1. Introduction

1.1. Background

This Community Engagement Report forms an attachment to both a Local Planning Panel and Council report, each of which report on the feedback from the exhibition of the Planning Scheme for 195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta, herein referred to as the ‘St John’s Anglican Church site’.

The Planning Scheme for the St John’s Anglican Church site consists of a site specific Planning Proposal, site-specific Development Control Plan (DCP) amendment (amending Parramatta DCP 2011) and Planning Agreement for the subject site.

1.2. Purpose of this Report

The purpose of this report attachment is to summarise and respond to the submissions received during the exhibition of the Planning Scheme for the St John’s Anglican Church site. This report attachment should be read in conjunction with the relevant report to the Local Planning Panel or Council meetings. At the time this Report was prepared, the targeted Local Planning Panel meeting was 9 November 2022 and the Council Meeting was 15 November 2022.

2. Community Engagement

2.1. Who is the community?

The term ‘community’ includes (but is not limited to) residents, landowners, businesses, workers, visitors, interest groups, non-government organisations, non-for-profit organisations, the development industry and planning proposal applicants, other industry sectors and stakeholders, including peak industry groups and State public authorities.

2.2. Engagement principles

Council's **Community Engagement Strategy** includes eight key principles to guide engagement: building relationships, right to be involved, clarity of purpose, accessible and inclusive, timely and coordinated, tailored, transparent, and learning from practice. These key principles have been based on the Community Participation principles outlined in the *Environmental Planning and Assessment Act 1979*. These principles were used to inform the processes and engagement mechanisms undertaken during the exhibition period.

2.3. Engagement timeframe

Public exhibition of the draft Planning Proposal and the draft Development Control Plan formally commenced on Tuesday 29 March 2022, with the public exhibition of the draft Planning Agreement commencing shortly after on Tuesday 12 April 2022 for the site at 195 Church St, 65- 79 Macquarie St, 38 and 45 Hunter St, Parramatta. Formal exhibition of all three documents concluded at 5pm on Friday 13 May 2022.

The draft DCP and PP were exhibited for a total of 45 days and the draft PA for 31 days. The extended exhibition period accounted for the public holidays in this time period and for the joint exhibition of the documents.

2.4. Engagement mechanisms

The exhibition period was supported by a number of engagement mechanisms to promote public participation and provide the opportunity for feedback on the Planning Scheme for the St John’s Anglican Church site. The engagement tools implemented are listed below with a short description of each:

1. Notification Emails:

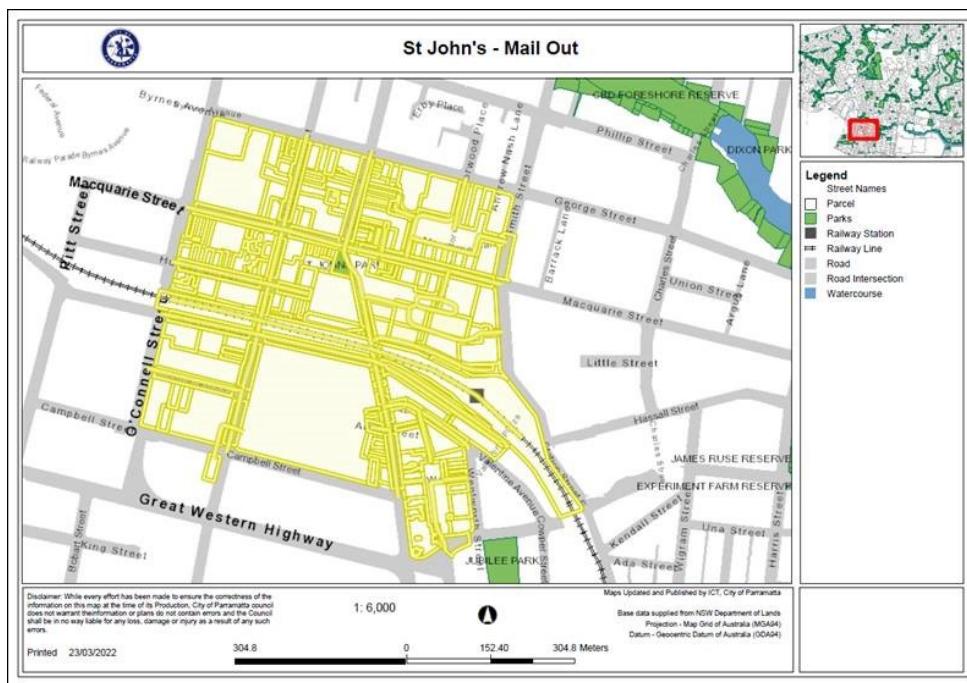

In accordance with Condition 3 of the Gateway Determination, issued by the Department of Planning and Environment on 8 September 2020, a suite of customised notification emails were prepared. The following Public Authorities, Service Providers and Peak Body Organisations were contacted via email:

- Department of Infrastructure, Transport, Regional Development and Communication
- Endeavour Energy
- Department of Planning and Environment – Environment and Heritage Group
- NSW State Emergency Service
- Transport for NSW
- Civil Aviation Safety Authority
- Department of Planning and Environment
- Heritage NSW
- Sydney Water
- Government Architect NSW
- National Trust NSW
- National Trust Parramatta Branch

2. Notification Letters:

At the commencement of the exhibition period, 3,687 letters were sent to nearby landowners and occupiers to notify them of the Public Exhibition for the St John's Anglican Church site.

The mail out area was bound by George Street in the north, Smith Street to the east, Campbell Street to the south, and O'Connell Street to the west. For the specific mail out area, refer to the image below.

3. Frequently Asked Questions (FAQs):

Frequently Asked Questions were provided on Council's Participate Parramatta webpage, providing answers to commonly asked questions relating to the 'who, what, where' of the Planning Scheme for the St John's Anglican Church site. Providing Frequently Asked Questions was important due to the complexity of the Planning Scheme, new planning initiatives being proposed, and volume and size of exhibition material.

4. Social Media:

The Planning Scheme for the St John's Anglican Church site was promoted across Council's social media channels via a mixture of paid advertisements and organic posts.

An approximate 57,317 people were reached across Council's main social media accounts and the Participate Parramatta social media account.

- City of Parramatta Facebook – 41,516 followers
- City of Parramatta Twitter - 8,864 followers
- Participate Parramatta Facebook – 6,937 followers

5. ePULSE (e-newsletter):

The feedback opportunity and the broader project was promoted via both ePulse and the Participate Parramatta community newsletter.

- The Participate Parramatta Community Newsletter went out to 10,653 people on Thursday 14 April 2022. The email was opened 4,655 times and the various website links within the newsletter that included a link to the St John's Planning Proposal were clicked 257 times.
- The April edition of ePulse went out to approximately 55,000 people.

6. Public notices:

The project was promoted twice via Parra News (the local Parramatta newspaper) during the exhibition period. The first ad was released on Tuesday 29 March 2022 and the second on Tuesday 19 April 2022.

7. Webpages:

a. Participate Parramatta website:

The Planning Scheme for the St John's Anglican Church site and supporting exhibition material were placed on the Participate Parramatta website for the duration of the exhibition period. This website raised awareness of the Planning Scheme public exhibition, informed the public regarding the purpose of the proposal, outlined where to view the exhibition material, and outlined how to provide feedback.

The Planning Scheme for the St John's Anglican Church site project page on Participate Parramatta garnered repeated interest from the community. It was viewed 6,501 times during the consultation period by 4,112 unique visitors.

A total of 63 documents were listed on the page. These documents were downloaded 2,167 times over the course of the exhibition. For a breakdown of the top 5 document downloads, see the below table.

Document Name	Number Of Downloads
01a Planning Proposal 2 – St John's (195 Church) RZ 5 2018	372
01d 2022 March Reference Design Report	128
01b DCP Controls associated with Planning Proposal RZ 2018 St John's March 2022	110
01e 2022 March CoP Heritage Documents	69
01f 2022 March Heritage Addendum Paul Davies	58
TOTAL	737

A link to Participate Parramatta is provided here: [195 Church St, 65-79 Macquarie St, 38 and 45 Hunter St, Parramatta | Participate Parramatta \(nsw.gov.au\)](https://195churchst.ppparticipate.com.au/)

b. City of Parramatta website:

The Planning Scheme for the St John's Anglican Church site was displayed as a banner item on the City of Parramatta external website throughout the exhibition period. The external website homepage where the banner sits received 21,227 unique page views in this period. This resulted in 103 link clicks to the project page on the Participate Parramatta website.

8. Hard Copy Documentation:

Hard copies of the Planning Scheme for the St John's Anglican Church site and supporting information were made available at Council's Customer Contact Centre and Parramatta CBD Library (subject to COVID-19 restrictions) during the exhibition period.

9. NSW Planning Portal:

The NSW Government Planning Portal provides public access to a range of planning services and information including site specific Planning Proposal. Information on the St John's Site Specific Planning Proposal is provided on the Planning Portal and can be accessed via the following link:

<https://pp.planningportal.nsw.gov.au/prr/post-exhibition/st-johns-cathedral-site-195-church-street-65-79-macquarie-street-38-and-41-45-hunter-street-parramatta-168-dwellings-4825-jobs>

10. 'Phone a Planner' sessions:

Phone a Planner sessions were facilitated through an online booking system, offering community members the opportunity to book in a 30-minute out-of-office hours appointment to speak with a Council Planner. No bookings were made for the phone-a-planner sessions offered. Council officers received one phone call with queries about the Planning Scheme during exhibition, and answered the questions raised therein.

3. Feedback from Exhibition Period

3.1. Overview of Formal Feedback Received

Formal feedback on the exhibition of the Planning Scheme for the St John's Anglican Church site consistent with the community participation requirements established by the *EP&A Act* resulted in a total of **406 submissions** being received by Council. The submissions are categorised into the following:

- **Residents, Individuals and Community Groups:** 390 Submissions
- **Peak Body Organisations:** 3 Submissions
- **Developers, Major Landowners, and Planning Consultants:** 5 Submissions
- **Public Authorities and Service Providers:** 8 Submissions

The feedback received from the community during the formal exhibition period is discussed in the sections below. For a detailed summary of submissions in each category along with the corresponding Council Officer response, refer to [Appendices A to D](#) of this report.

4. Submissions from Residents, Individuals and Community Groups

4.1. High Level Summary of Submissions

The total number of submissions received from the community and locally-based community groups was 390 (392 Submissions including submitter duplicates). Council officers note this was an unprecedented level of community engagement with a site-specific Planning Proposal in the Parramatta CBD amongst recent site-specific Planning Proposals.

The below table enumerates these submissions and categorises their general view on the Planning Scheme. This table clearly demonstrates the polarised nature of the community's response, which is also noteworthy amongst recent site-specific Planning Proposals in the Parramatta CBD.

Submissions – Support	156 (40%)
Submissions – Did Not Support	230 (59%)
Submissions – Other Views	4 (1%)
TOTAL	390 (100%)

Two community groups made submissions, being North Parramatta Residents Action Group and the Blue Mountains Association of Cultural Heritage Organisations. Both groups did not support the proposal.

A detailed summary of the issues in each category along with the corresponding Council Officer response, is contained within [Appendices A-1, A-2 and A-3](#) of this report.

4.2. Spatial Analysis

The below table provides information about the spatial distribution of the submissions. The following is noted regarding this analysis:

- a. All submissions are considered regardless of location.
- b. Spatial analysis can be a useful tool to identify patterns in the community response - particularly in instances such as this one where a large number of submissions have been received.
- c. Only about half of submissions gave any location information, and not all of those submissions gave complete address information. Council officers have made a reasonable effort in good faith to identify spatial location in instances where incomplete address information was provided, however, this was not possible in all instances.
- d. Of submissions where location was able to be established, the most submissions came from within the Parramatta LGA (102 submissions). However, a significant proportion of responses also came from outside the LGA (78 submissions).
- e. Council officers note that, where location was able to be established, submission writers from within the Parramatta LGA were more likely to express support for the proposal (61 support vs. 40 not support) than submission writers outside the Parramatta LGA (32 support vs. 46 not support).

Location	Support	Did Not Support	Other Views	TOTAL
Parramatta LGA	61	40	1	102 (26%)
Greater Sydney	32	39	0	71 (18%)
Outside Greater Sydney	0	7	0	7 (2%)
Insufficient information	63	143	3	210 (54%)
TOTAL	156 (40%)	229 (59%)	4 (1%)	390 (100%)

4.3. Submissions in Support – Summary and Analysis

Council officers have considered the 156 submissions received in support and identified 10 themes across them. These themes are discussed, enumerated and responded to in the below table.

Appendix A-1 summarises and allocates the themes to the 156 submissions received in support of the Planning Scheme. In this Appendix, each submission received has been allocated a unique number, and if provided by the Submitter, the Street Name and Suburb is included. To ensure the privacy of submitters, names and street numbers have been withheld.

No	Themes	Submissions raising issues under this theme in support	Response	
		Number	Percentage (rounded)	
1	<u>Will enhance the Church's use</u> Examples of points raised: <ul style="list-style-type: none"> • Will enhance ability of church to provide church services and programs that will benefit wider community • Recognises the vital role of St Johns Church within Parramatta community • Will improve church facilities to cater for a growing congregation • Will provide a space to welcome people of all ages, cultures and backgrounds • Will provide the church with more flexible and useful spaces to conduct services, gatherings, events and sporting activities • Will generate cash flow for ongoing maintenance of Cathedral building and heritage items and to support church activities 	79	23%	This view is noted, and mainly relates to how the private landowner proposes to utilise their site.
2	<u>Public, community, cultural and economic benefits of proposal</u> Examples of points raised: <ul style="list-style-type: none"> • Will attract more local tourism • Will strengthen business and employment • Will add increased economic vitality and retail opportunities within precinct • Will contribute to the cultural, religious, economic and social life of Parramatta • Will provide public benefit through 	67	20%	This view is noted. This is considered to be generally aligned with Council's existing policy position for this site.

	<ul style="list-style-type: none"> the sharing of church spaces Will provide cost savings for City of Parramatta Council 			
3	<p><u>Positive urban/planning design outcomes</u></p> <p>Examples of points raised:</p> <ul style="list-style-type: none"> Proposal will deliver positive urban design and planning outcomes In line with new developments in CBD and the LGA's objectives as the Central River City Improves integration of St John site with Parramatta CBD Upgrade in design will enhance local area Considers the proposal to be well thought out and a good long-term decision for Parramatta There is great potential in redeveloping the site 	61	18%	This view is noted. This is considered to be generally aligned with Council's existing policy position for this site.
4	<p><u>Positive public domain</u></p> <p>Examples of points raised:</p> <ul style="list-style-type: none"> Additional public space will enhance Cathedral and surroundings and will enhance vibrancy of Parramatta CBD Will allow an unhindered line of sight to the Cathedral from East, North and South directions Will provide community access in perpetuity Values retention and enhancement of green open space 	45	13%	This view is noted. This is considered to be generally aligned with Council's existing policy position for this site. It is noted that the additional publicly accessible space is only delivered as part of Option A, and the matter of which Option (A or B) will proceed will be the subject of a future Stage 1 DA process.
5	<p><u>Support for Option A for Church Hall</u></p> <p>Examples of points raised:</p> <ul style="list-style-type: none"> Church hall of little heritage value for Parramatta and the church Existing building is dysfunctional requiring significant repair work that is not cost-effective New facilities would provide more functional space for Church community Option B, retaining a smaller section of the hall is less useful 	44	13%	This view is noted. The matter of which Option (A or B) will proceed will be the subject of a future Stage 1 DA process.
6	<p><u>Positive heritage outcomes</u></p> <p>Examples of points raised:</p> <ul style="list-style-type: none"> Enhances heritage aspects of St John's Cathedral Proposal preserves essence of history of area References the original historical intention of the site as a site for congregation rather than a museum 	22	6%	This view is noted. The matter of Heritage outcomes for this site (i.e. which Option will proceed) will be the subject of a future Stage 1 DA process.

7	<p><u>Positive impacts for pedestrian safety/parking/traffic/infrastructure</u></p> <p>Examples of points raised:</p> <ul style="list-style-type: none"> • Will result in improved vehicular access • Will provide greater walkability around area • Supports additional parking- underground parking will improve pedestrian safety • Supports improved vehicle access to Queensland Arcade • The development encourages active modes of transport due to proximity to transport hubs and will decrease private vehicle usage and support climate change 	17	5%	This view is noted. This is considered to be aligned with Council's existing policy position for this site. It is noted that some of the issues noted at left are only relevant if Option A proceeds, and the matter of which Option will proceed will be the subject of a future Stage 1 DA process.
8	<p><u>Role and recognition of Church in preparing proposal</u></p> <p>Examples of points raised:</p> <ul style="list-style-type: none"> • Anglican Church has worked closely with Council to develop proposal • Proposal has undergone a lengthy and considered evaluation process • Church has taken a visionary and collegiate approach in seeking to redevelop its properties 	7	2%	This view is noted, and Council officers acknowledge that Council and the Applicant have worked together over a number of years to progress this proposal.
9	<p><u>Queries whether Centenary Square will be affected by construction and if Parramatta Light Rail will be impacted</u></p> <p><i>[Submitter indicated support for proposal but raised query]</i></p>	1	1%	This query is noted. Both construction-related and long-term impacts on Centenary Square and Parramatta Light Rail will be matters for consideration as part of a future DA process.
10	<u>Support for Option A and B for Church Hall</u>	1	1%	This view is noted. The matter of which Option will proceed will be the subject of a future Stage 1 DA process.

4.4. Submissions not Supporting – Summary and Analysis

Council officers have considered the 230 submissions that did not support the Planning Scheme and identified **15** themes across them, as enumerated in the below table.

The main issues raised by submitters relevant to each theme are summarised, and then a response by council officers to each theme is provided.

Appendix A-2 summarises and allocates the themes to the 230 submissions that did not support the Planning Scheme. In this Appendix, each submission received has been allocated a unique number, and if provided by the Submitter, the Street Name and Suburb is included. To ensure the privacy of submitters, names and street numbers have been withheld.

No	Themes	Submissions raising issues under this theme not in support	
		Number	Percentage (rounded)
1	Impacts on St John's Cathedral and grounds (visual, environmental and historical)	147	28%
2	Concern that the Cathedral will be demolished	2	0.4%
3	Relationship to Parramatta's history and heritage	140	26%
4	Concerns relating to St John's Parish Hall	40	7%
5	Concerns relating to development contributions and private benefit	7	1%
6	Impacts on public open space and Heritage Items surrounding the Centenary Square	75	14%
7	Impacts on Hunter Street	10	2%
8	Traffic and transport impacts	4	1%
9	Social/infrastructure impacts and community interest	16	3%
10	Need for the proposal	12	2%
11	Relationship to planning instruments and processes	57	10%
12	Environment and sustainability	6	1%
13	Concerns relating to overdevelopment	15	3%
14	Concerns relating to building design and its impacts generally	11	2%
15	No reason for objection provided	8	1%

Theme 1: Impacts on St John's Cathedral and grounds (visual, environmental and historical)

Issues Raised:

- Submits that proposed development 's height, bulk and scale would dominate, overshadow and/or is out of character with St John's Cathedral and or its setting.
- Opposes height given that the current Parramatta LEP provides for a maximum of 18 – 24 m for the site.
- Notes that there is no building height control on land zoned SP1 Place of public worship, raising concerns that the developer will self-determine height and or sell off the airspace.
- Notes that the now-endorsed CBD Planning Proposal identifies part of the site as falling within Block A of the Sun Access Protection Map.
- Quotes from the Heritage Assessment conducted by Hector Abrahams Architects for this planning proposal, which stated on page 13 that the amount of sun in the proposal was insufficient to sustain: the health of the vegetation on the church site, the amenity for people, and the rendering of the architectural form in light.
- The Proposal will affect the historic and heritage integrity of the Cathedral and adjoining buildings

including St John's Parish Hall and Verges Cottage.

- The church and setting (that is a nationally significant historic site) should be preserved intact and retained as is.
- Supports comments from Hector Abrahams Architects, which stated that the church does not need a new setting, but a reinterpretation of the historic setting, such as through the removal of car parking from the cathedral's public access area and the area immediately adjacent to the cathedral's western entry facing Hunter Street.
- Considers that airflow around the Cathedral is important so as to avoid moisture damaging the building.
- The development site should be preserved as a low-rise precinct.
- Concerned with wind tunnel effects, loss of vistas and blue sky and lack of solar access.
- Issues of evacuating high-rise buildings in emergencies.

Council Officer Response:

It is acknowledged that the height under the current Parramatta LEP 2011 for areas of the site zoned B4 Mixed Use varies from 12m to 24m. The proposed increase in height to 211m RL for two parts of the site allowing a built form of high-rise towers is considered acceptable and is supportable on heritage grounds. The proposed height was supported by the applicant's Heritage assessments, and also by an independent review of the controls by Hector Abrahams in 2018.

The review by Hector Abrahams concluded that the development of high towers on church land should not detract from the Cathedral providing the church yard retains its historic integrity. This is in recognition that towers are the norm in Parramatta with small heritage sites nearby.

As the proposed height is considered acceptable on heritage grounds it is not considered that proposed development will dominate and or impose an overbearing backdrop to St John's Cathedral subject to the design of the tower being consistent with the building envelope and tower slenderness controls in the DCP.

Part of the development site is subject to solar access controls for the protection of Parramatta Square.

Under Parramatta LEP 2011 there is no height limit for the St John's Cathedral site zoned SP1 Place of public worship. However, this does not mean that height is unlimited for the site, but rather any proposal will require consent and will need to be assessed on its merits cognisant with the heritage status of the Cathedral site. The State Heritage Register listing (I01805) of the Cathedral and its curtilage will have the effect of limiting building height. Council staff are not aware of any plans to sell off the air space above the area zoned SP1 Place of public worship. Any development plans would be constrained by the heritage listing.

