## BASIS OF REPORT

This report has been prepared by SLR Consulting Australia Pty Ltd (SLR) with all reasonable skill, care and diligence, and taking account of the timescale and resources allocated to it by agreement with Yass Valley Council (the Client). Information reported herein is based on the interpretation of data collected, which has been accepted in good faith as being accurate and valid.

This report is for the exclusive use of the Client. No warranties or guarantees are expressed or should be inferred by any third parties. This report may not be relied upon by other parties without written consent from SLR.

SLR disclaims any responsibility to the Client and others in respect of any matters outside the agreed scope of the work.

# 1 Introduction

## 1.1 Background of the Plan

The Yass Valley Heavy Haulage Contributions Plan 2021 (this Plan) will be released for public exhibition in the second half of 2021. It was prepared under Section 7.11 of the *Environmental Planning and Assessment Act 1979* ('EP&A Act').

The Yass Valley Local Government Area (LGA) experiences significant heavy vehicle movement due to its proximity to the Australian Capital Territory (ACT), particularly relating to material importation. The intent of this Plan is to collect contributions from industry who generate heavy vehicle movements on Council roads. These contributions are required to offset the cost of road maintenance and road upgrades required because of large projects, extractive industries and the like. The intent of a heavy haulage contributions plan is to outline a methodology to determine fair contributions from any given development or heavy haulage activity within the Yass Valley LGA.

Section 7.11(3) of Part 7 of the EP&A Act authorises Yass Valley Council (Council) to require a section 7.11 contribution to be applied through a condition on a development consent or Complying Development Certificate (CDC) towards the provision of, or increase in demand for public amenities and public services within the LGA. Such a condition can only be imposed if it is in accordance with a contributions plan adopted by Council.

This Plan is to enable Council and other Consent Authorities to require developers of land within the LGA to make contributions for the purpose of providing certain public amenities and public services.

This contributions plan contains the following:

- Details regarding the administration and operation of this Plan.
- How the various Heavy Haulage rates were determined for vehicle and road type.
- How the Heavy Haulage section 7.11 contribution amount is to be calculated.
- Council policy on how and when developers are to settle their section 7.11 contribution obligations.
- Specific information regarding Accredited Certifiers involvement in administering the Plan.

## 1.2 Development subject to a contribution

This Plan applies to any development that generates heavy vehicle trip generation on Council maintained roads, which may include the following types of development:

- Earthworks (excavation and fill).
- Mines, extractive industries.
- Other similar 'heavy haulage' development types.

---

## 1.3 Works schedule

This Plan will seek a fair contribution from Heavy Haulage operations within the LGA to offset the accelerated decline in service life of roads caused by additional traffic movement on Council roads associated with Heavy Haulage operations.

The public amenities and services covered by this Plan include the following:

- Pavement damage to Council managed roads caused by Heavy Haulage operations associated with developments throughout the LGA.
- The upgrade and augmentation of Council managed roads to operate safely as Heavy Haulage routes.

The costs of administering this plan will also be met by contributions imposed under this Plan.

## 1.4 How to use this Plan

This Plan has been broken up into the following sections to allow easy navigation by Council staff, developers, and private certifiers:

### Section 2 – Administration of the Plan

This section details the particulars of this Plan including, date of commencement, the land to which this Plan applies, the purpose of this Plan, relationship with other plans, development exempt from contributions under this Plan, and obligations for accredited certifiers.

### Section 3 – Calculation of contributions

This section details how to calculate the section 7.11 contribution amount including, details of the nexus between development and works, how contribution rates were determined, how to calculate a contribution rate (including worked examples), application information requirements, requirements of ongoing operations in regards to periodic payments, indexation of rates, and provision for the variation of section 7.11 contribution amounts.

### Section 4 – Payment of contributions

This section details how payment of contributions is to be made including, the timing of payments, deferral or periodic payment arrangements, requests for alternative payment arrangements, and procedure for adjusting section 7.11 contribution amounts at the time of payment.

### Section 5 – Other matters

This section details further requirements regarding the administration of this Plan including, the periodic review of contribution rates, provision for the pooling of section 7.11 contributions, saving and transitional arrangements associated with the operation of this Plan, and recording keeping requirements of Council.

## 1.5 Definitions used in this Plan

In the Plan, the following phrases have the following meanings:

- **CDC** – Complying Development Certificate
- **Consent Authority** – has the same meaning as in the EP&A Act but also includes an accredited certifier responsible for issuing a CDC
- **Council** – Yass Valley Council
- **EP&A Act** – means the Environmental Planning and Assessment Act 1979
- **EP&A Regulation** – means the Environmental Planning and Assessment Regulation 2000
- **ESA** – Equivalent Standard Axle
- **Heavy Haulage** – means the transportation of bulk materials via road transport.
- **LGA** – Yass Valley Local Government Area
- **This Plan** – Yass Valley Heavy Haulage Contributions Plan 2021

---

## 2 Administration and operation of this plan

This section describes this Plan's purpose, where it applies and the development it applies to.

### 2.1 Name of this Plan

This Plan is called the *Yass Valley Heavy Haulage Contributions Plan 2021*.

