## BASIX™Certificate

Building Sustainability Index www.planningportal.nsw.gov.au/development-and-assessment/basix

## **Alterations and Additions**

Certificate number: A1796472

This certificate confirms that the proposed development will meet the NSW government's requirements for sustainability, if it is built in accordance with the commitments set out below. Terms used in this certificate, or in the commitments, have the meaning given by the document entitled "BASIX Definitions" dated 10/09/2020 published by the Department. This document is available at www.planningportal.nsw.gov.au/definitions

## Secretary

Date of issue: Wednesday, 21 May 2025

To be valid, this certificate must be lodged within 3 months of the date of issue.

| Glazing requirements   | Show on<br>DA Plans | Show on CC/CDC<br>Plans & specs | Certifier<br>Check |
|--|---------------------|---------------------------------|--------------------|
| Windows and glazed doors   | -                   |                                 |                    |
| The applicant must install the windows, glazed doors and shading devices, in accordance with the specifications listed in the table below. Relevant overshadowing specifications must be satisfied for each window and glazed door.  | ~                   | ~                               | ~                  |
| The following requirements must also be satisfied in relation to each window and glazed door:  |                     | ~                               | ~                  |
| Each window or glazed door with improved frames, or pyrolytic low-e glass, or clear/air gap/clear glazing, or toned/air gap/clear glazing must have a U-value and a Solar Heat Gain Coefficient (SHGC) no greater than that listed in the table below. Total system U-values and SHGCs must be calculated in accordance with National Fenestration Rating Council (NFRC) conditions. The description is provided for information only. Alternative systems with complying U-value and SHGC may be substituted. |                     | ~                               | ~                  |
| For projections described in millimetres, the leading edge of each eave, pergola, verandah, balcony or awning must be no more than 500 mm above the head of the window or glazed door and no more than 2400 mm above the sill.   | ~                   | ~                               | ~                  |
| For projections described as a ratio, the ratio of the projection from the wall to the height above the window or glazed door sill must be at least that shown in the table below.   | ~                   | ~                               | ~                  |
| Pergolas with polycarbonate roof or similar translucent material must have a shading coefficient of less than 0.35.  |                     | ~                               | ~                  |
| Pergolas with fixed battens must have battens parallel to the window or glazed door above which they are situated, unless the pergola also shades a perpendicular window. The spacing between battens must not be more than 50 mm.   |                     | ~                               | ~                  |

BASIX Certificate number:A1796472 page 8/8

## Legend

In these commitments, "applicant" means the person carrying out the development.

Commitments identified with a in the "Show on DA plans" column must be shown on the plans accompanying the development application for the proposed development (if a development application is to be lodged for the proposed development).

Commitments identified with a in the "Show on CC/CDC plans & specs" column must be shown in the plans and specifications accompanying the application for a construction certificate / complying development certificate for the proposed development.

Commitments identified with a in the "Certifier check" column must be certified by a certifying authority as having been fulfilled, before a final occupation certificate for the development may be issued.
