## Statement of Environmental Effects (SEE) Form for Minor Development

A Statement of Environmental Effects (SEE) is required for all Development Applications.

By completing this form or submitting your own Statement of Environmental Effects, you are demonstrating you have considered the impacts of your proposed development.

If the question is not relevant or you are unsure, please indicate **NOT APPLICABLE** or **UNSURE**.

If you do not provide sufficient information, the Development Assessment Planner will require additional information which can result in delays in obtaining an outcome.

Have any questions? Please call the Development Hub (02) 6767 5555 or email <u>development@tamworth.nsw.gov.au</u>

#### Does your proposal meet all local controls?

- Local controls include minimum setback distance, maximum height and site coverage. Check the Tamworth Regional Development Control Plan 2010
- □ Yes, it complies with all the local controls
- No, I am seeking a variation(s) (Please explain why a variation is required)

i am seeking variations in relation to the distance from the side boundary as the shed is proposed at 400mm from the side boundary of the property. The existing shed is built right on the side boundary and has proved to not be an issue to neighbouring propertys in the past. it has not caused any loss of deprevation or restricted amenities / sunlight to the neighbouring yard.

If you need additional space, please use the space provided on page 4 or add extra pages

#### WATER SENSITIVE ESSENTIALS

 Compliance with at least 2 out of 5 Water Sensitive Essentials (WSE) measures are required for any proposed developments requiring connection to reticulated (town) water and sewer services

I nominate the following Water Sensitive Essentials (WSE) measures to be implemented with my proposed development:

- Water Efficient Appliances and Fittings with a minimum rating of 4 WELS stars
- Rainwater Tank(s) with a capacity of 10,000 litres or more – an appropriate mechanism is to be provided for automatically switching to the town water supply (if available) when the volume of water in the rainwater tank(s) is low.
- Landscaped Stormwater Retention Area (Rain Garden) with a minimum of 5m<sup>2</sup> of retention area and must be designed by a suitably qualified person.
- □ Grey Water Diversion Device with a handactivated valve, switch or tap that is fitted to the outlet of the waste pipe of the laundry tub/bathroom fitting. There is a minimum of 10 m<sup>2</sup> dedicated land application system.
- Grey Water Treatment Device with accreditation by the NSW Department of Health and to be approved by Council for installation and operation under Section 68 of the Local Government Act 1993 and Part 2, Division 4 Local Government (General) Regulation 2005.