1. Regarding environmental effects:

- a. It is acknowledged that shadow diagrams included in the Urban Design Report 2018 submitted with the Planning Proposal show that the proposed development will overshadow the Cathedral from approximately 12 PM onwards in midwinter. In addition, the assessment by Hector Abrahams states that the amount of sun in the proposal was insufficient to sustain: the health of the vegetation on the church site, the amenity for people, and the rendering of the architectural form in light. The following response is made to the Hector Abrahams statement:

- The concept landscape masterplan does not raise any issues of overshadowing on the future health of vegetation on site.
- Protection of the church and its setting will provide appropriate amenity for the community
- Protection of view corridors for the Church and the setbacks proposed in the site-specific DCP should help to ensure adequate rendering of the architectural form in light.
- The site-specific DCP requires a schedule of conservation works to be included with the DA for St John's Parish Hall, St John's Building, Warden's Cottage and memorial and this control has been amended to include the Cathedral [See C.1 under the heading 'Heritage' in 'G. Development to Benefit a Heritage Item' in both Option A and Option B.]

- b. In addition, the Urban Design report states that proposed development will comply with the draft Conservation Management Plan's requirement for 30 minutes midwinter sun to the western façade of the Cathedral (11.10 – 11.40 am) and 20 minutes in the equinox ((11.35 – 11.55am on 21st of March, 11.20-11.40am on 21st of September). In addition, some degree of overshadowing is to be expected with developments in the Parramatta CBD.
 - c. It is noted that the proposed development will not infringe on view corridors, including views from Hunter Street, Parramatta Square and Church Street, protected by Council's Development Control Plan 2011. It is acknowledged that the proposed development may cause some loss of blue-sky views. But this will be minimised as view corridors for the Church will allow people to enjoy blue sky views from a number of different vantage points. In addition, some loss of blue-sky views is inevitable in the Parramatta CBD context if jobs and housing targets are to be achieved. Wind tunnel effects and issues of evacuating high-rise buildings in emergencies can be considered at the Design Excellence and Development Application stages as appropriate.
2. Regarding building design and controls:
- a. The site-specific DCP contains objectives and provisions that define the development's building envelope and provides an appropriate relationship with St John's Cathedral, the public domain and Centenary Square. The site-specific DCP contains the following provisions:
 - i. objectives that encourage buildings to respond to the heritage significance of the site and the human scale of the Cathedral and surrounding space
 - ii. 20 m setback provision from the centre of the Cathedral as part of the set out for Parramatta Square
 - iii. street wall height limit of 14 – 16 m for buildings facing the Cathedral
 - b. Council officers acknowledge there is tension between delivery of commercially viable floorplates, and the design vision for slender towers in the CBD. This site has sought to balance these issues by using setbacks consistent with the draft CBD DCP, while also delivering a commercially viable floorplate.
 - c. The relationship of future development to the Cathedral and grounds will be further refined and considered during the Design Excellence and Development Application stages. This process will help to address submitters' concerns to achieve the best urban design and planning outcomes for this iconic site.
3. The following comments relating to the Cathedral's setting are made:
- a. The Cathedral and grounds will be largely retained. The setting of St John's Anglican Cathedral may be enhanced with a new public square - in the event that a Development Application is approved that allows the demolition of the Parish Hall.
 - b. The Heritage Impact Statement, Paul Davies Pty Ltd, 2018 shows that the significance of the church precinct should not be detrimentally affected by the Planning Proposal. The Statement comments that the proposal creates a fine setting for the Cathedral building and appropriately integrates it into the ongoing development of Parramatta. In addition, Paul Davies Pty Ltd in 2019 stated the support for removal of car parking at grade level enhanced landscaping and the removal of boundary fencing to create urban public space.
 - c. It is noted that the advice by Hector Abrahams in 2018 states that the church does not need a new setting, but a reinterpretation of the historic setting, in particular the definition on the western side and the removal of ground level car parking. Paul Davies Pty Ltd 2019 responds that the interpretation of the western space could be more clearly articulated in the planning proposal or explored more fully in a design competition.
 - d. The setting for the Cathedral is also protected by the State Heritage Register listing and its defined curtilage referred to previously in this response. It is noted that the Planning Proposal does not provide for any development within the heritage curtilage. The listing together with other setbacks proposed will help protect the historic and heritage integrity of the Cathedral.

- e. As the Cathedral setting will be protected it is not necessary to consider making the whole of the development site a low-rise precinct, that in any case would be contrary to the principles underpinning the CBD Planning Proposal.

Theme 2: Concern that the Cathedral would be demolished

Issues Raised:

- A concern was raised that St John's Cathedral would be demolished.

Council Officer Response:

The exhibited St John's Planning Proposal is not seeking delisting or demolition of any Heritage-listed item on the site. The State heritage listed Cathedral owned by the Anglican Church is not proposed to be demolished.

The exhibited draft DCP describes two options for the local heritage listed St Johns Parish Hall (to the north of the Cathedral) and establishes a staged process by which consideration of the future of the Parish Hall will be considered. This is consistent with DPE's intention as part of the Gateway determination, which was to defer the matter of the Hall's future to Development Application stage (rather than Planning Proposal stage). The two options for the St Johns Parish Hall are Option A - 'removed and replaced' (in other words, the whole building is demolished); and Option B 'partly retained' (and specifically, the original c1910 structure is retained and the 1950s elements are removed/ demolished).

Theme 3: Relationship to Parramatta's History and Heritage

Issues Raised:

- Submits that the Planning Proposal is not sympathetic to the history of the area and is disrespectful to history and those of the Christian faith.
- Submits that much of Parramatta's heritage and links to history have been destroyed or compromised and Council should be doing more to protect heritage. Examples of listed buildings lost include Willow Grove, Royal Oak Hotel, St George's terraces and Albion Hotel.
- Raises concern with Council's stance on heritage and submits that Council is not committed to managing and preserving objects, artefacts, structures, spaces and practices which are of historical significance to the community and enduring value to the future.
- Submits that heritage, including a slice of colonial Sydney, should be preserved for future generations.
- Submits that Council should develop and protect its colonial heritage as a tourist opportunity.
- References The Rocks, London and Adelaide for examples of how heritage can be celebrated and submits that this proposal would not occur in Europe or the UK.
- Encourages efforts to improve the usability of St John's Cathedral and cites the cathedral as Parramatta's jewel in the midst of all the new development.
- Submits that approval of this development will set a precedent for other developments within proximity to heritage items.
- Submits that Council should also advocate for the restoration and reopening of Roxy Theatre.
- Submitter notes
 - the likelihood of the site to retain Aboriginal archaeological deposits and historical archaeological deposits of state and local significance
 - the high social and cultural significance of the site to the local Aboriginal community
 - the site is likely to hold the remains of the Parramatta native institution
 - therefore, seeks building should be sympathetic to be based upon full archaeological exploration prior to any new footprint design
 - Seeks that more extensive archaeological research should be undertaken in order to inform the potential redevelopment opportunity around the Parish Hall
- Negatively references recent and site-specific planning proposals and planning and heritage decisions made in the 1970s and 1980s drawing parallels to this Planning Proposal.
- Supports concerns raised by National Trust and National Trust Parramatta Regional Branch
- The Planning Proposal is not sympathetic to history of the area, those of the Christian faith, descendants of early convicts, residents and the First Nations people

- Concerned with Council's stance on heritage and lack of commitment to management and preservation of places of historical significance

Council Officer Response:

Whilst the submitters raise many issues, the key issue is whether the Planning Proposal and DCP controls provides for the appropriate level of protection of St John's Anglican Cathedral, its setting, and adjoining heritage items including, Verger's Cottage, the Parish Hall and Centenary Square.

The Planning Proposal and DCP aim to protect the heritage integrity of St John's Anglican Cathedral and Verger's Cottage, and the collection of heritage items surrounding Centenary Square. The issue of the Parish Hall is dealt with separately under the next theme in this document, and impact on Centenary Square is dealt with under the theme addressing impacts on open space.

By protecting the heritage integrity of the Cathedral, the following can be achieved:

- a. Respect for and links to Parramatta's history is preserved.
- b. The respect for those of the Christian faith is maintained.
- c. Links to the site of past generations and also of the First Nations people is preserved.
- d. The Cathedral is protected for the benefit of future generations.
- e. The opportunity is retained to promote heritage tourism of the site.

It is noted that the Planning Proposal is site-specific and does not consider cumulative heritage loss across a broader precinct. However, there are 126 listed sites (local and State items) within the CBD PP boundary of evidence that Council does have a strategy to preserve heritage items in the CBD.

The proposal does not approve the removal of any Heritage-listed item. It establishes a staged process by which consideration of the future of the Parish Hall will be considered. This is consistent with DPE's intention as part of the Gateway determination, which was to defer the matter of the Hall's future to Development Application stage (rather than Planning Proposal stage).

The matter at hand is a site-specific Planning Proposal. The following broader issues are not considered directly relevant to the consideration of this Planning Proposal:

- a. Council's past and current management of heritage functions.
- b. Council's management of its heritage items and places in relation to other places in Australia and overseas
- c. The impact of past site-specific Planning Proposals within the Parramatta CBD on heritage items

Nevertheless, Council recognises the importance of the preservation of Parramatta's historic and cultural buildings through its LEPs (which Heritage-list a large number of places in the CBD and elsewhere in the Parramatta LGA) and through its other corporate activities.

It is acknowledged that the site has the potential to contain Aboriginal and historical archaeological deposits of both state and local significance. There is support for early archaeological testing before determination of the final building layout. Therefore, it is recommended that an archaeological report based on archaeological testing, be added to the list of documents that must be submitted with the Stage 1 Development Application.

Support for the concerns raised by the National Trust and National Trust Parramatta Regional Branch is noted. The submissions from the National Trust branches are addressed elsewhere in this report and in Appendix C.

Theme 4: Concerns Relating to St John's Parish Hall

Issues Raised:

- Opposes the total or partial destruction of St John's Parish Church Hall.
- The Hall has the following values and benefits:
 - Is of architectural merit
 - Provides balance and context for the Cathedral and Town Hall opposite

- Contributes to the streetscape
 - Tells the history of the site.
- Its removal allows an even larger footprint for tower buildings closer to the Cathedral.
- Supports Option A if towers were built to a more responsible height of 24 m.
- The perspective render of Option B, with the omission of surrounding buildings maximum heights misrepresents the urban fabric of Parramatta Square.
- The overhanging development above St John's Parish Hall is an unrefined and undesirable architectural solution.
- The future functions within the new building are questioned.

Council Officer Response:

The Planning Proposal does not provide for the removal of St John's Parish Church Hall as an item of local Heritage significance. The Planning Proposal establishes a staged process for considering how the Hall's future will be decided as part of the Development Application process. As noted in the previous theme response, this process is because of the approach that DPE took in issuing the Gateway Determination.

Consequently, the site-specific DCP contains controls for two options in relation to St John's Parish Hall:

- a. Option A: the Parish Hall is demolished
- b. Option B: the Parish Hall is partially retained being the original circa 1910 structure, with the 1950s elements to be removed.

Under Option A the northern commercial tower would be built on part of the area currently containing the Hall. The remainder of the current Hall footprint would form an extension to the open space at the western side of the Cathedral. New Parish facilities would be incorporated in the podium of the new commercial building to accommodate the activities that currently occur in the Hall.

Under Option B the commercial tower would extend to within approximately 3 m of the retained portion of the St John's Parish Hall. While it is acknowledged that an option where a tower overhanging the Hall was included in the "Independent Heritage Advice Version V2.0 Dated 12th December 2018" prepared for the City of Parramatta Council by Hector Abrahams Architects, this option was not included in any of the planning controls for the site and that Council does not support this option. Neither the site-specific DCP nor the applicant's Reference Design March 2022 provide for any overhanging development over the top of St John's Hall as part of Option B.

The draft site-specific DCP includes controls that will apply to either outcome of the assessment process i.e. if the removal is supported, or if the removal is not supported. In addition, the building envelope will be subject to further refinement at Stage 1 DA, design competition, and Stage 2 DA phases.

The permitted height in the Planning Proposal of 211 m RL is considered acceptable being in line with the heights proposed in the CBD Planning Proposal, supported by the applicant's Heritage assessments and also an independent review of the controls by Hector Abrahams in 2018. Given the recommendation of Council Officers that unlimited floor space not be permitted on this height it is very unlikely that a building at 211RL will be achieved. Under the FSR proposed (17.5:1) it is expected that the maximum height will be in the order of 188 metres. The NSW State Heritage Inventory listing form includes the following Statement of Significance for St John's Parish Hall: St John's Parish Hall St John's Church Hall is of significance for the local area for historical and aesthetic reasons and as a representative example of a 20th Century church hall in the area, also as a rare example of this age and architectural quality in the local area. The hall makes a major contribution to the Parramatta townscape in unison with the associated church building. The site possesses potential to further contribute to an understanding of early urban development in Parramatta. The item is a related place to the adjoining St John's Church which is separately listed in the LEP.

The Hector Abrahams report 2018 considered that the Hall has architectural merit, being not only large in size, has a full aisle, a cast-iron arcade and a clerestory. It is in fact conceived like a large church. Nevertheless, the report by the applicant's Heritage consultants, Paul Davies Pty Ltd, states that there a range of variations of this type of buildings across Church sites and there is nothing to suggest that this building is an exemplar of the form or is exceptional in anyway.

Hector Abrahams in his report states that the Hall has an important status in the history of the ministry of the parish and the site. Paul Davies Pty Ltd suggests that whilst the hall has been a functional part of the parish the status in the history of the parish and site is not clear.

It is noted that advice from the applicant's Heritage consultants, Paul Davies Pty Ltd in March 2022 stated

that whilst supporting the client's request for the option to remove and replace St John's Hall consistent with the ongoing history of regeneration of premises on the site, they were of the opinion that the two-option approach was appropriate. Furthermore, they stated that despite the St John's Hall having local heritage significance there are potentially significant benefits that may be achieved from its removal. A decision to remove the building must be made in relation to outstanding urban outcomes that include enhancing the setting of the Cathedral.

The Hall is considered to contribute to the streetscape although there is not considered to be evidence that the Hall provides balance and context for the Cathedral and Town Hall. Council has introduced a setback for the potential tower from centenary square – which is consistent with setbacks established further north in Church Street to make sure that towers are setback to ensure the buildings along the edge of Centenary Square and Church Street have an appropriate scale (ie 12-14 metres) sensitive to the group of heritage items in this location.

St John's Hall is considered to have heritage value for historical and aesthetic reasons even though the level of value may not be outstanding. The heritage values of the Hall need to be appropriately considered when deciding its future at the Development Application stage.

Finally, Council officers note the issues raised regarding future functions of the new parish facilities and the private landowner's control thereof. The specific function of the Hall or any future church-owned spaces redeveloped by the Church are the responsibility of the private landowner. They are not being redeveloped as public community facilities. They will be private building / facilities and Council will not determine their use and operation it will be up to the landowner to use these in accordance with planning rules that apply.

Theme 5: Concerns Relating to Development Contributions and Private Benefit

Issues Raised:

- Development contributions are not satisfactory in offsetting heritage loss.
- Will create a precedent for heritage buildings to be traded off in exchange for community benefits.
- The proposal would only financially benefit the church.
- Makes specific comment on aspects of the proposal that have been offered as public benefits:
 - Notes that public access to church grounds is not a new public benefit, as this agreement has been in place since 1953.
 - Notes that provision of vehicle and pedestrian access arrangements are also not new public benefits, as an agreement was signed in 1991 and is valid until 2041.
 - Considers that provision of vehicle access arrangements to allow entry to 181 Church Street is not a public benefit, but only for the benefit of owners and tenants of the Queensland Arcade, which is located adjacent to the site. Accordingly, it should be categorised as a 'private benefit', rather than a public benefit.
- Submits that surrounding squares will be subject to significant overshadowing exposure to westerly winds, reducing their usability as a community hub.
- Considers Council has approached the VPA incorrectly, considering it a part of the planning proposal, when each should be addressed separately and by different parts of Council.
- Considers Council's planning team should only address the merits of the planning proposal without any consideration of the benefits offered in the VPA, and that to do so otherwise is contrary to the Environmental Planning and Assessment Act and Council's own policy regarding planning agreements.

Council Officer Response:

The draft Planning Agreement that accompanies the Planning Proposal provides for several public benefits for the community in the event that a Development Application is approved that allows the demolition of the Parish Hall. Key public benefits are as follows:

- a. Licence in perpetuity for public access to open space surrounding the Cathedral.
- b. Creation of vehicle laneway between 181 Church Street and Marsden Street
- c. Creation of civic space between the Cathedral building and Hunter Street. Portion of road in front of 45 Hunter Street would be closed and included in the civic space but remain in Council ownership.
- d. The Church would bear the maintenance and liability for the civic space site in perpetuity.
- e. Compensation of \$1.1 million for reduction in public benefit due to driveway arrangements restricting the size of the civic space and eliminating the previously proposed laneway.

- f. Compensation of \$3 .5 million to recognise Council's risk from not having the public access recognise on the land title and accepting limitations relating to the Churches use of the land.

The report to Council of 21 March 2022 (paragraph 12) states that the offer by the applicant is considered to provide a sufficient level of public benefit that outweighs the loss for the community of the heritage item.

A fair and careful process has been set up to consider the removal of the Church Hall. A staged process has been established for considering how the halls future will be decided. A condition of the Gateway requires a site specific LEP to be included that requires a site specific DCP or Stage 1 DA to be undertaken to address the outcome for the Hall. Further, controls have been included in the site-specific DCP for two options: Option A – demolition and Option B – partial retention. Because a unique framework has been set up for considering the future of the Church Hall this case should not create a precedent for heritage-listed buildings to be “traded off” in exchange for community benefits.

The Planning Agreement will be a matter of consideration at the Development Application stage, but will not be the only matter that is considered when assessing the future of the Hall.

It is acknowledged that the Planning Proposal creates benefit for the private landowners. This is consistent with uplift at other sites provided through Council's broader Parramatta CBD Planning Proposal process. The public will benefit from the development in the form of development contributions (applicable in either Option A or Option B), as well as the Planning Agreement benefits (if Option A is assessed as acceptable).

The following response is made to issues raised on the value of elements of the planning agreement.

- a. Whilst it is acknowledged that the public has access to open space surrounding the Cathedral, this right is time-limited by an existing agreement with the Applicant. The planning agreement grants a licence in perpetuity for public access to this space.
- b. In the heritage assessment by Hector Abrahams of December 2018 it is stated that the proposed square fronting Hunter Street will be fully shaded in winter and will be exposed to the natural winds from the west and may be further impacted by wind generated by high-rise forms. These factors point to a poor amenity of outdoor space as found in the city and Queen Square in the City of Sydney. In the Applicant's response to this assessment through their consultants work (Aspect Studios, prepared in collaboration with Paul Davies Heritage Architects), the proposed tree-lined Plaza is described as becoming a highly desirable shaded public realm that will assist in increasing the urban tree coverage in the CBD and will assist in urban cooling. Also, as part of the design competition phase a more detailed concept can be prepared to achieve outcomes befitting of the Cathedral and surrounding precinct.

There is not considered to be any provision in the Environment of Planning and Assessment Act 1979 and the Environmental Planning and Assessment Regulation 2021 that would preclude the making of the subject voluntary planning agreement.

Council's Planning Agreements Policy 2018 includes principles for planning agreements. A key principle (f) provides that development unacceptable on planning grounds will not be permitted because of planning benefits offered by developers that do not make the development acceptable in planning terms. Other relevant principles are:

- (i) Council will not allow the interests of individuals or interest groups to outweigh the public interest.
- (J) Council will not improperly rely on its position to extract unreasonable public benefits from developers.

4. The planning agreement is considered to be consistent with these principles in that:
 - a. The development is generally acceptable on planning grounds. It is noted that the public benefits offered by the agreement are considered to outweigh the loss of the Church Hall, but its future has not been determined yet and this will be done as part of a future staged process.
 - b. Council has not allowed the interests of the applicant to outweigh the public interest. By compliance with LEP and site-specific DCP provisions and further assessment at the Design Excellence and DA stages a rigorous process to ensure that development does not adversely impact the Church or its setting is set up and a process has been established to

- determine the future of the Church Hall.
- c. Council has not extracted unreasonable public benefits from the applicant, the public benefits to be provided reflects a negotiated outcome between Council and the applicant. This agreement has been the subject of public exhibition (which is required under relevant planning legislation) and community sentiment on whether the removal of the Hall to allow extended public space and a larger commercial building provide a public benefit is not unanimous. There are part of the submission group that argue that removal of the hall allows community benefits and others who consider that the open space and commercial building do not warrant removal of the Hall. The issue of whether the benefits proposed outweigh the loss associated with removal of the hall seem to be a subjective issue.

Theme 6: Impacts on Public Open Space and heritage items surrounding the Centenary Square

Issues Raised:

- Centenary Square was and continues to be a gathering place, and a place that holds significance for First Nations people.
- Objects to development within proximity to the clock, historic buildings of Murray Bros store and Town Hall.
- Considers that the whole area of Centenary Square marked out on the Heritage Map in the CBD Planning Proposal document should be protected.
- The Parramatta Square project was based on the Cathedral site being left as is, low in surrounds.
- Focus should be on developing more green space, improving the pedestrian environment within CBD and creating a liveable city.
- Questions if Centenary Square will be affected whilst public domain works are underway.
- The proposal will overshadow and have an adverse effect on:
 - Centenary Square and specifically its historic character and community use.
 - Parramatta Square and also on Parramatta Town Hall.

Council Officer Response:

It is acknowledged that there will be significant overshadowing impacts to Centenary Square from developments on the north side of Macquarie Street and to the west of the St John's site, with some measure of solar impacts in a densely-built CBD environment inevitable. These impacts have been deemed acceptable as part of the Parramatta CBD PP. It is not expected that a development at St John's would significantly alter the likely overshadowing outcomes for Centenary Square.

Nevertheless, shadow diagrams included in the Urban Design Report 2018 for the subject Planning Proposal show that the proposed development of the St John's site will only overshadow Centenary Square from approximately 2 PM onwards in midwinter.

The Planning Proposal provides that building height adjoining Centenary Square will be limited to 12/18 m that will help protect the ambience of the Square.

Centenary Square and the façades of adjoining buildings which enclose it are heritage listed of local significance in Parramatta LEP 2011. Murray Buildings (alongside the Town Hall) is separately heritage listed.

Building height controls for land adjoining Centenary Square and the local heritage listing for the Square should help to protect its historic character and allow its full use for range of community activities and will preserve people's associative links with the Square including those of the First Nations People.

