Introduction

The purpose of this Planning Proposal is to update Schedule 5 Environmental Heritage of Bathurst Regional Local Environmental Plan (LEP) 2014. The Planning Proposal aims to consider heritage listing the following items:

- a) 62 Seymour Street, Bathurst as an example of a Colonial Period dwelling.
- b) Increase the curtilage of the existing heritage listed Agricultural Research Station to include all buildings associated with the early Government research station.
- c) The gantry crane located on Bathurst Railway Station lands not currently included on heritage listed lands.
- d) 13 natural landscapes as recommended by the Bathurst Region Heritage Study 2007 including:
 - Abercrombie Caves – Caves Road, Abercrombie River
 - Winburndale Nature Reserve – Winburndale Dam Road, Napoleon Reef
 - Copperhannia Nature Reserve – Colo Road, Trunkey Creek
 - Stevens Park and Weir – Budden Street and Peppers Creek, Rockley
 - Wattle Flat Heritage Lands - Wattle Flat
 - Trunkey Creek Memorial Park – Arthur Street, Trunkey Creek
 - Devil's Marbles – 2396 Ophir Road, Rock Forest
 - Macquarie Woods – Cashens Lane, Vittoria
 - Lions Club Drive Trees - Lions Club Drive, Kelso
 - Beyer's Avenue Trees - Beyer's Avenue, Hill End
 - Wallaby Rocks – 557 Hill End Road, Sofala
 - Victoria Park – Howick Street, Bathurst
 - Centennial Park – Bentinck Street, Bathurst.
- e) Include more descriptive property addresses for several currently listed heritage items.

The Planning Proposal will not involve a review of the existing heritage items currently under Schedule 5 of the LEP.

A copy of the Council report and minute to proceed with the Planning Proposal are provided at **attachment 1**.

If the Planning Panel so determines, Council will accept the delegated functions offered to it pursuant to Section 59 of the Environmental Planning and Assessment Act 1979.

The Planning Proposal has been prepared in accordance with Section 55 of the *Environmental Planning and Assessment Act 1979* (the Act) and the relevant Department of Planning Guidelines, including *A Guide to Preparing Local Environmental Plans* and *A Guide to Preparing Planning Proposals*.

Part 1 Objectives or intended outcomes

1.1 Introduction

The purpose of this Planning Proposal is to update Schedule 5 Environmental Heritage of Bathurst Regional Local Environmental Plan (LEP) 2014. The Planning Proposal aims to consider heritage listing the following:

- a) 62 Seymour Street, Bathurst as an example of a Colonial Period dwelling.

Council has a long established set of criteria for assessing the contribution of a building to the streetscape. This is known as the Bathurst Conservation Area Management Strategy (BCAMS). Council uses this information during the development assessment process.

Council officers, in conjunction with its Heritage Advisor, undertook a review of the BCAMS listing of the buildings within the Bathurst City, West Bathurst and Kelso Heritage Conservation Areas. As part of the review a visual inspection was undertaken to ascertain the approximate age of the building and how the building contributes to the streetscape. It should be noted that the age of the building is based on a visual inspection, identifying building features that represent a period of construction.

As part of this process it was found that of the 6 colonial properties identified in the Heritage Conservation Area, 62 Seymour Street is the only property without heritage listing. The Planning Proposal aims to rectify this to ensure all 6 colonial properties identified under BCAMS are heritage listed.

- b) Increase the curtilage of the existing heritage listed Agricultural Research Station to include all buildings associated with the early Government research station.

The Bathurst Experiment Farm of the New South Wales Department of Agriculture was established in 1895. It consisted of a dryland farming section on the slopes of Mount Panorama and an irrigated farming section on the banks of the Macquarie River, and supported a farm school which was conducted intermittently between 1897 and 1941. The buildings were built 1902 - 1909, designed by NSW Govt. Architect Walter Liberty Vernon, as part of 'Experiment Farm', later became the Bathurst Agricultural Research Station.

- c) The gantry crane located on Bathurst Railway Station lands not currently included on heritage listed lands.

This 25-ton gantry crane is a 'moveable' item of local significance being a rare and intact example of a large railway workshop crane. The crane was constructed in 1918 at the wagon repair siding to lift defective wagon (according to information within the 2002 SHI by Simpson Dawbin). It belonged to the 1880s Bathurst Locomotive Workshops since demolished, leaving it an isolated object / industrial relic on the far north-west corner of the Fabrication Yard.

It is a well-known local landmark, being clearly visible from the Rocket Street Bridge and strongly associated with the former railway workshops and a relic from Bathurst's

industrial past. Research by Sydney Trains suggests that 25-ton gantry cranes are rare, possibly no others still exist with 25-tons being a large crane.

- d) 13 natural landscapes as recommended by the Bathurst Region Heritage Study 2007 including:
- Abercrombie Caves – Caves Road, Abercrombie River
 - Winburndale Nature Reserve – Winburndale Dam Road, Napoleon Reef
 - Copperhanna Nature Reserve – Colo Road, Trunkey Creek
 - Stevens Park and Weir – Budden Street and Peppers Creek, Rockley
 - Wattle Flat Heritage Lands - Wattle Flat
 - Trunkey Creek Memorial Park – Arthur Street, Trunkey Creek
 - Devil's Marbles – 2396 Ophir Road, Rock Forest
 - Macquarie Woods – Cashens Lane, Vittoria
 - Lions Club Drive Trees - Lions Club Drive, Kelso
 - Beyer's Avenue Trees - Beyer's Avenue, Hill End
 - Wallaby Rocks – 557 Hill End Road, Sofala
 - Victoria Park – Howick Street, Bathurst
 - Centennial Park – Bentinck Street, Bathurst.

The Bathurst Regional Heritage Study 2007 identified the above list of natural landscapes/features be listed as individual heritage items. The places were recommended to be items within the Bathurst Regional Local Environmental Plan 2014 but were subsequently removed at the preparation of the instrument from direction from the Department of Planning.

- e) Include more descriptive property addresses for several currently listed heritage items.

