Please provide your view on the application	Submission Do it: Approve this proposal and allow the expansion to provide more jobs for Newcastle and the Hunter Valley.	Submission attachment	I agree to the privacy statement	I understand that by clicking the Submit button, I am providing the information contained in this form to the Department of Planning Industry and Environment and confirm that that information is not false or misleading I have read and understood the above	Created
PublicSubmission	I am making a personal submission										North Rothbury	2335	New South Wales		I support it	The spare land is ready for the expansion and the current infrastructure can handle it.			Case SUB-16772 is created successfully.	15/05/2026 19:33
PublicSubmission	I am making a personal submission										waratah	2298	New South Wales		I support it	I assume this terminal will go hand in hand with an increase in heavy vehicle traffic. - It is now time to construct the industrial dr /university dr link road,this link road construction has to be part of the overall plan,for more effective movement of heavy vehicles thru the suburbs			Case SUB-16773 is created successfully.	15/05/2026 19:54
PublicSubmission	I am making a personal submission										East Maitland	2323	New South Wales		I support it	I can't see any reason the modification shouldn't be approved. It's a positive part of the broader Newcastle and Hunter economies need to diversify away from coal mining and exports, without taking away from those industries while they are still viable. Being a hardstand area it also doesn't lock the area into anything that can't easily be undone in the future if a better use is proposed in the future. As the site is already contaminated from the BHP Steelworks it seems like a good use of brownfield land that would be difficult to not be used as industrial land of some sort.			Case SUB-16782 is created successfully.	17/05/2026 8:34
PublicSubmission	I am making a personal submission											2295	2299	New South Wales	I object to it	I object to this storage development as if it is storing Ion Lithium batteries it should be in an area away from any residential areas and water ways. Also there is no rail transport for this facility so one can take that transport will be through trucks adding more congestion to local roads. I be happy for this to be a cargo storage but I object to this proposal of expansion to store Lithium batteries.			Case SUB-16833 is created successfully.	22/05/2026 11:23
