

APPENDIX 1: STATEMENT FROM LAND OWNER MALCOLM WHITE

10/06/2014

Confirmation of land use past 13 years:

I have been the owner of the above land for the past 13 years and used it as grazing and fodder cropping. The land has had only moderate disturbance during this time. I have not noticed any scars in any trees on the property. The property has only a small amount of natural timber, there are no endemic species or vegetation on the property. Several dams have been constructed on the property including two large dams, there is one major contour bank to direct water and minimise erosion. The property is well grassed with natural summer grasses and winter herbage.

Yours faithfully,

Malcolm White

(Owner)
