

Subject:	Chullora Marketplace Redevelopment – High Level Impact Analysis
Date:	23 April 2019
From:	Philippa Curtis, Associate Director, Location IQ
То:	Dan Maurici, Senior Development Manager, Henroth Group

#### Background

Chullora Marketplace is a sub-regional shopping centre located in south-western Sydney, approximately 15 km to the south-west of the Sydney Central Business District (CBD).

Key points to note in relation to the composition and performance of Chullora Marketplace are as follows:

- The shopping centre occupies total floorspace of 19,322 sq.m, including retail floorspace of 18,532 sq.m and non-retail floorspace of 790 sq.m (including Australia Post, a travel agent and TAB).
- The centre is anchored by a Big W discount department store (7,916 sq.m), Woolworths (4,207 sq.m) and Aldi (1,478 sq.m) supermarkets and some 50 retail specialty outlets and kiosks.
- Total annualised retail sales of \$141.5 million (as at October 2018).

The nearest shopping centre to Chullora Marketplace is the Greenacre Small Village Centre (12,240 sq.m), located 2.1 km to the south-west. This includes a full-line Coles supermarket that opened in January 2012 together with three shops as well as some 59 other shops along Waterloo Road and Boronia Road.

Chullora Marketplace is now proposed for redevelopment (detailed in the following sub-section). The proposed development will not materially change the overall provision of floorspace provided at the site and thus impacts on Greenacre Small Village Centre are likely to be minimal.

As part of the planning proposal for the redevelopment of the Chullora Marketplace site, Canterbury Bankstown Council require a preliminary economic impact assessment which focuses on the potential impacts to Greenacre Small Village Centre, including:

- Undertake an analysis of the existing retail centre network. This analysis would identify the extent of the existing floor space (retail and commercial) in the Chullora and Greenacre shopping centres, as well as the role of each centre. It would also consider the trading performance of the two centres where such data is available.
- Forecast the population growth and socio-demographic characteristics within the trade area(s) based on the proposal and current projections in the locality.
- Consider the shift in trade over time in the context of growth and the current trading performance of the existing retail centre network.
- Based on the above tasks, consider whether the proposal may have any impacts on the trading performance of the Greenacre Small Village Centre that would be significant and/or detrimental and, if so, whether or not means could be used to mitigate the impacts.

### **Proposed Redevelopment**

A planning proposal has been submitted for the redevelopment of the Chullora Marketplace site, which may include:

- **Retail floorspace**: a reduction in total retail floorspace by <u>2,000 sq.m</u>, based on:
  - The Big W space is reduced from approximately 8,000 sq.m to 5,000 sq.m (a reduction of 3,000 sq.m);
  - A new mini-major tenant of 500 sq.m and new retail specialty floorspace of 500 sq.m.
- **Non-retail floorspace**: an increase in floorspace of <u>2,000 sq.m</u>, including:
  - A childcare centre (1,000 sq.m)
  - A gym (300 sq.m)
  - Medical Centre (700 sq.m)
- A residential component above the retail centre comprising 350 400 units

The overall GLA of Chullora Marketplace is assumed to remain generally consistent with the existing provision, although the provision of <u>retail</u> floorspace may be reduced by 2,000 sq.m, to be replaced with destinational <u>non-retail</u> uses.

### **Customer Segment Analysis**

#### **Resident Market**

Map 1 illustrates the Chullora Marketplace resident main trade area and competitive environment.

Table 1 outlines the resident main trade area current and projected population over the period to 2031. The resident main trade area population is currently estimated at 131,422 and is projected to increase to 148,625 by 2031, representing an average annual growth rate of 1.0%.

These projections consider the 350 – 400 residential units proposed as part of the Chullora Marketplace redevelopment. Assuming an average household size of 2.2 persons per unit, would indicate an additional 770 – 880 residents in the primary west sector as a result of the development.

Tables 2 and 3 detail the socio-economic profile of the resident main trade area. Key points to note are as follows:

- The socio-economic profile of the Chullora Marketplace resident main trade area population generally reflects a young, ethnically-diverse, family-based population.
- Average per capita and household income levels have increased at a slightly faster rate than the Sydney benchmark over the 2011-16 Census period. Main trade area residents are also ageing at a slower rate than the benchmark.
- Over time, as more multi-dwelling infill residential units are developed, the main trade area will likely become increasingly popular with younger, more affluent persons.

Tables 4 and 5 detail the current and projected retail spending levels within the resident main trade area. All figures are presented in <u>constant 2018 dollars</u> and including GST. As shown, the main trade area retail spending market is currently estimated at \$1.5 billion and is projected to increase to \$1.9 billion over the period to 2031, representing an average annual growth rate of 1.8%.

Based on an average per capita retail spend of approximately 11,750 in 2021, the additional 770 - 880 residents in the primary west sector as a result of the proposed residential component of Chullora Marketplace would add a further 9 - 10 million to the retail spending market.

#### Worker Market

The worker main trade area served by Chullora Marketplace is defined as the precinct which is bounded by the railway line, Hume Highway and Rookwood Road, including the Roberts Road precinct (consistent with the <u>primary west</u> sector of the resident main trade area - refer Map 1). This precinct includes a range of industrial, commercial and large format retail uses.