A new site specific DCP control is also proposed to further protect the amenity of Centenary Square by requiring no floor area under the Solar Access Plane, reducing the presence and mass on the adjacent civic spaces while opening up views across the podium to the sky thus creating a more slender, tall tower.

The Planning Proposal contains solar access provisions to protect the public domain of Parramatta Square, and the controls set out in the Parramatta DCP – Part 6 City Centre are considered appropriate to balance these impacts with urban development needs.

The Planning Proposal provides for improvements to green space and the pedestrian environment. A new square is to be provided to the west of the cathedral (in the event a Development Application is approved for the removal of St John's Parish Hall) and the setting of the cathedral will be enhanced through landscaping and the provision for additional on-site tree planting. These proposals will help create a more liveable city.

It is not considered that Centenary Square should be affected whilst public domain works for the development site are underway. But this is a matter that can be dealt with and resolved at Development Application stage.

Theme 7: Impacts on Hunter Street

Issues Raised:

- Opposes parking in Hunter Street that is too close to Cathedral
- Intensifying Hunter Street traffic will minimise historic viewpoint of Cathedral
- The end of Hunter Street should be paved over to become an extension of Parramatta Square with car access limited to local businesses only.
- Opposes acquisition of public land for construction of underground parking. Opposes loss of public land in Hunter Street for new development.

Council Officer Response:

The Planning Proposal provides for the creation of a new civic space at the end of Hunter Street (in the event a Development Application is approved for the removal of St John's Parish Hall) that will have the effect of limiting car parking in this street. No new parking is proposed close to the Cathedral.

The updated Traffic Impact Assessment by Traffix, 2022 states that the main vehicular access to the site is expected to be from Hunter Street, which is considered the most suitable for vehicular access to the development of this size and scale. Preliminary parking layout plans included in this assessment showed that access to proposed underground parking for the site will be from Hunter Street.

The original proposal was for vehicle access to the site to be from Macquarie Street, however this was not supported by TfNSW because of the impacts on Parramatta Light Rail, and as such Hunter Street became the only option. It is also noted that while access to the Northern tower will be via Hunter Street the new laneway being provided at the rear of 41-45 Hunter Street will make a contribution to balancing the traffic impacts in Hunter Street.

The draft Planning Agreement for the Planning Proposal provides that the portion of Hunter Street to be closed and included in the civic space will remain in Council ownership. Therefore, the proposal does not entail any loss of public land for new development.

Whilst the Planning Proposal may result in increased traffic on Hunter Street the creation of a civic space should enhance the historic viewpoint of the Cathedral at street level.

Theme 8: Traffic and Transport Issues

Issues Raised:

- Concerned with increased local traffic, management of vehicular congestion and lack of charging infrastructure for electric vehicles.
- Questions whether proposal will impact Parramatta Light Rail

Council Officer Response:

The Planning Proposal states that transport impacts of the proposal are not expected to be significantly different to those expected from the CBD Planning Proposal and so future impacts will be addressed through the Transport and Traffic Strategy prepared to inform the CBD Planning Proposal. In addition, traffic and transport impacts can be considered in greater detail at the Development Application stage.

Provision for electric charging infrastructure is dealt with in Parramatta DCP 2011 - Part 6 – Parramatta City Centre and does not need to be included in this site-specific Planning Proposal.

As the main access to the site is expected to be from Hunter Street, the proposal should not have any effects on the Parramatta Light Rail located on Macquarie Street. Any possible impact on Parramatta Light Rail can be dealt with at the Development Application stage and through the normal concurrence process. Further, and as noted above, TfNSW have opposed access from Macquarie Street to minimise impacts on the operation of the Parramatta Light Rail.

Theme 9: Social / Infrastructure Impacts and Community Interest

Issues Raised:

- The Planning Proposal needs to consider social and infrastructure impacts.
- The proposal is not in the interests of the community or the Parramatta LGA and its residents.
- Existing infrastructure cannot maintain further growth
- Required infrastructure and local amenities to service the building will be a financial burden for Council and local taxpayers.

Council Officer Response:

The Planning Proposal has adequately considered social, economic and infrastructure impacts. The Planning Proposal will facilitate a mix of land uses on site by delivering both commercial, retail and residential uses and jobs. The Planning Proposal also envisages an increase in capacity of approximately 5000 m² of GFA for Church uses should the replacement of the existing Parish Hall occur.

The site and its surrounds are well sited among existing road infrastructure, public transport and services to accommodate intensive development, demonstrated by the siting of adjacent Parramatta Square urban renewal redevelopment.

The proposal is considered to be in the strategic interest of the Parramatta LGA as it will facilitate a mix of land uses on-site by delivering commercial, retail and residential uses and jobs close to public transport and existing infrastructure in the CBD. These outcomes are considered appropriate for the site's central siting within the Parramatta City Centre.

The issue of the provision of infrastructure to provide for the growth on this site and the growth proposed in the CBD PP more generally was addressed with the preparation of the Parramatta City Centre Contributions Plan 2022 that came into force on 14 October 2022 and replaces the current Parramatta CBD Plan from 2007. This plan has increased the development contribution levy from a flat 3% on the cost of works, to 4% for non-residential floor space, and 5% for all uses that include a residential component. The infrastructure planning for this site has been considered in the broader strategic framework.

Theme 10: Need for the Proposal

Issues Raised:

- Objects to high-rise buildings given that there are already high-rise residential and commercial buildings nearby.
- Submits that there are other sites more appropriate for development.

Council Officer Response:

Given the site's central location in the Parramatta CBD, and the heritage analysis discussed in previous sections, it is appropriate that land adjacent to the Cathedral be given the opportunity to be developed for high-rise buildings in line with the framework of the Parramatta CBD Planning Proposal.

In addition, the Cathedral is located in the centre of the Parramatta CBD, and so, regardless of what eventuates on the Church's landholdings, the Cathedral will be surrounded by extensive urban development, including at adjacent Parramatta Square and along Macquarie, Marsden and Hunter Streets

and the new CBD PP controls which seek to enable the growth of the Parramatta CBD.

Under the planning framework that applies to the Parramatta LGA it is not necessary to consider whether there are other sites in Parramatta more appropriate for development. It is only necessary to consider whether the subject site is suitable for redevelopment. The planning scheme sets up a process by which that redevelopment will be assessed in further detail.

Theme 11: Relationship to Planning Instruments and Processes

Issues Raised:

- The Planning Proposal is inconsistent with planning instruments for the site including Parramatta LEP 2011, Parramatta DCP 2011 and the CBD PP.
- Is inconsistent with DCP 2011 in relation to towers of slender proportions in the mitigation of potential adverse effects that buildings may have on the public domain.
- The proposal is not based on sound planning principles.
- Process issues related to the following matters are raised:
 - Project justification
 - Reflection of community views
 - Timely notification of changes
 - Council transparency
 - Developer accountability and power
- The proposed development:
 - represents misguided short-term goals
 - will create a precedent for other developers to seek excessive heights
 - exemplifies greed and desire to maximise profits.
 - requires Council to promote Parramatta's livability
- No Arboricultural Impact Assessment Report (or preliminary assessment) has been prepared on trees proposed to be retained.
- As the new centre of Parramatta CBD, the entire area requires careful and considered planning.
- Council is making decisions irrespective of community sentiments.
- All levels of government should listen to the community and respond to community opposition appropriately
- The area requires preparation of a master plan
- Considers that Cathedral site should be looked after by the National Heritage Trust.

Council Officer Response:

The 2011 LEP and DCP have been the subject of a review (the CBD Planning Proposal Process) which looked at how the Parramatta CBD should grow and evolve to meet state Government and Council planning priorities. This site specific PP has been assessed in the context of the future plan which permits greater development / growth rather than the controls contained in LEP and DCP 2011 at the time the St John Planning Scheme was exhibited which are now out of date.

The proposal for the northern tower site is consistent with the planning framework for B3 commercial core sites as expressed in Council's Parramatta CBD Planning Proposal finalised and published as PLEP 2011 (Amendment 56) on 14 October 2022. In addition, the proposed site-specific DCP complements and is consistent with the broader controls to be introduced as part of the draft Parramatta City Centre DCP (new Part 6).

A new site specific DCP control is also proposed to further protect the amenity of Centenary Square by requiring no floor area under the Solar Access Plane, reducing the presence and mass on the adjacent civic spaces while opening up views across the podium to the sky thus creating a more slender, tall tower.

The preparation and assessment of this Planning Proposal is subject to the provisions and guidelines of State Government including in particular the Environmental Planning and Assessment Act 1979 and the Local Environment Plan Making Guideline December 2021 by the Department Planning and Environment. These provisions ensure:

- a. transparency of process
- b. publicised opportunities for community involvement within an appropriate timeframe

- c. careful and considered planning
- d. appropriate balancing of public interests against the private interests of developers.

The following response is made to development issues raised:

- a. The development proposed is considered to represent desirable long-term goals being in accordance with Council's planning framework for the site that will benefit the Parramatta community.
- b. Proposed building heights for the site are consistent with the CBD Planning Proposal and are supported by heritage studies. Therefore, it is not considered that a precedent will be created for excessive heights to be sought elsewhere in the Parramatta CBD.
- c. It is acknowledged that in a market economy, developer decisions to undertake development is driven by the desire to make a return on their investment. However, planning controls are put in place to ensure that development occurs in a way that maximises the benefits to the community from the development not to ensure high returns for developers.
- d. Council through the progression of the CBD Planning Proposal, the draft CBD DCP amendments, public domain upgrades and proposals and other corporate activities, such as events, is helping to create a liveable Parramatta CBD.

It is noted that the Planning Proposal is supported by a Concept Landscape Masterplan, Aspect Studios, 2018 which considers proposed landscaping and vegetation planting. The Masterplan also notes the existence of significant value and mature trees on the site which should be preserved where possible and assessed by an arborist.

At this stage, sufficient consideration has been given to landscape and vegetation issues together with the retention of existing trees. It is not considered necessary to provide an Arboricultural Cultural Impact Assessment report with the Planning Proposal to assess the proposal's impact on existing trees. A detailed Arboricultural assessment is most appropriately undertaken at DA stage and in this case the site-specific DCP requires an arborist report as part of the Stage 1 Development Application.

It is not Council's role with this subject site-specific Planning Proposal to make any recommendations on whether a heritage agency such as the National Trust should be responsible for management of the site. In any case, as the Cathedral site is on the State Heritage Register it is subject to the Heritage Act 1977, and this will assure appropriate conservation and management of the Cathedral site.

Theme 12: Environment and Sustainability

Issues Raised:

- There are concerns as to the proposal's environmental impacts
- The construction phase will inadvertently damage St John's Cathedral
- Development may affect airflow around church causing moisture and building damage.
- Parramatta's sustainability efforts and sustainable development standards are inadequate
- Council's reported efforts to preserve and generate canopy coverage are not based on evidence.
- Good place making outcomes are advocated
- The Planning Proposal will contribute to global warming

Council Officer Response:

There is no evidence from either the Applicant's Heritage Impact Statement by Paul Davies Limited 2018 or by the Council's commissioned Heritage Assessment by Hector Abrahams in 2018 that the development proposal will cause any adverse environmental impacts such as moisture and building damage. However, these impacts, along with impacts arising from the construction phase, will be assessed at the Development Application stage.

It is noted that the Planning Proposal provides for the retention of on-site trees and vegetation and should the new square be established on the west side of the Cathedral there will be additional planting that will extend the tree canopy coverage within the Parramatta CBD. If trees are removed, these would be subject to DA approval. The Planning Proposal is supported by a Concept Landscape Masterplan (Aspect Studios

2018) which considers proposed landscaping and vegetation planting. The masterplan also notes the existence of significant value and mature trees on the site which should be preserved where possible and assessed by an arborist. At this stage, sufficient consideration has been given to landscape and vegetation issues together with the retention of existing trees. A detailed assessment is most appropriately undertaken at DA stage, and in this case the DCP requires an arborist report as part of the Stage 1 DA.

This Planning Proposal is also subject to Council's Parramatta DCP 2011 and recently adopted amendments with new controls in Part 6 for the Parramatta City Centre which contain best practice sustainability provisions and controls. Provisions are included for high performing buildings, dual water systems, all electric new buildings, electric vehicle charging infrastructure, urban cooling, solar light reflectivity, natural refrigerants in air-conditioning, bird friendly design and wind mitigation. Consideration will be given at the design excellence and at the development application stage to meeting these provisions and controls. These provisions should ensure that the proposal is sustainable and does not contribute to global warming.

Theme 13: Concerns Relating to Overdevelopment

Issues Raised:

- Concerns regarding overdevelopment and that there is too much development already which has destroyed Parramatta and this proposal will do the same.

Council Officer Response:

It is acknowledged that significant redevelopment of the site is proposed including under both scenarios (Options A and B); however, is not considered to represent overdevelopment. The proposal is in line with the provisions of the CBD Planning Proposal that supports population and jobs growth in accordance with State government policies.

The proposed development will also need to comply with the guidelines of the site specific DCP that will assist with requirement for an appropriate building scale and form, and that development responds to the human scale of the Cathedral and surrounding space. This will be considered through the Stage 1 DA, Design Excellence and Stage 2 DA, with this process set up to ensure development enhances the character of the Parramatta CBD, making it a liveable place to be enjoyed by the community.

Theme 14: Concerns Relating to Building Design and General Impacts

Issues Raised:

- Building design is opposed and criticised because it:
 - lacks visual appeal and should be more imaginative and iconic.
 - is crude and vulgar
- The proposal will lead to poor urban design and planning outcomes as exemplified by statements that Parramatta will become a high-rise concrete jungle and/or like New York and Sydney CBD
- Raises issues with high density living and seeks 'traditional work spaces'.

Council Officer Response:

The proposed development should lead to acceptable urban design and planning outcomes and should not harm the urban fabric of the Parramatta CBD. The proposal is in line with the framework of the CBD Planning Proposal and site specific DCP guidelines will also help to ensure an appropriate scale and form of development.

A new site specific DCP control is also proposed to further protect the amenity of Centenary Square by requiring no floor area under the Solar Access Plane, reducing the presence and mass on the adjacent civic spaces while opening up views across the podium to the sky thus creating a more slender, tall tower.

The emphasis in processing the Planning Proposal up to now has been on ensuring that development can comply with Council's planning controls and strategic direction and also that it can satisfactorily address key

urban design issues such as view protection, solar access and setbacks to ensure adequate separation with adjoining buildings. At this stage it is not necessary to consider the visual appearance of the proposed buildings. This will be dealt with at the Design Excellence and Development Application stages where appropriate attention can be given to ensuring excellent building design outcomes and avoids poor design that submitters are concerned about.

Compliance with planning and other building regulations should ensure that high-rise buildings meet the needs of residents and businesses of the community. It is not the role of the planning system to provide for a particular type of business premises, such as ‘traditional work places’.

4.5. Other Submissions – Summary and Response

Council received a small number of submissions that could not be clearly categorised into either “support” or “do not support”. These are detailed and responded to below.

Summary of Submission	Council Officer Response
Other Submission 1 – Neutral: <ul style="list-style-type: none"> Submitter did not indicate if they supported or did not support the development. Submitter raises that there is no Arboricultural Impact Assessment report (or Preliminary Arboricultural assessment) assessing the trees in the Church yard which the Applicant is proposing to retain. 	Refer to the Council officer response provided at Section 4.5 : <ul style="list-style-type: none"> Theme 12, Environment and Sustainability.
Other Submission 2 – Support (in part): <ul style="list-style-type: none"> Submitter partially supports the development. Submitter raises a series of concerns (detailed within Appendix A3). Submitter states that they are dissatisfied with the options given. Submitter recognises the value of heritage buildings in Parramatta and that St Johns is the jewel of Parramatta. submitter raises concern that Parramatta’s history is being slowly eroded Submitter considers that intensifying Hunter Street traffic will minimise historical viewpoint of Cathedral Submitter supports the creation of another public space in Parramatta. Submitter supports removal of the Parish Hall but is disappointed that there is not an option to keep the Hall whilst providing a new square. Submitter concerned that no additional green space is provided and that Council shows no commitment to creating a liveable city.. 	Submission in partial support is acknowledged. Refer to the Council officer response provided at Section 4.4 : <ul style="list-style-type: none"> Theme 1, Impacts on St John’s Cathedral and Grounds Theme 3, Relationship to Parramatta’s History and Heritage Theme 4, Concerns Relating to St John’s Parish Hall Theme 7, Impacts on Hunter Street Theme 12, Environment and Sustainability.
Other Submission 3 – Support (in part): <ul style="list-style-type: none"> Submitter generally supports the development. Submitter raises a series of concerns (detailed within Appendix A3). The submitter generally supports the development and requests that the amenity and heritage of the Cathedral be maintained. The submitter raises a number of concerns: <ul style="list-style-type: none"> Development may diminish the Cathedral and it should be adequately separated from new buildings. Building design and materials should mitigate negative impacts. 	Submission in partial support is acknowledged. Refer to the Council officer response provided at Section 4.4 : <ul style="list-style-type: none"> Theme 1, Impacts on St John’s Cathedral and Grounds Theme 6, Impacts on Public Open Space Theme 8, Traffic and Transport Impacts

<ul style="list-style-type: none"> ○ Development could overshadow nearby public spaces and create wind tunnel affects. ○ Concern with increased traffic and lack of electric vehicles charging infrastructure. 	
<p>Other Submission 4 – Other:</p> <ul style="list-style-type: none"> • Submitter considers that the Church should be demolished and rebuilt. • It is unclear if the submitter is referring to the demolition of St John's Anglican Church Hall, or the Cathedral. Therefore, the submission is not categorised. 	<p>Refer to the Council officer response provided at Section 4.3:</p> <ul style="list-style-type: none"> • Theme 5, Support for Option A Church Hall; and / or <p>Refer to the Council officer response provided at Section 4.4:</p> <ul style="list-style-type: none"> • Theme 2, Concern that the Cathedral would be demolished.

Council officers have considered the 4 submissions.

Appendix A3 summarises and responds to the issues raised.

5. Submissions from Peak Body Organisations

5.1. High Level Summary of Submissions

The total number of submissions received from Peak Body Organisations was three (3). The following Peak Body Organisations provided a submission regarding the Planning Scheme for the St John's Anglican Church site:

- National Trust (NSW Branch)
- National Trust (Parramatta Branch)
- Australian Institute of Landscape Architects (AILA)

The below table categorises their general view on the Planning Scheme.

Submissions – Support	0 (0%)
Submissions – Did Not Support	3 (100%)
Submissions – Other Views	0 (0%)
TOTAL	3 (100%)

Council officers have considered the 3 submissions.

Appendix B summarises and responses to the issues raised.

6. Submissions from Developers, Major Landowners, and Planning Consultants

6.1. High Level Summary of Submissions

The total number of submissions received from Developers, Major Landowners, and Planning Consultants was five (5).

Council officers have considered the 5 submissions.

Appendix C summarises and responses to the issues raised.

7. Submissions from Public Authorities and Service Providers

7.1. Consultation

Condition 3 of the Gateway Determination, issued by the Department of Planning and Environment on 8 September 2020 required Council to consult with the following public authorities and organisations under Section 3.34 (2) (d) of the Act and/or comply with the requirements of relevant Section 9.1 Directions:

- NSW State Emergency Services
- DPIE – Environment, Energy and Science
- NSW Heritage
- Transport for NSW
- Civil Aviation Safety Authority
- Commonwealth Department of Infrastructure and Regional Development
- Utility providers

7.2. High Level Summary of Submissions

The total number of submissions received from Public Authorities and Service Providers was eight (8). The following Public Authorities and Service Providers provided a submission regarding the Planning Scheme for the St John's Anglican Church site:

- NSW State Emergency Service
- Department of Planning and Environment – Environment and Heritage Group
- Heritage NSW
- Transport for NSW
- Civil Aviation Safety Authority
- Commonwealth Department of Infrastructure, Transport, Regional Development and Communication
- Endeavour Energy
- Sydney Water

Council officers have considered the 8 submissions.

Appendix D summarises and responses to the issues raised.

8. Conclusion

The feedback received during the exhibition period for the Planning Scheme for the St John's Anglican Church site, has informed the Local Planning Panel report and follow up Council Report and has resulted in some minor amendments to the site specific DCP.

The Participate Parramatta and City of Parramatta websites will be regularly updated to inform the public of reporting processes and next steps of the Planning Scheme for the St John's Anglican Church site. Additionally, the Participate Parramatta website will be updated following Council reporting.

A project contacts list has been developed to serve as the principal method for future updates on the Planning Scheme for the St John's Anglican Church site. Submitters that provided their email address were automatically placed on this mailing list.

Appendix A-1 – Submissions from Residents, Individuals and Community Groups – in Support

APPENDIX A-1: Submissions from Residents, Individuals and Community Groups who supported the Planning Scheme

This document summarises the 156 submissions (40% of the total number of submissions received) that supported the Planning Scheme for the St John's Anglican site.

Each submission has been allocated a unique number according to the date the submission was received by Council, for example, "Submission Number 15". Where provided by the Submitter, the Street Name and Suburb is included. To ensure the privacy of submitters, names and street numbers have been withheld.

Refer to 'Section 4.3 Submissions in Support – Summary and Analysis' within the body of the Community Engagement Report for a list of the 10 themes that address the issues raised in support.

Tip: To find a particular submission: search for the Street Address (eg "Macquarie Street, North Parramatta") or an issue you raised in your submission (eg "open space", "Cathedral", "facilities", "urban design", "Hall" etc) using the Control F function.