### 2.2 Commencement of this Plan

This Plan has been prepared in accordance with section 7.11 of the EP&A Act and section 26 and 27 of the EP&A Regulation. This Plan was adopted on 25<sup>th</sup> August 2021 and commences from this date.

### 2.3 Area to which this Plan applies

This Plan applies to all land within the Yass Valley Local Government Area.

### 2.4 Purpose of this Plan

The primary purpose of this Plan is to authorise:

- The Council, when granting consent to an application to carry out development to which this plan applies; or
- An accredited certifier, when issuing a CDC for development to which the Plan applies,

to require a section 7.11 contribution to be made towards the provision, extension or augmentation of public amenities and services that are required by consequence of the development, or which were provided in anticipation of, or to facilitate, such development.

Other purposes of this Plan are as follows:

- To provide a clear and transparent basis for levying contributions under the provision of section 7.11 of the EP&A Act.
- To provide the framework for the efficient and equitable determination, collection and management of section 7.11 contributions.
- To establish the relationship between expected development and the public amenities and services included in this plan, to demonstrate the required contributions are reasonable.
- To allow for the provision of the required public amenities and services by alternative means where this is acceptable to the developer and the Council (for example through a planning agreement).
- To ensure that the broader Yass Valley community is not unreasonably burdened by the provision of public amenities and services required as a result of development affected by this Plan.

### 2.5 Relationship with other contributions plans

The Plan repeals the following contributions plans:

- *Yass Valley Council Heavy Haulage Contributions Plan 2006*.

Development applications are also subject to the *Yass Valley Development Contributions Plan 2018* in addition to this Plan should it apply. In these instances, costs associated with Heavy Haulage should be excluded from consideration under the *Yass Valley Development Contributions Plan 2018*.

Exemptions to developer contributions towards Heavy Haulage costs on top of levies under the *Yass Valley Development Contributions Plan 2018* are at the discretion of Council, where the contribution payable would be greater if levied solely under the *Yass Valley Development Contributions Plan 2018*.

## 2.6 Statutory basis of the Plan

Section 7.11 of the EP&A Act enables Council to include a condition in any consent to levy a contribution towards the provision or improvement of amenities or services, provided as follows:

### 7.11 Contribution towards provision or improvement of amenities or services

- 1) *If a consent authority is satisfied that development for which development consent is sought will or is likely to require the provision of or increase the demand for public amenities and public services within the area, the consent authority may grant the development consent subject to a condition requiring—*
  - a) *the dedication of land free of cost, or*
  - b) *the payment of a monetary contribution,*

*or both.*
- 2) *A condition referred to in subsection (1) may be imposed only to require a reasonable dedication or contribution for the provision, extension or augmentation of the public amenities and public services concerned.*
- 3) *If—*
  - a) *a consent authority has, at any time, whether before or after the date of commencement of this Part, provided public amenities or public services within the area in preparation for or to facilitate the carrying out of development in the area, and*
  - b) *development for which development consent is sought will, if carried out, benefit from the provision of those public amenities or public services,*

*the consent authority may grant the development consent subject to a condition requiring the payment of a monetary contribution towards recoupment of the cost of providing the public amenities or public services (being the cost as indexed in accordance with the regulations).*
- 4) *A condition referred to in subsection (3) may be imposed only to require a reasonable contribution towards recoupment of the cost concerned.*
- 5) *The consent authority may accept—*
  - a) *the dedication of land in part or full satisfaction of a condition imposed in accordance with subsection (3), or*

- b) *the provision of a material public benefit (other than the dedication of land or the payment of a monetary contribution) in part or full satisfaction of a condition imposed in accordance with subsection (1) or (3).*
- 6) *If a consent authority proposes to impose a condition in accordance with subsection (1) or (3) in respect of development, the consent authority must take into consideration any land, money or other material public benefit that the applicant has elsewhere dedicated or provided free of cost within the area (or any adjoining area) or previously paid to the consent authority, other than—*
- a) *a benefit provided as a condition of the grant of development consent under this Act, or*
- b) *a benefit excluded from consideration under section 7.4(6).*
- 7) *If—*
- a) *a condition imposed under subsection (1) or (3) in relation to development has been complied with, and*
- b) *a public authority would, but for this subsection, be entitled under any other Act to require, in relation to or in connection with that development, a dedication of land or payment of money in respect of the provision of public amenities or public services or both,*

*then, despite that other Act, compliance with the condition referred to in paragraph (a) is taken to have satisfied the requirement referred to in paragraph (b) to the extent of the value (determined, if the regulations so provide, in accordance with the regulations) of the land dedicated or the amount of money paid in compliance with the condition.<sup>1</sup>*

Section 7.13(1) of the EP&A Act requires that any condition to impose a contribution levy must be in accordance with an adopted Contributions Plan, provided as follows:

**7.13 Section 7.11 or 7.12 conditions subject to contributions plan**

- 1) *A consent authority may impose a condition under section 7.11 or 7.12 only if it is of a kind allowed by, and is determined in accordance with, a contributions plan (subject to any direction of the Minister under this Division).<sup>2</sup>*

...

