

### **PLANNING PROPOSAL**

# INTRODUCTION OF FLOOD PLANNING AREA CONTROLS FOR GLENREAGH

**Prepared by: Clarence Valley Council** 

Date: September 2018

#### **Declaration**

Document name: Planning Proposal – Introduction of Flood Planning Area Controls

for Glenreagh

Document Author: Maya Dougherty

Occupation of document author: Strategic Planner, Clarence Valley Council

Qualifications of document author: Masters of Urban Planning, B. Apl. Sc. (Environmental

Management)

Declaration: I, Maya Dougherty, declare that this Planning Proposal constitutes

a planning proposal for the purposes of section 3.33 of the Environmental Planning and Assessment Act 1979 (the Act) and further declare that the document complies with the relevant provisions of the Environmental Planning and Assessment Act 1979 and the Department of Planning and Environment's *A guide* 

to preparing planning proposals (August 2016).

Date: September 2018

#### 1. PRELIMINARY

#### 1.1 Context

This planning proposal constitutes a document referred to in Section 3.33 of the Environmental Planning and Assessment Act 1979. It has been prepared in accordance with the Department of Planning and Environment's "A guide to preparing planning proposals" (August 2016). A gateway determination under Section 3.34 of the Act is requested.

#### 1.2 Subject Land

This planning proposal applies to the Glenreagh township and nearby rural land along the Orara River and Tallawudjah Creek and is identified in the Locality Plan below (Figure 1).

Figure 1 Locality Sketch, showing the Glenreagh Township and rural land affected by the proposal.

Figure 2 Aerial Photo

#### 1.3 Current Zoning & Use

The land is currently zoned RU2 Rural Landscape, R2 Low Density Residential, RE1 Public Recreation and B1 Neighbourhood Centre under Clarence Valley Local Environmental Plan 2011 (CVC LEP).

The planning proposal does not propose changes to current zoning (see Figure 3 below).

Figure 3 Plan indicating current land zoning of Glenreagh and surrounds

#### 1.4 Background

The village of Glenreagh and surrounds are affected periodically by flooding of the Orara River and Tallawudjah Creek. Tallawudjah Creek is a major tributary of the Orara River with the confluence immediately downstream of the Glenreagh village.

Council commissioned a Flood Study to characterise the nature of flooding for the Glenreagh study area up to the probable maximum flood event. The Study, finalised in 2013, was funded by the NSW Government's Floodplain Management Program and Council. The Management Study and Plan follows on from the Flood Study. These Studies and Plan have been prepared in accordance with the NSW Government's Floodplain Development Manual.

The Management Study reviewed a range of management options or measures within the categories of property modification, response modification and flood modification.

Preparation of the Study and Plan involved working with Clarence Valley State Emergency Services as well as technical staff from the NSW Office of Environment and Heritage. Both of these agencies plus the Bureau of Meteorology (BoM) and Water NSW have provided feedback to the Draft Study and Plan, with resulting alterations to the recommended actions.

#### On 15 May 2018, Council resolved to:

- Adopt the Glenreagh Floodplain Risk Management Plan, with an amendment such that Action P5.1 be split into two actions with the installation of a new automatic flood gauge at the Glenreagh Bridge identified with a capital cost of \$15,000 and an annual maintenance cost of \$3,000 and schedule implementation of management actions as part of the Council's future Delivery Program and Operational Plans.
- 2. Prepare a Planning Proposal to include the flood mapping from the Glenreagh Flood Study (2013) in an updated Flood Planning Map under the Clarence Valley Local Environmental Plan 2011 and make necessary complementary amendments to the Floodplain Management Controls within the relevant Council Development Control Plans.
- Advise persons and NSW agencies who made submissions of the Council's resolution and for relevant NSW agencies notify where implementation of the Plan requires their action.
- 4. Note that an application for funding of the action to install a remote alert or webcam at Bluff Bridge through the NSW Government's Floodplain Management Program has been endorsed by Council's Executive and submitted by Council's Water Cycle Section.