Row No.	Submitter Number and Address	Summary of Submission	Council Officer Response
1.	No Address Provided Submission Number 1	Support <ul style="list-style-type: none">• Submitter notes that the proposal represents an excellent urban design outcome, provides significant public benefit, and recognises the vital role of St John's Anglican Church within the Parramatta community.• Submitter raises that the Anglican Church has worked closely with Council to prepare this proposal.	Submission in support of the proposal is acknowledged.
2.	Submitter from Hunterford Crescent, Oatlands Submission Number 2	Support <ul style="list-style-type: none">• Submitter considers that the proposal will deliver valuable community and urban design outcomes.• Submitter considers that the inclusion of public open space is of benefit to the community.• Submitter raises that the Anglican Church has made a significant effort to develop the project.	Submission in support of the proposal is acknowledged.
3. Submitter from Church Street, Parramatta Submission Number 39	Support <ul style="list-style-type: none">• Submitter supports Option A.• Submitter raises that the function and significance of the Hall is mainly in relation to the Church.• Submitter considers Option B, retaining a smaller section of the Hall, to be <i>less useful</i>.	Submission in support of the proposal is acknowledged.
29.	Submitter from Bramley Street, Fairfield West Submission Number 40	Support <ul style="list-style-type: none">• Submitter notes that the project will bring improvement to the area.• Submitter considers the project in line with development across Parramatta CBD.• Submitter considers the Church and its surrounds to be a relaxing and open place.	Submission in support of the proposal is acknowledged.
30.	Submitter from Cambridge Street, Suburb Not Provided Submission Number 41	Support (Enquiry) <ul style="list-style-type: none">• Submitter supports the proposal.• Submitter questions how Centenary Square will be affected whilst public domain works are underway.• Submitter questions if the proposal will impact the Parramatta Light Rail project.	Submission in support of the proposal is acknowledged. Refer to Themes 7 and 8 in 'Section 4.4. Submissions not Supporting' for a responses to the query about light rail and Centenary Square.
31.	Submitter from Church Street, Parramatta Submission Number 42	Support <ul style="list-style-type: none">• Submitter considers that the current facilities are not sufficient to support the programs being run on Sundays and it is therefore <i>desperately needed</i> for the site to be developed and increased in its capacity.• Submitter would welcome a development that provides larger and more modern facilities to support the activities of the church.• Submitter supports the expansion of open space proposed for the area north-west of the Cathedral, noting the importance of open space in a high-density environment.	Submission in support of the proposal is acknowledged.
32.	Submitter from Douglas Avenue, North Epping Submission Number 43	Support <ul style="list-style-type: none">• Submitter considers the proposal a <i>good foundation</i> to meet the church's need for long-term development, while also supporting the city's overall development strategy and providing business and employment opportunities.• Submitter hopes the proposal can be processed <i>smoothly and quickly</i>, as it is a long-awaited solution.	Submission in support of the proposal is acknowledged.
33.	Submitter from Bilpin Street, Suburb Not Provided Submission Number 44	Support <ul style="list-style-type: none">• Submitter considers that the proposal will enhance and update facilities at the church and make the surrounding land more accessible to pedestrians.• Submitter considers that the proposal will keep the Cathedral as a central focus and make the area a shared space for the public to enjoy.• Submitter considers that the historic Cathedral will still be in use, attracting others to visit.	Submission in support of the proposal is acknowledged.
34.	Submitter from Church Street, Parramatta	Support <ul style="list-style-type: none">• Submitter notes that the parish provide free services for community members of different language groups.	Submission in support of the proposal is acknowledged.

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ5/2018]**

	Submission Number 45	<ul style="list-style-type: none"> • Submitter raises that whilst the demand for language classes remains high, <i>due to the limitation of space, the Church cannot support additional classes.</i> • Submitter considers that the proposal will provide increased space to accommodate more community activities to unite different ethnic groups. 	
35.	Submitter from Douglas Avenue, North Epping Submission Number 46	<p>Support</p> <ul style="list-style-type: none"> • Submitter raises that the current Parish Hall does not meet the needs of the Parish. • Submitter considers that the proposal will support the Church's need for long-term development, as a Cathedral situated in Parramatta CBD. • Submitter considers the proposal to align with the City's overall development strategy, supporting businesses and providing opportunity. 	Submission in support of the proposal is acknowledged.
36.	Submitter from Macquarie Street, Parramatta Submission Number 48	<p>Support</p> <ul style="list-style-type: none"> • Submitter considers that the proposal will improve the current facilities for the Church community of St John's Cathedral, raising that the facilities are <i>outdated and not designed to be accessible.</i> • Submitter considers that the proposal will enable modern facilities to serve the growing church community, many of whom live in the Parramatta area. • Submitter acknowledges the <i>need to balance heritage and development</i>, while raising that the purpose of facilities should be to serve the community and not the other way around. • Submitter considers that the proposal will improve the public space around the site and the Cathedral, enhancing the space in line with Centenary Square and Parramatta Square and making it <i>more accessible and enjoyable to the public.</i> • Submitter supports the proposed open public square in the Hunter Street area and states that this will improve access to other zones within Parramatta CBD, particularly expanding connectivity to creative spaces and food and drink venues on Hunter Street and the western portion of Parramatta CBD. • Submitter considers that the proposal will contribute to Parramatta being a great city to live, work and enjoy recreation in as it will increase employment opportunities, provide additional housing, improve public spaces and provide new facilities. 	Submission in support of the proposal is acknowledged.
37.	No Address Provided Submission Number 50	<p>Support</p> <ul style="list-style-type: none"> • Submitter considers that the proposal will enhance City of Parramatta. • Submitter notes their support to see <i>all the dark, old brick buildings gone and replaced with modern ones.</i> • Submitter raises that the proposal will create a spacious and modern space, aligned with Parramatta Square. • Submitter values the retainment of green park areas. 	Submission in support of the proposal is acknowledged.
38.	Submitter from Helen Street, Westmead Submission Number 51	<p>Support</p> <ul style="list-style-type: none"> • Submitter considers the proposal to be <i>beneficial to the city.</i> • Submitter considers that the proposal will provide more space for the church to run programs for young people, which will benefit the broader community. • Submitter considers the development will attract more youth and strengthen the economy. 	Submission in support of the proposal is acknowledged.
39.	Submitter from Enid Street, Denistone Submission Number 53	<p>Support</p> <ul style="list-style-type: none"> • Submitter is highly supportive of the project. 	Submission in support of the proposal is acknowledged.
40.	Submitter from Church Street, Parramatta Submission Number 54	<p>Support</p> <ul style="list-style-type: none"> • Submitter considers that the proposal will promote the city view of Parramatta CBD and offer a nice activity place for the residents. 	Submission in support of the proposal is acknowledged.

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ5/2018]**

41.	Submitter from Hassall Street, Parramatta Submission Number 55	<p>Support</p> <ul style="list-style-type: none"> • Submitter supports the improvement of St John's Parish Hall, as the facilities are outdated, the entire hall is currently not fit for purpose, and the Hall does not meet the needs of the Church. • Submitter considers that development will support increased capacity onsite, allowing all congregations to gather on the premises at the same time, which will provide a community atmosphere. • Submitter considers that the proposal will increase the provision of parking for churchgoers, as parking in Parramatta is scarce. • Submitter highlights the significance of the Cathedral as a pivotal building in Parramatta, noting that the development will support the church to continue serving the local community into the future. 	Submission in support of the proposal is acknowledged.
42.	Submitter from Hassall Street, Parramatta Submission Number 56	<p>Support</p> <ul style="list-style-type: none"> • Submitter highlights the <i>dilapidated state</i> of the existing St John's Parish Hall, stating its facilities are outdated and inadequate to meet the needs of the growing congregation. • Submitter considers the needs necessary to improve St John's Anglican Church's facilities to provide more space for the congregation to meet and strengthen the sense of community. • Submitter considers that the proposal will enhance the Cathedral building. 	Submission in support of the proposal is acknowledged.
43.	Submitter from Railway Street, Baulkham Hills Submission Number 57	<p>Support</p> <ul style="list-style-type: none"> • Submitter considers that the proposal will provide more space for meetings, events, and teaching. • Submitter considers that the proposal will support economic activity in Parramatta, provide retail opportunities to further activate the precinct and improve vehicular access. 	Submission in support of the proposal is acknowledged.
44.	No Address Provided Submission Number 58	<p>Support</p> <ul style="list-style-type: none"> • Submitter raises that the project will interconnect the St John's Church site with the community of Parramatta and will provide opportunities for the site to interact with Parramatta's dynamic landscape. • Submitter considers that the proposal will provide numerous business opportunities and tourism possibilities. • Submitter raises that we should support different religions to have stronger voices. • Submitter considers the project to be aligned with new development occurring across Parramatta CBD, and therefore views the development as a timely proposal. 	Submission in support of the proposal is acknowledged.
45.	Submitter from Railway Street, Granville Submission Number 59	<p>Support</p> <ul style="list-style-type: none"> • Submitter supports the proposal to change Hunter Street into a vibrant, modern, and user-friendly accessway and meeting place. • Submitter notes the dissatisfaction existing facilities and capacity of St John's Anglican Church and the Parish Hall. • Submitter supports the proposal's solutions to the above issues, noting that the proposal will enable a better use of space for the future. 	Submission in support of the proposal is acknowledged.
46.	Submitter from Macquarie Street, Parramatta Submission Number 60	<p>Support</p> <ul style="list-style-type: none"> • Submitter raises that the St John's site (apart from the Cathedral and lawn space on the Eastern side), including Queensland Arcade, are outdated and can be redeveloped to suit the look and vibe of Parramatta more. • Submitter considers that the proposal will have a positive impact for the public and members of St John's Anglican Church. • Submitter suggests that the extension of Hunter Street can be better utilised as pedestrian access to enhance the vibrancy of Parramatta CBD. 	Submission in support of the proposal is acknowledged.
47.	No Address Provided Submission Number 61	<p>Support</p> <ul style="list-style-type: none"> • Submitter raises that the proposal provides significant public and commercial benefits. 	Submission in support of the proposal is acknowledged.

Appendix A-2 – Submissions from Residents, Individuals and Community Groups – Not in Support

APPENDIX A-2: Submissions from Residents, Individuals and Community Groups who did not support the Planning Scheme

This document summarises and allocates themes to the 229 submissions (59% of the total number of submissions received) that did not support the Planning Scheme for the St John's Anglican site.

Each submission has been allocated a unique number according to the date the submission was received by Council, for example, "Submission Number 15". Where provided by the Submitter, the Street Name and Suburb is included. To ensure the privacy of submitters, names and street numbers have been withheld.

Refer to 'Section 4.4 Submissions not Supporting – Summary and Analysis' within the body of the Community Engagement Report for:

- a list of the 14 themes and the number of submissions that raises each theme.
- a council officer response to each of the 14 themes.

Tip: To find a particular submission: search for the Street Address (eg "Hunter Street, North Parramatta") or an issue you raised in your submission (eg "open space", "Cathedral", "solar access", "Planning Agreement", "Hall" etc) using the Control F function.

Row No.	Submitter Number and Address	Summary of Submission	Council Officer Response
1.	No Address Provided Submitter Number 15	Object <ul style="list-style-type: none"> • Submitter understands the value of linking St John's Square with Centenary Square and ensuring a more cohesive aesthetic and pedestrian flow. • Submitter objects to the proposed high-rise commercial buildings, given that there are already high-rise residential buildings nearby, along with the commercial skyscrapers of 6 and 8 Parramatta Square. • Submitter considers that the cultural heritage of Parramatta should be prioritised over commercial interests. • Submitter suggests the focus should be on improving and developing more green spaces and improving the pedestrian environment within the CBD. • Submitter considers that the construction of additional high-rise buildings will detract from the scale of the cathedral and diminish the ambience of Centenary Square. 	Theme 1 [Impacts on St John's Cathedral and grounds] Theme 3 [Relationship to history and heritage] Theme 10 [Need for Proposal] Theme 12 [Environment and Sustainability]
2.	Submitter from Seven Hills Submitter Number 22	Object <ul style="list-style-type: none"> • Submitter considers that, given the age of the cathedral, the proposal to demolish or move historic buildings will destroy what few remaining links there are to Parramatta's past. • Considers that the proposal is a disrespectful to the history of Parramatta and those of the Christian faith. 	Theme 3 [Relationship to history and heritage]
3.	Submitter from Wentworth Avenue, North Rocks Submitter Number 23	Object <ul style="list-style-type: none"> • Submitter considers that some historical sites in Parramatta should be retained. • Considers that there are other sites in Parramatta that would be more appropriate for redevelopment. 	Theme 3 [Relationship to history and heritage] Theme 10 [Need for Proposal]

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ5/2018]**

4.	Submitter from Veron Street, Wentworthville Submitter Number 24	Object <ul style="list-style-type: none"> • Submitter considers that the cathedral is an important historical monument that brings identity and meaning to Church Street and should not be demolished. 	Theme 2 [Demolition of St John's Cathedral] Theme 3 [Relationship to history and heritage]
5.	Submitter from Brickfield Street, North Parramatta Submitter Number 25	Object <ul style="list-style-type: none"> • Submitter considers that the Church should be left alone. 	Theme 1 [Impacts on St John's Cathedral and grounds]
6.	Submitter from Eleanor Street, Rosehill Submitter Number 26	Object <ul style="list-style-type: none"> • Submitter considers that the church, grounds and supporting buildings <i>should be preserved intact</i>. • Submitter raises that the Church precinct is a nationally significant site that should not be changed. • Submitter notes that the building is of local, state and national significance, in contributing to the story of Parramatta. • Submitter raises that the development will overshadow the <i>significant cultural and religious site</i>, considering the development to be extremely tall and inappropriately placed. • Submitter considers that Parramatta has lost too many historical and cultural buildings. • Submitter raises that they are <i>outraged at this government's greed and callousness towards preserving what makes Parramatta a unique and historic jewel</i>. • Submitter requests to retain the site as it is. 	Theme 1 [Impacts on St John's Cathedral and grounds] Theme 3 [Relationship to history and heritage]
7.	No Address Provided Submission Number 35	Object <ul style="list-style-type: none"> • Submitter objects to the proposed height of the development, noting it does not comply with the current height control applying to the site, which is a maximum of 18-24 metres. • Submitter considers that the size of the development would <i>completely compromise the heritage value of the existing site</i>. • Submitter notes that the development is inconsistent with mitigating the <i>potential adverse effects that buildings may have on a public domain</i>. • Submitter considers that the development will result in significant overshadowing to areas identified as Sun Access Protection Surfaces. • Submitter is concerned by the possible loss of St John's Parish Hall, as it was part of the Anglican parish's planning and an important part of the history of ministry on this site. • Submitter raises concerns that the proposed development would dominate Centenary Square and be an overbearing backdrop to the State heritage-listed St John's Cathedral. • Submitter requests for Council to follow their own development guidelines and put heritage value before developer profits. 	Theme 1 [Impacts on St John's Cathedral and grounds] Theme 3 [Relationship to history and heritage]
8.	No Address Provided Submission Number 37	Object <ul style="list-style-type: none"> • Submitter raises the colonial heritage of the site and notes that the surrounding open space is enjoyed by many for recreation. • Submitter considers that the nearby vicinity, including Town Hall and the area towards Macquarie Street, exemplify Parramatta's heritage and character. • Submitter raises concerns that the proposed development would cause overshadowing. 	Theme 1 [Impacts on St John's Cathedral and grounds] Theme 3 [Relationship to history and heritage]
9.	Submitter from Carmen Drive, Carlingford	Object <ul style="list-style-type: none"> • Submitter considers that the proposal is not needed and is not in the best interest of Parramatta or its impacts and community interest.] 	Theme 9 [Social and infrastructure impacts and community interest]

Appendix A-3 – Submissions from Residents, Individuals and Community Groups – Other

APPENDIX A-3: Submissions from Residents, Individuals and Community Groups who raised other matters in regards to the Planning Scheme

This document summarises the 4 submissions (1% of the total number of submissions received) that could not be clearly categorised into either ‘support’ or ‘do not support’. Therefore, these submissions have been categorised into ‘other’.

Each submission has been allocated a unique number according to the date the submission was received by Council, for example, “Submission Number 34”. Where provided by the Submitter, the Street Name and Suburb is included. To ensure the privacy of submitters, names and street numbers have been withheld.

Refer to ‘Section 4.5 Other Submissions – Summary and Response’ within the body of the Community Engagement Report for Council officer responses.

Tip: To find a particular submission: search for the Street Address (eg “Macquarie Street, North Parramatta”) or an issue you raised in your submission (eg “open space”, “Cathedral”, “facilities”, “urban design”, “Hall” etc) using the Control F function.

Row No.	Submitter Number and Address	Summary of Submission	Council Officer Response
4	No Address Provided Submission Number 4	<p>Neutral</p> <ul style="list-style-type: none"> Submitter raises that there is no Arboricultural Impact Assessment report (or Preliminary Arboricultural assessment) assessing the trees in the Church yard which the Applicant is proposing to retain. Submitter raises that the proposed paths and altered ground levels could impact upon the existing trees. Submitter considers that this should be assessed at the current stage, as changes will be difficult to make at the DA stage. 	<p>Refer to “Section 4.5 Other Submission Response One”</p>
34	Submitter from Westmead Submission Number 34	<p>Support (in part)</p> <ul style="list-style-type: none"> Submitter recognises the value of heritage buildings in telling the story of Parramatta, as it has grown from a colonial centre in contrast to the Parramatta Square development. States that St John’s Cathedral is the jewel of Parramatta, as a major historical viewpoint and links to surrounding heritage buildings. Notes that Parramatta’s history is being slowly eroded and is set to become a lost historical streetscape. Considers that intensifying traffic on Hunter Street will minimise the historic viewpoint of the Cathedral from street level. Submitter supports the creation of another public space in Parramatta that will honour the significance of the Cathedral’s western viewpoint. Submitter supports the removal of the Parish Hall and a larger, taller building on the adjoining site. Submitter is disappointed that there is not an option to keep St John’s Parish Hall, whilst providing a new square to emphasise the Hunter Street entrance and viewpoints. Notes that Council have not provided any additions to greenspace and is creating a hot city. States that Council are continuing to allow more density without providing additional on street public green space. Submitter considers that Council shows no commitment to creating a liveable city. 	<p>Refer to “Section 4.5 Other Submission Response Two”</p> <p>Refer to Section 4.4 Submissions not Supporting – Summary and Analysis for comments on the issues of concerns raised.</p>

<p>38</p> <p>Submitter from Picasso Crescent, Old Toongabbie Submission Number 38</p>	<p>Support (in part)</p> <ul style="list-style-type: none"> • Submitter generally supports the development, noting that intensifying the use of space is consistent with other developments within Parramatta CBD. • Submitter requests for the amenity and heritage of the Cathedral to be maintained. • Submitter raises concerns that the Cathedral may be diminished by the proposed development and considers that the new buildings should be <i>sufficiently distanced</i> from the Cathedral to avoid <i>disrupting the current vista</i>. • Submitter raises that the design of the new buildings and materials used should be considered to mitigate negative impacts. • Submitter is concerned by the potential overshadowing of public spaces nearby the Cathedral, noting that overshadowing would make the area less attractive for public use. • Submitter raises concerns that the development could potentially cause areas to become <i>shadowy wind tunnels</i>, alike Sydney CBD. • Submitter is concerned by an increase of vehicles on local roads (particularly access in/out of Parramatta CBD), a lack of charging infrastructure for electric vehicles, and the management of vehicular congestion. <p>Other</p> <ul style="list-style-type: none"> • Submitter considers that Church should be demolished and rebuilt. • Submitter considers that the new development would be inconsistent with the old Church building.
<p>206</p> <p>No Address Provided Submission Number 206</p>	<p>NB: It is not clear if the Submitter is referring to the Church (Cathedral) or the Church Hall (Parish Hall).</p> <p>Refer to Section 4.4 Submissions not Supporting – Summary and Analysis for comments on the issues of concerns raised.</p> <p>Refer to "Section 4.5 Other Submission Response Four"</p>

Appendix B – Institutions, Organisations and Interest Groups Submission Summaries

APPENDIX B: Submissions from Institutions, Organisations and Interest Groups Submission Summaries and Officer Responses

Issue	Officer Response
National Trust (NSW Branch)	
The submissions objects to the Planning Scheme, specifically opposing Option A (removal of Hall) and expressing strong concern about Option B (partial retention of the Hall).	<p>Noted.</p> <p>This view is noted. The Planning Proposal does not propose to remove the listing from the Parish Hall. It establishes a staged process by which the Hall's future will be assessed.</p> <p>However, Council has previously accepted that the benefits from the public domain/ open space benefits plus the additional jobs generated from a larger commercial tower in making the decision to proceed with the Planning Proposal and Planning Agreement. Council sought to enlist the Hall but DPE reject this request and advised the demolition of the Hall should be a matter determined via a development application process.</p> <p>It is for this reason that the Draft DCP contains an option that sets out controls should a decision be made via the Stage 1 Development Application to allow demolition of the Church Hall.</p> <p>The Planning Agreement contains the public benefits that Council considers offset the loss of the Hall.</p>
Parramatta is notable for its loss of heritage items, precincts and character areas, and this should not be exacerbated by further loss (particularly in the main city square).	<p>Preservation of the spatial scale of Centenary Square and the grounds of the St John's Cathedral are embedded in Parramatta DCP – Part 6 City Centre and site specific DCP controls.</p> <p>This view is noted, as is the view of Heritage NSW who did not object to the proposal nor raise the issue of loss of heritage.</p> <p>The Planning Scheme is site-specific and does not consider cumulative heritage loss across a broader precinct. The Planning Proposal does not propose to remove the listing from the Parish Hall. It establishes a staged process by which the Hall's future will be assessed. The Planning Scheme also includes a Planning Agreement which contains public benefits that Council considers offset the loss of the Hall.</p>
Concern that Option A is inconsistent with the relevant CMP, specifically:	<p>This view is noted. A CMP for the project has not yet been approved by relevant decision-making authorities; this will form part of the DA process.</p> <p>The maximum building footprint for the northern tower in both options is further setback than the present boundary of the Parish Hall along its southern boundary. It is accepted that the northern tower's eastern maximum podium boundary extends 3m beyond the present extent of the Parish Hall. However, this podium is limited in height by the Church St upper level setback, and will also</p>
1. The northern tower "grossly encroaches" into the visual setting of the Cathedral and introduces unacceptable impacts in this regard.	
2. The proposed towers introduce unacceptable impacts on the landmark qualities of the Cathedral.	