Several existing heritage items within Schedule 5 have a very limited property description. It is proposed to include greater property information on these items to make them more easily identifiable. This is particularly relevant for heritage items in the road reserve (such as Council's bridge assets). The current description only identifies the road reserve which is very difficult to search. It is proposed to identify these items in the road reserve by indicating the nearest adjoining Lot and DP. Additionally, some update of Lot and DP details is required as subdivision has occurred and a new title created.

The Planning Proposal will not involve a review of the existing heritage items currently under Schedule 5 of the LEP.

1.2 The subject land

The subject lands affected by the Planning Proposal are indicated in Part 2.

Part 2 Explanation of Provisions

2.1 Introduction

The Schedule 5 Environmental Heritage Planning Proposal involves an amendment to the Bathurst Regional Local Environmental Plan 2014 ("the LEP"), to include additional items in Part 1 of Schedule 5.

This is to be achieved by:

- a) Amending Part 1 of Schedule 5 of the Bathurst Regional LEP 2014 to include the following:

Suburb	Item Name	Address	Property Description
Mitchell	Ag Research Station	Browning Street	Lot 7323 DP 1156317
Bathurst	House	62 Seymour Street	Lot 1 DP 737838
Abercrombie River	Abercrombie Caves	Caves Road	Lot 74 DP 729406
Napoleon Reef	Winburndale Nature Reserve	Winburndale Dam Road	Lot 1 DP 914785 Lots 17, 23, 24 & 26 and DP 755772 Lots 34, 35, 40 & 44 DP 755772 Lots 63, 79 & 243 DP 755764 Lot 49 DP 1198780 Lots 147, 154, 171 & 172 755780 Parcels 38917, 39727, 39729, 42305 & 39785 <u>E1 Zone land only</u>
Trunkey Creek	Copperhania Nature Reserve	Colo Road	Lot 42 DP 1195654 Lot 45 & 46 DP 753023 Lot 8184 DP 1186418
Rockley	Stevens Park and Weir	Budden Street	Lot 7002 & 7003 DP 1000974
Wattle Flat	Wattle Flat Heritage Lands	Sofala Road	North – Lot 7017 DP 1060345 Lots 189, 372, 391, 398 & 401 DP 755790 Lots 403, 415, 416, 417 & 428 DP 755790 Lot 7362 DP 1148094 South - Lot 7001 DP 1117443 Lot 7002 DP 1117441
Trunkey Creek	Trunkey Creek Memorial Park	42 Arthur Street	Lots 1 & 2 Sec 13 DP 758998 and Part road reserve
Rock Forest	Devil's Marbles	2473 Ophir Road	Part Lot 115 DP 750365 and Part road reserve
Vittoria	Macquarie Woods	32 Cashens Lane	Lots 196 - 198 DP 750375 Lots 45, 49 - 51 DP 750375
Kelso	Lions Club Drive, Trees	Lions Club Drive	Lions Club Drive, road reserve
Hill End	Beyer's Avenue, Trees	Hill End Road and Beyers Avenue	Hill End Road, road reserve Beyers Avenue, road reserve
Crudine	Wallaby Rocks	557 Hill End Road	Lot 2 DP 837763 (Part of)
Bathurst	Victoria Park	Howick Street	Lot 1 DP 134801

Bathurst	Centennial Park	Bentinck Street	Lot 1 DP 134733
Bathurst	Bathurst Railway Gantry Crane	34 Alpha Street	Lot 22 DP 1160509 (Part of) Moveable

- b) Amending several existing items under Part 1 of Schedule 5 of the Bathurst Regional LEP 2014 provided in Attachment 4.

PART 3 Justification

Section A – Need for the Planning Proposal

1. Is the Planning Proposal a result of any strategic study or report?

Yes. The Bathurst Regional Heritage Study 2007 identified several natural landscapes/features be listed as individual heritage items. Another recommendation of that report was to continue to review and update heritage items where more information comes to light about places that illustrate history and significance; this is the case for the Research Station, 62 Seymour Street and the Gantry Crane.

Council has subsequently resolved on 3 February 2016 to prepare a planning proposal to reclassify the subject land.

2. Is the Planning Proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

The Planning Proposal is the best means of achieving the protection of heritage and intended outcomes of the Planning Proposal. The only avenue available to insert additional items in Schedule 5 of the LEP is via a Planning Proposal.

Section B – Relationship to strategic planning framework

3. Is the Planning Proposal consistent with the objectives and actions of the applicable regional or sub-regional strategy (including the Sydney Metropolitan Strategy and exhibited draft strategies)?

The following table addresses the evaluation criteria for the consistency with the regional and sub-regional strategies, as required by the guidelines for preparing a Planning Proposal.

Evaluation criteria	Y/N	Comment
Does the proposal have strategic merit and: ◇ Is consistent with a relevant local strategy endorsed by the Director General; or ◇ Is consistent with the relevant regional strategy or Metropolitan Plan; or ◇ Can it demonstrate strategic merit, giving consideration to the relevant section 117 directions	Yes	The Planning Proposal is consistent with the Bathurst Region Rural Strategy 2008 which recommended identifying natural heritage and the recommendations of the Bathurst Regional Heritage Study 2007. The Planning Proposal is consistent with the Draft Central West and Orana Regional Plan. The Planning Proposal is consistent

applying to the site and other strategic considerations (e.g. proximity to existing urban areas , public transport and infrastructure accessibility, providing jobs closer to home etc)		with the relevant Section 117 directions of the Minister. They are explained later in this Planning Proposal documentation.
Does the proposal have site specific merit and is it compatible with the surrounding land uses, having regard to the following: ◇ The natural environment (including known significant environmental values, resources or hazards) and ◇ The existing uses, approved uses and likely future uses of the land in the vicinity of the proposal; and ◇ The services and infrastructure that are or will be available to meet the demands arising from the proposal and any proposed financial arrangements for infrastructure provision.	Yes	The majority of the above mentioned landscapes/features are owned by either the Crown or by Council. Therefore, the likelihood of development occurring on the land associated with these features is minimal.

4. Is the Planning Proposal consistent with a Council's local strategy or other local strategic Plan?

The Bathurst Region Rural Strategy 2008 recommended the provisions of the Bathurst Regional Heritage Study 2007 be implemented. The 2007 Study identified several natural landscape/features of importance to the Bathurst Region and recommended the existing heritage listings continue to be updated should new information come to light about places that illustrate history and significance.

