

NABERS Embodied emissions mater

New non-residential developments must complete this for

From 1 October 2023, all new non-residential developments must report on embodied NSW government's State Environmental Planning Policy (Sustainable Buildings SEPP) of key materials at the development application and construction certificate stages.

More on the Sustainable Buildings SEPP

Embodied carbon emissions are generated across the full life cycle of a building from " 16% of the whole-of-life carbon footprint of Australia's buildings in 2019 [1]. The purpos only, to support project team discussions about potential reduction in emissions from keembodied emissions factors. This reporting form will be updated to reflect the NABERS 2024.

Step 1: About the building

In the 'About the building' tab, you will add the location, function, and type of building y_i to add information that describes the building, including gross floor area, number of flor information will allow the NSW Government to compare similar buildings.

Step 2: Quantity of materials

In the 'Quantity of materials' tab, you will add the amounts of materials that you will use complete those fields relevant to your building. Leave fields that aren't relevant to your uncertainty, particularly at DA stage, so please use your best estimates where informat

How much do I need to include?

You must include all parts of the building delivered by the main contractor, covering at if you spent \$100,000 on materials, you need to include the material amounts of at least

Wherever possible, consider materials costs only, not labour, plant or equipment. How costs, please simply be consistent in the way the costs are reported throughout the spr

Enter the quantity of materials (excluding labour, plant, equipment, margins and taxes

- (1) Structure (substructure and superstructure) within the envelope of the building. Also necessary for the main building to function (for example, plant that is in a separate building to function (for example, plant that is in a separate building to function (for example, plant that is in a separate building to function (for example, plant that is in a separate building).
- (2) Envelope (cladding, curtain walls, roofing, windows, doors etc.)
- (3) Permanent internal walls and doors. At minimum, this should include all structural w

(4) External works (hard landscaping, carparks, etc.) outside of the building envelope.

Enter the cost of materials (excluding labour, plant, equipment, margins and taxes) fo

(5) Building services (mechanical, electrical, plumbing, vertical transport, etc.) required equipment required by a particular tenant.

You must enter the amounts of materials in SI units (commonly known as the metric sy various products on the market. However, you might need to convert the units of some

Step 3: Certifier details

In the 'Certifier' tab you will add the details of the person who has entered data, and the data. The certifier must be a quantity surveyor, designer, engineer or NABERS assess

Step 4: Attach to approval

Attach this Excel spreadsheet to your development application or construction certifical

The data collected in this form will be used by the NSW Government to inform future p

Help!

If you have general questions about reporting on the embodied emissions of your build consent authority.

If you have technical questions about this spreadsheet, please contact NABERS: nabers@environment.nsw.gov.au

Please enter reinforcing steel as part of "Reinforcing steel" below

Please enter reinforcing steel as part of "Reinforcing steel" below

Please enter reinforcing steel in relevant line items below. If not known at DA stage, please make your best estimate. If not known at CC stage, please ask your supplier.

Enter as cubic metres, calculated as (area in m2) * (thickness in mm / 1000).

Please include all block fill concrete and all reinforcing steel in relevant line items above/below.

Enter as <u>cubic metres</u>, calculated as (area in m²) * (thickness in mm / 1000)

Solid Aerated Autoclaved Concrete (AAC) block.

Enter as <u>cubic metres</u>, calculated as (area in m²) * (thickness in mm / 1000).

Include all reinforcing steel bar/mesh in the building's structure in this row. Usually this is calculated as kg/m³ per concrete element and then summed. Example: 10 m³ of 40 MPa concrete @ 100 kg/m³ + 5 m³ of 50 MPa concrete @ 150 kg/m³ = 1,750 kg reinforcing steel.

Include all steel fibre reinforcing and steel strand in the building's structure in this row.

Examples include universal beams, universal columns and welded beams

Examples include C purlins, Z purlins and all light gauge steel framing

Include any allowance for connections here

Primarily for engineered timber structure connections

Please enter reinforcing steel in the line below. If not known at DA stage, please make your best estimate. If not known at CC stage, please ask your supplier.

If not known at DA stage, please make your best estimate. If not known at CC stage, please ask your supplier.

Where concrete and reinforcing steel are also used, enter these in the rows above.

Where concrete and reinforcing steel are also used, enter these in the rows above.

Enter as <u>cubic metres</u>, calculated as (area of wall in m²) * (thickness in mm / 1000)

Include purchased material only. Exclude site-won material.

Include purchased material only. Exclude site-won material and sand/gravel in concrete.

Please enter a description for any structural material that does not fit a predefined classification Please enter a description for any structural material that does not fit a predefined classification Please enter a description for any structural material that does not fit a predefined classification

Required. Coverage of <u>spend</u> for the envelope items you have entered below. Minimum requirement = 80%. Exclude head contractor preliminaries and margins.