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>3. The proposed commercial tower extends farther than the eastern boundaries of the original hall, and will impact the setting, and landmark qualities of the Cathedral.</p>	<p>Neither option is supported, but the submission prefers aspects of B (partial retention) over A (demolition) for the following reasons:</p> <ol style="list-style-type: none"> 1. It retains the Hall which contribute to the St John's complex of buildings. 2. The northern tower is smaller, more slender and less visually dominant 3. Introduces greater separation between the Cathedral and northern tower, lessening visual impacts <p>The height, density and scale of buildings in both options are not supported. These aspects are not consistent with the CBD PP, which was undertaken in consultation with the community and did not envision uplift at this site.</p>	<p>be subject to assessment on the heritage listing for Centenary Square and the Cathedral. It is reiterated that this is a maximum podium footprint, and may be subject to further refinement at Stage 1 DA, Design Competition and Stage 2 DA phases.</p> <p>The Cathedral is located in the centre of the Parramatta CBD, and so, regardless of what eventuates on the Church's landholdings, the Cathedral will be surrounded by extensive urban development, including at adjacent Parramatta Square and along Macquarie, Marsden and Hunter Streets.</p>	<p>This view is noted. The Stage 1 DA process will essentially determine whether Option A or B proceeds.</p>
	<p>The magnitude of the increase in development controls contemplated is “unrealistic, inappropriate and unfortunate”. The need for development is not balanced with the values of a state significant site, and does not align with community expectation of acceptable scale.</p> <p>Cites Council's independent heritage report which raised concern with the scale difference between the high rise buildings and the church building.</p>	<p>Whilst the independent heritage report was not supportive of de-listing the Hall and the expansion of civic space in front of the Cathedral's western towers, Council ultimately concluded that the public benefits associated with the new expanded civic space over Hunter Street and A-grade office building were considered on balance to provide adequate justification to de-list the Church Hall and that the additional FSR and height were acceptable. (Noting that DPE's Gateway determination subsequently rejected de-listing of the Hall, as discussed elsewhere in this report). In other words, Council concluded that – provided that adequate public benefits were delivered to offset the loss of the Hall - this site could otherwise benefit from planning controls commensurate with other B3 sites in the (then-current) draft CBD PP.</p>	<p>On this basis, the St John's proposal could theoretically have been “combined” with the CBD PP's process. However, as this site has particular DCP and Planning Agreement considerations, this would have had the effect of slowing down the CBD PP which would not have been a desirable outcome.</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

	<p>An assessment of these controls requires a Heritage Impact Assessment to be submitted, with examination of heritage views a required component. Similarly, a Visual Impact Assessment, included as part of an Urban Design Report or independent study, to assess the impact of the development on the identified values, significance and sensitivity of the landscape would also be required. The Stage 1 DA process requires submission of this analysis.</p> <p>Planning controls should promote a 'varied and interesting' urban environment, and in Parramatta this is of key importance in the area of the main public square where the Cathedral and Town Hall are cited (one of very few Australian cities where this is the case).</p>	<p>Preservation of the spatial scale of Centenary square and the grounds of the St John's Cathedral are embedded in Parramatta DCP – Part 6 City Centre and site specific DCP controls, including an amendment to these controls following considering the DPE's preliminary findings and principles for the SEPP2 work and desire to balance place values with strategic outcomes.</p>	<p>The SSDCP controls are recommended to be amended, specifically by the inclusion of a new DCP Figure "Built Form setout plan for Option A/B" and new objective and control that makes clear that the tower cannot include floor area under the Solar Access Plane. The objective of the amendment is to create a slenderer tower by prohibiting any encroachment above the podium of the PSQ SAP angle on the Macquarie Street/ Centenary Square corner of the tower to reduce the mass and presence on the civic spaces and open up views across the podium to the surrounding streets and sky. Images to demonstrate the benefits of this are contained in the 9 November 2022 Local Planning Panel Report.</p>	<p>This view is noted. Council has determined through site-specific consideration that the site can benefit from uplift, and Heritage NSW did not object to the proposal. Further, the proposal has been granted a Gateway Determination by DPE.</p>	<p>To support the process for assessing this uplift in detail and examining the elements of the square that contribute to its historic character and significance, the site specific DCP sets out a preferred planning pathway. The Stage 1 DA will consider building envelopes, public domain elements and the removal and replacement or partial retention of the Hall. The determined outcome of this DA will form part of the design brief for a Design Competition process, where design solution to achieve high quality buildings and spaces are tested. Following this the winning scheme is then assessed with a DA.</p>	<p>In addition, in SSDCP controls are recommended to be amended as described in the cell above with the intent being to reduce the mass and presence on Macquarie Street and Centenary Square corner and opening up views across the podium to the surrounding streets and sky.</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

When proposing extensive changes and impact to the setting of a state significant heritage place.”	The submission objects to the proposal.	Noted.	Noted.
Much of the submission is structured around the Strategic Merit Test and Site-Specific Merit Test from DPE's <i>Planning Proposals: A guide to preparing planning proposals</i> (the <i>Guide</i>). The Submitter notes that a Planning Proposal must meet both strategic and site-specific merit tests to be successful, and that if a proposal fails the strategic merit test, it cannot be supported even if it satisfies the site-specific test.	The <i>Guide</i> states that there will be a presumption against a Rezoning Review request that seeks to amend LEP controls that are less than 5 years old, unless the proposal can clearly justify that it meets the Strategic Merit Test outlined in the <i>Guide</i> . The submission argues that the proposal fails the Strategic Merit Test, specifically with regards to whether the PP will give effect to relevant regional/district plans.	Noted. The proposal has been granted a Gateway Determination and so the view that the proposal does not satisfy these tests is not supported by Council nor DPE. At the time the SSPP was lodged in May 2018 the LEP controls for the site had been in place for over 5 years and therefore the Rezoning Review request is valid.	This view is noted, and Council officers acknowledge that the strategic planning documents cited assign considerable importance on protecting and respecting Parramatta's heritage. These same documents also assign importance to development of the economy for jobs, provision of housing, optimisation of infrastructure and resilience among others. The Central City District Plan also describes combining "...history and heritage with modern design achieves an urban environment that demonstrates shared values and contributes to a sense of place and identity". As noted throughout this report, through the rezoning review process Council has determined that the northern tower site can benefit from uplift, and ultimately concluded that the public benefits associated with the new civic space and A-grade office building were considered on balance to provide adequate justification to de-list the Church Hall and that the additional FSR and height were acceptable.
In addition to the strategic merit test outlined above, the submission considers the site-specific merits of the proposal.	The submission outlines the recent finalisation of the Parramatta CBD PP. It objects to “piecemeal” planning and considers this is “the worst example to date”. The submission argues that this site-specific PP challenges the overall decision of Council on what form the Parramatta CBD should take”.	Noted, see response to individual issues below.	This view is noted but not supported for the reasons outlined in this report and in response to the Trust's comments above.

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

The submission does not think the delisting and demolition of the Hall is justified, and cites Council's independently-commissioned Heritage report which argued for the importance of the Hall to the Cathedral, the significance of the Hall itself, and its contribution on Centenary Square.	The views of the heritage consultant commissioned by Council are acknowledged regarding the impact on the historic integrity of the church yard through the potential removal of the Hall and change to the amount of space in front of the western towers (to create an expanded civic area over part of Hunter Street).
The commercial tower represents a building which is "excessive" in height and significantly larger than that envisioned in the Parramatta CBD PP (which was supported by Council staff, community, Councillors and Minister for Planning).	While Council ultimately came to a different view, the de-listing of the Hall was rejected by the Department, considering it a matter appropriate for consideration at the DA stage. The recommended Stage 1 DA process requires detailed examination of all heritage issues related to the proposal.
The submission raises concern about setting a precedent for other sites to ask for a similar uplift.	As described elsewhere in this report, the uplift was considered by Council commensurate with other B3 sites, and as per Council's broader strategic framework expressed through the CBD PP. Controls have been amended following the exhibition to ensure a slenderer tower which in part responds to the concern raised. These changes are described above.
The submission objects to the use of a Planning Agreement to justify the delisting and demolition of the Parish Hall.	This concern is noted and if a similar request were to be received by Council for another heritage listed site, the same rigorous and assessment process against heritage controls and the broader strategic framework would be required.
Delisting/demolition of the Hall should not be negotiable through a Planning Agreement, regardless of the benefits proposed. The demolition of a heritage item should be based on an assessment of its significance, and not whether it can be "traded off" for public benefits. Any delisting consideration should follow normal process of considering Schedule 5 items.	This view is noted. Council ultimately came to a different view through the assessment process that the public benefits associated with the new civic space and A-grade office building were considered on balance to provide adequate justification to de-list the Church Hall and that the additional FSR and height were acceptable.
The EP&A Act requires a Planning Agreement to be advertised.	The site specific DCP controls sets out a preferred planning pathway that requires at the Stage 1 DA, an assessment of the significance of the Hall and then DCP controls if the removal is supported, or if the removal is not supported. The applicant will need to make their case for demolition as part of the Development Application process. The public benefits generated will be available IF it is determined that the Hall can be demolished. The planning agreement details what will be the offset IF it is able to be demolished it does not enable demolition.
The submission notes DPE's advice that "there still remains no strong evidence to allow the removal of St John's Parish Hall from the heritage schedule of [PLEP2011]."	The Planning Agreement was exhibited alongside the Planning Proposal. The issue of the removal of the Parish Hall has not been pre-empted by the Planning Scheme, but will be considered through a Stage 1 DA process. The planning scheme includes controls that will apply to either outcome of that assessment process – i.e. if the removal is supported, or if the removal is not supported.
The submission takes issues with the specific public benefits offered as follows:	In relation to the first benefit: public access to the Church grounds is currently in place; however, is subject to a temporary licence agreement between Council and the Church. Since introduced in 1953 the licence has been renewed twice, and is due to expire in 2041. The Church is offering as part of the Planning Agreement to make public access to the grounds available to the community in perpetuity, this being considered by Council to be of significant public benefit.
1. public access to Church grounds: the submission states that this is not a new public benefit, but one that is already in place. 2. provision of vehicle/pedestrian access arrangements: the submission states that the developer is proposing to dedicate a number of parking spots to be used exclusively by the church. It also notes that the existing agreement grants pedestrian use of certain areas as a footway, and states that this is not a new public benefit, but one that is already in place.	In relation to the second benefit: it is acknowledged that there is an existing pedestrian access arrangement granted through the licence, however, this licence expires in 2041. The benefit under this Planning Agreement would be that this access is provided in perpetuity. Separately, it is also noted that the documents indicate that a number of parking spaces will be developed in the basement of either Option A or Option B outcome; these parking spaces will be assessed at DA stage and are not related to the public benefits offered.

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>3. the provision of vehicle access for Queensland Arcade: the submission states that this is a private benefit for one landowner, rather than a public benefit.</p> <p>The Planning Agreement has been entwined with the merit assessment of the PP, which is contrary to the proper approach of keeping each matter separate.</p>	<p>In relation to the third benefit: this item has not been included in the Planning Agreement due to any benefits to Queensland Arcade. It is in the Planning Agreement due to the community benefits of this arrangement. Removing vehicle access from Darcy/Church Streets to the Queensland Arcade site improves pedestrian safety at an existing pedestrian/vehicle conflict point in a busy part of the city.</p> <p>The Planning Proposal has been independently assessed by DPE who did not raise issues relating to this concern.</p>	<p>As part of the Stage 1 DA process, the future of the Hall will be assessed. The Planning Agreement is a matter for consideration for the assessment, as is a Heritage assessment of any proposal put forward.</p> <p>There will be significant overshadowing impacts to Centenary Square from developments on the north side of Macquarie St and to the west of the St John's site. These impacts have been deemed acceptable as part of the Parramatta CBD PP. It is not expected that a development at St John's would significantly alter the likely overshadowing outcomes for Centenary Square.</p>	<p>The Applicant's Urban Design Report included solar testing and this document was part of the exhibition material. Detailed analysis of overshadowing impacts at the DA stage will be required to assess compliance with the sun access controls in PLEP Amendment 56.</p> <p>The Roxy Theatre is not zoned SP1. It is zoned B3. It is acknowledged that a height control has been applied at that site.</p>	<p>SP1-zoned land in the CBD generally has no height or FSR controls applied, and this continues to be the case on the SP1 land under this site-specific Planning Proposal.</p> <p>It is acknowledged that the Parish Hall's zoning is changing from SP1 to B3 under the site-specific Planning Proposal, but without height controls that limit development to the height of the Hall. This allows for the consideration of the Hall's future through the process laid out in the Planning Scheme, i.e. a Stage 1 DA.</p>	<p>The submission notes s5.10(10) of the standard LEP which provides incentive provisions for heritage items and allows development that would otherwise be prohibited by zoning.</p> <p>Unacceptable impacts on centre of Parramatta.</p> <p>Noted. Any future DA will be assessed against this clause if applicable.</p>	<p>This view is noted.</p> <p>Council has considered the potential impacts of development at this site under the Planning Scheme and responses to this issue are detailed elsewhere in this table. It is also noted that DPE has issued a gateway determination allowing the process for consideration of the planning proposal to proceed, as well as, no objections being received from Heritage NSW and the</p>
---	--	---	--	--	--	--

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>The proposed development will not infringe on view corridors, including views from Hunter Street, Parramatta Square and Church Street, protected by DCP. It is acknowledged that the proposed development may cause some loss of blue-sky views. But this will be minimised as view corridors for the Church will allow people to enjoy blue sky views from a number of different vantage points. In addition, some loss of blue-sky views is inevitable in the Parramatta CBD context if jobs and housing targets are to be achieved.</p> <p>A wide variety of impacts – including Heritage - will be assessed in greater detail as part of the Stage 1 and Stage 2 Das and Design Competition. Specifically, the Stage 1 DA requires a number of supporting documentation to be considered as part of the assessment including: Updated Reference Design, Conservation Management Plan, Structural Report (assessing impacts of underground car parking on heritage items), Acoustic Report (assessing noise and vibration impacts from underground car parking on heritage items), Interpretation Strategy (finalised Interpretation Plan will be lodged at Stage 2), Concept Landscape Plan, Arborist Report, Heritage Impact Statement and Archaeological Test Excavation Report.</p>	<p>Council resolved in 2019 to support the Planning Proposal subject to suitable measures being included in a Planning Agreement, and at that point the Planning Proposal became a policy position of Council. The development proposed is considered to represent desirable long-term goals being in accordance with Council's planning framework for the site that will benefit the Parramatta community.</p> <p>It is acknowledged this is an Applicant-initiated proposal and that in a market economy developer decisions to undertake development is driven by the desire to make a return on their investment. However, planning controls are put in place to ensure that development occur in a way that maximises the benefits to the community from the development not to ensure high returns for developers. The outcomes sought for the site are consistent with the CBD Planning Proposal and are supported by heritage studies. Therefore, it is not considered that a precedent will be created for removal of heritage items to be sought elsewhere in the Parramatta CBD.</p>
<p>Australian Institute of Landscape Architects [AILA]</p>	<p>The submission objects to the proposal.</p>
<p>The proposal disregards the setting of the oldest church site in Australia.</p>	<p>This view is noted.</p>
<p>The proposal impacts on an important example of Scottish Picturesque landscape influence, which is likely of World Heritage status</p>	<p>The influence of English and Scottish picturesque style on early colonial settlement is well documented; however, the claim about the likely status as World Heritage is not well-supported by evidence by the submitter.</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>'sensitivity' and 'high sensitivity'. The St John's site is within the area of 'sensitivity' and the Planisphere report states that "Development in these areas may have some impact, but there is no risk of resulting in a significant impact upon the World and National Heritage values".</p> <p>Notwithstanding the above, an assessment of the broader heritage impacts of the proposal is required to be addressed in the Stage 1 DA through submission of supporting documents by the Applicant including the Heritage Impact Assessment and approved Conservation Management Plan. Independent assessment by Heritage NSW is also required as part of the concurrence process triggered in relation to the SHR listed Cathedral.</p>	<p>It is noted that Heritage NSW and the Department of Infrastructure, Transport, Regional Development and Communication have not objected to the proposal.</p>
<p>The proposal would have destructive impacts on centenary square, its relationship to the Parramatta River Valley, the former Market Place (now Parramatta Town Hall) and Parramatta Square. Protection of Centenary Square's assemblage of civic/sacred buildings and spaces is internationally valuable.</p>	<p>This view is noted and addressed in the response above.</p>
<p>The proposal takes over part of Hunter Street, which is an important spine linking the civic heart of Parramatta CBD to the Government Domain and botanic gardens to the west</p>	<p>The proposal extends over part of Hunter Street for the purpose of an open space with associated public domain works proposed to create a civic area in front of the western entry to the Cathedral. The area of Hunter Street within the new civic space however will remain in Council ownership with the Church responsible for maintenance consistent with the Planning Agreement.</p> <p>It is acknowledged that extending the civic space over a part of Hunter Street was not supported by Council's Heritage Consultant because of the impact on the historic integrity of the church yard. However, Council ultimately came to a different view on this issue through the assessment process. The view along the link between the Domain and St John's Church is not interrupted by built form elements, and this is reinforced by Council continuing to own the land. Council also concluded that the public benefits associated with the new expanded civic space over Hunter Street and A-grade office building were considered on balance to provide adequate justification to de-list the Church Hall and that the additional FSR and height were acceptable.</p> <p>The proposed increase in height to 211m RL for two parts of the site allowing a built form of high-rise towers is considered acceptable and is supportable on heritage grounds. The proposed height was supported by the applicant's Heritage assessments, and also by an independent review of the controls by Hector Abrahams in 2018.</p> <p>The review by Hector Abrahams concluded that the development of high towers on church land should not detract from the Cathedral providing the church yard retains its historic integrity. This is in recognition that towers are the norm in Parramatta with small heritage sites nearby.</p> <p>As the proposed height is considered acceptable on heritage grounds it is not considered that proposed development will dominate and or impose an overbearing backdrop to St John's</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Cathedral subject to the design of the tower being consistent with the building envelope and tower slenderness controls in the DCP.</p> <p>A fair and careful process has been set up to consider the removal of the Church Hall. A staged process has been established for considering how the halls future will be decided. A condition of the Gateway requires a site specific LEP to be included that requires a site specific DCP or Stage 1 DA to be undertaken to address the outcome for the Hall. Further, controls have been included in the site-specific DCP for two options: Option A – demolition and Option B – partial retention. Because a unique framework has been set up for considering the future of the Church Hall this this case should not create a precedent for heritage-listed buildings to be “traded off” in exchange for community benefits.</p> <p>The Planning Agreement will be a matter of consideration at the Development Application stage, but will not be the only matter that is considered when assessing the future of the Hall.</p>	<p>This view is noted and addressed in the response above.</p>	<p>Diminishes the Cathedral's two towers, which were modelled on a 12th century English church on Reculver Promontory by John Wattis, working closely with Elizabeth Macquarie. Further review of the relationship of these buildings is required, particularly as a stone from the ruin of this church is mounted on the west wall of the Cathedral.</p> <p>The proposal does not comply with the LEP by an order of magnitude of 10 (243 metre height)</p> <p>The form of the proposal does not meet the DCP objective to be of slender proportions</p>	<p>Acknowledged. This is because the proposal seeks to vary the present LEP controls.</p> <p>Council officers acknowledge there is tension between delivery of commercially viable floorplates, and the design vision for slender towers in the CBD. In response to the DPE analysis for the Second CBD SEPP and issues raised in submissions, the DCP has been amended as described in the body of the report and in responses to similar issues in this table, to seek to make the tower more slender to minimise the impact of the tower on Centenary Square the surrounding area.</p>	<p>Notwithstanding this, the appropriateness of the base of the tower relative to the podium and upper portion of the tower (above the Sun Access Plane) will be assessed in greater detail as part of the Stage 1 DA, Design Competition and Stage 2 DA through consideration of the Parramatta DCP – Part 6 City Centre Building Envelope controls including: building separation (6.3.3.2) particularly control C.04 (one step in the building); tower slenderness (6.3.3.3) particularly C.04 (floor plates and setbacks) and C.05 (maximum floorplate length).</p> <p>Parramatta Square is protected through controls in PLEP 2011. Consistency of the proposal with these controls is a matter for assessment at the DA stage. Centenary Square will be overshadowed by other development already permissible under the CBD Planning Proposal and therefore controls to protect this area have not been considered as art of the broader CBD Planning Proposal exercise.</p> <p>This view is noted. Council has considered the potential impacts of development at this site under the Planning Scheme. A wide variety of impacts – including Heritage - will be assessed in greater detail as part of the Stage 1 and Stage 2 DAs.</p>
		<p>Public Space identified for protection under the LEP (Centenary Square, Parramatta Town – former Market Square, and Parramatta Square) will be overshadowed in the afternoon.</p>		<p>Proposed change to Schedule 5 means potential delisting, demolition and redevelopment of the Hall. The submission argues this disregards the planning intentions of the Anglican parish and the character, views and</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>spatial structure of the whole complex, and introduces a 45 storey building</p>	<p>Given the site's central location in the Parramatta CBD, and the heritage analysis discussed in previously, it is appropriate that land adjacent to the Cathedral be given the opportunity to be developed for high-rise buildings in line with the framework of the Parramatta CBD Planning Proposal.</p> <p>In addition, the Cathedral is located in the centre of the Parramatta CBD, and so, regardless of what eventuates on the Church's landholdings, the Cathedral will be surrounded by extensive urban development at similar developed heights, including at adjacent Parramatta Square and along Macquarie, Marsden and Hunter Streets and the new CBD PP controls which seek to enable the growth of the Parramatta CBD. However, it is not considered that this will create a precedent for changes to Schedule 5 – items of environmental heritage, with proposals considered on merit and in response to in-depth heritage analysis and consultation with State agencies. For this proposal, both Heritage NSW and the Department of Infrastructure, Transport, Regional Development and Communication raised no objections with the proposal.</p>	<p>The submission raises concern about the 4-storey Cathedral vs. 243 metres building which will "abruptly dominate the pedestrian-centred space of layered significance", specifically:</p> <ul style="list-style-type: none"> - the steeples will be insignificant in proportion and blocked from their setting - the civic square will have overlooking, shadow, wind tunnel, noise and urban heat impacts - overpower and potentially destroy the planned grounds and sense of sacred place of Christian worship dating from 1798 - Crowding and encroaching on open space of significant to First Nations people <p>The proposal is detrimental to the scale of the township intended by Elizabeth Macquarie, particularly in the valley floor where the township evolved at the junction of Sydney Harbour and freshwater. Further review should be completed, including the study of St John's Church by Penny Pike and Meredith Walker which analyses the spatial structure of the valley, assesses the relationship between the Cathedral and the landscape setting, and exists as a precedent for conservation of the Cathedral, grounds and setting.</p> <p>Further review by appropriate personnel is required to examine the Reculver Promontory site, understand its relationship to and influence on St John's, and interrogate preservation efforts at that site to the colonial experience of history at this site (particularly in light of the 'terra nullius' concept and the history of the site as an annual meeting place with First Nations people). This should inform a larger design intention for the site which integrates the broader landscape and history. Demonstrating respect for the Burramattagal and First Nations perspectives must be integrated through genuinely collaborative planning processes, with full and informed consent, rather than offsets.</p>	<p>This view is noted and addressed in the responses above.</p> <p>This view is noted and addressed in the responses above, and these additional points are also made in response:</p> <ul style="list-style-type: none"> • the Church Street view corridor is being protected • Parramatta Square was also set out to protect views from the west, and the DCP controls for this site respect the Parramatta Square setbacks. • the new civic space is considered to provide a more appropriate approach from the west, removing what is currently an area used for carparking with little clear landscape structure. <p>This view is noted and addressed in the responses above.</p>
--	---	---	---

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

A properly integrated landscape heritage review and assessment is needed, which includes relationship to its broader context and international significance.	In response to AILA's concerns, Council officers recommend a minor change to the DCP objective and control in 'Part B Understanding the Place' of the Heritage Controls for both Option A and Option B to more specifically consider landscape heritage issues during the DA stage. This is as follows: <u>Original objective:</u> "O.2 Ensure the important relationships between St John's Anglican Cathedral complex and Parramatta City Centre, including heritage listed places and the historic street pattern, are well understood to inform any future redevelopment. <u>Original control:</u> "C.1 The relationship between the St John's Anglican Cathedral complex, the adjacent heritage items, and broader city centre must be set out within a heritage impact statement submitted with the Development application and Council-supported Conservation Management Plan prepared for the St John's Anglican Cathedral complex. This explanation must include a views analysis, as well as an analysis of relationships with Centenary Square and the new Parramatta Square". <u>Proposed amended objective:</u> O.2 Ensure the important relationships between St John's Anglican Cathedral complex and Parramatta City Centre, including heritage listed places, <u>and</u> the historic street pattern <u>and</u> broader <u>historic landscape context</u> , are well understood to inform any future redevelopment. <u>Proposed amended control:</u> "C.1 The relationship between the St John's Anglican Cathedral complex, the adjacent heritage items, <u>and</u> broader city centre <u>and landscape context</u> must be set out within a heritage impact statement submitted with the Development application and Council-supported Conservation Management Plan prepared for the St John's Anglican Cathedral complex. This explanation must include a views analysis, <u>as well as</u> an analysis of relationships with Centenary Square and the new Parramatta Square, <u>and assessment of the historic landscape context</u> ".

