Modification Development Consent

No. DA57-06/07, DA57-06/07AM1, DA1-07/08-s96, DA10.2006.57.3
As Modified by No. 10.2006.57.4

Notice of determination of a development application pursuant to section 4.18(1)(a) of the *Environmental Planning and Assessment Act 1979* (the Act). Pursuant to section 4.55 of the Act, the development has been determined by the granting of consent subject to the attached conditions.

Endorsed date of consent: 24 November 2006, 3 July 2007, 6 December 2007 and 17 December 2014
Consent as modified on: 21 October 2021
Description of development: Modification Development Consent for Existing Quarry-Permit Blasting, Accept Foundry Slag and Sand
Attached: 1 Conditions
2 Endorsed plans

This Consent becomes effective and operates from the endorsed date of consent.

Pursuant to section 4.53 of the Act this Consent shall lapse if building, engineering, or construction work relating to the building, subdivision, or work is not physically commenced on the subject land within five (5) years from the endorsed date of consent.

Colin Kane
Director Environment & Planning
Registration No. 0878
GREATER HUME COUNCIL

Our Ref: CJK:SG:P10040111:P287-9495

Right of Review:

Pursuant to clause 100(1)(c1) of the *Environmental Planning and Assessment Regulation 2000* and section 8.2 of the Act it is advised that if you are dissatisfied with this determination you may request a review of this determination under section 8.3 of the Act within 6 months after the date on which you received this notice.

Right of Appeal:

Pursuant to section 8.7 of the Act it is advised that if you are dissatisfied with this determination you may appeal to the Land and Environment Court within 6 months after the date on which you received this notice.

Conditions of Modification Development Consent No. 10.2006.57.4

- 1 The Applicant shall implement all practicable measures to prevent and/or minimise any harm to the environment that may result from the construction, operation, or rehabilitation of the development.

Terms of Approval

- 2 The Applicant shall carry out the development generally in accordance with the:
 - a) *Environmental Impact Statement: Expansion of Table Top Quarry*, dated September 2006, prepared by Habitat Planning (EIS), and the *Statement of Environmental Effects* dated 19 June 2007 prepared by Habitat Planning, and
 - b) General Terms of Approval No. 1065634 'Attachment A' of the Department of Environment and Conservation, dated 14 November 2006, and
 - c) Information supplied with Modification DA 10.2006.57.3 including version 3 2014 of the Blast Management Plan which was modified to require a minimum notification process to residences (within 2500m of the quarry) of seven (7) days.
 - d) Conditions of this development consent, as amended.

If there is any inconsistency between the above, the conditions of this consent shall prevail to the extent of the inconsistency.

- 3 The Applicant shall comply with any reasonable requirement/s of the Greater Hume Shire Council arising from the Council's assessment/interpretation of:
 - a) the endorsed EIS;
 - b) any reports, plans or correspondence that are submitted to Council in accordance with this development consent; and
 - c) the implementation of any actions or measures contained in these reports, plans or correspondence.

Limits on Approval

- 4 This consent lapses:
 - a) after the Applicant has extracted 2,000,000 cubic metres of material from the development, or
 - b) 20 years after the date it commences, whichever comes first.
- 5 The Applicant shall not produce or transport more than 100,000 cubic metres of material a year from the development, but the Applicant may in circumstances deemed exceptional by Council, and only with the prior written approval of Council, produce or transport more than 100,000 cubic metres of material a year from the development. In forming a view about whether or not to grant such approval the Council will consider its statutory obligations and the overall risk of harm to the environment.

- 6 The Applicant shall comply with the following quarry operating hours:
- a) Monday to Friday, 6.30am to 5.30pm, and
 - b) Saturday, 7.30am to 2.00pm.

No work is to be carried out on Sundays or on Public Holidays.

- 7 The quantities of foundry sand, foundry slag and concrete stored upon the premises is not to exceed 5000 tonnes, 2000 tonnes and 3000 tonnes respectively.

Deferred Commencement

- 8 In respect of approval to haul material away from the development, pursuant to Section 80(3) of the *Environmental Planning and Assessment Act 1979*, this is a "deferred commencement" consent. As such this consent, in respect of approval to haul material away from the development, does not 'operate' until such time as all of the requirements of Condition 21 of this consent have been completed to the satisfaction of the Roads & Traffic Authority (RTA) and Council.

Once all of these requirements have been complied with to the satisfaction of the RTA and Council, Council will advise the Applicant of this circumstance in writing, at which time approval to haul material away from the development will become 'operational'.

(Note: This condition has been worded to provide for the extraction, processing and stockpiling of material to facilitate road construction necessary for the haulage part of the development consent to become 'operational'.)

Surrender of Consents

- 9 Within 2 months of the date of approval to haul material away from the development becoming 'operational', the Applicant shall surrender all existing development consents and existing use rights associated with the site in accordance with Clause 97 of the *Environmental Planning and Assessment Regulation 2000*.

Identification of Boundaries

- 10 Within 2 months of the date of this consent, the Applicant shall:
- a) engage a registered land surveyor to mark out the boundaries of the approved limits of extraction;
 - b) submit a survey plan of these boundaries to Council; and
 - c) ensure that these boundaries are clearly marked at all times in a permanent manner that allows operating staff and inspecting officers to clearly identify those limits.