5. Is the Planning Proposal consistent with applicable State Environmental Planning Policies?

Council has undertaken a review to determine whether or not the Planning Proposal is consistent with the State Environmental Planning Policies. There are no SEPP's which are relevant to the Planning Proposal. See the table below.

State Environmental Planning Policy (SEPP)	Compliance (Yes/No or Not Relevant)
SEPP No 14 – Coastal Wetlands	Not Relevant

SEPP No 15 – Rural Landsharing Communities	Not Relevant
SEPP No 19 – Bushland in Urban Areas	Not Relevant

SEPP (Western Sydney Parklands) 2009	Not Relevant

6. Is the Planning Proposal consistent with applicable Ministerial Directions (s. 117 directions)?

Council has undertaken a review to ensure the planning proposal is consistent with all relevant Section 117 Ministerial Directions issued by the Minister for Planning to relevant planning authorities under section 117(2) of the Environmental Planning and Assessment Act 1979.

All relevant Section 117 Ministerial Directions are considered in the following table.

Section 117 Ministerial Direction	Consistency
1. Employment and resources	
1.1 Business and Industrial Zones	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
1.2 Rural Zones	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
1.3 Mining, Petroleum Production and Extractive Industries	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
1.4 Oyster Aquaculture	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
1.5 Rural Lands	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
2. Environment and Heritage	
2.1 Environment Protection Zones	Not applicable. Council is satisfied that the planning proposal is

Section 117 Ministerial Direction	Consistency
	consistent with the requirements of the direction.
2.2 Coastal Protection	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
2.3 Heritage Conservation	Applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
2.4 Recreation Vehicle Areas	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
3. Housing, Infrastructure and Urban Development	
3.1 Residential Zones	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
3.2 Caravan Parks and Manufactured Home Estates	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
3.3 Home Occupations	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
3.4 Integrating Land Use and Transport	Not applicable. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
3.5 Development Near Licensed Aerodromes	The proposal does not alter or remove a provision relating to land in the vicinity of a licensed aerodrome. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
3.6 Shooting Ranges	The proposal does not affect land adjacent or adjoining an existing shooting range. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
4. Hazard and Risk	
4.1 Acid Sulfate Soils	The Bathurst Region does not include any land identified on Acid Sulfate Soils Planning maps held by the Department. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
4.2 Mine Subsidence and Unstable Land	The Bathurst Region does not include any land identified as within a Mine Subsidence District proclaimed under the Mine Subsidence Compensation Act 1961. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
4.3 Flood Prone Land	The Planning Proposal does not include any land which is identified as being flood liable land as identified either by Council's computer based flood model or the Bathurst Floodplain Management Policy. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
4.4 Planning for Bushfire Protection	The Planning Proposal does include land which is identified as being Bushfire Prone Land. Council is satisfied that the planning proposal is consistent with the requirements of the direction.

Section 117 Ministerial Direction	Consistency
5. Regional Planning	
5.1 Implementation of Regional Strategies	The Planning Proposal is consistent with the Draft Central West and Orana Regional Plan. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
5.2 Sydney Drinking Water Catchments	The Bathurst Region is outside the identified Sydney Drinking Water Catchment area. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
5.3 Farmland of State and Regional Significance on the NSW Far North Coast	Does not apply to the Bathurst Region. No farmland of State or Regional significance is located within the Bathurst Region. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
5.4 Commercial and Retail; Development along the Pacific Highway, North Coast	Does not apply to the Bathurst Region. No regional or sub-regional strategy applies to the Bathurst Region. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
5.8 Second Sydney Airport: Badgerys Creek	Does not apply to the Bathurst Region. No regional or sub-regional strategy applies to the Bathurst Region. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
5.9 North West Rail Link Corridor Strategy	Does not apply to the Bathurst Region. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
6. Local Plan Making	
6.1 Approval and referral Requirements	The Planning Proposal does not affect development application provisions and does not propose any referral provisions relating to this land. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
6.2 Reserving land for Public Purposes	The Planning Proposal does not relate to reserving land for public purposes. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
6.3 Site Specific Provisions	The Planning Proposal does not relate to a particular development to be carried out on a specific site. Council is satisfied that the planning proposal is consistent with the requirements of the direction.
7. Metropolitan Planning	
7.1 Implementation of the Metropolitan Strategy	Does not apply to the Bathurst Region. Council is satisfied that the planning proposal is consistent with the requirements of the direction.

Section C – Environmental , social and economic impact

7. Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

Council is satisfied that, as a result of the Planning Proposal, critical habitat, threatened species, populations or ecological communities will not be adversely affected. The Planning Proposal seeks the identification and protection of a number of natural landscape features.

8. Are there any other likely environmental effects as a result of the Planning Proposal and how are they proposed to be managed?

Council considers that there are no likely environmental effects as a result of the Planning Proposal.

9. Has the Planning Proposal adequately addressed any social and economic effects?

Social Impacts

It is considered that as a result of the Planning Proposal there are no social impacts that need to be addressed.

Economic Impacts

It is considered that as a result of the Planning Proposal there are no economic impacts that need to be addressed.

Section D State and Commonwealth interests

10. Is there adequate public infrastructure for the Planning Proposal?

The Planning Proposal does not impact on any existing or future public infrastructure.

11. What are the views of State and Commonwealth Public Authorities consulted in accordance with the Gateway Determination?

Council will consult with Crown Lands and John Holland Rail. It is proposed to undertake this consultation as part of the public exhibition of the draft plan.

Part 4 Mapping

Proposed maps to be amended as part of this planning proposal.

Part 5 Community Consultation

Council anticipates that following the Gateway Determination and Council satisfying any conditions imposed prior to the public exhibition period, the Planning Proposal will be placed on public exhibition for a period of 28 days.

It is proposed that the Planning Proposal will be publically notified by:

- a) a notice in the Western Advocate newspaper on at least 2 occasions; and
- b) written notification to all landowners affected by the Planning Proposal;
and
- c) notification on Council's website.