Enter as m² of roof area. Exclude allowances for overlap in the roofing sheets. This row includes all metal-coated and pre-painted steel sheets where steel is the base metal. Examples include: galvanised steel, zinc-aluminium (zincalume) coated steel and zinc-aluminium-magnesium (ZAM) coated steel, whether painted or unpainted.

Enter as m² of roof area. Exclude allowances for overlap in the roofing sheets. This row also includes pre-painted aluminium sheets.

Enter as m^2 of roof area. Exclude allowances for overlap in the roofing sheets. This row also includes pre-painted zinc sheets.

Enter as m² of roof area. Exclude allowances for overlap in the membrane sheets.

Enter as m² of roof area. Exclude allowances for overlap between the tiles.

Enter as m² of roof area. Exclude allowances for overlap between the tiles.

Please enter a description for any roofing that does not fit a predefined classification

Enter as m² of wall area. Heat-cured bricks use a kiln or furnace to raise the brick temperature above ambient temperature during curing process.

Enter as m² of wall area. Air-dried bricks are cured using ambient temperature.

Enter as m² of wall area.

Enter as m2 of wall area

Enter as m² of wall area. Exclude allowances for overlap in the cladding sheets, offcuts, etc. This row includes all metal-coated and pre-painted steel sheets where steel is the base metal. Examples include: galvanised steel, zinc-aluminium (zincalume) coated steel and zinc-aluminium-magnesium (ZAM) coated steel, whether painted or unpainted.

Enter as m² of wall area. Exclude allowances for overlap in the cladding sheets, offcuts, etc. This row also includes pre-painted aluminium sheets.

Enter as m² of wall area. Exclude allowances for overlap in the cladding sheets, offcuts, etc. This row also includes pre-painted zinc sheets.

Enter as m² of wall area. GRC = Glass Reinforced Concrete.

Enter as m² of wall area. Exclude allowances for overlap between weatherboards, offcuts, etc.

Enter as m² of wall area. Exclude allowances for offcuts, etc.

Enter as m² of wall area. Exclude allowances for offcuts, etc.

Enter as m² of wall area. Exclude allowances for offcuts, etc.

Enter as m² of wall area. Exclude allowances for offcuts, etc. Include both external wall linings and internal wall linings for envelope walls.

Enter as m² of wall area. Exclude allowances for offcuts, etc. Include both external wall linings and internal wall linings for envelope walls.

Please enter a description for any wall cladding that does not fit a predefined classification

Include all single glazing, including standard, toughened, laminated and low-E

Include all double glazing, including standard, toughened, laminated and low-E

Please enter a description for any material that does not fit a predefined classification

Where possible, enter material costs excluding labour, plant, equipment, margins and taxes

Where possible, enter material costs excluding labour, plant, equipment, margins and taxes

Electrical services including the main power supply, backup generators, security and communications. Excluding solar installations.

Where possible, enter material costs excluding labour, plant, equipment, margins and taxes.

Where possible, enter material costs excluding labour, plant, equipment, margins and taxes

Where possible, enter material costs excluding labour, plant, equipment, margins and taxes

Where possible, enter material costs excluding labour, plant, equipment, margins and taxes

Please group all other services here, meaning that coverage will always be 100% for services. Enter only the material costs (excluding labour, plant, equipment, margins and taxes).

Required. Coverage of <u>spend</u> for external works (excluding soft landscaping) entered below. Minimum requirement = 80%. Exclude head contractor preliminaries and margins.

Please enter reinforcing steel as part of "Reinforcing steel" below Please enter reinforcing steel as part of "Reinforcing steel" below Please enter reinforcing steel as part of "Reinforcing steel" below Please enter reinforcing steel as part of "Reinforcing steel" below Please enter reinforcing steel as part of "Reinforcing steel" below Please enter reinforcing steel as part of "Reinforcing steel" below Please enter reinforcing steel as part of "Reinforcing steel" below

Include all reinforcing steel bar/mesh in the external works in this row. Usually this is calculated as kg/m³ per concrete element and then summed. Example: 10 m³ of 40 MPa concrete @ 100 kg/m³ + 5 m³ of 50 MPa concrete @ 150 kg/m³ = 1,750 kg reinforcing steel.

Include all steel fibre reinforcing and steel strand in the external works in this row.

Includes structures, louvre systems, etc.

Enter as profiled polycarbonate sheet that would ordered, including allowance for overlap

Enter as profiled PVC sheet that would ordered, including allowance for overlap

Enter as bituminous sheet that would ordered, including allowance for overlap

Enter as profiled steel sheet that would ordered, including allowance for overlap

Include purchased material only. Exclude site-won material.

Include purchased material only. Exclude site-won material and sand/gravel in concrete.