Operation of Plant and Equipment

- 11 The Applicant shall ensure that all plant and equipment at the site, or used in connection with the development, are:
- a) maintained in a proper and efficient condition; and
 - b) operated in a proper and efficient manner.

Air Quality Standards

- 12 The Applicant shall ensure that air pollution generated by the development does not exceed the ambient air quality standards and goals listed in the following Tables at any nearby dwelling on land not in the same ownership as the development.

<i>Long Term Impact Assessment Criteria for Particulate Matter:</i>		
<i>Pollutant</i>	<i>Averaging period</i>	<i>Criterion</i>
Total suspended particulate (TSP) matter	Annual	90 $\mu\text{g}/\text{m}^3$

Particulate matter < 10 µm (PM ₁₀)	Annual	30 µg/m ³
--	--------	----------------------

<i>Short Term Impact Assessment Criterion for Particulate Matter:</i>		
<i>Pollutant</i>	<i>Averaging period</i>	<i>Criterion</i>
Particulate matter < 10 µm (PM ₁₀)	24 hour	50 µg/m ³

<i>Long Term Impact Assessment Criteria for Deposited Dust:</i>			
<i>Pollutant</i>	<i>Averaging period</i>	<i>Maximum increase in deposited dust level</i>	<i>Maximum total deposited dust level</i>
Deposited dust	Annual	2 g/m ² /month	4 g/m ² /month

Note: Deposited dust is assessed as insoluble solids as defined in AS 3580.10.1-1991: *Methods for Sampling and Analysis of Ambient Air - Determination of Particulates - Deposited Matter - Gravimetric Method*.

Air Quality Management

- 13 The Applicant shall minimise and/or prevent the emission of dust from the site in accordance with the *Soil and Water Management Plan and Rehabilitation Plan* prepared by SJE Consulting, dated August 2006 (Appendix K, EIS).

Pollution of Waters

- 14 Except as may be expressly provided by an Environment Protection Licence, the Applicant shall comply with Section 120 of the *Protection of the Environment Operations Act 1997* during the carrying out of the development.
- 15 Should excavation activities result in the interception of groundwater, all related activities must immediately cease and the Applicant must contact the Department of Water and Energy for instructing advice.

Water Discharge Limit

- 16 Except as may be expressly provided by an Environmental Protection Licence, the Applicant shall ensure that the discharges from any licenced discharge point/s comply with the limits in the following table:

<i>Water Discharge Pollution Limits:</i>		
<i>Pollutant</i>	<i>Units of Measure</i>	<i>100 Percentile Concentration Limit</i>
Total suspended solids	mg/L	50
pH	pH	6.5–8.5

Stormwater Management Systems

- 17 The Applicant shall ensure that the stormwater management systems for the development are designed, constructed and operated to capture and treat polluted waters from operations and storm events in accordance with the *Soil and Water Management Plan and Rehabilitation Plan* prepared by SJE Consulting, dated August 2006 (Appendix K, EIS).
- 18 Within 5 days of a rainfall event, the Applicant shall ensure that the basins in the storm water management system are treated and emptied to maintain required storage volumes.

Bunding

- 19 Impervious bunds must be constructed around all fuel, oil and chemical storage areas and the bund volume must be large enough to contain 110 per cent of the volume held

in the largest container. Bunds must be designed and installed in accordance with the requirements of the EPA Environment Protection Manual Technical Bulletin *Bunding and Spill Management*.

Rehabilitation

- 20 The Applicant shall progressively rehabilitate the site in accordance with the *Soil and Water Management Plan and Rehabilitation Plan* prepared by SJE Consulting, dated August 2006 (Appendix K, EIS) to the satisfaction of Council.

Access in general

- 21 All access to and from the development is to be via the approved Hume Highway access point, or otherwise approved by the RTA and/or Council.

Hume Highway access point

- 22 Temporary haul road access to and from the quarry is to be carried out in accordance with the following requirements:
- a) Temporary haul road access from the quarry to the Olympic Highway is permitted at the location shown in the amended approved site plan until the Hume Highway four lane divided carriageway works have been opened for public use (i.e. when publicly notified by the RTA). Only 'left turns' are permitted onto the Olympic Highway. No 'right turning' traffic is permitted to enter the temporary haul road from the Olympic Highway.
 - b) Temporary haul road access from the quarry to the Hume Highway is permitted at the current haul road location until the Hume Highway four lane divided carriageway works have been opened for public use. Only 'left turns' are permitted into the site from the Hume Highway. No 'right turning' traffic is permitted to enter the Hume Highway haul road from the Hume Highway. (Note that this requirement only applies to haul trucks.)
 - c) The temporary haul road access point with the Olympic Highway is to be sealed for a minimum length of 30m from the existing pavement on the Olympic Highway.
 - d) The egress Safe Intersection Sight Distance (SISD) at the Olympic Highway and the Hume Highway is to be in accordance with the RTA's *Road Design Guide* for the prevailing speed limit i.e. 225m for the 100km/hr speed zone.
 - e) 'R2-4' ("No Entry") signs are to be placed at the Olympic Highway access point to the satisfaction of the RTA.
 - f) All works associated with the proposed development shall be at no cost to the RTA or Council.
- 22A When the Hume Highway four lane divided carriageway works have been opened for public use (i.e. when publicly notified by the RTA), the temporary haul road access arrangements as detailed above in condition 21 are to cease, with access then to only be obtained to the Hume Freeway in accordance with the requirements of Condition 23. Within twenty-one (21) days of such time all relevant traffic control signage and any other related signage at the closed Olympic Highway temporary haul road access point is to be removed.
- 23 Haulage of material is to cease in fog which limits visibility to less than 225 metres. To allow the mine manager to assess fog conditions, a specially marked guidepost, approved by the RTA for colour and location shall be placed 225 metres either side of the Highway access point. On instances of fog the mine manager shall check that the guideposts can be seen from the highway access. Only if the guideposts are visible shall haulage proceed. Conditions should be checked regularly by the mine manager.