Council will notify the relevant government public authorities concurrently with the public exhibition period with respect to the Planning Proposal.

Following the public exhibition period, this section will be altered to reflect the extent of consultation that was undertaken, including any issues which were raised as a result of the consultation.

Part 6 Project timeframe

The following table outlines Council's anticipated timetable for the completion of the Planning Proposal. Council anticipates that the process will take approximately 8 months from the date of the Gateway Determination.

Step	Criteria	Project timeline
1	Anticipated commencement date (date of Gateway determination)	July 2016
2	Anticipated timeframe for the completion of required technical information	August 2016
3	Commencement and completion dates for public exhibition period	August 2016
4	Dates for public hearing (if required)	September 2016
5	Timeframe for consideration of submissions	September 2016
6	Timeframe for the consideration of a proposal post exhibition	November 2016
7	Date of submission to the department to finalise the LEP	December 2016
8	Anticipated date RPA will make the plan (if delegated)	February 2017
9	Anticipated date RPA will forward to the department for notification.	February 2017

This is a detailed cadastral map of a rural area. The map shows various land parcels, some of which are highlighted in brown and others in red with diagonal hatching. A central red-hatched area is labeled 'C10'. Other labels include 'I346', 'I281', 'I280', 'I276', and 'I277'. Roads are labeled 'WELLS ACCESS', 'CRAWFORD LN', 'LIMEKILNS ROAD', 'BULLOCK FLAT ROAD', 'PAULING YARDS ROAD', and 'SOPALA ROAD'. The map is framed by a blue border.

Attachment 1 Council report and minute

Bathurst Regional Council Ordinary Meeting 3 February 2016

5 PLANNING PROPOSAL – SCHEDULE 5 ENVIRONMENTAL HERITAGE (20.00298)

Recommendation: That Council:

- (a) prepare a Planning Proposal in accordance with the NSW Department of Planning and Environment Guidelines to update Schedule 5 Environmental Heritage of Bathurst Regional Local Environmental Plan 2014.
- (b) forward the Planning Proposal to the NSW Department of Planning and Environment requesting a Gateway Determination;
- (c) accept any delegations from the NSW Department of Planning and Environment in relation to this Planning Proposal;
- (d) call a division.

Report: Council's Strategic Planning section is preparing a Planning Proposal to the NSW Department of Planning and Environment to update Schedule 5 Environmental Heritage of Bathurst Regional Local Environmental Plan (LEP) 2014. The Planning Proposal aims to consider heritage listing several items within the following areas:

- Colonial Housing Stock within the Bathurst Region including 62 Seymour Street, Bathurst.
- Early Government sites such as the Agricultural Research Station and relics associated with Bathurst Railway Station.
- 13 natural landscapes as recommended by the Bathurst Region Heritage Study 2007 including:
 - Abercrombie Caves – Caves Road, Abercrombie River
 - Winburndale Nature Reserve – Winburndale Dam Road, Napoleon Reef
 - Copperhanna Nature Reserve – Colo Road, Trunkey Creek
 - Stevens Park and Weir – Budden Street and Peppers Creek, Rockley
 - Wattle Flat Heritage Lands - Wattle Flat
 - Trunkey Creek Memorial Park – Arthur Street, Trunkey Creek
 - Devil's Marbles – 2396 Ophir Road, Rock Forest
 - Macquarie Woods – Cashens Lane, Vittoria
 - Lions Club Drive Trees - Lions Club Drive, Kelso
 - Beyer's Avenue Trees - Beyer's Avenue, Hill End
 - Wallaby Rocks – 557 Hill End Road, Sofala
 - Victoria Park – Howick Street, Bathurst
 - Centennial Park – Bentinck Street, Bathurst.

The Planning Proposal will not involve a review of the existing heritage items currently under Schedule 5 of the LEP.

Financial Implications: Nil.

Bathurst 2036 Community Strategic Plan - Objectives and Strategies

- Objective 11: To protect the region's unique heritage and history. To protect a unique identity. Strategy 11.1

- Objective 30: To identify the needs of the community and encourage and support communication, interaction and support within the community.

Strategy 30.3, 30.5, 30.6

MINUTE

12 Item 5 PLANNING PROPOSAL – SCHEDULE 5 ENVIRONMENTAL HERITAGE (20.00298)

MOVED: Cr G Westman SECONDED: Cr M Coote

RESOLVED: That Council:

- (a) prepare a Planning Proposal in accordance with the NSW Department of Planning and Environment Guidelines to update Schedule 5 Environmental Heritage of Bathurst Regional Local Environmental Plan 2014.
- (b) forward the Planning Proposal to the NSW Department of Planning and Environment requesting a Gateway Determination;
- (c) accept any delegations from the NSW Department of Planning and Environment in relation to this Planning Proposal;
- (d) call a division.