Appendix C – Developers, Major Landowners and Planning Consultant Summaries

APPENDIX C: Submissions from Developers, Major Landowners and Planning Consultant Summaries and Officer Responses

Issue	Officer Response
Think Planners on behalf of landowners of 57 Macquarie Street	
Submission raises no in principle objection to the Planning Proposal, dependent on confirmation of questions in remainder of submission. This site is the subject of a site-specific Planning Proposal lodged with Council; this process is currently “paused”.	<p>Noted.</p> <p>Noted. The 57 Macquarie St Planning Proposal will be assessed on its own merits within the strategic context of the Department finalised CBD Planning Proposal published as Parramatta LEP (Amendment No 56) on 14 October 2022.</p>
“No in principle objection” position is contingent on St John’s not constraining 57 Macquarie St site’s development.	<p>Noted; refer to comment in above cell. The planning controls set out in Amendment No 56 to PLEP 2011 are the relevant LEP controls for 57 Macquarie St at present. The St John’s Planning Proposal has not altered these LEP controls for any adjoining sites.</p> <p>The exhibited reference design for St John’s does not represent Council’s definitive position on a built form for that site or any adjoining sites – a reference design is an indicative document that demonstrates at a high level that a particular site (St John’s, in this instance) can support a certain amount of development potential.</p> <p>The draft SS DCP contains Council’s present position on controls for the St John’s site. One change is recommended in response to the issue raised by the Submitter about the western tower setback. The change is to clarify that the western tower setback is 6 metres (not 9 metres). Council’s site - specific assessment has concluded that 6 metres is an acceptable setback in this case given the context and the desire to maximise the commercial floor space on the site that is proposed to be rezoned to B3 Commercial core while achieving important amenity objectives for Centenary Square and the new civic space. The exhibited DCP also referred to the setback required in the CBD DCP, which as exhibited required a 9m setback where there is an interface between a B3 Commercial Core zone boundary with a B4 Mixed use Zone boundary. However, the site specific assessment should supersede the CBD DCP setback and to ensure this is clear the SSDCP for St John’s will be amended to ensure that it is clear that the 6m tower setback will apply to the subject site.</p> <p>The relevant DCP controls for the 57 Macquarie St site against which a future development on this site will be assessed are those in Part 6 – Parramatta City Centre recently endorsed by Council on 31 October 2022. The 57 Macquarie St landowner may request to pursue a separate conversation around a site-specific DCP with Council if they feel there is merit in doing so.</p> <p>If 57 Macquarie St also develops a commercial tower, a 6m setback would be the applicable control there as well. However, if 57 Macquarie St sought to develop a residential tower, a 9m setback would be the applicable control (as per the draft Parramatta CBD DCP).</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

GAT & Associates on behalf of landowners of 87 Marsden Street	
The submission does not object to the Planning Proposal, but concern is raised with the building footprint and scale of the northern tower and its potential impact on future development at 87 Marsden St.	<p>Noted.</p> <p>If the submitter and their client feel a site-specific DCP is necessary for their site, Council officers are happy to discuss this matter further.</p>
The Planning Proposal acknowledges there is a proposal at 57 Macquarie St, but does not outline how the St John's proposal fits with that proposal. It is unclear how other proposals and/or development in proximity have been considered. Cumulative impacts are questioned, and further analysis should be provided about the northern tower, 57 Macquarie St, and 87 Marsden St sites.	<p>Broader controls for CBD sites were being introduced as part of the Parramatta City Centre DCP that at the time of writing was due to be considered by Council at the meeting on 31 October 2022. The controls as endorsed by Council at this meeting, will be the controls that will apply to all sites unless adjusted by a site specific DCP. The setbacks introduced in the site-specific DCP for St John's are consistent with the DCP controls in Part 6 – City Centre, unless stated otherwise.</p> <p>On this basis, the St John's proposal could theoretically have been "combined" with the CBD PP's process. However, as this site has particular DCP and Planning Agreement considerations, this would have had the effect of slowing down the CBD PP which would not have been a desirable outcome.</p>
The proposal raises height by 780% and FSR by 330%, which is "contradictory and excessive to the recently gazetted" CBD PP. The height and FSR should remain consistent with the CBD PP.	<p>Council determined through site-specific consideration of the planning scheme that the B3 northern tower site could support the floor space envisioned through the Unlimited commercial floor space (UCFS) provisions introduced as part of the CBD Planning Proposal. This view was outlined in the 21 March 2022 Council report seeking endorsement to exhibit the St John's Planning Scheme.</p> <p>Since this time, the Department in finalising the PLEP 2011 (Amendment 56) on 6 May 2022 removed the UCFS provisions for both B3 and B4 zoned land. This provision however is now reinstated for B3 sites mapped as "Area B" on the Special Provisions Map via the publication of State Environmental Planning Policy (SEPP) Amendment (Parramatta CBD) 2022. Further, the Department have indicated they are considering pursuing another SEPP ('second SEPP') to introduce additional FSR for commercial uses on certain land in the B4 Mixed Use zone, as well as other B3 Commercial Core zoned land (not covered in the first SEPP).</p> <p>Both these SEPP processes to reintroduce additional commercial FSR do not apply to the land subject to the St John's Planning Scheme site given this site was not identified on the Additional Local Provisions Map in Council's original work on the CBD PP. However, it is relevant to consider these SEPP processes as part of the assessment of the additional commercial FSR sought via the SSSP for the St John's and this is discussed further and in more detail in the Council Report.</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>More broadly, the application of the UCFS / additional commercial FSR provisions to the adjoining B4 Mixed use zoned land at 57 Macquarie Street, 41-43 Hunter Street, 45 Hunter Street and 87 Marsden Street was endorsed by Council on 15 June 2021 as part of the finalisation stage of the CBD PP, as having “merit for further investigation through separate planning study and rezoning process”. However, the situation now is that the final outcomes of the second CBD SEPP process by the Department will be a consideration for this work and any changes to the planning provisions on these sites.</p> <p>Regardless of the policy framework discussed above, the redevelopment potential of 87 Marsden St is governed by the relevant LEP controls for that site, not by any controls introduced for the St John's site via the SSPP.</p>	<p>It is acknowledged that a redevelopment at this site will have public domain impacts, as will redevelopment at surrounding sites (including 87 Marsden St). The critical public domain impact of overshadowing at Parramatta Square is protected through the provisions in this PP and the finalised CBD PP. Other public domain impacts – such as overshadowing, wind and other effects on spaces such as Centenary Square, nearby public footpaths, etc. – would be assessed in greater detail at the DA stage and according to the relevant planning controls in place. This is consistent with the approach that would be used for any other B3-zoned sites in the CBD PP and is therefore considered acceptable.</p>	<p>In response to concerns raised by the Department about unlimited commercial floor space, Council officers are recommending that the St John's site be allocated a nominated maximum FSR of 6:1 for commercial floor space above the mapped FSR of 10:1, which will allow for a maximum FSR on the site of 17.5:1 (inclusive of a design excellence bonus). This recognises the site is to be rezoned to B3 Commercial Core and seeks to maximise the employment benefit from the subject site. However, given the site is in a more sensitive part of the CBD in terms of heritage and impact on civic/open space, the unlimited floor space provisions (in Clause 7.25A) ultimately endorsed by the Department for the B3 Commercial core sites located north-east of the subject site is not recommended for this site.</p>	<p>The Council-commissioned heritage assessment recognised that towers and small heritage sites nearby are normal for Parramatta CBD and raised no objection to increased FSR and height on the northern tower site on Heritage grounds, provided the church yard has its historic integrity.</p> <p>The site is subject to the same solar access provisions as the remainder of sites in the Parramatta CBD, meaning no net negative overshadowing impact on Parramatta Square at nominated times.</p> <p>The Church Street view corridor has been respected in the St John's DCP controls. The proposal is consistent with Council's planning approach for Church St on this matter.</p> <p>Some measure of solar, privacy and view impacts in a densely-built CBD environment are inevitable. The controls set out in the Parramatta DCP – Part 6 City Centre are considered appropriate to balance these impacts with urban development needs.</p>
	<p>The proposed height and FSR should be reduced to alleviate the impacts on the Cathedral and Parramatta Square. Height and scale of buildings should transition down towards Church St to balance open space at Parramatta Square and density of buildings around Parramatta Square, and minimise “overbearing” on the Cathedral.</p>	<p>Concern is raised with 6m setbacks along the western boundary of the northern tower as well as on Macquarie St. There is concern this will impact on 87 Marsden St in terms of solar access, privacy and views.</p>	

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

	<p>The northern tower does not have to comply with ADG, due to its commercial use. However, a residential tower at 87 Marsden St would have to comply with building separation and solar access requirements. This is an unfair burden on 87 Marsden St.</p>	<p>This is not considered an unfair burden on 87 Marsden St. The ADG is not applicable to commercial buildings, and a different setback is considered appropriate for commercial buildings than for residential buildings. Should 87 Marsden St develop with a residential option, the ADG would apply and in this case the setback on 87 Marsden Street would be 9 metres; and should 87 Marsden Street develop with a commercial option, it would also be subject to the same 6m setback control as the subject site. Council has applied the same set of controls where the setback varies depending on the use in a site specific DCP that applies to site immediately across the road from 87 Macquarie Street.</p>	<p>The Planning Proposal has not addressed how the size and location of the tower will impact on 87 Marsden St. Concern is raised that the proposal considers Parramatta Square, but not the adjoining properties.</p>	<p>Due to its unique nature as a central civic development space, Parramatta Square has introduced particular planning considerations which were necessary to address in the drafting of DCP controls for the St John's site. For other sites, the controls of the Parramatta DCP – Part 6 City Centre are considered appropriate to balance impacts with urban development needs. The development application process will provide a further opportunity for the owner of 87 Marsden Street to understand the impacts on 87 Marsden Street once detail on the actual design and impact are available. The controls being put in place are consistent with those that apply generally across the different parts of the CBD, and it is not considered that the development presents a more significant impact on the future development options for 87 Marsden Street.</p>	<p>A 6m setback is insufficient to minimise overshadowing/privacy amongst the 3 sites (St John's, 57 Macquarie St and 87 Marsden St). Impacts/interaction with 45 Hunter St is also raised in the submission. Greater setbacks and reduction in building footprint should be introduced. The setback should be increased to 12m.</p>	<p>A 6m wide laneway next to the northern commercial tower is a poor urban design outcome. A greater setback could help improve the laneway.</p>	<p>The upper floors of the tower should be pushed towards Macquarie St.</p>	<p>The building envelope be limited to that identified as V1 in figure 5. This will create an appropriate transition to the Cathedral and protect its open space character.</p>	<p>The draft SS DCP contains Council's present position on controls for the St John's site. One change is recommended in response to the issue raised by the Submitter about the western tower setback. The change is to clarify that the western tower setback is 6 metres (not 9 metres). The reasons for this change are discussed in detail in the previous responses above.</p> <p>The CBD is a densely-built urban area, and buildings will realistically be developed in close proximity to one another; there will be a level of overshadowing and privacy impacts throughout the city, as is expected of this sort of development scenario. The submission has not made any clear argument for why this site should be treated differently than other sites in the CBD under the Parramatta DCP', Part 6 – City Centre, 6.3.3.2 Building Separation controls. As noted above in relation to the western tower setback this is being changed to 6 metres (not 9 metres) for the reasons outlined above.</p> <p>The laneway has been removed from the present reference design, and the podium now adjoins neighbouring sites. This is consistent with the vision expressed in the Parramatta DCP – Part 6 City Centre, which is generally attached podiums with setback towers above.</p> <p>Council officers do not support reducing the Macquarie St setback. A 6m setback is considered appropriate and consistent with the Parramatta DCP – Part 6 City Centre, and anything less would set an undesirable precedent of encroachment on Macquarie St.</p> <p>"V1" appears to refer to a map legend code for an FSR control of 3:1 on PLEP 2011's FSR maps. This is the current FSR control applied in PLEP 2011 to the Church's landholdings north of the Hall and South of Macquarie St.</p> <p>Therefore, Council officers understand that the submitter wishes to see the northern tower envelope limited to the area between the Hall and Macquarie St. The built form envisioned under "Option B" roughly conforms to this area. However, the Planning Scheme also contains "Option A", wherein the Hall is demolished, and the new building footprint extends into the present footprint of the Hall.</p>
--	--	--	--	--	--	--	---	---	---

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

	<p>As noted elsewhere in the report, the matter of whether Option A is acceptable will be assessed in a Stage 1 DA process.</p>
The landowner is concerned that the St John's tower configuration puts an onus on their site to ensure no overshadowing to Parramatta Square. The proposal has not considered the likely overshadowing that will be generated by future developments in Parramatta Square. The proposed footprint will likely push the bulk on 87 Marsden St closer to Parramatta Square in order to achieve adequate building separation. This will exacerbate overshadowing generated by development at 87 Marsden St. Concern is raised that this will impact the solar protection zone at Parramatta Square, and therefore the development potential at 87 Marsden St.	<p>The controls for the St John's site do not alter any controls that apply to the 87 Marsden St site, and the proposed setbacks are consistent with the broader DCP controls in Part 6 (which will also apply to 87 Marsden St) endorsed by Council on 10 October 2022. Therefore, Council officers do not consider that the proposed building footprint at St John's has the effect of altering the likely footprint of future development at 87 Marsden St. Each site will be subject to relevant solar access and setback controls, and assessed according to those controls at DA stage.</p> <p>Overshadowing of Parramatta Square has been considered by Council and DPE, with DPE issuing a Gateway requirement that the proposal be consistent with the (then) CBD PP in this regard.</p>
The northern tower would overshadow the north facing windows at 45 Hunter St, which is considered a poor outcome as 45 Hunter St could partly be used for residential accommodation.	<p>Overshadowing impacts are unavoidable in a dense urban environment such as the Parramatta CBD. It is acknowledged that 45 Hunter St is likely to be impacted by other buildings' shadows - including potentially a development at 87 Marsden St. Overshadowing impacts will be examined at DA stage for any of the development sites in this area.</p> <p>It is acknowledged that this will create a boundary between B3 and B4 zones, where commercial and residential uses may ultimately be developed in close proximity. Nevertheless, the a 6m setback proposed for a commercial tower at St John's site is considered acceptable.</p>
A 6m separation will likely compromise the privacy of residential units developed at 87 Marsden St, created a burden on 87 Marsden St to provide greater building separation to protect privacy.	<p>This issue is addressed in the cells above.</p>
The planning proposal has provided conflicting information regarding the heritage status/value of the Hall. The proposal states " <i>the reduction in the extent of Special Activities (Place of Public Worship) zoned land on this site reflects Council's decision to allow for the demolition of St Johns Church Hall</i> ". However, the planning proposal also states that an independent review concluded that the Hall should be retained. It should be clearly outlined whether the Hall is to be retained or demolished.	<p>The quoted text at left appears to be "left over" from an earlier version of the Planning Proposal, and Council officers acknowledge that ideally this would have been removed to reflect the Gateway determination's requirement to remove references to removing the Hall. Nevertheless, it is considered that the rest of the Planning Proposal and exhibited documents made it very clear that the Planning Scheme presents options for treatment of the Hall, dependent on a Stage 1 DA process.</p>
The church hall is considered to form part of the open space and heritage status of the church.	<p>This view is noted. As stated elsewhere in this report, Council has formed the view that – on balance – the public benefits offset the loss of the Parish Hall. Notwithstanding this view, the Department's Gateway determination requirement to remove references to removing the Hall is reflected in the exhibited Planning Scheme including DCP controls which require the removal of the hall to be assessed as part of the Stage 1 DA.</p>
Removing the hall will isolate the Cathedral, as the scale difference between Cathedral and surrounding development would be emphasised.	<p>This concern is noted, and it is acknowledged that "Option A" of the DCP would introduce a different scale relationship between the Cathedral and nearby development. This would be examined at the Stage 1 DA stage, when the question of whether the Hall may be removed is assessed.</p>
The tower is located on land identified as a heritage item in the recently finalised CBD PP.	<p>Noted. This is a DA issue. Development can potentially take place on land identified with a Heritage listing, but must demonstrate through the DA process that this development is acceptable in terms of Heritage impacts. This is a key reason for the Stage 1 DA requirement introduced in the Planning Proposal/DCP.</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Impacts on the heritage significance of the church is of concern. The parish hall and grounds have been largely retained despite changes in the CBD since 1935. The Cathedral being setback from large scale developments creates a sense of openness and supports its heritage significance. The northern tower is considered intrusive and should be further setback. The proposal will unreasonably dominate the Cathedral.</p> <p>The proposal does not indicate whether there is an economic/employment need justifying a 211m commercial tower. It is unclear whether all the commercial space would be occupied by future business. A study should be prepared confirming demand for this development, particularly given there are other sites in the CBD which have the same controls sought by the Applicant and will contribute to commercial GFA in the CBD.</p> <p>There should be further consultation between the Applicant, Council and landowners of adjoining properties. There will be impacts, and the whole block around Parramatta Square should be considered holistically to ensure best outcomes.</p>	<p>Both development options increase the setback between the Cathedral and nearest building to the NW (whether that is the partially retained Hall or a new building podium).</p> <p>As noted above, any DA will need to demonstrate that the impacts on the Cathedral are acceptable. This will be a key question examined in the Stage 1 DA process.</p>
<p>ICC Development Group (41-43 Hunter Street)</p>	<p>Submission generally supports the St John's proposal.</p> <p>Submission provides an update on development progress at their site (where the proponent is planning a private hospital development). Proponent is in the process of engaging with Council about access arrangements through its site.</p> <p>Makes references to draft CBD PP clause 6.7.6J(8)(C)(vii), which stated that "the location of any tower proposed, having regard to the need to achieve an acceptable relationship with other towers (existing or proposed) on the same site or on neighbouring sites in terms of separation, setbacks, amenity and urban form".</p> <p>Concern is raised about a perceived discrepancy where one plan appears to show the southern tower having a 6m setback from Hunter St while another has a 3m setback.</p> <p>Note this control: C.7. If site amalgamation of 41, 43 and 45 Hunter Street cannot be achieved, additional massing up to one (1) storey above the specified street wall may be considered for the Southern</p>
<p>Noted.</p>	<p>Noted.</p> <p>The quoted text at left was the draft clause relating to Opportunity Sites in the Council endorsed version of the CBD PP that permitted sites mapped on the Opportunity Site Map to access additional FSR subject to meeting certain criteria in the corresponding draft provision. 41-43 and 45 Hunter St were not mapped as Opportunity Sites and therefore could not access the intended FSR.</p> <p>Notwithstanding the above, the Department in finalising the PLEP 2011 (Amendment 56) removed the Opportunity Site provision and therefore is no longer relevant.</p> <p>It is assumed the plan referred to by the Submitter is one in the Reference Design. The setback of the southern development site to Hunter Street aligns with the 20m Parramatta Square setback from St John's Cathedral centre line.</p> <p>Notwithstanding the above, the reference design does not set controls for St John's site, or for surrounding sites. The DCP is where these controls are set out, and overrides any inconsistencies in the reference design does not clearly reflect the DCP controls.</p> <p>No changes to this control (C.7) are recommended. Future DAs will be assessed for consistency with this control.</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>development site where amenity and heritage impacts can be satisfied and the additional storey is setback a minimum 6 metres from Hunter Street, and the eastern, southern and western setbacks are established through detailed urban design and architectural analysis taking into consideration potential development at 41-43 Hunter Street and the surrounding heritage context. Any upper level addition above the specified street wall should apply construction methods and materiality which reinforce a lightweight and recessive appearance to the architecture above the street wall.</p> <p>Submission notes that above control may be refined post-exhibition. Also notes that ICC and St John's are currently progressing with their own plans for each site, which may result in further refinement of the above clause.</p>	<p>Submission would like to confirm that the setbacks of St John's planning proposal are equitably shared between both sites (St John's site and 43 Hunter Street), allowing for equitable development rights to be adhered too. Concern that 41-43 Hunter St will be disadvantaged by the St John's Planning Proposal.</p>	<p>The controls at the St John's site do not alter the controls that apply to 41-43 Hunter St; no additional burden is created. The DCP controls in Part 6 – Parramatta City Centre recently endorsed by Council on 31 October 2022 require the podiums of both buildings to be built to their shared boundary; with SS DCP control C.7 requiring on the southern development site (No. 45) - where amalgamation of 41, 43 and 45 Hunter St does not occur - any single level additional storey above the 14-16m street wall or podium interface to be setback 6m from Hunter St, and the setbacks to the east, south and west of this additional one storey to be established through detailed design taking into consideration potential development on 41-43 Hunter St.</p> <p>The Applicant has made certain assumptions about surrounding development as part of their reference design. The reference design however does not set controls for St John's site, or for surrounding sites. The DCP is where these controls are set out, and overrides any inconsistencies in the reference design.</p>	<p>SS DCP control C.7 requires on the southern development site (No. 45) - where amalgamation of 41, 43 and 45 Hunter St does not occur - any single level additional storey above the 14-16m street wall or podium interface to be setback 6m from Hunter St, and the setbacks to the east, south and west of this additional one storey to be established through detailed design taking into consideration potential development on 41-43 Hunter St.</p>	<p>Representative of Strata Committee of 181 Church St (Queensland Arcade)</p> <p>Object and do not agree with Schedule 7 of the Planning Agreement (regarding temporary access terms).</p> <p>Concern that Queensland Arcade was not consulted before the terms were drawn up.</p> <p>The role of the Applicant in pursuing this public benefit is to be willing to provide the temporary access, and they have confirmed this through the drafting of the temporary access licence.</p> <p>However, it is made clear within the Planning Agreement that this is an ongoing discussion: the Planning Agreement acknowledges that "Council agrees to use its best endeavours to facilitate the discussion and negotiations between the Developer and Queensland Arcade Owner" about the temporary access licence, and it does not require Queensland Arcade to consent to the licence.</p>
--	---	--	---	---

