Stanbridge Solar Farm – Addendum

Leeton Shire has requested the proportion of Class 3 land that the project will occupy.

I am unable to find a data base that gives the area of Class 3 land in the Leeton Shire. Instead, the area of Class 3 land has been calculated from the Seed database.
<https://geo.seed.nsw.gov.au/vertigisstudio/web/?app=cabd04d595ec43c1aaf4298e80e83ec2>.

There are four areas of Class 3 land in the Shire. These are shown in the following map. I have used the mapping tool on the website to calculate the areas of each zone. The combined area is about 609 sq km = 60900ha. The solar project will cover approximately 22ha. This represents 0.036% of the Class 3 soil in the Shire
