The applicant must install a photovoltaic system as part of the development. The applicant must connect this system to the development's electrical system.	✓	✓	✓
The photovoltaic system must consist of:			
• one set of photovoltaic collectors with the capacity to generate at least 1.7 peak kilowatts of electricity, installed at an angle between 0 degrees and 10 degrees to the horizontal facing north	✓	✓	✓
• another set of photovoltaic collectors with the capacity to generate at least 1.7 peak kilowatts of electricity, installed at an angle between 0 degrees and 10 degrees to the horizontal facing north	✓	✓	✓

## Legend

In these commitments, "applicant" means the person carrying out the development.

Commitments identified with a  in the "Show on DA plans" column must be shown on the plans accompanying the development application for the proposed development (if a development application is to be lodged for the proposed development).

Commitments identified with a  in the "Show on CC/CDC plans and specs" column must be shown in the plans and specifications accompanying the application for a construction certificate / complying development certificate for the proposed development.

Commitments identified with a  in the "Certifier check" column must be certified by a certifying authority as having been fulfilled, before a final occupation certificate (either interim or final) for the development may be issued.