This Plan has been prepared in accordance with section 26 and 27 of the EP&A Regulation, which details the form of, and particulars that must be included within, a Contributions Plan. This Contributions Plan, once adopted, will enable Council to levy contributions for the provision, extension or augmentation of public amenities and services that are required by consequence of development, or which were provided in anticipation of, or to facilitate, such development.

<sup>1</sup> Extract from section 7.11 of the *Environmental Planning and Assessment Act 1979* (Current version for 25 March 2021)

<sup>2</sup> Extract from section 7.13 of the *Environmental Planning and Assessment Act 1979* (Current version for 25 March 2021)

---

## 2.7 Development exempt from this Plan

This Plan DOES NOT apply to the following types of developments:

- Development proposed by or on behalf of Council.
- Development exempted from section 7.11 contributions by way of a direction made by the Minister of Planning under section 7.17 of the EP&A Act.

The calculation of contribution rates DOES NOT apply to the following:

- Haulage routes along National highways or State roads within the Council area.
- Private roads within the Council area.
- Development located within Business and Industrial Zones within the Council area under the provisions of the *Yass Valley Local Environmental Plan 2013*.
- Earthworks undertaken in accordance with *State Environmental Planning Policy (Exempt and Complying Development Codes) 2008*, specifically Part 2, Division 1, Subdivision 15 for Earthworks, retaining walls and Structural support.

This exclusion makes allowance for the location of these developments on road networks with pavement designed and constructed with a higher than standard life. Furthermore, the large volume, various types and unpredictable loadings of vehicles generated by both development within zoned commercial and industrial areas, and vehicles operating within these areas, makes collection of data for efficient and equitable determination of contributions uncertain.

## 2.8 Obligations of accredited certifiers

### 2.8.1 Complying development certificates

This Plan requires that, in relation to an application made to an accredited certifier for a CDC relating to development affected by this Plan:

- The accredited certifier must, if a CDC is to be issued, impose a condition requiring a monetary contribution, if such a contribution is authorised by this Plan.
- The amount of the monetary contribution that the accredited certifier must impose is the amount determined in accordance with **Section 3** of this Plan.
- The terms of the condition be in accordance with **Section 3** of this Plan.

#### 2.8.1.1 Procedure for determining the section 7.11 contribution amount

1. If, and only if specified in writing in the application for a CDC, the applicant has requested a credit under section 7.11(6) of the EP&A Act, or an exemption for part or the whole of the development under **Section 2.7** of this Plan applies, the accredited certifier must:
  - a. Make a request in writing to the Council for the Council's advice on whether the request is granted, or the extent to which it is granted; and
  - b. In calculating the monetary contribution, comply with the Council's written advice or if no such advice has been received prior to the granting of the CDC refuse the applicant's request for a variation to the section 7.11 contribution required under this Plan.

2. Determine the section 7.11 contributions in accordance with **Section 3.3** of this Plan taking into account any exempt development specified in **Section 2.7** and any advice issued by Council under paragraph 1(b) above.

### 2.8.2 Construction certificates

It is the responsibility of an accredited certifier issuing a construction certificate for building work or subdivision work to ensure that each condition requiring the payment of a monetary contribution before work is carried out has been complied with in accordance with the CDC or development consent.

The accredited certifier must ensure that the applicant provides a receipt (or receipts) confirming that contributions have been fully paid and copies of such receipts must be included with copies of the certified plans provided to the Council in accordance with section 142(2) of the EP&A Regulation. Failure to follow this procedure may render such a certificate invalid and expose the certifier to legal action.

The only exceptions to this requirement are where a work in kind, material public benefit, dedication of land and/or deferred payment arrangement has been agreed by the Council. In such cases the Council will issue a letter confirming that an alternative payment method has been agreed with the applicant.

---

## 3 Heavy Haulage Contribution Calculation

### 3.1 Nexus between development and works

Roads have a design life after which they need reconstruction. Heavy vehicles can significantly reduce the life of a road. The heavy vehicles have a disproportionately greater impact on the life of roads compared to light vehicles, notwithstanding the greater numbers of light vehicles using Council roads.

Major roads and highways are generally designed and constructed to accommodate heavy vehicles and the damage associated with heavy trucks is recouped through registration and general taxation. Roads within the local road network managed by Council conversely often have a lower design standard and are more susceptible to wear and tear associated with heavy vehicles resulting in the need for more frequent reconstruction work.

Council has the responsibility of maintaining most of the roads in the LGA to an acceptable standard. The standard is to ensure the roads:

- Are kept to an appropriate level of safety for the road user; and
- Remain trafficable for the duration of their design life.

The additional heavy vehicle loadings on a road due to developments involving laden heavy vehicle movements will accelerate the deterioration of that road's pavement. The consequence is that in order for the roads authority to maintain the road pavement at its existing level of service, additional maintenance spending will be required sooner than would be the case without that development. In short, the use of a road by heavy vehicles will require the replacement of that road's pavement sooner.

From time-to-time Council receives development applications that involve the haulage of material and goods using heavy vehicles. These developments typically include quarries and other forms of extractive industry, however, they can also include rural industries. These developments can be located anywhere within the LGA.