- 24 The Applicant is to comply with any revised access point requirements of the RTA arising from design and construction of the proposed Hume Highway four lane divided carriageway proposal as a part of the AUSLINK National Network. All existing access point construction works are to make good to new arrangements and be rehabilitated to the satisfaction of the RTA and Council.

(Note: Contact should be made with Council at this time to determine whether or not the proposed revised accessway arrangements require a modification to this consent or a fresh development consent.)

Parking

- 25 The Applicant shall provide sufficient on-site parking for all quarry-related traffic to the satisfaction of Council.

Road Haulage Dust and Debris

- 26 The Applicant shall ensure that all loaded vehicles entering or leaving the site are covered to prevent the escape of dust and debris.
- 27 The Applicant shall ensure all loaded vehicles leaving the site are cleaned of materials that may fall on the road before they are allowed to leave the site.

Haul Road Speed Management (Dust)

- 28 Standard 40km/hr speed limit signage is to be installed on the haul road at:
- a) the Hume Highway entrance for ingress traffic, and
 - b) the entrance to the straight section of the haul road near the quarry for egress traffic.

Visual Amenity

- 29 The Applicant shall minimise the visual impacts of the development to the satisfaction of Council.

Native Vegetation

- 30 Prior to the removal of any native vegetation associated with the development, contact is to be made with the Murray Catchment Management Authority (MCMA) for advice regarding the need for a Development Consent and/or a Property Vegetation Plan under the *Native Vegetation Act 2003*.

Waste Minimisation

- 31 The Applicant shall minimise the amount of waste generated by the development. All liquid and non liquid wastes resulting from activities and processes at the site must be assessed, classified and managed in accordance with the EPA's Environmental Guidelines: *Assessment, Classification and Management of Liquid and Non-liquid Wastes (1999)*, or any other EPA document superseding this guideline.

Dangerous Goods

- 32 The Applicant shall ensure that the storage, handling, and transport of dangerous goods is carried out in accordance with relevant Australian Standards, particularly *AS 1940-2004: The storage and handling of flammable and combustible liquids* and *AS/NZS 1596:2002: The storage and handling of LP Gas*, and the *Dangerous Goods Code*.

Safety

- 33 The Applicant shall secure the development to ensure public safety to the satisfaction of Council.

Emergency Management

- 34 The Applicant shall ensure that the development is suitably equipped to respond to any fires on-site.

Signage and building construction

- 35 Any signage or building construction requiring the prior development consent of Council is to be the subject of a fresh development application to Council.

Blasting

- 36 All relevant industry guidelines and standards are to be complied with including licencing requirements from the NSW Department of Primary Industries.

- 37 A blasting management plan is to be submitted to Council to the satisfaction of the Director of Environmental Services that includes, but not limited to, the following procedures:

- a) The maximum number of blasts per year is not to exceed a total of 5 and no more than 2 blast are to occur in a single month.
- b) All residents within a 2500 metre distance of the quarry operations to be kept informed, well in advance of any blasting activity.

38 **Environmental Protection Authority**

L4 Blasting limits

- L4.1 The overpressure level from blasting operations on the premises must not:
- a) Exceed 115dB(Lin Peak) for more than 5% of the total number of blasts over a period of 12 months; and
 - b) Exceed 120dB (Lin Peak) at any time.

The air blast overpressure values stated above apply when the measurements are performed with equipment having a lower cut-off frequency of 2Hz or less. If the instrumentation has a higher cut-off frequency then a correction of 5dB should be added to the measured value. Equipment with a lower cut-off frequency exceeding 10Hz should not be used for the purpose of measuring air blast overpressure.

- L4.2 Ground vibration peak particle velocity from the blasting operations at the premises must not:
- a) Exceed 5mm/s for more than 5% of the total number of blasts over a period of 12 months; and
 - b) Exceed 10mm/s at any time,
when measured at any point within 1 metre of any affected residential boundary or other noise sensitive location such as a school or hospital.

- L4.3 Blasting operations on the premises may only take place between 10am and 3pm Monday to Friday and not during periods of inversions.

- L4.4 The hours of operations for blasting operations specified in Conditions L4.3 may be varied if the EPA, having regard to the effect that the proposed variation would have on the amenity of the residents in the locality, gives written consent to the variation.

- L4.5 Blasting at the premises is limited to one (1) blast each day on which blasting is permitted. The restrictions on times and frequency of blasting referred to above are based on the ANZEC Guidelines *“Technical basis for guidelines to minimise annoyance due to blasting overpressure and ground vibration”* September 1990.