Tables 6 and 7 detail the current and projected worker population and retail spending levels within the worker trade area. All retail spend figures are presented in constant 2018 dollars and including GST. Key points to note include:

- The current worker trade area population is 17,325 and is projected to increase to 18,125 by 2031, reflecting an average annual growth rate of 0.4%.
- The total retail expenditure of the worker main trade area population is currently \$224.8 million, and is projected to increase to \$258.1 million by 2031, reflecting an average annual growth rate of 1.1%.
- Typically, workers spend 15% 20% of total retail spending at retail facilities near their place of work if relevant facilities are provided. This would indicate current worker retail spending of around \$35 - \$45 million, primarily on food catering and retail services.

#### Competition

Tables 8 – 11 and Chart 1 provide an overview of the competitive landscape within the region. Key points to note are as follows:

- **Full-line Supermarkets**: Greenacre Small Village Centre in the primary west sector, includes the only other full-line supermarket within the main trade area, besides Woolworths at Chullora Marketplace (refer Table 8).
- Centre Size and Performance Comparison:
  - Chullora Marketplace is a sub-regional shopping centre anchored by Big W, Woolworths and Aldi. Greenacre Small Village Centre includes a full-line Coles supermarket and 62 retail specialty shops compared to some 50 shops at Chullora Marketplace (refer Table 9). The Greenacre Small Village Centre along Waterloo Road has a strong convenience focus with 63% of retail shops in the food & liquor, food catering and retail services categories (refer Chart 1).
  - At 19,322 sq.m, Chullora Marketplace is 1.5 times larger than the Greenacre Small Village Centre (12,240 sq.m).

- Greenacre Small Village Centre is estimated to be achieving sales in the order of \$79 million, which is around 57% of the sales recorded at Chullora Marketplace (\$141.5 million).
- **Retail Hierarchy**: Within the retail hierarchy, Chullora Marketplace is higher than Greenacre Small Village Centre given that they serve different retail needs of local residents and workers; Greenacre Small Village Centre is focused purely on a convenience supermarket offer, whereas Chullora Marketplace also provides higher-order, non-food and retail services facilities.
- Supermarket Floorspace Provision: There is a low provision of supermarket floorspace within the main trade area as compared with the Sydney benchmark (refer Table 10). This indicates that all supermarkets within the main trade area are likely to trade strongly, particularly the full-line supermarkets at Chullora Marketplace and Greenacre Small Village Centre.
- **Future Competition**: There are no future competitive developments which are likely to have a significant impact on either Chullora Marketplace or Greenacre Small Village Centre (refer Table 11).

#### **Indicative Projected Sales and Impacts**

In order to assess the potential economic benefits and impacts that may arise from the proposed Chullora Marketplace development, the projected sales level that the redeveloped centre is likely to achieve is outlined. All sales projections are presented in constant 2018 dollars and including GST.

Table 12 provides high-level sales projections for Chullora Marketplace in 2021 under two scenarios, as follows:

- **Do Nothing Scenario** (the centre remains as is): projected total centre retail sales for Chullora Marketplace are \$144.6 million in 2021, some \$3.1 million higher than current sales, reflecting an average annual growth rate of 0.7% per annum.
- **Redevelopment Scenario**, based on the assumptions detailed above, illustrated in Figure 1. Projected total centre retail sales are \$147.3 million in 2021, some <u>\$2.7 million</u> (or 1.9%) higher than under the Do Nothing scenario.

On the assumption that 100% of the additional sales generated at the redeveloped Chullora Marketplace (i.e. \$2.7 million) were to come from Greenacre Small Village Centre, the impact on Greenacre Small Village Centre would be in the order of 3.4%; well within the normal competitive range (of less than 10%).

In reality, the majority of the additional sales generated at the redeveloped Chullora Marketplace (i.e. \$2.7 million) will be a result of additional retail expenditure generated by the residential component above the retail centre, which is estimated at \$9 - \$10 million. Additional retail sales at Chullora Marketplace at \$2.7 million represent only 25% - 30% of this additional retail spend in the market. The remaining 70% - 75% of this additional retail spend (approximately \$7 million) will be directed to other retail facilities within the area, including Greenacre Small Village Centre. As such, the proposed redevelopment of Chullora Marketplace would likely have a positive impact on Greenacre Small Village Centre.

Under the proposed redevelopment, customer shopping patterns are unlikely to change significantly. As such, the major anchor tenant at Greenacre Small Village Centre (Coles) is unlikely to be impacted. Coles is the major customer attractor which other retailers at the Greenacre Small Village Centre leverage off. A further 62 retail shops are provided within the Greenacre Small Village Centre. The Greenacre Small Village Centre has a strong convenience focus with 63% of retail shops in the food & liquor, food catering and retail services categories. These categories are day to day convenience categories that are unlikely to be impacted.

The existing retail hierarchy is unlikely to be detrimentally impacted as a result of the proposed redevelopment of Chullora Marketplace.

I hope this information meets your requirements. Please contact me if you have any queries.

Yours sincerely,

PH CINTIC

Philippa Curtis Associate Director