#### 2. PART 1 - OBJECTIVE OR INTENDED OUTCOME

To amend Clarence Valley Local Environmental Plan to introduce "Flood Planning Area" controls over certain lands at Glenreagh.

#### 3. PART 2 - EXPLANATION OF PROVISIONS

The objective of the Proposal will be achieved by:

 Amending LEP Map CL1\_012 to insert Flood Planning Area and Probable Maximum Flood Line by identification of land affected by flood hazard on the Orara River in Glenreagh consistent with the adopted Glenreagh Floodplain Risk Management Study and Plan 2018 (GHD).

#### 4. PART 3 - JUSTIFICATION

#### 4.1 Is the planning proposal a result of any strategic study or report?

Yes. The Glenreagh Floodplain Risk Management Study and Plan 2018 (GHD) identifies flood hazard affecting land within Glenreagh, which recommends development controls be prepared to ensure proper assessment of the potential impact of flood hazard on land and development likely to be affected by flood hazard.

### 4.2 Is the planning proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

Use of the Flood Planning Map to identify the land affected by flood hazard and ensure full and proper assessment of the hazard in association with development decisions is the best means of achieving the objectives of the planning proposal. Development controls in relevant CVC development control plans provide guidance in respect of the flood hazard. However, as Glenreagh has not been included in the Flood Planning Map previously, this will increase the accuracy and statutory weight to consideration of the latest flood modelling data in development application assessments.

Other measures have been recommended by the Glenreagh Floodplain Risk Management Study and Plan 2018 to mitigate the impacts of flooding. However these are recommended as an addition to the amendment to the CVC LEP, rather than instead of.

#### RELATIONSHIP TO STRATEGIC PLANNING FRAMEWORK

# 4.3 Applicable Regional Plan - Is the planning proposal consistent with the objectives and actions of the applicable regional, sub-regional or district plan or strategy (including any exhibited draft plans or strategies)?

The *North Coast Regional Plan 2036* (NCRP 2036) released in March 2017 is the applicable regional plan. It is the NSW Government's strategy for guiding land use planning decisions for the North Coast region.

The Regional Plan comprises four goals, 25 directions and 80 actions. The goals articulate the intended outcome; the directions identify the broad issues or policy areas that need to be focused

on; and the actions represent the steps needed to be taken or initiatives that need to be implemented to achieve the goals. Actions are either implemented as strategies or as initiatives.

The North Coast Delivery, Coordination and Monitoring Committee has been established to oversee implementation of the vision, goals and actions in the Regional Plan. In this regard the North Coast Regional Plan 2036 - Implementation Plan 2017-2019 has also been released to accompany the Regional Plan.

Accordingly, the proposal is considered to be consistent with the NCRP 2036. An assessment of the planning proposal's consistency against the regional plan's goals, directions and actions is at Appendix 1 (consistency checklist).

#### 4.4 Consistency with Council's local strategies and other local strategic plans

The planning proposal is considered to be consistent with the provisions of the Clarence Valley LEP 2011. In particular, flood planning and floodplain risk management is identified as a consideration via Clauses 7.3 and 7.4 of the LEP.

In addition, the Clarence 2027 is Council's adopted community strategic plan. It is supported by Council's Delivery Program and Annual Operational Plan applicable at the time.

An assessment of the planning proposal against The Clarence 2027 and Council's Delivery Program and Operational Plan is at Appendix 2 (consistency checklist).

#### 4.5 Consistency with applicable state environmental planning policies

There are no State Environmental Planning Policies (SEPPs) that are directly applicable. Refer to the consistency checklist at Appendix 3.

#### 4.6 Consistency with applicable Ministerial Directions (s.9.1 Directions)

The proposal is consistent with applicable Section 9.1 Directions.

