

Development Application

JCDecaux (on behalf of Sydney Trains) has submitted a development application. The development application seeks consent for the removal of two large-format static vinyl third party advertising signs and replacement with a digital advertising signage at the George Street railway overpass. The proposed digital screen has a dimension of 7.936m x 2.048m. Along with third-party advertisements, the digital advertising signage will display emergency messages and other public awareness messages.