On being PUT to the VOTE the MOTION was CARRIED

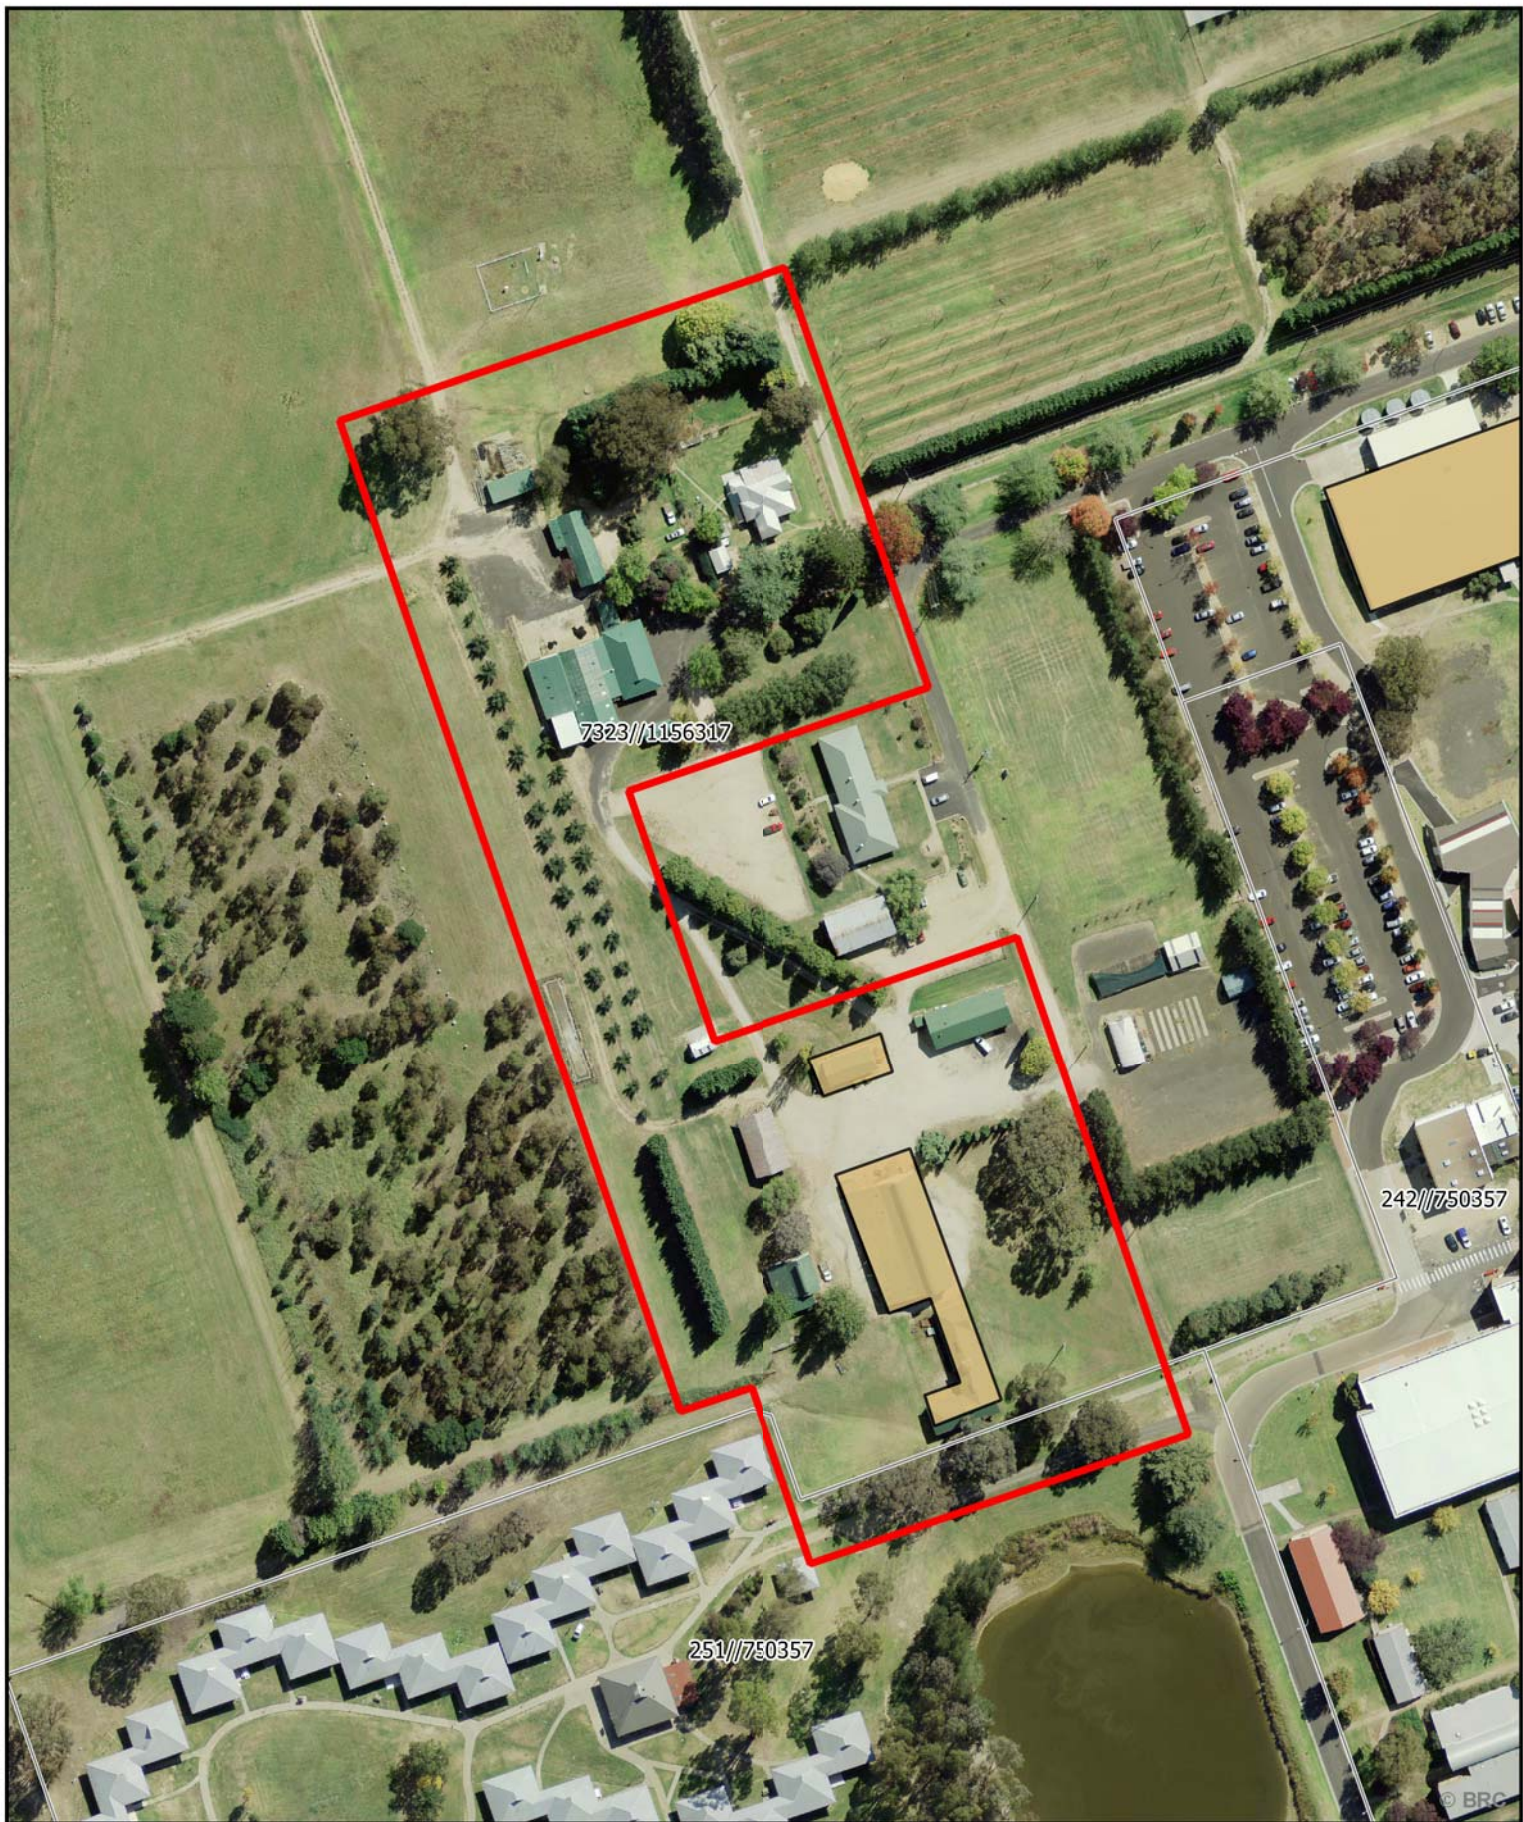

The result of the division was:

In favour of the motion - Cr W Aubin, Cr B Bourke, Cr M Coote, Cr G Hanger, Cr J Jennings, Cr M Morse, Cr I North, Cr G Rush, Cr G Westman,

Against the motion - Nil

Absent - Nil

Abstain - Nil

Important work as designed by NSW Govt. Architect Walter Liberty Vernon.**Historical notes of provenance:** The Bathurst Experiment Farm of the New South Wales Department of Agriculture was established in 1895. It consisted of a dryland farming section on the slopes of Mount Panorama and an irrigated farming section on the banks of the Macquarie River, and supported a farm school which was conducted intermittently between 1897 and 1941. Although the area of the farm has diminished to that shown on Plans A and B the farm continues today as the Bathurst Agricultural Research Station of the New South Wales Department of Agriculture. Most of the early Government fruit packaging was carried out at the Fruit processing complex

The buildings were built 1902 - 1909, designed by NSW Govt. Architect Walter Liberty Vernon, as part of 'Experiment Farm', later became the Bathurst Agricultural Research Station.

It is interesting to note the barn has a wall with graffiti on it consisting of the names of previous students and farm workers, indicating who was been involved with the farm in the past.

Aesthetically a good example of a typical small residential / commercial building, with a parapeted front gable, and no verandah in an area that was once an important commercial part of the town being close to the road from Carcoar to Canowindra and Cowra.

Historical notes of provenance: Exceptional early example of residential/commercial buildings in Bathurst.**Themes:** National theme

State theme

Local theme

Designer: unknown**Builder:** unknown**Year started:****Year completed:** 1840**Circa:** Yes**Physical description:** Small scale residence, possibly with former with commercial use. Constructed is mixture of Flemish bond and English bond with a parapet facing Seymour Street. It is the parapet that particularly identifies it as an early Bathurst building.

Small asymmetrical façade, with front door (not original), timber framed double hung windows. Soldier header coarse in brickwork above door. Building braced through with tie rod in the apex. Simple gable roof, iron clad (not original).

The room to the right hand side has a verandah which was likely a private use verandah. This room has likely been constructed a later time. It is possibly timber framed with a window matching in size, gabled roof, oriented in the opposite direction to the other side.