Refer to the consistency checklist against these Directions at Appendix 4.

#### **ENVIRONMENTAL, SOCIAL AND ECONOMIC IMPACT**

4.7 Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

No. The planning proposal seeks to ensure an appropriate level of assessment for new development on land subject to identified flood hazard. Land zoning will remain unchanged by this proposal.

4.8 Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

The proposal will reduce impacts of flooding on new developments by ensuring that development considerations in accordance with the mapping provided by the Glenreagh

Floodplain Risk Management Study and Plan are taken into account at the Development Application stage.

#### 4.9 Relevant social and economic effects?

While Glenreagh has not previously been subject to floodplain mapping in the LEP, the flood hazard is generally well known to landowners and residents and consultation with local community members was undertaken during the development of the Glenreagh Floodplain Risk Management Study and Plan 2018.

It is expected that submissions received during the public exhibition period will present issues relevant to social and economic impact. Submissions are to be reported to Council for consideration following the public exhibition period.

#### STATE AND COMMONWEALTH INTERESTS

#### 4.10 Is there adequate public infrastructure for the planning proposal?

The planning proposal will not change the requirements of existing public infrastructure.

## 4.11 What are the views of State and Commonwealth public authorities consulted in accordance with the gateway determination?

A gateway determination has not yet been issued. However, throughout the development of the Plan comments have been received from the SES, OEH, BoM and WaterNSW and consequently updates have been made to the report.

Refer also to Section 6. PART 5 - COMMUNITY CONSULTATION, below.

#### 5. PART 4 - MAPPING

Figure 4 Draft LEP map, showing the proposed Flood Planning Area and Probable Maximum Flood Line (full-sized map attached in a separate document).

Figure 5 showing the affected area within the township of Glenreagh.

#### 6. PART 5 - COMMUNITY CONSULTATION

It is considered that the proposal is 'low impact' for the purpose of community consultation under Section 5.5.2 of "A guide to preparing local environmental plans, August 2016", particularly as the Glenreagh community were actively involved in the preparation of the Floodplain Management Study and Plan through public meetings and responses to mailouts within the study area. Input from community members resulted in some management measures being included that otherwise would not have been.

Although the proposal is considered as low impact, it is intended that the planning proposal be advertised for 28 days in accordance with Section 5.5.2 of "Á guide to preparing local environmental plans". It is also intended to provide written notification to all those properties identified as being inundated by 1% AEP and Probable Maximum Flood.

It is anticipated that state and Commonwealth authorities will be consulted following the issue of any gateway determination, including the SES, OEH, BoM and WaterNSW.

#### 7. PART 6 - PROJECT TIMELINE

An estimated timeline for this project is nine months from the issue of a Gateway determination, providing such determination does not impose conditions that are onerous to satisfy. There is also potential for issues to be raised during the public exhibition that require more detailed assessment and consideration by Council that could modify this timeline. Council will make reasonable efforts to finalise the planning proposal ahead of this estimate.

<b>Estimated Completion Date</b>	Milestone
18 September 2018	Referral of Planning Proposal to Gateway
By 16 October 2018	Receipt of Gateway determination
November 2018 (2 weeks)	Public Exhibition of Planning Proposal
February 2019	Environment, Planning and Community Committee and Ordinary Council
	Meeting – consider report on submissions
March 2019	Referral to Department of Planning and Environment with request to
	arrange making of final plan
April 2019	Notification of LEP Amendment

#### APPENDIX 1: NORTH COAST REGIONAL PLAN 2036 CONSISTENCY CHECKLIST

(Note - refer to section 4.3 of this template document)

