

Projects and works notice

Project update:

East Seaham Rd, East Seaham
Road reconstruction works

Project overview

We've been planning the East Seaham Road, East Seaham reconstruction works, from the northern most sealed section to the Port Stephens boundary of Dungog Shire Council. This project has been made possible with funding via the Federal Blackspot project, Federal Local Roads and Community Infrastructure (LRCI) funds and committed funding from the \$10M NSW government election commitment.

What's next

We've completed the initial design and planning and have identified that we need to undertake further flora and fauna environmental surveys. Over the next couple of months, there'll be consultants undertaking these surveys on East Seaham Road.

When we've completed the planning process, finalised the design and have approvals to begin, we'll let you know the construction timeframes.

In the meantime, we'll be installing guardrail and enhancing line marking along the existing northern sealed section of East Seaham Road.

If you have any questions in relation to the project, please contact our Customer Experience team on 4988 0255 or scan the QR code below to view the project webpage.