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Queensland Arcade has made several attempts to Council to do something with the building, but has been rejected.</p>	<p>It is understood that Queensland Arcade does not wish to pursue temporary access arrangements with the Church at this time.</p> <p>Council officers acknowledge and thank Queensland Arcade representatives for their time in several meetings that have been held over the course of the past few years. For reasons discussed below, Council officers do not support development uplift on this site. These reasons have been discussed with representatives previously.</p>	<p>In summary, Council officers do not support changes to planning controls at Queensland Arcade to increase development potential. The key reason for this is that a redevelopment of the Queensland Arcade site would disrupt the heritage view line down Church Street to the St John's Cathedral steeple and beyond – i.e. the "Blue Sky" policy. Protecting this view line was a key heritage policy underpinning the controls of the CBD PP. A large portion of the Queensland Arcade site falls within this view line, and the remaining parts of the site are unlikely to be redevelopable from a buildability point of view due to their small size and/or long, thin shape.</p>	<p>Council officers note that Queensland Arcade made a submission to the CBD PP exhibition requesting development uplift for their site. This requested change was assessed and classified as "Decision Pathway 2 – Red" (not supported) as part of the CBD PP exhibition consideration, and this recommendation was supported by both Council and DPE. Council officers' position on this matter has not changed since assessment of the CBD PP exhibition response.</p>	<p>If it is noted that surrounding properties have experienced development uplift through the CBD PP and other site-specific processes. As discussed above, the particular site constraints at Queensland Arcade do not lead Council officers to support development uplift at this site.</p>	<p>The "Blue Sky" policy guides height limits down Church St to ensure that St. John's Cathedral steeple is clearly seen with sky behind it. This policy formed a key part of the CBD PP controls and was supported by Council and DPE. This policy affects a number of sites including this site.</p>	<p>It is not practical for this site to redevelop without severely compromising the Blue Sky policy, as a large portion of the site is located within this view axis. The remaining portions of the site are unlikely to be re-developable from a buildability perspective.</p>	<p>Council officers have already met with Queensland Arcade on a number of occasions. The landowner is able to lodge a Planning Proposal for their land, if they deem this the appropriate course of action. Council officers are happy to arrange a pre-lodgment meeting on request.</p>	<p>However, it should be noted that Council officers do not support development uplift on this site (as discussed above). Therefore, Council officers will not be directly approaching Queensland Arcade regarding a Planning Proposal process, as to do so would see the landowner expend (possibly significant) funds with a low likelihood that further development potential can be supported.</p> <p>Noted. Queensland Arcade may wish to engage planning or other appropriate consultant advice to advise them on potential courses of action for their landholdings.</p>
<p>Concern raised about uncertainty for the future of the building and impact on the owners and tenants of the building.</p> <p>Walker Corporation</p>								

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

The submission communicates Walker's support for the redevelopment of the Parramatta CBD, design excellence, positive contributions to community/visitors, and protection of historical buildings, and the positioning of Parramatta Square in support of these goals.	Noted.
The western end of Parramatta Square is of great historical significance, and new development and heritage must be balanced to maintain a sense of place. The cluster of heritage buildings at west end of Parramatta Square / St John's Cathedral site is noted, and submission argues their importance can only be showcased through their retention and careful planning of buildings around them.	Noted. Council has ultimately come to the view that additional uplift on the St John's site can be accommodated and the SSDCP controls include a preferred planning pathway to assess relevant matters for a future design response.
The submission summarises the current and proposed controls, and notes that the Applicant would benefit from approximately 18,539sqm additional GFA in Option A as compared to Option B. The submission argues that in either scenario Council should benefit from the uplift.	The appropriate development contribution will be applied to any future DA and the resulting income put towards development-generated infrastructure needs and costs that ultimately benefit the community and council.
The submission does not oppose development of the site, but argues that the new controls must ensure design excellence, retention of heritage buildings, and that Council benefits from the uplift in the value of the land. Submission argues that these things are not achieved by the draft Planning Scheme.	This view is noted. As stated elsewhere in this report, Council has formed the view that – on balance – the public benefits offset the loss of the Parish Hall; and that the preferred planning pathway outlined in the SSDCP provides for a rigorous process to assess the heritage matters.
Heritage concerns:	<p>Noted.</p> <p>The submission summarises Heritage listings at the subject site and nearby items, arguing that they form a “unique family of heritage items that anchor the western end of Parramatta Square”. The submission also summarises the history of heritage consideration as part of this Planning Proposal.</p> <p>The submission notes that Council and Applicant Heritage consultants debated the demolition of the Hall, and both agreed that the Hall has heritage significance.</p> <p>It argues that the “area of contention is whether the public benefits from the demolition of the Parish Hall outweigh the advantages of its retention (and/or integration with a new commercial tower”.</p> <p>The submission considers the Applicant has presented an “either/or” scenario, “where the primary focus of the heritage debate has been on the benefits of the item’s demolition with limited design scenarios presented to Council”. Concern is raised that a scenario in which the public benefits are delivered and the Hall is retained has not been adequately explored.</p>
	<p>Changes to Ministerial directions and the decision the Department made to remove value sharing provisions from Council's CBD PP means contribution towards infrastructure will be collected via Council CBD Development Contribution Plan when the development proceeds.</p> <p>The landowner has only offered these benefits in the context of the Hall being approved for removal, and Council cannot compel them to do otherwise unless a compulsory acquisition process is considered.</p>

<p>Outside of compulsory acquisition, there is no viable mechanism to consider the delivery of the benefits enumerated in the Planning Agreement and retain the Hall.</p> <p>Council officers do not consider compulsory acquisition to be viable, and are instead considering the offer that was made by the Applicant.</p> <p>There may be an opportunity in the future (if the demolition of the Hall is refused) to try and negotiate some of the benefits as an offset against payable contributions. However, the Applicant has made it clear in negotiations that if the Hall is not approved for demolition, they have no interest in providing the Planning Agreement benefits.</p> <p>Noted; refer to comments in above cell. To reiterate, the Applicant has not expressed the desire to develop the site in this way. It is acknowledged that a portion of the Applicant's land functions as "public domain", however this land is actually privately owned, and Council cannot compel the Applicant to take any particular actions with it (outside of those responsibilities already listed in an existing agreement between Council and the Church).</p>	<p>Refer to the discussion in the above cells about the land being privately owned and the offer by the Applicant.</p> <p>The area of the Cathedral grounds subject to revitalisation includes the area generally of the west of the Cathedral, including the Civic Square. The existing grassed area to the east will not be subject to works. The Planning Agreement that formed part of the exhibition documentation details the area subject to revitalisation.</p> <p>This view is noted. Council officers agree that activation along the southern side of the Hall (if Hall retained) or northern side of the new civic space (if Hall is not retained) is desirable, and would seek to achieve the relevant activation outcome depending on what happens with the Stage 1 DA process.</p>	<p>Council exhibited the Planning Scheme with options to address DPE's stated preference to defer consideration of the outcomes for the Hall to DA stage. This preference was detailed in the Gateway determination letter dated 8 September 2020 and formed part of the exhibition documentation.</p> <p>It would not have been appropriate to exhibit a DCP with controls that only contemplated removal of the Hall, because this would undermine the integrity of the DA process – i.e. it would accept as a <i>fait accompli</i> the outcome that the Hall would be demolished prior to a proper assessment of the acceptability of that outcome being performed.</p> <p>Therefore, the DCP contains controls that respond to a scenario in which the Hall is removed (Option A) and a scenario in which it is retained (Option B), and the LEP controls facilitate a Stage 1 DA process in which the appropriate of those two options will be selected through an assessment process.</p>
<p>The Submission argues that the site can be redeveloped with two towers, while also improving the public domain and retaining the Hall.</p> <p>The submission argues that the area of civic space that should be revitalized includes an extended area of the Cathedral's grounds, not just the proposed Civic Square.</p>	<p>Citing DPE's NSW Guide to Activation: Public Spaces, the submission argues that activation of the civic space can happen through various ways and does not depend on the removal of the Hall and redevelopment of a commercial tower.</p> <p>The submission argues that, in order to avoid making a decision on de-listing, Council has exhibited a draft DCP with scenarios. The submission considers that advancing a PP to exhibition stage without clarity on development outcomes is unacceptable and inconsistent with Section 3.33 of the Environmental Planning and Assessment Act.</p>	

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Endorsing a DCP and Planning Agreement with the heritage scenarios presents as an incentive for developers to destroy heritage items rather than retain them. This is poor governance, as Council should be advocating for the protection and retention of heritage items.</p> <p>The Church and surrounding buildings (including the Hall) are an important historic anchor point for the CBD and the removal of the Hall should not be contemplated, particularly given the public benefit offer, which the submission argues is "a lackluster offer...to provide minor public domain improvement works".</p>	<p>The alternate option in the DCP also facilitates clarity on the role of the Planning Agreement. If the DCP had remained silent on the removal of the Hall, there would have been no context for the Planning Agreement which Council resolved to pursue.</p> <p>This concern is noted and if a similar request were to be received by Council for another heritage listed site, the same rigorous and assessment process against heritage controls and the broader strategic framework would be required.</p> <p>For this site, Council exhibited the Planning Scheme with options to address DPE's stated preference to defer consideration of the outcomes for the Hall to DA stage.</p> <p>The Planning Agreement has been a matter of consideration when assessing the PP, as Council had to assess the impacts of the proposal and whether or not these were mitigated.</p> <p>On balance, Council concluded that the public benefits offered were appropriate to offset the impacts from the loss of the Heritage item.</p>	<p>Through the Stage 1 DA process, the future of the Hall will be assessed. The Planning Agreement is a matter for consideration for the assessment, as is a Heritage assessment of any proposal put forward.</p>	<p>The public benefit offer is for the carrying out of works (including works to the land that functions as "public domain"), provision of access and monetary contributions towards the delivery of public infrastructure and amenities in connection with the Planning Proposal and proposed development of land.</p> <p>The offer of 'access in perpetuity' to the land that currently functions as public domain is considered by Council officers to be a significant public benefit, as is the embellishment and maintenance of that land to Council's standards. These benefits could only otherwise be achieved via a very costly compulsory acquisition process.</p> <p>This issue has been addressed in above comments from Council officers. To reiterate, the "public domain" around the church is privately-owned land, and Council does not have the practical means outside of a compulsory acquisition process to compel the landowner to undertake what the submitter is suggesting.</p> <p>Refer to comments above addressing these issues.</p>	<p>The public domain surrounding the church should be improved in any development scenario to provide an improved connection congruent with the outdoor space with Parramatta Square.</p> <p>The loss of this prominent item is unjustified, and DPE's comments that "there has been no strong evidence provided to allow the proposed removal of [the Hall] from the heritage schedule of [PЛЕP 2011]" are cited. The presentation of two options undermines public trust. Council should be committed to retaining historic built heritage, and the DCP should be amended to provide additional protection to the heritage buildings.</p> <p>The submitter does not support demolition of the Hall, and considers the Planning Agreement and DCP undermine the planning system and set an undesirable precedent.</p> <p>This view is noted.</p>
--	--	---	---	---

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Planning Agreement - Requirement for demolition</p> <ul style="list-style-type: none"> - Council has not supported their engaged Heritage expert and so has exhibited a DCP with scenarios - The removal of the Hall only benefits the Applicant with more floor space, so it is unclear why Council has considered this for exhibition - the items in the Planning Agreement do not provide a tangible public benefit that warrants removal from the item, and “incentivize the demolition of a heritage building for money”. - The civic domain improvements should be required in any redevelopment, and this would be necessary anyway given the extensive basement excavations proposed. Rather than classifying them as ‘benefits’, they should simply be included in any future DCP controls seeking to improve public domain as part of any development. - If the Applicant was serious about public benefit, the Hall would be retained and the public domain works expanded. The Applicant acknowledges the importance their land plays for public access, but the contribution is insufficient. - This approach to demolition of Heritage items undermines community confidence and creates an undesirable precedent. - It is unclear how Council can accept the offered benefits to justify the removal of a heritage item as being within the scope of “public purpose” – which is a relevant legislative requirement. While the submitter appreciates a PA is not to influence the decision of a PP or removal of the item, concern is raised that could undermine community confidence in Council and the planning process 	<p>Council exhibited the Planning Scheme with options to address DPE's stated preference in the Gateway determination to defer consideration of the outcomes for the Hall to DA stage.</p> <p>The Planning Agreement has been a matter of consideration when assessing the PP, as Council had to assess the impacts of the proposal and whether or not these were mitigated. On balance, Council concluded that the public benefits offered were appropriate to offset the impacts from the loss of the Heritage item.</p> <p>The Stage 1 DA process, the future of the Hall will be assessed. The Planning Agreement is a matter for consideration for the assessment, as is a Heritage assessment of any proposal put forward.</p> <p>As noted in previous comments above, the “public domain” around the church is privately-owned land, and Council does not have the practical means outside of a compulsory acquisition process to compel the landowner to undertake what the submitter is suggesting.</p>	<p>The Council Report for the Extraordinary Council Meeting on 21 March 2022 (Item 12.3) included Attachment 1 being the ‘Term Sheet – St John’s Cathedral: Planning Agreement - dated 15 March 2022’.</p> <p>This document set out and explained the proposed provisions and issues to form part of the planning agreement.</p> <p>An Explanatory Note of the draft Planning Agreement, letter from Council's solicitor and Planning Agreement were all part of exhibition material. Council is satisfied that proper process has been followed consistent with Section 7.4 of the Environmental Planning and Assessment Act.</p> <p>Planning Agreement - Ambiguity:</p> <ul style="list-style-type: none"> - The \$4.6 million contribution of the Planning Agreement is questioned. (being \$1.1 million for no through site link being provided, and \$3.5 million for the “risk Council is accepting due to the public access not being legally recognised on the land title and acceptance of limitations on public access”) - Why was \$1.1 million offered, and how was it calculated? The loss of the through site link is a result of TfNSW's requirements. Why should the Applicant pay for something that is out of their control? Concern is raised that this is just additional justification for demolition of the item, and Council accepting this is not in the spirit of the terms that a Planning Agreement is to be made. - What is the justification for the \$3.5 million? Council should be transparent in its method of calculating the contribution.
---	--	--

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Planning Agreement - public access to Church Land</p> <ul style="list-style-type: none"> - The submission notes that the public access to church land is through a license rather than an easement, and \$3.5 million has been offered to justify this. This is unjustified and does not adequately represent the public benefit of public access through an easement. - Council should require an easement as well as additional public domain improvements works. The terms of the easement can be negotiated between Council and Applicant. This would ensure public access in perpetuity, which is not ensured under the proposed arrangement (i.e. if the land is sold). Providing easements is a common process and there shouldn't be an exception here. - If the Applicant is not willing to offer such benefits, perhaps Council should reconsider the PP. 	<p>Refer to comments above addressing these issues.</p> <p>Council officers note that this option formed part of negotiations, and the licence was ultimately considered an acceptable alternative given that the additional risks posed by a licence compared to an easement were addressed by the applicant.</p> <p>The Gateway determination dated 8 September 2020 included two conditions related to solar access for Parramatta Square. Condition 1(a) required an additional site specific clause to be included in the Planning Proposal for St John's to require consistency with the solar access requirements for Parramatta Square, including requirement for compensatory area; and Condition 5 required prior to finalisation, the planning proposal is to be consistent with the Parramatta CBD Planning Proposal's position in relation to solar access to Parramatta Square.</p> <p>The site-specific PP was exhibited in April/May 2022 with a clause consistent with the solar access requirements for Parramatta Square including the compensatory area as per the CBD PP endorsed by Council June 2021. While a map of the compensatory area was not part of PP exhibited material, references to the CBD PP were included and available. The parts of the finalised Clause 7.5 Sun access in LEP 2011 (Amendment 56) related to Parramatta Square were not amended.</p> <p>The Applicant's Urban Design Report included solar testing and this document was part of the exhibition material. Detailed analysis of overshadowing impacts at the DA stage will be required to assess compliance with the sun access controls in PLEP Amendment 56.</p> <p>Solar Access</p> <ul style="list-style-type: none"> - The submission summarises the solar access controls within the exhibited PP vs the CBD PP - The clause exhibited in the St John's proposal is not consistent with the CBD PP, as the St John's provision does not provide additional protection between 1pm-2pm on the March/September equinox periods as required by the CBD PP. The clause would result in less protection than the current solar access provisions of PLEP by allowing overshadowing between 12-1pm if there is a compensatory area of solar access elsewhere in the square. - The provision should be amended to ensure consistency with the CBD PP so that the PP is in accordance with the Gateway determination. - The drafted clause does not provide a map of the compensatory area to be protected. This makes it unclear how the control is to apply. Exhibited PP should be unambiguous and any proposed map amendments need to be included in accordance with the relevant section of the EP&A Act. This needs to be remedied to ensure clarity, consistency with CBD PP, and consistency with the EP&A Act.
---	---

Appendix D – Public Authorities and Service Providers Summaries

APPENDIX D: Submissions from Public Authorities and Service Providers Submission Summaries and Officer Responses

Issue	Officer Response
Endeavour Energy	Did not object to the Planning Proposal. The submission included technical advice and documentation outlining location of electrical easements on site, standard conditions of consent, etc.
Civil Aviation Safety Authority (CASA)	Did not object to the Planning Proposal. CASA will assess the building as appropriate at DA stage. As there will be other obstacles in the vicinity (such as Parramatta Square) it is unlikely that CASA will make specific recommendations for the building, except perhaps obstacle lighting.
Department of Infrastructure, Transport, Regional Development and Communication (DIRD)	Did not object to the Planning Proposal. The proposal may result in activities that intrude into protected airspace, and applications for potential controlled activities are required to be referred to the relevant airport for assessment and approvals. Early engagement with Bankstown and Sydney Airports is encouraged to ensure intrusions are identified, assessed and mitigated where possible.
Sydney Water	Did not object to the Planning Proposal. The agency notes that the proposal presents potentially large servicing demands and recommends further steps are taken to address this issue including investigations to determine the servicing requirements, engaging a Water Servicing Coordinator, lodging a feasibility application with Sydney Water, and having an inception meeting with the agency at detailed concept stage.
Department of Planning and Environment – Environment and Heritage Group	Did not object to the Planning Proposal, but did raise various issues and recommendations as summarised below. Advises Council to carefully consider the inconsistencies of the Planning Proposal with the requirements of the relevant Section 9.1 Direction relating to Flood Prone Land
	Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project. Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project. CASA was also consulted (see above). Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project.
	Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project. Council's flood engineers have not raised concerns with the Planning Proposal's consistency with this Section 9.1 Direction, nor has DPE flagged any issues with this direction when issuing a Gateway for this Proposal. This land will be subject to floodplain risk management controls as a result of the CBD PP, and site-specific DCP controls relevant to flooding and rainwater management are also proposed.