Various additions at rear under skillion roof.

The building is indicative of very early houses of Bathurst Early Victorian period. This is shown in the building being built right up to the front boundary.

Physical condition level: Good

Item name: House**Location:** 62 Seymour Street Bathurst 2795

Bathurst Regional

Physical condition: The building is currently well maintained.**Archaeological
potential level:****Archaeological
potential Detail:****Modification dates:** The LHS addition which is of framed construction probably occurred in the 1920s or 30.**Recommended

Assessed significance: State

Endorsed significance:

Statement of significance: Extensive and beautiful caves including large cavern over the passing Grove creek has significant historical connection with 'Ribbon Gang' and other fugitives. These caves are considered to be the second most important geologically and aesthetically in NSW, after Jenolan Caves.

Item name: Abercrombie Caves

Location:

Bathurst Regional

Historical notes of provenance: It is believed the limestone system, made up of ancient ocean sediments, was laid down about 430 million years ago. There is evidence Aboriginal people of the area used land around the caves surface.. One dreamtime legend has it that a half fish, half lizard monster lived in waters that ran through the caves. White settlers are believed to have first visited the caves, then known as the Burrangyong Caverns, in the 1820s.

Ralf Entwistle and 14 other members of the Ribbon Gang stumbled into the Grove Creek Caves and it is thought they took shelter here from the police for some time. After a rest period they left the caves and travelled up the creek, then were attacked by the troopers, and fought back, at the top of Grove Creek Falls. The gang retreated again to the caves, probably this time to the cave now known as the Bushranger's cave.

Some 64 years later Sam Grosvenor discovered a set of leg irons in the Bushrangers Cave, believed to have been dropped there by the Troopers pursuing the Ribbon Gang.

....Ref (From the walkabout website <http://www.walkabout.com.au>)

Located 289 km west of Sydney and 72 km south of Bathurst, Abercrombie Caves are the most accessible cave system in New South Wales.

This particularly attractive collection of limestone caves offer the usual array of stalagmites and stalactites. There is a river with a couple of particularly beautiful pools and the caves themselves have an array of columns and shawls with names like 'Hall of Terpischore', 'Angel's Harp', 'Plum Pudding' and 'Diamond Cascade'.