NORTH COAST REGIONAL PLAN 2036 GOALS, DIRECTIONS & ACTIONS	CONSISTENCY	COMMENTS
Goal 1 - The most stunning environment in NSW Direction 1 - Deliver environmentally sustainable growth		
Action 1.1 - Focus future urban development to mapped urban growth areas.	N/A	
Action 1.2 - Review areas identified as 'under investigation' within urban growth areas to identify and map sites of potentially high environmental value.	N/A	
Action 1.3 - Identify residential, commercial or industrial uses in urban growth areas by developing local growth management strategies endorsed by the Department of Planning and Environment.	N/A	
Action 1.4 - Prepare land release criteria to assess appropriate locations for future residential, commercial and industrial uses.	N/A	
Goal 1 - The most stunning environment in NSW Direction 2 - Enhance biodiversity, coastal and aquatic habitats, and w	ater catchments	
Action 2.1 - Focus development to areas of least biodiversity sensitivity in the region and implement the 'avoid, minimise, offset' hierarchy to biodiversity, including areas of high environmental value.	N/A	
Action 2.2 - Ensure local plans manage marine environments, water catchment areas and groundwater sources to avoid potential development impacts.	N/A	
Goal 1 - The most stunning environment in NSW Direction 3 - Manage natural hazards and climate change		
Action 3.1 - Reduce the risk from natural hazards, including the projected effects of climate change, by identifying, avoiding and managing vulnerable areas and hazards.	Yes	The Glenreagh Floodplain Risk Management Study and Plan 2018 (GHD) identifies hazards that result from the flooding of the Orara River.
Action 3.2 - Review and update floodplain risk, bushfire and coastal management mapping to manage risk, particularly where urban growth is being investigated.		The proposal is to implement flood mapping in Glenreagh to guide future development within that locality, following the recommendations of the Glenreagh Floodplain Risk Management Study and Plan 2018 (GHD).
Action 3.3 - Incorporate new knowledge on regional climate projections	N/A	