Resource Recovery

Foundry Sand and Concrete Waste must be processed at the premises in accordance with the Resource Recovery Order under Part 9, Clause 93 of the Protection of the Environment Operations (Waste) Regulation 2014. The following orders relate to the wastes proposed to be recovered for reuse at the premises.

The processed foundry sand order 2014

<http://www.epa.nsw.gov.au/resources/waste/foundrysandRRO14.pdf>

The recovered aggregate order 2014

<http://www.epa.nsw.gov.au/resources/waste/aggregateRRO14.pdf>

39 Roads & Maritime Services

The Proponent shall keep accurate records of the amount of material that is imported for processing on the subject site and associated traffic movement to and from of the subject site (on a monthly basis). These records shall be made available at the request of either of the Greater Hume Shire Council or Roads and Maritime Services.

Conditions have been placed on the consent for the following reasons:

- 1 To ensure the compliance with the terms of the Environmental Planning Instruments.
- 2 Having regard to Council's duties of consideration under Section 79C of the Environmental Planning and Assessment Act 1979, as well as Section 80A which authorises the imposing of consent conditions.
- 3 Having regard to the comments made by referral authorities and submissions received from the public
- 4 Having regard to the circumstances of the case and the public interest.

27 July 2021

Colin Kane
Greater Hume Council
PO Box 99
Holbrook NSW 2644

Attention: Colin Kane, Director Environment & Planning

Via Email

Dear Colin,

**Re: Section 4.55(1A) Application to Modify Development Consent No. DA 1-07/08-s96
15778 Hume Highway, Mullengandra**

This Statement of Environmental Effects (SEE) is submitted to Greater Hume Council on behalf of Walsh Wodonga (VIC) Pty Ltd, in support of an application to modify Development Consent No. 1-07/08-s96 (DA 57-06/07 AM1) relating to the expansion of the Table Top Quarry at Lot 41, DP1004275 (now known Lot 2, DP1241599 and Lots 50-52, DP1125663) and addressed as 15778 Hume Highway, Mullengandra.

This request is made pursuant to Section 4.55(1A) of the *Environmental Planning and Assessment Act 1979* ("the EPA Act").

1. Overview

This modification is sought to alter the type of material that can be received at the quarry. At present, the quarry can receive 'Foundry Sand and Concrete'. The subject modification seeks to expand the material received on site to also include 'Foundry Slag'.

No changes to existing site operations or the development footprint are proposed and for all intents and purposes all operations will remain unchanged with the exception of the material received on-site.

The modification has been discussed with Council's Colin Kane, as well as with James Robinson from the local branch of the NSW Environment Protection Authority (EPA). A subsequent amendment will be required to the current EPA Licence (Ref No. 12712) that applies to the land, which has already been discussed with this authority.

Ultimately there is considered to be no significant impact over and above what was considered in the original application and subsequent modifications and the change is worthy of Council's support.

2. Site Description

The subject site for development was originally described in the previous Environmental Impact Statement as Lot 41, DP1004275. The property is currently described as Lot 2, DP1241599 and Lots 50-52, DP1125663 and addressed as 15778 Hume Highway, Mullengandra.

The site is more commonly known as the 'Table Top Quarry'.

A plan showing the existing conditions of the site and surrounds is provided in Figures 1 & 2 below.

GREATER HUME SHIRE
COUNCIL

3. Consent to be Modified

The original Table Top Quarry was approved by the former Hume Shire Council on 14 October 1998.

A subsequent application (Ref No. 57-06/07 AM1) was submitted to Greater Hume Council to expand this quarry, which required the preparation of an Environmental Impact Statement in accordance with the requirements of the Secretary's Environmental Assessment Requirements (SEARs). This application was approved by Council on 6 December 2007. The development is described by the consent as "Expansion of Table Top Quarry".

A subsequent modification (Ref No. 1-07/08-s96) was approved on 6 December 2007 to allow blasting to occur on-site.

A summary of the previous approval history is provided in Table 1 below.

Table 1 – Previous approval and modification history

Application No.	Approved	Description
DA 99002	14/10/1999	Table Top Quarry
DA 57-06/07 AM1	24/11/2006	Expansion of Table Top Quarry
DA 1-07/08-s96	06/12/2007	Expansion of Table Top Quarry as modified - blasting

4. Description of Proposed Modification

The proposed modification seeks to alter the type of material that can be received at the quarry. At present, the quarry can receive 'Foundry Sand and Concrete'. The subject modification seeks to expand the material received on site to also include 'Foundry Slag'.

Consequently, the proposal requires modification of Condition 2(a) as follows:

Terms of Approval

2. *The Applicant shall carry out the development generally in accordance with the:*

- (a) *Environmental Impact Statement: Expansion of Table Top Quarry, dated September 2006, prepared by Habitat Planning (EIS), and the Statement of Environmental Effects dated 19 June 2007 and 27 June 2021 prepared by Habitat Planning, and*
- (b) *General Terms of Approval No. 1065634 'Attachment A' of the Department of Environment and Conservation, dated 14 November 2006, and*
- (c) *Conditions of this development consent, as amended.*

If there is any inconsistency between the above, the conditions of this consent shall prevail to the extent of the inconsistency.

The modified development does not alter any previously endorsed plans.