The local Aborigines, the Burra Burra group who were part of the larger Wiradjuri tribe, knew of the caves although, interestingly, there have been no artifacts found in the Arch Cave, (However Bill Allen a local aboriginal, has mentioned the remains of an Aboriginal were found and were dated at approximately 10,000 years old. Apparently the hands and feet had been amputated and the male was left to die in the cave). In 1977 a research team found stone tools and animal bones (some from extinct animals) in a shelter north of the Great Arch.

There is some doubt as to who was the first European to see the Arch Cave. As early as 1821 the Sydney Gazette reported that 'a cave of considerable dimensions has been recently discovered in the neighbourhood of Bathurst' although, at the time, there was no confirmation that this report referred to Abercrombie Caves.

Throughout the 1830s people from the surrounding properties would visit the main cave and by the 1840s it was a popular visiting place. A survey was carried out in 1842. The Sydney Morning Herald reported on a visit to the caves in 1843 and the immensely gifted artist, Conrad Martens, arrived and made a number of sketches in May, 1843.

The discovery of gold in the area in the 1850s (Tuena - 1851, Mount Grey - 1854) resulted in a huge increase in visitors to the caves. In 1860 the miners at Mount Grey built the first stage in the Arch Cave. It was replaced in 1880 and the replacement is still used occasionally today.

The discovery of gold also meant a dramatic increase in bushranging in the district and, once again, the caves became a popular retreat when bushrangers were being chased. In his book 'The Abercrombie Caves', author Geoff Bates claims 'It is believed that Ben Hall and his gang (including Frank Gardiner and John O'Meally) spent considerable time at the caves in the years 1863 to 1865.'

By 1870 the caves were popular with visitors from Sydney and by 1888 a temporary keeper was employed to look after the caves which were suffering from graffiti and vandals. By 1895 more than 1000 people a year were visiting the caves.

Circa: No

Physical description: The Abercrombie Caves are about 70 kilometres south of Bathurst, not far from the former gold-mining village of Trunkey Creek.

The caves are a fine limestone formation. Cave viewing supervised by NSW Dept. of Tourism. Camping and tourist facilities kept at low key. The area is within a NPWS Nature Reserve.

These caves are considered to be the second most important in NSW (after Jenolan Caves)

The main cave, and well known of the Abercrombie caves is the Archway Cave. This is a large natural limestone based bridge of land that spans across the Grove Creek which flows to the Abercrombie River. Inside the archway is an extensive range of cave formations. Daylight enters the cave from each direction, but between the cave is also lit artificially to highlight features of the formations.

A few interesting points:

1. The pink colour of the ceiling of the cave is actually a fungi.
2. The white spots on the ceiling of the cave that are visible near the arch are actually cobwebs.

Physical description: Winburndale Nature Reserve,
Taken from the National Parks & Wildlife Service website.

Winburndale Nature Reserve is dominated by a major ridge system running in an east and north-east direction. The ridge system is the remains of an eroded plateau, which now forms rocky slopes from the ridgetops to the watercourses and creeks.

The change in vegetation association on these portions reflects the diverse habitats over the altitudinal and geographical range. There are stands of snow gum at Mt. Horrible, while at locations slightly less exposed, snow gum-mountain gum association occurs. At lower altitudes the eucalyptus association can be mountain gum, broad and narrow leaved peppermint and Red Stringybark. On the cooler slopes, red stringybark becomes dominant. On the western slopes, scribbly gum is very common, often in conjunction with a slate strewn ground surface. The gullies, as well as containing several species of tall-growing acacias, harbour a wet sclerophyll vegetation and include such eucalypt species as rough barked manna gum, brown barrel and apple box. At the lowest altitudes red box and yellow box occur. The vulnerable capertee stringybark is found on the midslopes within the Nature Reserve.

The diverse vegetation communities provides a habitat for a number of animals, including four species of macropod, a wide range of arboreal mammals, wombats, echidnas, a variety of bird and reptile species and the Purple Copper Butterfly, one of the rarest species of butterfly in Australia. This species is endemic to NSW and depends upon blackthorn, an understorey plant species, for survival. Both quolls and Koalas have been recorded in the past.

Scientific, Recreational and educational activities are encouraged where compatible with nature conservation objectives

Item name: Copperhannia Nature Reserve

Location:

Bathurst Regional

Historical notes of provenance: Copperhannia Nature Reserve (is located in the south western corner of the LGA).

(From the National Parks & Wildlife Service website)

The National Park area was proclaimed a nature reserve on 21 April 1972 with an original size of 2,529.34ha. To date there have been three additions of land, on 14 December 1979 (714ha), 19 December 1980 (251ha) and 22 October 2004 (2.95ha) which have increased the total area reserved to 3,497ha.

The original nature reserve was made up of unreserved Crown Land and the Copperhannia Trigonometric Station Reserve 20857. Subsequent reserved lands included a Public Utility Reserve 73568, a Special Purpose Lease 12117, Crown Lease 1976/1 and a Crown Reserve R95544 that incorporated both a Mining Lease (506) and Gold Lease (10). The nature reserve ranges in elevation from 500m along the western edge of the reserve at Hells Hole and Rocky Bridge Creeks' to 966m at the Copperhannia Geodetic Trigonometric Station.

Historic Heritage

Six historic sites have been found in the reserve and consist of one mine shaft, four modified survey trees with scar markings and one cave. Three off-park sites are located along the boundary of the reserve and these consist of modified survey trees, two of which have portion details carved into the scar.

The mine shaft was part of Crown Lease R95544 and was associated with a mining lease area MLA 506 Gold Lease G10) where gold bearing quartz was extracted. Given the proximity of the mine shaft to Arkell Ridge Road, the mine was capped in June 2002 by NPWS staff.

There is anecdotal evidence that a rugged mountain range within the catchment of the Wyangala Dam. John Piesley and perhaps also the Bushranger John Vane. The remains of a hut that is said to have been utilised by the bushrangers, their associates and families is believed to exist in the reserve but remains undiscovered to date.

The reserve has been subject to grazing and records exist of a grazing lease established over the area as early as the 1920's. Grazing continued up until the late 1960's. A number of internal fences remain as evidence of grazing use.

Bathurst Regional

Physical description: This is the Habitat of the Purple Copper wing butterfly, which is listed as an endangered species.

