Bangus Gravel Quarry

Martin Hay
M H Earthmoving Pty Ltd
P O Box 227
Gundagai NSW 2722

Dear Martin,

RE: *Bangus Gravel Quarry, Tumblong Lot 7300 DP1147008 (R757213) and Lot 7004 DP1028797 (R89508)*
– Continuing use of Gravel by Council

Cootamundra Gundagai Regional Council are the appointed Land Manager under the Crown Land Management Act 2016, for Reserve No. 89508 for the purpose of Quarry. As such the land is managed by Council under the requirements of the Local Government Act 1993. Note that Reserve No. 757213 is also part of the same quarry that has been in operation for the past 35 years by Council registered by the Department of Industry Mining department. Both Reserve No 89508 and No. 757213 are currently subject to compulsory land acquisition applications by Council.

As the manager of the said land, in preparation for a proposed Development Application and remediation activities, I offer the following statement:

Council has an ongoing commitment to win gravel resources from the existing Bangus Quarry for the purpose of existing and future road maintenance, road construction and other civil works requiring quality gravel and fill material. The volume of material required to meet the needs of Council would typically range in the order of 8,000 m3 to 12,000 m3 per year to be won from the existing pit or excavated stockpiles. Council will continue to take gravel from the quarry footprint or adjacent stockpiles concurrently with MHE landfilling operations until such a time that available quarry or stockpiled materials were exhausted.

Should you, or a third party, require further information or wish to discuss the matter please contact the undersigned on 0413 884 164.

Yours faithfully

Phillip McMurray
Acting General Manager