Concentrated heavy vehicle movements generated by these developments will accelerate the deterioration of road pavements that were designed to meet demands of rural rather than industrial or commercial developments.

Councils are not generally able to impose additional fees, charges or rates to meet the extra costs associated with accelerated deterioration of roads caused by heavy vehicle movements from these developments, except for section 7.11 contributions imposed under the EP&A Act.

Council considers that it is reasonable to expect that developments, which generate unusually high truck movements or truck movements that significantly reduce the life of the road construction and / or increase the cost of maintaining a road should make a monetary contribution. The amount should be based on the cost to Council of bringing forward the need for works or based on the increased cost to Council of maintaining the road.

This Plan therefore authorises Consent Authorities to require contributions from developments that generate additional heavy vehicle movements to meet the additional cost burden of providing and maintaining roads caused by those developments.

Council shall allocate any monies received under this plan to the particular haul roads that developments have contributed towards. As heavy haulage developments can occur anywhere in the LGA, and this Plan operates to respond to the impacts of yet-to-be-identified developments, it is not possible to identify the specific roads in this Plan.

### 3.2 Determination of Heavy Haulage Contribution Rates

To ensure an equitable Heavy Haulage contribution rate, consideration is required to be given to the design lives of the different road types throughout the LGA. Further, a detailed understanding of what impacts different heavy vehicle configurations would have on these roads also needs to be considered.

A unit of measurement has been developed to enable these comparisons to be made. The 'Equivalent Standard Axles' (ESA) measurement provides this unit. An ESA equates to an 80KN (roughly 8t) force being exhibited by a Single Axle Dual Tire.

Impact associated with both heavy vehicle configurations and the design life of a road can be measured in this unit. For instance, a fully loaded Truck & Dog (6 axle) would exert 7.7 ESAs on a section of road as it travels along it. Further, as a road is planned it is designed to accommodate the current and future traffic needs of the roads over a set length of time. This traffic requirement and length of time informs the design of the road pavement.

Traffic requirements along a section of road can be specified in ESAs, making it possible to designate the design life of a road with the ESA unit. This is in addition to being able to calculate the cost for Council to build, maintain and refurbish these roads to meet the required standard to achieve the desired design life.

As such, it is possible to determine the cost to maintain a one-kilometre section of road per ESA (refer to **Appendix C** for a worked example of this calculation). This calculation done by dividing the Total Cost maintaining a road over its economic life by the Estimated Economic Life of a road, measured in ESAs.

In addition to the above, for each heavy vehicle class a value of how many tonnes of material that can be transported per ESA can be calculated. This is determined by sourcing standard ESA values for each of type of heavy vehicle that could operate within the LGA. For calculations undertaken under this Plan, these have been sourced from the Australian Trucking Association – Truck Impact Chart. ESA values have been sourced for both unloaded and 100% loaded. In addition, the payloads for these vehicles has been sourced.

To determine the tonne per ESA value, the unloaded and 100% loaded ESA values have been added together to find the Round-trip ESA value (providing the overall impact of a heavy vehicle trip to a site 100% laden and an empty return journey). When this value is calculated, the full payload of the vehicle (measured in tonnes) is divided by the round-trip ESA value.

To determine the cost per tonne of material transported per kilometre of road, the final calculation required is to divide the cost of maintaining a one-kilometre section of road per ESA by the vehicle specific tonnes per ESA value. This calculation results in a specific contribution rate for each road type within the LGA for each potential heavy vehicle type that could use these roads.

This process has been undertaken for each combination of road and vehicle type detailed within the Contribution Rate Chart located at **Appendix A**.

---

### 3.3 Calculation of monetary contributions

This section contains a step-by-step method to calculate the section 7.11 contribution amounts for Heavy Haulage generating activities. The instructions are to be used in conjunction with the Contribution Rate Chart provided at **Appendix A**.

The Contribution Rates have been calculated using ESA information sourced from the Australian Trucking Association – Truck Impact Chart and relating this information to the road design and economic life of roads in the LGA. Costing information provided by Council has been used to find a cost/ESA figure for each type of Council road. The two sources of information have been combined to determine a cost/t/km figure for each road type, specific to the LGA. This is described in greater detail above, with a worked example contained at **Appendix C**.

*Note – Two common types of truck configurations are a three-axle rigid (bogey) and a 6-axle truck and dog. The ESAs for a round haulage trip (fully loaded to site and empty on the way back to the origin) and the payload for these vehicles has been provided in the table. It is standard industry practice to use a full payload for each haulage trip therefore a maximum payload has been assumed in calculating the ESAs.*

#### Step One

**Determine which vehicle type is being used for the Heavy Haulage activity.**

This should be nominated by the contractor managing the works. Refer to **Section 3.4.1** below for Council procedure if this information is not provided in application.

#### Step Two

**Determine the amount of material hauled with the particular vehicle type.**

This should be nominated by the contractor managing the works. If this information is not provided, further information **MUST** be sought from the applicant.

