3 Mandatory matters for consideration

The Department conducted a comprehensive assessment of the project against the mandatory matters for consideration as part of the original assessment of DA 10064 and the NSW LEC conciliation process. The Department considers this modification application does not result in significant changes that would alter the mandatory matters for consideration under section 4.15 of the EP&A Act and conclusions made as part of the original assessment.

Objects of the EP&A Act

The Minister or delegate must consider the objects of the EP&A Act when making decisions under the Act. The Department is satisfied the proposed modification is consistent with the objects of the EP&A Act.

Biodiversity Conservation Act 2016

Section 1.7 of the EP&A Act requires the application of the *Biodiversity Conservation Act 2016* (BC Act) in connection with the terrestrial environment. The BC Act introduced a Biodiversity Offsets Scheme (BOS) that applies when:

- the amount of native vegetation being cleared exceeds a certain threshold area; or
- the impacts occur within an area mapped on the Biodiversity Values Map (BVM) published by the Minister for Environment; or
- the 'test of significance', in section 7.3 of the BC Act, identifies that the development or activity is likely to significantly affect threatened species or ecological communities, or their habitats; or
- the works are carried out in a declared area of outstanding biodiversity value.

The Applicant confirmed that all vegetation on site that has previously been cleared, was cleared under previous consents when enacted. The proposed modifications do not result in any additional clearing of vegetation. A review of the subject site in relation to the BVM shows that the site is not mapped as comprising high biodiversity value.

Having regard to the proposed modifications and the previous approval for the removal of vegetation from the site (issued by the NSW LEC), the Department is satisfied that the proposal does not trigger the BOS.

The Department also notes that there is currently no declared area of outstanding biodiversity value within Kosciuszko National Park.

Environmental Planning Instruments

An assessment of compliance with the then *State Environmental Planning Policy (Kosciuszko National Park-Alpine Resorts) 2007* (the Alpine SEPP) was undertaken in the determination of the original development application (DA 10064) by the NSW LEC. The former Alpine SEPP was superseded by the Precincts - Regional SEPP in March 2022, and now the Precincts - Regional SEPP is the EPI that applies to this application.

The Department has considered the current modification application against the provisions of the Precincts – Regional SEPP and is satisfied the modification proposal continues to be consistent with this EPI.

5 Engagement

5.1 Department's engagement

The Department's Community Participation Plan (CPP), April 2024, prepared in accordance with Schedule 1 of the EP&A Act requires an application for modification of development consent not required to be exhibited by the EP&A Regulations to be exhibited for a timeframe dependent on the urgency, scale and nature of the proposal.

However, as discussed in **Section 4** above, the EP&A Act requires the consent authority to notify, or made reasonable attempts to notify, each person who made a submission in respect of the relevant development application of the proposed modification by sending written notice to the last address known to the consent authority of the objector or other person.

On this basis, the Department made the application publicly available, notified nearby lodges and previous submitters to the original development application between 14 October 2024 and 28 October 2024 on the NSW Planning Portal website.

The application was referred to the NSW Rural Fire Service (RFS) pursuant to section 4.46 of the EP&A Act (integrated development) as a Bushfire Safety Authority (BFSA) under the *Rural Fires Act 1997* is required for the development to be carried out. The application was also referred to the National Parks and Wildlife Service (NPWS) pursuant to section 4.27 of the Precincts – Regional SEPP.

Following the exhibition of the application, the Department placed copies of all submissions received on its website and forwarded these to the Applicant.

5.2 Summary of submissions

During the exhibition period, the Department received submissions from the RFS, the NPWS and two (2) public submissions from nearby residences providing objections to the proposed modifications.

RFS

The RFS did not object to the proposal and advised that no additional comments were required to those already provided in relation to the original application and the Bushfire Safety Authority (BFSA) issued.

NPWS

The NPWS did not object to the modification and commented that the previous comments to the proposal remain relevant.

Public submissions

The Department received one (1) public objection and one (1) submission providing comments during exhibition of the application.

The objection raised by the public primarily related to further potential intrusion into the northern view of the neighbouring Golden Eagle Apartments (located south of the proposal area) and potential visual impacts of the proposed solar panels.

The comments provided expressed support for the proposed design but noted that the modifications could be viewed from the submitter's property (in particular, the main viewing windows and balcony). Clarification was sought regarding the dimensions of the solar panels and if the installation of the solar panels would result in an increase in height above the maximum RL datum of 1400.760m.

The Applicant provided a response to the concerns outlined in the public submissions, which can be identified in **Section 6**.

6 Assessment

In assessing the merits of the proposed modification, the Department has considered the:

- previous Environmental Assessment Reports for the proposal and the NSW LEC approval,
- the modification application and existing conditions of consent,
- submissions from government agencies, and
- matters for consideration under section 4.15(1) of the EP&A Act.