DEVELOPMENT
CONSENT
APPROVED
Subject to conditions
21 OCT 2021
GREATER HUME SHIRE
COUNCIL

5. Substantially the same development

Section 4.55(1A)(a) of the Act requires a consent authority to be satisfied that the development to which the consent as modified relates is "substantially the same development as the development for which consent was originally granted and before that consent as originally granted was modified (if at all)".

In this instance, the proposed modification will not substantially alter the essence of the approved development, being a quarry. Specifically, the modification request does not seek to alter the footprint of the previously approved development, the amount of material that can be extracted per annum or the lifespan of the quarry. Furthermore, all operational matters will remain unchanged except for the receipt of foundry slag in addition to foundry sand and concrete, which is currently accepted on-site.

Consequently, the incorporation of the proposed modification will result in a development which is substantially the same as the approved development.

6. Planning Assessment

Section 4.55(3) of the EP&A Act requires the consent authority, when assessing a Section 4.55 application, to take into consideration such of the matters referred to in Section 4.15 as relevant to the development, the subject of the application.

Section 4.15(1)(a) requires the consent authority to take into consideration:

(a) *the provisions of:*

- (i) *any environmental planning instrument, and*
- (ii) *any proposed instrument that is or has been the subject of public consultation under this Act and that has been notified to the consent authority (unless the Planning Secretary has notified the consent authority that the making of the proposed instrument has been deferred indefinitely or has not been approved), and*
- (iii) *any development control plan, and*
- (iiia) *any planning agreement that has been entered into under section 7.4, or any draft planning agreement that a developer has offered to enter into under section 7.4, and*
- (iv) *the regulations (to the extent that they prescribe matters for the purposes of this paragraph),*

that apply to the land to which the development application relates,

The subject site is zoned RU1 Primary Production and development for the purposes of an extractive industry is permitted with consent in this zone.

The proposed change to material receivals does not alter the extent to which the application complies with the provisions of the Greater Hume Local Environmental Plan and Greater Hume Development Control Plan that applied at the time. The assessment undertaken in the previous EIS dated September 2006 remains valid for the altered proposal.

Whilst it is acknowledged that the original development application was classified as 'Designated Development' under Section 4.10 of the *Environmental Planning & Assessment Act 1979* (EP&A Act) and required the preparation of an EIS under Schedule 3 of *Environmental Planning & Assessment Regulation 2000* (EP&A Regulation), the proposed modification does not require the submission of a new EIS.

Specifically, Part 2 of Schedule 3 of the EP&A Regulation stipulates:

Development involving alterations or additions to development (whether existing or approved) not designated development if, in the opinion of the consent authority, the alterations or additions do not significantly increase the environmental impacts of the total development (that is the development together with the additions or alterations) compared with the existing or approved development.

In forming its opinion as to whether or not the development is designated development, a consent authority is to consider as per Clause 36 of Schedule 3 of the EP&A Regulation:

- (a) the impact of the existing development having regard to factors including—
 - (i) previous environmental management performance, including compliance with the conditions of any consents, licences, leases or authorisations by a public authority and compliance with any relevant codes of practice, and
 - (ii) rehabilitation or restoration of any disturbed land, and
 - (iii) the number and nature of all past changes and their cumulative effects, and
- (b) the likely impact of the proposed alterations or additions having regard to factors including—
 - (i) the scale, character or nature of the proposal in relation to the development, and
 - (ii) the existing vegetation, air, noise and water quality, scenic character and special features of the land on which the development is or is to be carried out and the surrounding locality, and
 - (iii) the degree to which the potential environmental impacts can be predicted with adequate certainty, and
 - (iv) the capacity of the receiving environment to accommodate changes in environmental impacts, and
- (c) any proposals—
 - (i) to mitigate the environmental impacts and manage any residual risk, and
 - (ii) to facilitate compliance with relevant standards, codes of practice or guidelines published by the Department or other public authorities.

As outlined above, the purpose of the modification is to expand the range of materials that can be received on-site to also include foundry slag. This is in addition to the foundry sand and concrete, which is currently accepted on-site.

It is reiterated that the modification request does not seek to alter the footprint of the previously approved development, the amount of material that can be extracted per annum or the lifespan of the quarry. Furthermore, all operational matters will remain unchanged except for the receipt of foundry slag in addition to foundry sand and concrete, which is currently accepted on-site.

Consequently, the incorporation of the proposed modification will not change the character or intensity of development on-site and the site will continue to operate in accordance with the conditions of the previous development consents issued for the site.

For these reasons, the proposed modification is not considered to be classified as Designated Development.

Notwithstanding the above, an assessment of the environmental impacts of the proposed modification is provided to take into consideration the matters referred to in Section 4.15(1) of the EP&A Act as relevant to the development.

DEVELOPMENT
CONSENT
APPROVED
Subject to conditions

21 OCT 2021
GREATER HUME SHIRE
COUNCIL

Context and setting

The subject land is rurally zoned and has been approved for the purposes of an extractive industry (quarry). The subject modification seeks approval to expand the range of materials that can be accepted on-site to include foundry slag.

No other changes are proposed to the size of the development footprint, the annual extraction rate or the lifespan of the quarry, as well as current site operations. The proposed modification will therefore not alter the existing context and setting of the area.

Traffic and Access

As outlined above, the development does not alter existing traffic arrangements and there will be no change to the environmental effects on access and traffic as considered in the original application.