NORTH COAST REGIONAL PLAN 2036 GOALS, DIRECTIONS &	CONSISTENCY	COMMENTS

Action 8.4 - Promote opportunities to expand visitation to regionally significant nature-based tourism places, such as Ellenborough Falls, Dorrigo National Park, Wollumbin–Mount Warning National Park, Illuka				
Action 7.1 - Prepare action plans for regional cities that:  • ensure planning provisions promote employment growth and greater housing diversity;  • promote new job opportunities that complement existing employment nodes around existing education, health and airport precincts;  • identify infrastructure constraints and public domain improvements that can make areas more attractive for investment; and  • deliver infrastructure and coordinate the most appropriate staging and sequencing of development.  Goal 2 - A thriving, interconnected economy  Direction 8 - Promote the growth of tourism  Action 8.1 - Facilitate appropriate large-scale tourism developments in prime tourism development areas such as Tweed Heads, Tweed Coast, Ballina, Byron Bay, Coffs Harbour and Port Macquarie.  Action 8.2 - Facilitate tourism and visitor accommodation and supporting land uses in coastal and rural hinterland locations through local growth management strategies and local environmental plans.  Action 8.3 - Prepare destination management plans or other tourism focused strategies that:  • identify culturally appropriate Aboriginal tourism opportunities;  • encourage tourism development in natural areas that support conservation outcomes; and  • strategically plan for a growing international tourism market.  Action 8.4 - Promote opportunities to expand visitation to regionally significant nature-based tourism places, such as Ellenborough Falls, Dorrigo National Park, Wollumbin–Mount Warning National Park, Illuka				
ensure planning provisions promote employment growth and greater housing diversity;     promote new job opportunities that complement existing employment nodes around existing education, health and airport precincts;     identify infrastructure constraints and public domain improvements that can make areas more attractive for investment; and     deliver infrastructure and coordinate the most appropriate staging and sequencing of development.  Goal 2 - A thriving, interconnected economy  Direction 8 - Promote the growth of tourism  Action 8.1 - Facilitate appropriate large-scale tourism developments in prime tourism development areas such as Tweed Heads, Tweed Coast, Ballina, Byron Bay, Coffs Harbour and Port Macquarie. NORTH COAST REGIONAL PLAN 2036 GOALS, DIRECTIONS &	CONSISTENCY	COMMENTS		
ACTIONS				
Action 8.5 - Preserve the region's existing tourist and visitor	N/A			
accommodation by directing permanent residential accommodation away				
from tourism developments, except where it is ancillary to existing tourism				
developments or part of an area otherwise identified for urban expansion				
in an endorsed local growth management strategy.				
Goal 2 - A thriving, interconnected economy				
Direction 9: Strengthen regionally significant transport corridors				
Action 9.1 - Enhance the competitive value of the region by encouraging	N/A			
business and employment activities that leverage major inter-regional				
transport connections, such as the Pacific Highway, to South East				
Queensland and the Hunter.				
Action 9.2 - Identify buffer and mitigation measures to minimise the impact	N/A			
of development on regionally significant transport infrastructure including				
regional and state road network and rail corridors.				
Action 9.3 - Ensure the effective management of the State and regional	N/A			
road network by:				
<ul> <li>preventing development directly adjoining the Pacific Highway;</li> </ul>				
<ul> <li>preventing additional direct 'at grade' access to motorway-class</li> </ul>				
sections of the Pacific Highway;				
<ul> <li>locating highway service centres on the Pacific Highway at</li> </ul>				
Chinderah, Ballina, Maclean, Woolgoolga, Nambucca Heads,				
Kempsey and Port Macquarie, approved by the Department of				
Planning and Environment and Roads and Maritime Services; and				
<ul> <li>identifying strategic sites for major road freight transport facilities.</li> </ul>				
Goal 2 - A thriving, interconnected economy				
Direction 10 - Facilitate air, rail and public transport infrastructure				
Action 10.1 - Deliver airport precinct plans for Ballina–Byron, Lismore,	N/A			
Coffs Harbour and Port Macquarie that capitalise on opportunities to				
diversify and maximise the potential of value-adding industries close to				
airports.				
Action 10.2 - Consider airport-related employment opportunities and	N/A			
precincts that can capitalise on the expansion proposed around Gold				
Coast Airport.	21/2			
Action 10.3 - Protect the North Coast Rail Line and high-speed rail corridor	N/A			
to ensure network opportunities are not sterilised by incompatible land				
uses or land fragmentation.	N/A			
Action 10.4 - Provide public transport where the size of the urban area has	N/A			

ACTIONS the potential to generate sufficient demand. Action 10.5 - Deliver a safe and efficient transport network to serve future release areas.  Goal 2 - A thriving, interconnected economy Direction 11: Protect and enhance productive agricultural lands Action 11.1 - Enable the growth of the agricultural sector by directing urban and rural residential development away from important farmland and identifying locations to support existing and small-lot primary production, such as horticulture in Coffs Harbour.  Action 11.2 - Deliver a consistent management approach to important farmland across the region by updating the Northern Rivers Farmland Protection Project (2005) and Mid North Coast Farmland Mapping Project (2008).  Action 11.3 - Identify and protect intensive agriculture clusters in local plans to avoid land use conflicts, particularly with residential and rural residential expansion.  Action 11.4 - Encourage niche commercial, tourist and recreation activities that complement and promote a stronger agricultural sector, and build the sector's capacity to adapt to changing circumstances.  Action 11.5 - Address sector-specific considerations for agricultural industries through local plans.  Goal 2 - A thriving, interconnected economy Direction 12 - Grow agribusiness across the region  Action 12.1 - Promote the expansion of food and fibre production, freight and logistics, and processing through flexible planning provisions in local growth management strategies and local environmental plans.  Action 12.2 - Encourage the co-location of intensive primary industries, such as feedlots and compatible processing activities. Action 12.3 - Examine options for agribusiness to leverage proximity from N/A	NORTH COAST REGIONAL PLAN 2036 GOALS, DIRECTIONS &	CONSISTENCY	COMMENTS
Action 10.5 - Deliver a safe and efficient transport network to serve future release areas.  Goal 2 - A thriving, interconnected economy  Direction 11: Protect and enhance productive agricultural lands  Action 11.1 - Enable the growth of the agricultural sector by directing urban and rural residential development away from important farmland and identifying locations to support existing and small-lot primary production, such as horticulture in Coffs Harbour.  Action 11.2 - Deliver a consistent management approach to important farmland across the region by updating the Northern Rivers Farmland Protection Project (2005) and Mid North Coast Farmland Mapping Project (2008).  Action 11.3 - Identify and protect intensive agriculture clusters in local plans to avoid land use conflicts, particularly with residential and rural residential expansion.  Action 11.4 - Encourage niche commercial, tourist and recreation activities that complement and promote a stronger agricultural sector, and build the sector's capacity to adapt to changing circumstances.  Action 11.5 - Address sector-specific considerations for agricultural industries through local plans.  Goal 2 - A thriving, interconnected economy  Direction 12.1 - Promote the expansion of food and fibre production, agrichemicals, farm machinery, wholesale and distribution, freight and logistics, and processing through flexible planning provisions in local growth management strategies and local environmental plans.  Action 12.2 - Encourage the co-location of intensive primary industries, such as feedlots and compatible processing activities.