The Department considers the key assessment issues associated with the modification application are:

6.1 Internal configuration amendments

As discussed in **Section 2.1**, the Applicant has proposed minor internal changes to the building to adjust the bin room landscaping and door access for accessibility, refine the internal layout of Apartment 402 and delete the lobby ceiling void at Levels 4, 5 and 6. The proposed modifications are primarily to allow for compliance with the relevant accessibility provisions and improve the functionality of the space, and would not alter the approved use as a tourist accommodation building.

The Department considers there are no additional impacts created by the proposed internal amendments and consequently considers this modification to be acceptable.

6.2 External changes

As discussed in **Section 2.2**, the Applicant has proposed external amendments to provide solar panels on the roof, relocate the roof hatch, provide communication cable outlets behind approved parapet, clarify the location of ventilation outlets and refine the external cladding. The Applicant notes that the external changes proposed remain within the site boundary and do not alter the built form, RL or building setbacks to the boundary approved by the LEC.

During exhibition, two submissions were provided from neighbouring lodges:

- An objection from a neighbouring lodge to the south of the proposal area, due to concerns that the proposed solar panels would cause further vertical intrusion that would affect views to the north (towards Mount Kosciuszko).
- Comments from the Hi Noon Ski Club that expressed support for the proposed design but noted that the modifications could be viewed from the submitter's property (in particular, the main viewing windows and balcony). Clarification was sought regarding the dimensions of the solar panels and if the installation of the solar panels would result in an increase in height above the maximum RL datum of 1400.760m.

The Applicant provided a response to submissions (RTS) on 31 October 2024. The RTS clarified that:

- the overall dimensions in plan will be no larger than the approved pop-up roof, which is 54.5 m² (7.78m east-west by 7m north-south), in section, it will be no thicker than 140mm (see **Figure 15**)
- the installation system will include clips, a slim subframe and the solar panels, which will be less than 140mm in depth altogether

Figure 15 | The dimensions of the proposed solar panels (Source: Applicant's RTS 2024)

The Department's assessment of the external modifications considers that these modifications are considered minor, have limited visual impact upon adjoining lodges and does not negatively impact the approved built form.

The Department concludes there are no additional impacts created by the proposed external amendments, and consequently consider this modification to be acceptable.

6.3 Design details and standards

The proposed works, when constructed, are to comply with the Building Code of Australia (BCA) and relevant Australian Standards. The Department notes that compliance with relevant requirements is to be determined at the construction certificate stage by the Certifier and in accordance with conditions of consent. All new work (or work as part of the DA) must comply with the BCA. The Department considers that compliance with the BCA is achievable, with documentation confirming compliance required to be provided at the Construction Certificate stage.

7 Recommendation

The Department has assessed the modification application and supporting information in accordance with the relevant requirements of the EP&A Act and considered the submissions provided by the public and the NPWS and RFS.

The Department's assessment concludes that the proposed modification is appropriate as it is substantially the same development as originally approved; the proposed modifications to conditions are acceptable; the proposal continues to comply with the Precincts – Regional SEPP provisions; all submissions received during the assessment of the application have been considered; and the proposal does not result in any additional matters that required consideration under Section 4.15(1) of the EP&A Act.

Overall, the Department concludes that the modifications to the approved NSW LEC application are acceptable and does not negatively impact the suitability of the proposal as approved by the NSW LEC.

The Department therefore recommends that the application be approved, subject to changes to the existing conditions of consent (**Appendix C**). In accordance with the Minister's delegation dated 9 March 2022, the Team Leader - Assessments, Alpine Resorts Team may determine the application as:

- no reportable political donation has been disclosed,
- there are less than 15 public submissions in the nature of objections, and
- the application is in relation to land to which Chapter 4 of the Precincts – Regional SEPP applies.

It is recommended that the Team Leader - Assessments, Alpine Resorts Team, as delegate of the Minister for Planning:

- **considers** the findings and recommendations of this report
- **determines** that the modification application MOD 24/14453 (DA 10064 MOD 4) falls within the scope of section 4.56(1) of the EP&A Act
- **accepts and adopts** all of the findings and recommendations in this report as the reasons for making the decision to approve the modification
- **modifies** the consent DA 10064
- **signs** the attached approval of the modification (**Appendix C**).

Recommended by:

Meg D'souza
Planning Officer
Alpine Resorts Team

Adopted by:

Mark Brown
Team Leader, Assessments
Alpine Resorts Team
as delegate of the Minister for Planning

21 November 2024

Appendices

Appendix A – Modification Report

The following supporting documents and supporting information to this assessment report can be found on the NSW Planning Portal website as follows:

<https://pp.planningportal.nsw.gov.au/development-assessment/state-significant-applications/projects/state-development-applications>

Appendix B – Submissions

The Department made the application publicly available and notified adjoining lodges and previous submitters to the NSW LEC application within Thredbo Alpine Resort of the application between Monday 14 October 2024 and Monday 28 October 2024.

The application was referred to the RFS (as the original and modification is integrated development) and NPWS pursuant to section 4.27 of Chapter 4 of the Precincts-Regional SEPP, with comments received. Two (2) submissions from the public were received.

Appendix C – Notice of Modification