Noise, Dust and Odour

Matters regarding noise, dust and odour were considered in the previous EIS prepared for the site in accordance with the requirements of the SEARs. The subject modification is seeking approval to expand the range of materials that can be accepted on-site to include foundry slag, which will not create additional impacts in terms of noise, dust and odour. Therefore, there will be no change to the environmental effects as considered in the original application.

The existing quarry is operated in accordance with NSW Environment Protection Licence No. 12712, which regulates the use of the site and ensures it complies with all relevant environmental protection measures and operates within environmental thresholds in terms of noise, dust and odour. This current EPA licence will be amended to reflect the changes sought by this modification.

Waste

As outlined above, the purpose of the modification is to seek approval to expand the range of materials that can be accepted on-site to include foundry slag.

Section L2 of the EPA Licence specifies the wastes that may be accepted on-site. The purpose of the current modification is to expand this to include foundry slag, which is currently not permitted. As a result, an amended EPA licence is required from the EPA to reflect the changes sought by the modification.

Discussions have been ongoing with the EPA, who have verbally not raised any concerns subject to approval of a modified development consent from Council.

7. Conclusion

The subject application seeks to modify Development Consent No. 1-07/08-s96 (DA 57-06/07 AM1) as it relates to Table Top Quarry at 15778 Hume Highway, Mullengandra by expanding the range of materials that can be accepted on-site to now include foundry slag.

The proposal does not alter the overall outcome for the site, being a quarry and no other changes are proposed to the development footprint, lifespan, extraction volumes or operational matters of the quarry. The details provided within this documentation and attached information demonstrate that the proposed works will be carried out appropriately.

The proposed change has been discussed with Council, as well as the EPA who will need to provide an amended EPA Licence to reflect the changes sought by the modification.

Having regard to the above, it is recommended that the proposed modification is supported by Council. I trust that the above and attached information will enable Council to favourably determine this modification.

Environment Protection Licence

Licence - 12712

Information about this licence

Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and annual return to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

Environment Protection Licence

Licence - 12712

The EPA publication "A Guide to Licensing" contains information about how to calculate your licence fees. The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

WALSH WODONGA (VIC) PTY. LTD.

PO BOX 2

BARANDUDA VIC 3691

subject to the conditions which follow.

Environment Protection Licence

Licence - 12712

1 Administrative Conditions

A1 What the licence authorises and regulates

- A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity	Fee Based Activity	Scale
Extractive activities	Land-based extractive activity	> 30000 - 50000 T annual capacity to extract, process or store

A2 Premises or plant to which this licence applies

- A2.1 The licence applies to the following premises:

Premises Details
TABLETOP QUARRY
HUME HIGHWAY
TABLE TOP
NSW 2640
LOT 50 DP 1125663
DA57-06/07

A3 Information supplied to the EPA

- A3.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:

- the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
- the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

Environment Protection Licence

Licence - 12712

2 Discharges to Air and Water and Applications to Land

P1 Location of monitoring/discharge points and areas

- P1.1 The following utilisation areas referred to in the table below are identified in this licence for the purposes of the monitoring and/or the setting of limits for any application of solids or liquids to the utilisation area.

3 Limit Conditions

L1 Pollution of waters

- L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Waste

- L2.1 The licensee must not cause, permit or allow any waste to be received at the premises, except the wastes expressly referred to in the column titled "Waste" and meeting the definition, if any, in the column titled "Description" in the table below.
Any waste received at the premises must only be used for the activities referred to in relation to that waste in the column titled "Activity" in the table below.
Any waste received at the premises is subject to those limits or conditions, if any, referred to in relation to that waste contained in the column titled "Other Limits" in the table below.
This condition does not limit any other conditions in this licence.

Code	Waste	Description	Activity	Other Limits
NA	General or Specific exempted waste	Foundry sand and recovered aggregate	As specified in each particular resource recovery exemption	

- L2.2 The licensee must not cause, permit or allow any waste generated outside the premises to be received at the premises for storage, treatment, processing, reprocessing or disposal or any waste generated at the premises to be disposed of at the premises, except as expressly permitted by the licence.
- L2.3 This condition only applies to the storage, treatment, processing, reprocessing or disposal of waste at the premises if those activities require an environment protection licence.

L3 Noise limits

- L3.1 Noise emission from the premises must not exceed the criterion set out in the New South Wales Industrial Noise Policy at the nearest and potentially most affected noise sensitive receptors.
- L3.2 Noise from the premises is to be measured in accordance with the New South Wales Industrial Noise

Environment Protection Licence

Licence - 12712

Policy to determine compliance with this condition.

- L3.3 All practical measures must be used to silence the plant and equipment consistent with the best available technology that is economically achievable.
- L3.4 The noise emission limits identified in L3.1 apply for prevailing meteorological conditions (winds up to 3m/s), except under conditions of temperature inversions. Noise impacts that may be enhanced by temperature inversions must be addressed by:
- documenting noise complaints received to identify any higher level of impacts or patterns of temperature inversions;
 - where levels of noise complaints indicate a higher level of impact then actions to quantify and ameliorate any enhanced impacts under temperature inversions conditions should be developed and implemented.

