### No Evidence

In terms of this project, **no artefactual evidence** was identified that had Aboriginal significance. Moama Local Aboriginal Land Council will not be required for further site inspection and/or monitoring. In addition, there is nothing at this stage to halt or delay the continuation of your project works.

However, should skeletal material or anything of Aboriginal significance be exposed, during ground disturbance, work within the project area must cease immediately and contact made with the Moama LALC initially who will organize a sites worker to be in contact with your organization. As per the *National Parks and Wildlife Act 1974* it is an offence to destroy or remove anything of Aboriginal significance.

All Aboriginal cultural places in NSW are protected by law. Aboriginal artefacts are also protected. It is illegal to disturb or destroy an Aboriginal place. Artefacts should not be removed from site.

If requested the Moama LALC is willing to provide a brief training session to those who may be working on the site in order to ensure that they have a nominal understanding of potential Aboriginal objects/places.

Please do not hesitate to contact me if you have any queries regarding the context of this report and I will endeavor to answer them for you. On behalf of Moama LALC, I wish you well with your forthcoming project.

Kind Regards