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

	<p>Also, DPE is the plan-making authority in this instance, so will have the final approval in regard to Section 9.1 Directions.</p> <p>SESNSW was consulted as part of the exhibition.</p>
<p>Recommends that State Emergency Services [SES] NSW is consulted.</p> <p>Recommends that the DCP includes a control that trees removed are replaced at a ratio of 1:4.</p> <p>Recommends that the DCP includes a control to use native species to improve local biodiversity and ecological services at the site.</p> <p>Recommends that the DCP includes a control that where view lines to the Cathedral are to be maintained that small to medium sized local native tree species are used.</p>	<p>Rather than define public domain outcomes in specific terms ahead of time, this DCP has taken the approach of ensuring that Council has to approve an agreed detailed design brief and public domain design prior to submission of a future DA.</p> <p>This gives Council ample opportunity to consider landscaping issues such as those raised at least early in the development process and ensure that Council is satisfied on all accounts in light of Council's public domain policy position for the CBD (which includes the Parramatta DCP – Part 6 City Centre controls and Public Domain Guidelines 2017).</p> <p>Council officers consider that this flexible and design-led approach is preferred, given the unique nature of this project which will require a collaborative and iterative process between Applicant and Council to design the new public domain.</p> <p>Notwithstanding the above, Council officers accept that the control relating to the size of trees could be clarified, so as not to prejudice outcomes about the size of trees in light of heritage view lines. The following minor DCP amendment is recommended:</p> <p>Original control:</p> <p><i>"Large tree planting shall be provided within the public domain that is appropriate to its role, respectful of sight lines including from Hunter Street facing St John's Anglican Cathedral and at a scale that is appropriate to a setting for the St John's Anglican Cathedral! Trees shall be planted at natural (pre new development maximum) ground level, not in raised planters. The size of trees shall be maximized, within the considerations otherwise outlined in this control."</i></p> <p>Proposed amended control:</p> <p><i>"large Tree planting shall be provided within the public domain that is appropriate to its role, respectful of sight lines, including from Hunter Street facing St John's Anglican Cathedral and at a scale that is appropriate to a setting for the St John's Anglican Cathedral! Trees shall be planted at natural (pre new development maximum) ground level, not in raised planters. The size of trees shall be maximized, within the considerations otherwise outlined in this control."</i></p>
	<p>Recommends that the DCP includes a control that a pre-clearing inspection is undertaken by a suitably qualified ecologist prior to any clearing of vegetation.</p> <p>In further advice, EHG clarified that the purpose of this request is to identify whether the trees proposed for removal in the concept plan provide habitat for native fauna. EHG also provided further technical advice on what this review should entail, and how any native habitat and/or fauna – if found - should be properly taken care of. EHG's view is that this assessment should be undertaken at DA stage, and the</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>requirement for a pre-clearing inspection should be included as a condition of consent on any further lodged DA's.</p>	<p>The site-specific DCP also requires an arborist report as part of the Stage 1 DA and Council's City Significant Development team (CSD) and Tree Preservation Officers advise that a good arborist's report would address fauna.</p>
<p>State Emergency Service NSW [SESNSW]</p>	<p>The submission does not clearly support or object to the proposal, however, some of the comments therein could be read as objecting to the Proposal (see further below).</p> <p>The submission provides guidelines developed for the Hawkesbury Nepean Valley as a resource.</p> <p>Reference is made to comments that SESNSW submitted to the Parramatta CBD DCP exhibition. In summary, SESNSW prefers evacuation to a "shelter-in-place" approach, due to human behaviour during floods and the need for additional monitoring of areas where people are sheltering. However, where safe evacuation is compromised by a lack of adequate infrastructure and/or warning time, the NSW SES recognises that the situation may result in it being safer for a population at risk to remain in place, so long as buildings are structurally sound and there are safe and adequate places to shelter.</p> <p>The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project.</p> <p>Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project.</p> <p>These concerns relate to the flood planning and management policy framework that applies to the entire CBD and are not particular to this site. DPE in finalising the CBD PP (Amendment 56) supported and implemented Council's policy framework despite the SES concerns. The remaining part of this policy framework which needs to be implemented are broader DCP controls for the City Centre related to flooding and evacuation policy which at the time of preparing this report are under consideration by Council for finalisation.</p> <p>Further, the Parramatta DCP – Part 6 City Centre controls contains a note that acknowledges this issue as follows:</p> <p><i>"For many sites, conventional (horizontal) evacuation of a building during a flood event is suitable. For sites where this is not possible, taking refuge within buildings above the Probable Maximum Flood is required. This is termed 'Shelter in Place'. This DCP explains how these alternatives are pursued for new and upgrading development."</i></p> <p>This note is consistent with the broader controls that have already been given effect as part of the broader CBD PP and a future DA will be assessed against the relevant flood planning controls.</p> <p>The site-specific DCP complements and is consistent with the broader controls to be introduced as part of the new Parramatta DCP – Part 6 City Centre controls.</p> <p>Council's flood engineers have not raised concerns with the Planning Proposal's consistency with this Section 9.1 Direction, nor has DPE flagged any issues with this direction when issuing a Gateway for this Proposal.</p> <p>This land will be subject to floodplain risk management controls as a result of the CBD PP, and site-specific DCP controls relevant to flooding and rainwater management are also proposed.</p>
<p>Recommends that the site-specific DCP is made consistent with the new broader Parramatta CBD DCP once the latter is finalised.</p> <p>The consent authority will need to ensure that the proposal is considered against relevant Section 9.1 Direction and is consistent with the NSW Flood Prone Land Policy as set out in the NSW Floodplain Development Manual 2005.</p>	

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

	<p>Also, DPE is the plan-making authority in this instance, so will have the final approval in regard to Section 9.1 Directions.</p> <p>Zoning should not enable development that will result in an increase in risk to life, health or property of people living on the floodplain. The site is above the 1% AEP flood level, though roads adjacent to the site are affected by relatively frequent (1 in 5 year) flooding and the site is subject to Probable Maximum Flood flooding.</p> <p>Risk assessment should consider the full range of flooding, including events up to the PMF and not focus only on the 1% AEP flood. Risk assessment should have regard to flood warning and evacuation demand on existing and future access/egress routes. NSW SES notes and supports the site-specific controls included in the DCP regarding the design to consider riverine and local overland flow and modelling the interaction of flooding and built form</p>	<p>The key stormwater and flood risk management issue for the CBD Planning Proposal is balancing growth in the CBD with managing risks to life and property from flooding. Further, while the planning proposal increases the overall population at risk, it will also provide the opportunity to decrease the risk to that population through encouraging re-development which is more compatible with the flood risk. Both the site-specific and broader Parramatta DCP – Part 6 City Centre controls support this goal.</p> <p>Noted. The Parramatta DCP – Part 6 City Centre controls includes a control requiring a merit-based flood hazard and risk assessment to ensure buildings and the uses they contain are compatible with the identified flood risk.</p>
	<p>In the context of future development, self-evacuation of the community should be achievable, as far as possible, in a manner which is consistent with the NSW SES's principles for evacuation. Future development must not conflict with the NSW SES's flood response and evacuation strategy for the existing community. Evacuation must not require people to drive or walk-through flood water. Therefore, development at this site must ensure any evacuation is complete prior to the adjacent roads becoming flooded (in as early as a 1 in 5 year flood). Given this is a flash flood environment, there may be insufficient time to complete evacuation and further site-specific advice is provided below.</p> <p>Development strategies relying on deliberate isolation or sheltering in buildings surrounded by flood water are not equivalent, in risk management terms, to evacuation. St Johns Anglican Church Site DCP regarding Flood Risk and Rainwater Management C.12 should be changed to clarify that horizontal evacuation is the preferred primary strategy where feasible.</p>	<p>Emergency planning for any future development is a matter for consideration as part of a future DA. Specifically, Parramatta DCP – Part 6 City Centre controls requires a Flood Emergency Response Plan (FERP) to be submitted with a DA that would include requirements for evacuation or sheltering within a building.</p> <p>This issue is addressed above.</p> <p>Further, the Parramatta DCP – Part 6 City Centre controls also requires a FERP that will look at this in detail at the DA stage as well as hazard, risk and safety assessments to demonstrate how risk and potential for harm to people, property, buildings, and the environment from floodwaters will be mitigated.</p>
	<p>Development strategies relying on an assumption that mass rescue may be possible where evacuation either fails or is not implemented are not acceptable to the NSW SES. This should be included as a control measure in the DCP.</p>	<p>Council officers do not consider that the controls imply that mass rescue will be required. It contains numerous controls to ensure that 'shelter in place' evacuation is implemented in a safe and satisfactory manner.</p> <p>The Parramatta DCP – Part 6 City Centre controls also contains a control requiring fail safe access to an exit-entry point above the 1% flood level + freeboard that enables people to exit the building during a fire and/or flood, and allows emergency personnel to enter to attend to a medical emergency (6.7.4 C.07b).</p>
	<p>Normally the NSW SES is opposed to the imposition of development consent conditions requiring private flood evacuation plans rather than the application of sound land use planning and flood risk management. However, given the level of</p>	<p>Noted. Flooding will be an important consideration at DA stage, and guided by the flood controls in the LEP, CBD DCP and SSDCP. Specifically, the Parramatta DCP – Part 6 City Centre includes a control requiring a merit-based flood hazard and risk</p>

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>redevelopment in the CBD and the extent of flood considerations in the objectives and controls outlined in the draft DCP, the NSW SES notes that development applications should demonstrate sound flood evacuation risk assessment has been undertaken.</p>	<p>The habitable floors of any residential development (including aged care) should be located above the PMF with the building structurally designed for the likely flood and debris impacts. NSW SES notes that this is included in the draft Parramatta CBD DCP as control 7.2.C.01.</p>	<p>All ground floor businesses and retail floors must be above the 1% AEP flood levels and access to the basement must be above PMF. There must also be the provision of sufficient readily accessible habitable areas above the PMF cater for the safety of potential occupants, clients and visitors in commercial development.</p>	<p>The controls also contains a control requiring fail safe access to an exit-entry point above the 1% flood level + freeboard that enables people to exit the building during a fire and/or flood, and allows emergency personnel to enter to attend to a medical emergency (6.7.4 C.07b).</p>	<p>Noted.</p>	

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

evacuation and have pedestrian access to a podium level above the PMF to increase human safety.	must have fail safe access to the safe refuge area that is protected from floodwaters up to the PMF.
Provision of publicly accessible space or access to space above the PMF (with adequate infrastructure to enable the physically impaired to access such space) that is easily accessible 24 hours a day for seven days a week which is clearly identified for this purpose with associated directional signage. This should include building security considerations to ensure the appropriate areas above the PMF remain accessible. This should be included in the site specific DCP, if not already included in the revised Parramatta CBD DCP.	This view is noted. The issue of where people in the public domain will evacuate to is a broader strategic issue for emergency/evacuation planning processes and a potential future iteration of the Parramatta DCP – Part 6 City Centre controls. This is not considered an issue that should prevent this particular site-specific Planning Proposal from progressing consistent with Council's adopted framework relating to flood controls for the CBD.
Undertaking regular exercising of a building flood emergency response plan similar to a building fire evacuation drill is recommended.	The Parramatta DCP – Part 6 City Centre requirements for a FERP include a building flood emergency response plan, similar to a building fire evacuation drill, and measures to ensure this is tested at least annually.
Council should have community awareness strategies that include requiring current and future building owners to participate in increasing this awareness. This may also include an emergency warning notification (or PA) system to provide evacuation and safety directions to the community as identified the recently adopted Floodplain Risk Management Plan. The NSW SES recommends that Council considers the establishment of outdoor CBD-wide PA system (like that used in Sydney CBD). This would reduce the risks for the itinerant population as well as building occupants moving in and out of the building.	This view is noted. The Parramatta DCP – Part 6 City Centre requirements for a FERP include a building flood emergency response plan, similar to a building fire evacuation drill, and measures to ensure this is tested at least annually. These are broader flood emergency and evacuation planning issues. Council is presently progressing a holistic update to its emergency response plans in conjunction with relevant combat agencies. It is expected that this update will be completed this year, with more detailed evacuation planning to follow. Broader emergency planning approaches such as community awareness strategies, emergency drills, and emergency warning notification systems are best considered strategically, rather than as part of a site-specific planning proposal. SESNSW is involved in the project to update the city's current emergency plan. Council's Local Emergency Management Officer (LEMO) has been forwarded a copy of SES's submission to this Planning Scheme for their information. It is considered that these issues could be further considered at a strategic level in that arena.
Providing adequate services so people are less likely to enter floodwaters. This includes access to ablutions, water, power and basic first aid equipment. Consideration must be given to the availability of on-site systems to provide for power, water and sewage services for the likely flood duration of surrounding areas (which may exceed several hours) plus a further period to provide allowance for restoration of external services and infrastructure damage, as identified in draft Parramatta CBD DCP control 6.7.4 C.05.	Noted.
To minimise the increased risk of fire and to reduce both the potential for adverse outcomes in the case of a medical emergency and the risks to those who may aid the patient, Council, DPE, NSW SES, Ambulance NSW and the relevant Health	The issue of coincident emergencies – i.e. medical emergency or fire during flood – is not specific to this site, but is a broader strategic emergency planning question. The Parramatta DCP – Part 6 City Centre contains controls responding to this issue as follows:

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Functional area and fire agency servicing the area, should be consulted to determine appropriate risk management strategies during flooding.</p> <ul style="list-style-type: none"> The Parramatta DCP – Part 6 City Centre requirements for a FERP include evidence of consultation undertaken with relevant state and local agencies in the preparation of the FERP. The Parramatta DCP – Part 6 City Centre contains a control requiring fail safe access to an exit-entry point above the 1% flood level + freeboard that enables people to exit the building during a fire and/or flood, and allows emergency personnel to enter to attend to a medical emergency (6.7.4 C.07b). 	<p>Furthermore, Council is presently progressing a holistic update to its emergency response plans in conjunction with relevant combat agencies. It is expected that this update will be completed this year, with more detailed evacuation planning to follow. Part of this work also include evacuation strategies. It is noted that SESNSW is involved in that process. SESNSW submission has been forwarded to Council's Local Emergency Management Officer (LEMO) for consideration. It is considered that this question could be further considered at a strategic level in that arena.</p>	<p>Transport for NSW (TfNSW)</p> <p>Suggested wording related to the DCP came in as pre-exhibition comment and was included in the exhibition documentation. Preference for vehicle access to/from the site via Hunter Street given strategic investigations at the time for the provision for future transport infrastructure.</p> <p>The submission does not clearly support or object to the proposal, however, some of the comments therein could be read as objecting to the Proposal (see further below).</p> <p>The new intersection of Marsden Street / proposed new laneway at rear of 41-45 Hunter Street should be designed in accordance with relevant guidelines and assessed once the land acquisition is finalised.</p> <p>TfNSW does not support the car parking spaces stated in the traffic impact assessment, due to good public transport opportunities in close proximity.</p>	<p>This preference is reflected in the exhibited SS DCP controls (see C.1 and C.2 under the heading 'Vehicle access, parking, and servicing') and requiring the preferred parking/service access for the St John's Anglican Cathedral complex to be designed in consultation with Transport for NSW.</p>	<p>Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project.</p>	<p>Given the comments discussed below, Council officers consider this an unresolved objection and will refer to DPE as such.</p>	<p>Noted.</p>	<p>The car parking spaces were calculated using the rates and formula established as part of the CBD PP.</p>	<p>Officers do note that the Applicant has included land zoned SP1 Place of Public Worship in the formula calculation for commercial parking. Council officers would not include this land in the calculation, as this land is not being rezoned or redeveloped. Therefore the actual number of approved spaces may actually be less than that shown in the TIA.</p>	<p>Regardless of the car parking spaces estimated in the TIA, the new CBD PP rates sought under this site-specific PP have already been given effect as part of PLEP Am</p>
--	---	--	--	--	--	---------------	--	--	---

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

	<p>56. Therefore, the site-specific PP is consistent and there is no need to introduce these controls as part of this site-specific proposal.</p> <p>It is noted that the PLEP Am 56 rates apply to sites across the CBD, and all sites in the CBD enjoy good public transport opportunities in close proximity. Council officers do not consider there is any argument to withhold applying those rates to this particular site based on proximity to transport options.</p> <p>The ultimate number of apartments and areas allocated for the specific land uses within the buildings may alter at Concept and or DA stage, with the relevant car parking rate applied and assessed accordingly. Submission of a Parking and Access Report may also be required consistent with PDCP 2011 dependent on the final arrangement of buildings and uses and whether one DA is lodged for the whole site.</p> <p>Noted. While the reference design shows loading activities occurring onsite, officers consider that this matter could be strengthened in the DCP controls. An additional objective and control is proposed as follows:</p> <p><i>"Oxx. Minimise the impact of vehicular servicing and loading activities on the surrounding street network."</i></p> <p><i>"Cxx. All vehicular servicing and loading activities shall be accommodated on-site."</i></p>	<p>Parking matters in a future DA will be assessed against the relevant controls including finalised CBD PP controls and forthcoming CBD DCP.</p> <p>Noted. The DCP states that "<i>before lodging a Development Application early consultation with Transport for NSW and Council is encouraged to formulate an agreed access point for ingress and egress to the subject site</i>", as well as a control supporting this aim. Officers consider this sufficient to bring the issue to the fore, and also note Transport's concurrence on future development at this site which essentially gives the agency the power to 'veto' an undesirable access point.</p> <p>Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.</p>	<p>The indicative timeframe of construction is unknown. Several steps in the development process, including finalisation of the planning scheme, lodgment and approval of Stage 1 DA, Design Competition, and lodgment and approval of detailed DA are yet to occur.</p> <p>Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.</p> <p>Also, as noted elsewhere in this report, Council officers are considering a response to Church Street access (at Darcy Street) that addresses pedestrian safety issues.</p>
--	---	---	--

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

Submission queries whether there would be any planned church events/activities which might cause unexpected high volumes of vehicle/pedestrian traffic that might require arrangement with light rail to ensure safety.	Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.
Submission requests consultation with light rail on the proposed management of construction vehicle traffic, noting that light rail has not been designed to cater for construction vehicles.	Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.
Submission requests a reflectivity assessment report to ensure that road users would not be adversely impacted by reflectivity impacts.	Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.
Any application of Road Occupancy Licenses associated with this development would require consultation with light rail.	Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.
Any works which require access through the light rail corridor need consultation with and approval by light rail.	Noted. Council officers consider this a DA issue, and relevant consultation would occur as part of a concurrence process.
Heritage NSW	
The submission does not object to the proposal.	<p>Noted. The agency's submission has been forwarded to the Applicant for their information and assistance in progressing the project.</p> <p>Council officers agree that the assessment of the options in relation to the Hall is a DA issue, and one to be assessed by Council. The site specific DCP controls have been drafted to enable this and relevant consultation would occur as part of any concurrence process triggered in relation to the SHR listed cathedral.</p> <p>As noted above the triggering of any concurrence process and required action will be determined as part of the assessment of the DA.</p>
Advises Council that the assessment and consideration of any impacts of options in relation to the local heritage item St John's Parish Hall rests with Council; and notes that the removal of this local heritage item presents potential opportunities and constraints in relation to the SHR listed cathedral.	
Submission comments that it appears there are no changes to the planning controls within the SHR curtilage, but if any are proposed these require approval under the Heritage Act 1977.	
The options for St John's Parish Hall provides the following opportunities and constraints:	<p>Noted.</p> <ul style="list-style-type: none"> • Option A: Removal of the hall would enable reinterpretation of the public realm surrounding the SHR item, opening up views to its northern façade, and improving the pedestrian amenity • Option B: Retention of the hall would maintain the historic connection between the two heritage items and provide opportunities to interpret the historic context of the whole site.
Considers that the proposed height and density could result in buildings of 211 m near to the SHR item resulting in adverse visual and overshadowing impacts to the item and its setting. Although the reference designs provide some indication of potential impacts further detail is needed through supporting studies such as a Heritage Impact statement in the assessment.	<p>It should be noted that the recommendation to limit the FSR to 17.5.1 makes it much less likely that the maximum height of 211mRL will be realised.</p> <p>Objectives and provisions of the site specific DCP require:</p> <ul style="list-style-type: none"> • adequate studies, including a Heritage Impact Statement, are undertaken to inform the Stage 1 Development Application for the site to avoid adverse impacts on the Cathedral, and • development is undertaken in accordance with Council's design excellence process to minimise impacts and ensure sympathetic development.
Considers that regardless of option chosen for the local heritage item detailed design of the new towers should be taken through a design excellence process to minimise impacts and ensure sympathetic development.	

**195 Church Street, 65-79 Macquarie Street, 38 and 45 Hunter Street, Parramatta
St John's Anglican Church site [RZ/5/2018]**

<p>Supports overall objectives of the draft SS DCP including provisions to:</p> <ul style="list-style-type: none"> • retain the cathedrals pre-eminent status in city Centre • provide a setting for the Cathedral then is that clearly heritage significance of the site • requirement for a heritage impact statement, heritage interpretation strategy visual impact assessment and patient management plan to inform the development application for the site. • requirement that new development is undertaken in accordance with Council's design excellence process. <p>Recommends a full archaeological assessment to inform the planning proposal and any future development applications for the site. Notes that the subject site has potential State significant archaeology and exceptional archaeological research potential.</p> <p>Recommends that an aboriginal cultural heritage assessment report be prepared to help inform this planning proposal. States that there is a risk that without an appropriate level of assessment at the Planning Proposal stage it may not be possible to avoid harm to Aboriginal cultural heritage values identified later in the development process.</p>	<p>Support for the overall objectives and provisions of the draft SS DCP are noted.</p> <p>The Planning Proposal is accompanied by an archaeological report (2018), that includes the following statements:</p> <ul style="list-style-type: none"> • The site has moderate to high potential to retain Aboriginal archaeological deposits (pre-and post-contact) as well as historical archaeological deposits of both State and local significance, regardless of presence of existing structures. • Early archaeological test excavation is recommended to determine the extent to which archaeological resources exist that will provide the NSW Heritage Division and OEH with certainty with respect to their archaeological requirements for the study area. • An Aboriginal Cultural Heritage Assessment report (ACHA) an Aboriginal Heritage Impact Permit (AHIP) will be required for a Development Application. • Section 140 permits will be required from the NSW Heritage division in accordance with the Heritage Act, for historical archaeology. <p>It is considered that the Planning Proposal has given appropriate preliminary consideration to the identification and protection of archaeological resources and that more detailed reports can be provided as required and dealt with at the Development Application stage. Nevertheless, the report's recommendation for early test excavation is noted and supported, and a revision to the DCP is proposed as follows:</p> <p>(i) In the steps outlined for the staged DA process under the heading 'Options for Development and Planning Pathway', a new report is required in the first step being an Archaeological report, based on archaeological testing.</p> <p>(ii) In 'Part B Understanding the Place' of the Heritage Controls for both Option A and Option B to align with the requirement for an archaeology report to be submitted with the Stage 1 DA, a new objective and control is proposed as follows:</p>
---	--

	<p><i>"O.3. Ensure the archaeological resources of the place determined through early archaeological test excavations and incorporated into the Archaeological report inform the detailed design for the site. of the excavations are incorporated into the detailed design".</i></p> <p><i>"C.2. The recommendations of the Archaeological report (that includes the results of the test excavations) are to be incorporated into the detailed design. This includes the conservation of local and State significant archaeology. Where this is not possible or practical, excavation, salvage, reuse and/or interpretation of the archaeology in accordance with an approved archaeological research design and excavation methodology is to occur".</i></p>