L4 Blasting

- L4.1 Blasting in or on the premises must only be carried out between 10 am hours and 3 pm hours, Monday to Saturday. Blasting in or on the premises must not take place on Sundays or Public Holidays without the prior approval of the EPA.
- L4.2 Blasting at the premises is limited to 1 blast on each day on which blasting is permitted.
- L4.3 The overpressure level from blasting operations carried out in or on the premises must not:
- a) exceed 115 dB(L) for more than 5% of the total number of blasts carried out on the premises within the 12 months annual reporting period; and
 - b) exceed 120 dB(L) at any time
- at any residence or noise sensitive location (such as a school or hospital) that is not owned by the licensee or subject of a private agreement between the owner of the residence or noise sensitive location and the licensee as to an alternative overpressure level.

The airblast overpressure values stated above apply when the measurements are performed with equipment have a lower cut-off frequency of 2Hz or less. If the instrumentation has a higher cut-off frequency then a correction of 5dB should be added to the measured value. Equipment with a lower cut-off frequency exceeding 10Hz should not be used for the purpose of measuring air blast overpressure.

- L4.4 The ground vibration peak particle velocity from blasting operations carried out in or on the premises must not:
- a) exceed 5mm/second for more than 5% of the total number of blasts carried out on the premises within the 12 months annual reporting period; and
 - b) exceed 10mm/second at any time
- when measured at any point within 1 metre of any residence or sensitive location (such as a school or hospital) that is not owned by the licensee.
- L4.5 The hours of operations for blasting specified in condition L4 may be varied if the EPA, having regard to the effect that the proposed variation would have on the amenity of the residents in the locality, provides

Environment Protection Licence

Licence - 12712

written consent to any proposed variation of hours.

Consent must be sought prior to any blasting being undertaken outside of the specified hours.

L5 Hours of operation

- L5.1 The hours of operation specified in conditions L5.2 and L5.3 may be varied with written consent if the EPA is satisfied that the amenity of the residents in the locality will not be adversely affected.
- L5.2 All construction work at the premises must only be conducted between 7am and 6pm Monday to Saturday excluding public holidays.
- L5.3 Activities at the premises, other than construction work, may only be carried on between 7am and 6pm Monday to Saturday excluding public holidays.
- L5.4 This condition does not apply to the delivery of material outside the hours of operation permitted by condition L5.3, if that delivery is required by police or other authorities for safety reasons; and/or the operation or personnel or equipment are endangered. In such circumstances, prior notification must be provided to the EPA and affected residents as soon as possible or within a reasonable period in the case of emergency.

L6 Potentially offensive odour

- L6.1 No condition in this licence identifies a potentially offensive odour for the purposes of section 129 of the Protection of the Environment Operations Act 1997.

Note: Section 129 of the Protection of the Environment Operations Act 1997 provides that the licensee must not cause or permit the emission of any offensive odour from the premises but provides a defence if the emission is identified in the relevant environment protection licence as a potentially offensive odour and the odour was emitted in accordance with the conditions of a licence directed at minimising odour.

4 Operating Conditions

O1 Activities must be carried out in a competent manner

- O1.1 Licensed activities must be carried out in a competent manner.
This includes:
 - a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
 - b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

O2 Maintenance of plant and equipment

Environment Protection Licence

Licence - 12712

- O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:
- a) must be maintained in a proper and efficient condition; and
 - b) must be operated in a proper and efficient manner.

O3 Dust

- O3.1 Activities occurring at the premises must be carried out in a manner that will minimise emissions of dust from the premises. Dust suppression of material stockpiles, access roads and other areas associated with the activity must be undertaken to prevent offsite impacts
- O3.2 Trucks entering and leaving the premises that are carrying loads must have these loads completely covered at all times, except during loading and unloading.

O4 Processes and management

- O4.1 A Soil and Water Management Plan (SWMP) must be prepared and implemented. The plan must describe the measures that will be employed to minimise soil erosion and the discharge of sediment and other pollutants to lands and/or waters during construction activities. The SWMP should be prepared in accordance with the requirements for such plans outlined in *Managing Urban Stormwater: Soils and Construction* (available from the Department of Housing).
- O4.2 A Stormwater Management Scheme must be prepared for the development and must be implemented. Implementation of the Scheme must mitigate the impacts of stormwater runoff from and within the premises following the completion of construction activities. The Scheme should be consistent with the Stormwater Management Plan for the catchment. If a Stormwater Management Plan has not yet been prepared the Scheme should be consistent with the guidance contained in *Managing Urban Stormwater: Council Handbook* (available from the EPA).

5 Monitoring and Recording Conditions

M1 Monitoring records

- M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.
- M1.2 All records required to be kept by this licence must be:
- a) in a legible form, or in a form that can readily be reduced to a legible form;
 - b) kept for at least 4 years after the monitoring or event to which they relate took place; and
 - c) produced in a legible form to any authorised officer of the EPA who asks to see them.
- M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
- a) the date(s) on which the sample was taken;
 - b) the time(s) at which the sample was collected;
 - c) the point at which the sample was taken; and

Environment Protection Licence

Licence - 12712

d) the name of the person who collected the sample.

M2 Recording of pollution complaints

M2.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

M2.2 The record must include details of the following:

- a) the date and time of the complaint;
- b) the method by which the complaint was made;
- c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
- d) the nature of the complaint;
- e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
- f) if no action was taken by the licensee, the reasons why no action was taken.

M2.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

M2.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M3 Telephone complaints line

M3.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

M3.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M3.3 The preceding two conditions do not apply until 3 months after the date of the issue of this licence.