If a volume of material is quoted, it is to be converted to tonnes. The density of the material is to be nominated by the contractor managing the works. If the density nominated is less than 1.5 tonne per cubic metre, proof should be requested. If the contractor does not provide a density, then it shall be assumed to be 2.0 tonne per cubic metre.

#### Step Three

**Determine the type of road(s) used for the haulage route.**

There may be several roads used on a particular haulage route. In this case, multiple road types can be selected to include in the contribution's calculation. Mapping out the route and labelling the type and length of each road used will make breaking up the calculation easier. A list of road types is available in **Appendix B**. The relevant road types can be selected from the list by searching for the road name and matching it to the corresponding road type. The list in **Appendix B** is current as of July 2020 and has had the road types selected based on the asset class and segment widths. The road types have been used in order to be consistent with Council's *Road Standards Policy (RD-POL-9)*.

#### Step Four

**Determine the length of road used for the haulage route.**

This should be nominated by the contractor managing the works. Refer to **Section 3.4.2** below for Council procedure if this information is not provided in the application.

If multiple road types are used, determine the length of each road type.

### Step Five

**From the table, find the contributions rate that lines up with the relevant truck configuration and road type.**

Contribution rates should be indexed at this stage, in accordance with **Section 4.4** below.

### Step Six

**Calculate the contributions applied from the particular haulage activity.**

#### Example One – standard calculation

A 6-axle truck and dog will be used to cart 5,000 tonnes of material along a primary local road for 8 kilometres, returning to the site empty.

- Locate “Truck & Dog 6 Axle (NSW)” row.
- Locate the “Local (primary)” column.
- Scan across the table until the row and column intersect at \$0.121.

The contribution will be applied at a rate of \$0.121 per tonne of payload per length of haulage route (in one direction).

Because each trip was 8km in length, the total contributions applied to haul 5,000 tonnes of material is equal to:

$$P = C \times T \times L$$

$$\$0.121/t.km \times 5,000t \times 8km = \$4,840$$

Where:

*P* = Contribution payment (\$)

*C* = Contributions rate (\$/t.km)

*T* = Tonnes of hauled material (t)

*L* = Length of haul route (km)

#### Example Two – multiple road types

A 6-axle truck and dog will be used to cart 10,000 tonnes of material along a primary local road for 8 kilometres and 2 kilometres along a secondary local road.

- Locate “Truck & Dog 6 Axle (NSW)” row.
- Locate the “Local (primary)” and the “Local (secondary)” column.
- Scan across the table until the row and columns intersect at \$0.121 and \$0.299 for the primary local and secondary local respectively.

The contribution will be applied at a rate of \$0.121 and \$0.299 per tonne of payload per length of haulage route (in one direction) for the primary local and secondary local respectively (8kms and 2kms).

The two calculations can be done separately and then added together to find the total contribution for the haulage activity:

$$P(\text{primary}) = C(\text{primary}) \times T \times L(\text{primary})$$
$$\$0.121/t.km \times 10,000t \times 8km = \$9,680$$

$$P(\text{secondary}) = C(\text{secondary}) \times T \times L(\text{secondary})$$
$$\$0.299/t.km \times 10,000t \times 2km = \$5,980$$

$$\text{Total} = P(\text{primary}) + P(\text{secondary})$$
$$\text{Total} = \$9,680 + \$5,980 = \$15,660$$

Where:

$P$  = Contribution payment (\$)  
 $C$  = Contributions rate (\$/t.km)  
 $T$  = Tonnes of hauled material (t)  
 $L$  = Length of haul route (km)

*Note – Example calculations have been provided using initial Contribution Rate Chart 2021. Contributions rates may vary in the future due to indexation in accordance with CPI (All groups, Sydney) movements.*

## 3.4 Application information to be relied upon

### 3.4.1 Heavy Vehicle configuration

Where no information is provided by the applicant regarding vehicle type, Council will apply the contribution rate of a 'Three Axle Rigid GML' within the calculation methodology above. This vehicle type is commonly used throughout the LGA for Heavy Haulage operations and has the second highest cost per tonne of material per kilometre.

### 3.4.2 Haul Route

There may be circumstances where the likely length or lengths of roads to be used as part of Heavy Haulage routes in a development vary, and therefore the contribution amount for that development is difficult to quantify. In such cases, Council will determine the length or lengths of road to be levied based on the information submitted with the development application. It is the duty of the applicant to provide sufficient and accurate information on likely haul route/s used at the application stage.

---

### 3.5 Matters to be addressed during the operation of the development

Any consent issued for development will specifically identify the haul route to be used (including road length/s and type/s), the vehicle/s to be used, and the contribution rate/s applicable to the development. Council acknowledges that the haul route/s and vehicle/s used by a development may change over the life of the development. The consent will therefore include a condition that requires the proponent to prepare a statement detailing Heavy Haulage arrangements at least every three years (shorter depending on development proposed). The statement will identify the roads that are used by heavy vehicles transporting material and goods to / from the development, the classification of vehicle/s being used, as well as the proportion of the development's total heavy vehicles using each road length.