9 70	'ALLEY COUNCIL			
NORTH COAST REGIONAL PLAN 2036 GOALS, DIRECTIONS &	CONSISTENCY	COMMENTS		
ACTIONS				
Action 24.1 - Facilitate the delivery of well-planned rural residential	N/A			
housing areas by:				
• identifying new rural residential areas in a local growth management				
strategy or rural residential land release strategy endorsed by the				
Department of Planning and Environment; and				
<ul> <li>ensure that such proposals are consistent with the Settlement</li> </ul>				
Planning Guidelines: Mid and Far North Coast Regional Strategies				
(2007) or land release criteria (once finalised).				
Action 24.2 - Enable sustainable use of the region's sensitive coastal strip	N/A			
by ensuring new rural residential areas are located outside the coastal				
strip, unless already identified in a local growth management strategy or				
rural residential land release strategy endorsed by the Department of				
Planning and Environment.				
Goal 4 - Great housing choice and lifestyle options				
Direction 25 - Deliver more opportunities for affordable housing				
Action 25.1 - Deliver more opportunities for affordable housing by	N/A			
incorporating policies and tools into local growth management strategies				
and local planning controls that will enable a greater variety of housing				
types and incentivize private investment in affordable housing.				
Action 25.2 - Prepare guidelines for local housing strategies that will	N/A			
provide guidance on planning for local affordable housing needs.				

# APPENDIX 2: COUNCILS LOCAL STRATEGY AND STRATEGIC PLAN/S CONSISTENCY CHECKLIST

(Note - refer to section 4.4 of this template document)

Strategy/Strategic Plan	Relevant component/statement of consistency
The Clarence 2027	The proposal is relevant to the following Community Plan
	themes and objectives:
	2.1 To have communities that are well serviced with
	appropriate infrastructure. In order to do this we will:
	2.1.2 Ensure adequate natural disaster management
	4.1 To preserve and enhance our natural environment by:
	4.1.1 Managing our coastal zone, waterways, catchments
	and floodplains in an ecologically sustainable manner
	4.2 To foster a balance between development and the
	environment considering climate change impacts as we:
	4.2.2 Plan, resource and respond to natural hazards and disasters taking into account impacts from climate change
Council's Delivery Program and	The proposal is relevant to the following objectives, strategies
Operational Plan (Note: this changes	& activities:
annually)	Action 4.2.2 Plan, resource and respond to natural hazards
J	and disasters taking into account impacts from climate
	change includes the Glenreagh Flood Plain Risk
	Management Plan to be completed by June 2018.