6 Reporting Conditions

R1 Annual return documents

R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

- 1. a Statement of Compliance,
- 2. a Monitoring and Complaints Summary,
- 3. a Statement of Compliance - Licence Conditions,
- 4. a Statement of Compliance - Load based Fee,
- 5. a Statement of Compliance - Requirement to Prepare Pollution Incident Response Management Plan,
- 6. a Statement of Compliance - Requirement to Publish Pollution Monitoring Data; and
- 7. a Statement of Compliance - Environmental Management Systems and Practices.

Environment Protection Licence

Licence - 12712

At the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be completed and returned to the EPA.

R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.

R1.3 Where this licence is transferred from the licensee to a new licensee:

- a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:

- a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
- b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.

R1.5 The Annual Return for the reporting period must be supplied to the EPA via eConnect EPA or by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').

R1.6 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.

R1.7 Within the Annual Return, the Statements of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:

- a) the licence holder; or
- b) by a person approved in writing by the EPA to sign on behalf of the licence holder.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R2 Notification of environmental harm

R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.

R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

Environment Protection Licence

Licence - 12712

R3 Written report

- R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
- a) where this licence applies to premises, an event has occurred at the premises; or
 - b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence,
- and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.
- R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.
- R3.3 The request may require a report which includes any or all of the following information:
- a) the cause, time and duration of the event;
 - b) the type, volume and concentration of every pollutant discharged as a result of the event;
 - c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
 - d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
 - e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
 - f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
 - g) any other relevant matters.
- R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

7 General Conditions

G1 Copy of licence kept at the premises or plant

- G1.1 A copy of this licence must be kept at the premises to which the licence applies.
- G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.
- G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

Environment Protection Licence

Licence - 12712

Dictionary

General Dictionary

3DGM [in relation to a concentration limit]	Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples
Act	Means the Protection of the Environment Operations Act 1997
activity	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
actual load	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
AM	Together with a number, means an ambient air monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
AMG	Australian Map Grid
anniversary date	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
annual return	Is defined in R1.1
Approved Methods Publication	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
assessable pollutants	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
BOD	Means biochemical oxygen demand
CEM	Together with a number, means a continuous emission monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
COD	Means chemical oxygen demand
composite sample	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
cond.	Means conductivity
environment	Has the same meaning as in the Protection of the Environment Operations Act 1997
environment protection legislation	Has the same meaning as in the Protection of the Environment Administration Act 1991
EPA	Means Environment Protection Authority of New South Wales.
fee-based activity classification	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 2009.
general solid waste (non-putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997

Environment Protection Licence

Licence - 12712

flow weighted composite sample	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.
general solid waste (putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
grab sample	Means a single sample taken at a point at a single time
hazardous waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
licensee	Means the licence holder described at the front of this licence
load calculation protocol	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
local authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
material harm	Has the same meaning as in section 147 Protection of the Environment Operations Act 1997
MBAS	Means methylene blue active substances
Minister	Means the Minister administering the Protection of the Environment Operations Act 1997
mobile plant	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
motor vehicle	Has the same meaning as in the Protection of the Environment Operations Act 1997
O&G	Means oil and grease
percentile [in relation to a concentration limit of a sample]	Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence.
plant	Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles.
pollution of waters [or water pollution]	Has the same meaning as in the Protection of the Environment Operations Act 1997
premises	Means the premises described in condition A2.1
public authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
regional office	Means the relevant EPA office referred to in the Contacting the EPA document accompanying this licence
reporting period	For the purposes of this licence, the reporting period means the period of 12 months after the issue of the licence, and each subsequent period of 12 months. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
restricted solid waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
scheduled activity	Means an activity listed in Schedule 1 of the Protection of the Environment Operations Act 1997
special waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
TM	Together with a number, means a test method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .

Environment Protection Licence

Licence - 12712

TSP	Means total suspended particles
TSS	Means total suspended solids
Type 1 substance	Means the elements antimony, arsenic, cadmium, lead or mercury or any compound containing one or more of those elements
Type 2 substance	Means the elements beryllium, chromium, cobalt, manganese, nickel, selenium, tin or vanadium or any compound containing one or more of those elements
utilisation area	Means any area shown as a utilisation area on a map submitted with the application for this licence
waste	Has the same meaning as in the Protection of the Environment Operations Act 1997
waste type	Means liquid, restricted solid waste, general solid waste (putrescible), general solid waste (non-putrescible), special waste or hazardous waste

Mr Brian Wild

Environment Protection Authority

(By Delegation)

Date of this edition: 27-June-2007

End Notes

- 1 Condition A1.3 Not applicable varied by notice issued on <issue date> which came into effect on <effective date>
- 2 Licence varied by notice 1106112, issued on 10-Sep-2009, which came into effect on 10-Sep-2009.
- 3 Licence varied by notice 1506261 issued on 23-May-2012
- 4 Licence transferred through application 1506485 approved on 31-May-2012 , which came into effect on 01-Apr-2012
- 5 Licence varied by notice 1507226 issued on 28-Sep-2012
- 6 Licence varied by notice 1527161 issued on 12-Dec-2014
- 7 Licence transferred through application 1552019 approved on 15-May-2017 , which came into effect on 15-May-2017