As this contributions plan is an ESA-based contribution rate, the following requirements may be placed at Council's discretion on applicants by way of conditions of consent to be implemented at the start of and throughout the development's life:

- A traffic classifier is to be installed (at the applicant's cost) at a suitable location to classify and count the number of loaded heavy vehicles that enter or exit the development site over each quarter. The purpose of the classifier is to record the number of vehicles that are subject to contributions.
- Responsibility for keeping the traffic classifier in good working order throughout the life of the development will rest with the operator.
- Council officers are to be provided access to the traffic classifier data on a regular (i.e. at least quarterly) basis.
- In the event of the traffic data being corrupted, then the Council at its discretion may determine the ESAs and therefore the contribution amount for the preceding period.

### 3.6 Roadworks may be required to be undertaken in addition to contributions required under this Plan

The LGA's local and regional road network has been constructed and is maintained by Council as necessary to ensure an acceptable standard of service.

It is possible that some of these roads may not be able to accommodate additional heavy vehicle loading generated by Heavy Haulage operations without immediate upgrade. There may be upgrades to roads or traffic facilities that are directly required by a development and without which the development could not or should not reasonably occur. New roads, or upgrades to sections of the existing road network, including ongoing maintenance, may be required to accommodate the additional heavy vehicle loading.

Where a development requires works to the road network to be undertaken, the requirement will be by way of a condition imposed on the development consent under section 4.17(1)(f) of the EP&A Act. This will be in addition to road maintenance contributions for haul routes imposed under this Plan.

### 3.7 Latest rates to be used

The section 7.11 contribution imposed on a development will reflect the latest, indexed contribution rates authorised by this Plan.

The monetary section 7.11 contribution rates detailed in **Appendix A** reflect the contribution rates determined using values correct on 1<sup>st</sup> July 2020. Contributions rates will be indexed annually when determining contribution amounts as part of Step Five, outlined in **Section 3.3** above and explained at **Section 4.4** below.

The contribution rate chart contained at **Appendix A** will be updated annually and will be available for download from Council's website or available within Council offices.

Applicants and accredited certifiers should inquire at the Council for information on the latest contribution rates.

### 3.8 Variation to contributions authorised by this Plan

The Council may, after considering a written application, reduce the section 7.11 contribution otherwise calculated in accordance with the provisions of this plan.

Any increase in Heavy Vehicle haulage associated with a development subject to the requirements of this Plan, must be notified to Council in writing, with details provided identifying the revised distance, routes and truck types. This information would then be used by Council to vary the contributions rate as required.

A developer's request for variation to a contribution calculated in accordance with the Plan must be supported by written justification included with the development application. Such request will be considered as part of the assessment of the application.

An accredited certifier other than the Council cannot vary a section 7.11 contribution calculated in accordance with this plan, without Council's written approval (refer to **Section 2.8.1** above for further details).

---

## 4 Heavy Haulage Contribution Payment

### 4.1 Timing of payments

A monetary contribution required to be paid by a condition imposed on the development consent in accordance with this Plan is to be paid at the time specified in the condition.

Generally, the condition will provide for payment as follows:

- For development where no further approvals are required – prior to the commencement of the development.
- For development involving subdivision – the contribution must be paid prior to the release of the subdivision certificate (linen plan).
- For development not involving subdivision, but where a construction certificate is required, the contribution must be paid prior to the release of the construction certificate for any works.
- For works authorised under a CDC, the contributions are to be paid prior to any work authorised by the certificate commences, as required by section 136L of the EP&A Regulation.

At the time of payment, it will be necessary for monetary contributions amounts to be updated in accordance with the CPI All groups, Sydney index. (see **Section 4.4**).

### 4.2 Deferred and periodic payment

Council may accept the deferred or periodic payment of a monetary contribution required under this Plan if the applicant, or any other person entitled to act upon the relevant consent, makes a written request and can satisfy Council of non-compliance with the payment provisions.

Council must be satisfied that:

- There are valid reasons for the deferral or periodic payment.
- The granting of the request will not adversely impact on the administration, operation or cash flows of this Plan.
- The proposed arrangement remains consistent with the purpose of this Plan.

The decision to accept a deferred or periodic payment of a monetary contribution is at the sole discretion of Council. Any deferral will generally be limited to a period of no more than 24 months.

Where Council allows a deferral of contributions, an appropriate bank guarantee shall be secured for the amount of contributions to be deferred. The conditions under which the Council may accept deferred settlement by way of lodgement of a bank guarantee are that:

- The bank guarantee be by an Australian bank for the amount of the total contribution, or the amount of the outstanding contribution, plus an amount equal to thirteen (13) months interest (calculated using the rate set annually by the Minister of Local Government in relation to outstanding rates);
- The bank unconditionally pays the guaranteed sum to the Council if the Council so demands in writing not earlier than twelve (12) months from the provision of the guarantee or completion of the work whichever occurs first;

- 
- The bank must pay the guaranteed sum without reference to the applicant or landowner or other person who provided the guarantee, and without regard to any dispute, controversy, issue or other matter relating to the development consent or the carrying out of development in accordance with the development consent; and
  - The bank's obligations are discharged when payment to the Council is made in accordance with this guarantee or when Council notifies the bank in writing that the guarantee is no longer required.

