Subject: Re: Architectural Plan slight correction of displayed path position
Attachments: Draft revision of footpath v1 Feb2025.pdf

Hi Paul,

This is to advise that the attached change of path position has no impact on the assessment and recommendations included in our geotechnical report prepared for this development, reference 7404-R1 Rev2 dated 18 January 2025.

Kind regards,

Mark Bartel

Hi Mark

Further to my phone message, we are in final discussions with NSW Planning on our DA approval and they are wanting us to verify with our consultants, that a minor change

they require to be made to the plans for the marked path position to the survey overlay has no implications from your point of view for your reports.

The attached draft drawing represents where the actual path's position should be on the plans identified as inserted in blue. The only difference is the diagrammatical positioning on the plan and no change to surveying position. We are in the process of getting our draftsman to make this change.

Would you please verify by return email that your reports are not affected by the diagrammatical change. We are trying to finalise this in the next day and would greatly appreciate your early confirmation.

Kind Regards

Paul Kupacz