Any deferred or outstanding component of the monetary contribution will be adjusted in accordance with **Section 4.4** of this plan.

The applicant will be required to pay any charges associated with establishing or operating the bank guarantee. Council will not cancel the bank guarantee until the outstanding contribution as indexed and any accrued charges are paid.

Where Council agrees to a request for deferred or periodic payment, the applicant will be required to lodge, and pay for, a section 4.55 application to modify the development consent to specify the new payment arrangements.

### **4.3 Requests for alternative payment arrangements**

Applicants may propose an alternative contribution rate that more accurately reflects the likely road impacts of the particular development. Any alternate contribution rate must be agreed to by Council prior to the due date for a contribution payment or the commencement of any works as part of that alternate payment method.

Applicants may also propose alternative arrangements to the payment of a periodic contribution to Council for excessive road wear and tear. This could include, for example, reconstruction of the road pavement up-front and no ongoing maintenance contribution.

Justification of any alternative must be addressed in a transport study on the proposed development.

A person may make an offer to the Council to carry out works or provide another kind of material public benefit or dedicate land, in part or full satisfaction of a section 7.11 contribution required by a condition of consent imposed under this plan.

If a developer wishes to deliver infrastructure that is included in this Plan instead of the Council delivering that infrastructure, then the developer can approach this in one of two ways:

1. The developer may offer to enter into a planning agreement to undertake works, make monetary contributions, dedicate land, or provide some other material public benefit. Planning agreements are the most appropriate mechanism for offers made prior to the issue of a development consent for the development, or
2. If the developer has already received a development consent containing a condition requiring a section 7.11 contribution, the developer may offer to undertake works in kind through a works in kind agreement, or offer to dedicate land through a land dedication agreement.

Any offer for works in kind or other material public benefit shall be made in writing to the Council prior to the commencement of any works proposed as part of that offer. Retrospective works in kind agreements will not be accepted.

Works in kind or the dedication of land will be accepted by Council only under the following circumstances:

- Council will generally only accept offers of works or land that are the specific public amenities and services included in this Plan.
- Council determines that the works in kind are, or the land to be dedicated is, appropriate.
- The value of the works to be undertaken or the land to be dedicated is at least equal to the value of the contribution assessed in accordance with this plan, or where the value of the proposed works in kind or the land to be dedicated is less than the monetary value of the contribution, the difference will be met by way of a monetary contribution.

The decision to accept the settlement of a contribution by way of works in kind or the dedication of land is at the sole discretion of Council and will be subject to any reasonable requirement of the Council in relation to the facility specification, program for delivery, and a suitable defects liability period.

## 4.4 Adjusting contribution rates at the time of payment

Section 25I of the EP&A Regulations provides for the indexation of contribution rates detailed within **Appendix A**. Section 25I provides the following:

### **25I Indexation of monetary section 7.11 contribution—recoupment of costs**

*For the purposes of section 7.11(3) of the Act, the cost of providing public amenities or public services is to be indexed quarterly or annually (as specified in the relevant contributions plan) in accordance with movements in the Consumer Price Index (All Groups Index) for Sydney issued by the Australian Statistician.<sup>3</sup>*

Contribution rates have been calculated using prices current at the 1<sup>st</sup> July 2020 (index value of 114.7, ABS 6401.0, All groups CPI, Sydney, Jun 2020).

<sup>3</sup> Extract from the *Environmental Planning and Assessment Regulation 2000* (Current version 16 April 2021)

---

Contribution rates are to be adjusted using the ABS 6401.0, All groups CPI index for Sydney. **Appendix A** will be updated annually and will be accessible from Council's website.

Monetary contribution amounts required by conditions within a development consent imposed in accordance with this plan will be indexed to the annual rate detailed in Appendix A.

### Example indexation calculation

The following describes how the Contribution Rates Chart at **Appendix A** is to be indexed. The below calculation is required to be applied to each cell within the Chart.

Example calculation uses the cost/t/km rate for a Truck & Dog 6 Axle (NSW) using a Local (Primary) rural road.

- Jun 2020 value = \$0.121
- Jun 2020 CPI All groups, Sydney index value = 114.7
- Jun 2021 CPI All groups, Sydney index value = 118.8

Formula

New Rate = (CPI applicable to new rate / CPI applicable to base rate) x base contribution rate

$$\text{New rate} = (118.8 / 114.7) \times \$0.121$$

$$\text{New rate} = \$0.125$$

---

## 5 Other matters

### 5.1 Review of contribution rates

Contribution rates will be reviewed every four (4) years. This process will be undertaken concurrently with the preparation of Council's Asset department Delivery Plan required within each term of Council. Review of rates will be undertaken by Council's Manager of Engineering Services and Manager Roads Delivery in consultation with Council's Development Contributions Officer.

This process will review costs associated with the refurbishment and respray of the different road classes throughout the LGA. In addition, the review will ensure that ESA values for each road type remain the standard.

### 5.2 Pooling of contributions

The Plan expressly authorises monetary section 7.11 contributions paid for different purposes to be pooled and applied (progressively or otherwise) for those purposes.

### 5.3 Saving and transitional arrangements

This Plan applies to a development application or application for a CDC submitted after the date on which this Plan was adopted.

A development application or application for a CDC which has been submitted prior to the adoption of this Plan but not determined shall be determined in accordance with the provisions of the plan which applied at the date of submission of the application.

### 5.4 Accountability and access to information

In accordance with the EP&A Act and section 35 EP&A Regulation a contributions register will be maintained by Council and may be inspected upon request.

The register will be maintained at regular intervals and will include the following:

- Particulars sufficient to identify each development consent for which contributions have been sought.
- Nature and extent of the contributions required by the relevant condition of consent.
- Name of the contributions plan under which the condition of consent was imposed.
- Date the contribution was received, for what purpose and the amount.

Separate accounting records will be maintained for each contribution type in this Plan and published every year in Council's financial accounts. This information will be made available on Council's website and will be accessible through the NSW Planning Portal from 1 July 2022. They will contain details concerning contributions received and expended, including interest for each service or amenity to be provided. The records will also be held at Council's administration Office and may be inspected upon request.

# APPENDIX C

## Example Calculation of Contribution Rates

## EXAMPLE FOR LOCAL PRIMARY ROAD PER KM FOR A THREE-AXLE RIGID (BOGEY) RETURN EMPTY.

All costs and design life figures are based on data provided by Yass Valley Council. Costs are in July 2020 dollars. June 2020 All Groups CPI Sydney Index (114.7) to be used as base for indexation.

### ESTIMATED ECONOMIC LIFE (ESA)

$$\text{Design Traffic ESA} = 5.0 \times 10^5 \text{ ESA}$$

$$\text{Design Life} = 20 \text{ years}$$

$$\text{Economic Life (estimate according to YVC)} = 80 \text{ years}$$

$$\text{Economic Life (ESA)} = \text{Economic Life} / \text{Design Life} \times \text{Design Traffic ESA}$$

$$= 80\text{y} / 20\text{y} \times 5.0 \times 10^5 \text{ ESA}$$

$$= 2.0 \times 10^6 \text{ ESA}$$

Design Traffic sourced from Yass Valley Council's Road Standards Policy (2017). Design Life and Economic Life sourced from Yass Valley Council.

### MAINTENANCE COST OVER ECONOMIC LIFE

$$= \text{maintenance cost/year} \times \text{economic life}$$

$$= \$1,600/\text{y} \times 80\text{y}$$

$$= \$128,000$$

Maintenance costs are estimates sourced from Yass Valley Council based on costs Council have incurred for annual maintenance.

### COST OF RESEAL OVER ECONOMIC LIFE

$$= \frac{\text{economic life} - \text{frequency of reseal}}{\text{frequency of reseal} \times \text{cost of reseal inc allowance for patching}}$$

$$= (80\text{y} - 20\text{y}) / 20\text{y} \times \$60,000$$

$$= \$180,000$$

Note: because the road receives a full rebuild at 80 years, only 3 reseals are allowed for at 20,40, and 60 years.

### TOTAL COST OVER ECONOMIC LIFE (EL)

$$= \text{Maintenance cost over EL} + \text{Cost of reseal over EL} + \text{Cost of rebuild at EL}$$

$$= \$128,000 + \$180,00 + \$550,00$$

$$= \$858,000$$

### **COST/ESA**

$$\begin{aligned} &= \text{Total Cost Over Economic Life/Estimated Economic Life (ESA)} \\ &= (\$858,000)/(2.0 \times 10^6 \text{ESA}) \\ &= \$0.429/\text{ESA} \end{aligned}$$

The above is the cost per ESA to rebuild and maintain a km portion of road over its economic life.

### **TONNES/ESA (3 AXLE BOGEY)**

$$\begin{aligned} \text{ESA 100\% loaded} &= 3.58 \text{ ESA} \\ \text{ESA 0\% loaded} &= 0.51 \text{ ESA} \\ \text{ESA round trip} &= 4.09 \text{ ESA} \\ \text{Payload} &= 13.12\text{t} \\ \text{Tonnes/ESA} &= 13.12\text{t}/4.09\text{ESA} = \mathbf{3.21\text{t/ESA}} \end{aligned}$$

Essentially, every 3.21 tonnes of hauled material in a 3 axle bogey results in the generation of 1 ESA on the road; so, using the cost/ESA and Tonnes/ESA values, we are able to establish a relationship in terms of cost/tonne.

### **COST/TONNE**

$$\begin{aligned} &= \frac{\text{cost}}{\text{ESA}} \times \frac{\text{ESA}}{\text{tonnes}} \\ &= \frac{\$0.429}{\text{ESA}} \times \frac{\text{ESA}}{3.21\text{t}} \\ &= \$0.429/3.21\text{t} = \mathbf{\$0.134/\text{t}} \end{aligned}$$

The above is calculated for one km of road; therefore, the contributions rate is:

$$= \mathbf{\$0.134/\text{t.km}}$$

### SLR Wollongong Office

Level 1, The Central Building,  
UoW Innovation Campus,  
North Wollongong, NSW, 2520