(From the National Parks & Wildlife Service website)

Copperhannia comprises of a rugged mountain range within the catchment of the Wyangala Dam. It lies within the junction of two geological structures—the Hill End trough and Molong Geanticlines, giving rise to the unique Copperhannia Thrust.

The reserve protects a reasonably large remnant of woodland often with a sparse understorey adjacent to the Abercrombie River, featuring very steep ridges incised by Hell Hole Creek and Little Hell Hole Creek.

(Extract from the Copperhannia Nature Reserve Draft Plan of Management, (November 2005), National Parks & Wildlife Service website)

Copperhannia Nature Reserve is located 15km west of Trunkey Creek within the Central Tablelands. The reserve falls within the Bathurst Regional Council local government area. (2.95ha) which have increased the total area reserved to 3,497ha.

The original nature reserve was made up of unreserved Crown Land and the Copperhannia Trigonometric Station Reserve 20857. Subsequent reserved lands included a Public Utility Reserve 73568, a Special Purpose Lease 12117, Crown Lease 1976/1 and a Crown Reserve R95544 that incorporated both a Mining Lease (506) and Gold Lease (10). The nature reserve ranges in elevation from 500m along the western edge of the reserve at Hells Hole and Rocky Bridge Creeks' to 966m at the Copperhannia Geodetic Trigonometric Station.

Copperhannia Nature Reserve is located on the edge of both the South Eastern Highlands and NSW South Western Slopes Bioregions and is comprised of a reasonably large remnant of grassy and shrubby dry sclerophyll woodlands and forests on rolling to steep hills. The reserve is located in the Lachlan River Catchment and provides one of the upper catchments for Wyangala Dam. The majority of the creeks in the reserve flow west which flow into the Abercrombie River and eventually join the backed up waters of Wyangala Dam before reaching the Lachlan River.

Five Aboriginal sites have been recorded within Copperhannia Nature Reserve, which consists of three modified (scarred) trees and two artifact sites. Two off-park sites are located along the boundary of the reserve and consist of modified (scarred) trees. To date most Aboriginal heritage sites found in the reserve have tended to be opportunisticly located and there is potential for more sites to be discovered.

Assessed significance: Local

Endorsed significance:

Statement of significance: This lovely community Park is physically and visually very central to the village. It is named in honour of W.H. Stevens (William Horace) of Rockley, and owes much of its formation and character to the weir which was constructed as an activity to provide work during the depression in the early 1930s.

Historical notes of provenance: This weir, built in 1932, was instigated by Mr. Stevens of Rockley in the depression era to provide work for people out of work because of the depression and to provide a swimming hole for the village residents and a place where swimming lessons could be given. By the 1990s the water hole was not considered safe for swimming and a sign has been erected to that effect.

The park has been formalised in recent decades through the work of the former Evans Shire Council. There are two memorials in the park. (see separate listing), Part of the park space is the water body formed by the weir.

Physical description: This park is named in honour of W.H. Stevens (William Horace) of Rockley. The Rockley weir dams the Peppers Creek that runs through Rockley, beside Stevens park which is physically and visually very central to the village .

It's a concrete construction sloping forward on the outside face and the water that is dammed forms a body of water in the park that was initially used for a public swimming pool. It was constructed at the behest of Mr. Stevens, whom the park is named after.

At one side of the weir there is a set of steps leading to the wall. Some of the treads are concrete and others are stone. On the opposite side to the park the land is covered in generally bushland but with other plants including poplars and English hawthorns.

There is a sign near the water which reads 'No Swimming: The water body is unsafe for swimming. Do not enter water.'

The park is an attractive tree filled garden park beside the weir and the road. It contains a number of items for public use including picnic shelters, toilet block, many seats and children's play equipment. Through the centre of the park is a single straight line of large mature Elm Trees and the former swimming hole in Peppers Creek and its weir.

In front of the Stevens Park sign there is a large stone bolder with a plaque on it which indicates that below the rock is a time capsule was laid on Sunday 22 July 2001, to commemorate the 150th anniversary of the proclamation of Rockley village. It is to be opened in the 200th anniversary in the year 2051.

Item name: Wattle Flat Heritage Lands**Location:**

Bathurst Regional

Address:**Planning:** Southern & Western**Suburb/nearest town:** Wattle Flat 2795**Local govt area:** Bathurst Regional**Parish:** Sofala**State:** NSW**County:** Roxburgh**Other/former names:****Area/group/complex:****Group ID:****Aboriginal area:****Curtilage/boundary:** Wattle Flat Heritage Lands, (Reserve for Environmental Recreation and Environmental Protection), North western side of Wattle Flat**Item type:** Landscape**Group:** Landscape - Natural**Category:** Other - Landscape - Natural**Owner:****Admin codes:****Code 2:****Code 3:****Current use:** Reserve for Environmental Recreation and Protection**Former uses:****Assessed significance:** Local**Endorsed significance:**

Statement of significance: The Wattle Flat Heritage Lands are important in that this land was originally set aside as the common for Wattle Flat and has since served as a recreation area for the residents. Due to the intactness of the bushland, it has the potential to yield information about the flora and fauna, particularly the "Argyle Apple".

Historical notes

of provenance: Origin of the name: When the first band of diggers mounted Wyagdon Mountain and saw the beautiful plateau spread out before them, they called it, by reason of the plentifulness of Wattle trees in the neighbourhood, 'Green Wattle Flat'. For many years this original name was retained, but gradually the initial adjective fell into disuse, until at the present time there are few who even know of its former existence.

Remnant mines at Wattle Flat: Scores of reef mining operations, some with very deep shafts, were a feature of the 19th century landscape of Wattle Flat. The Wattle Flat Lands Trust has preserved five such mines. They are fenced for public protection and may be viewed by arrangement.

Examples of rich yields:

1. Crushings from 'Blue Duck'

A.Depth 100 feet, from 407.5 tons quartz: 501 ozs. 13 dwts. of gold.

B.Depth 60 feet (same reef), from 70 tons quartz: 77 ozs. 1 dwt, 18 grains of gold.

2. Crushings from 'Solitary', depth of 525 feet. The last stone crushed yielded 6 ozs to the ton. Water trouble was responsible for closing down this shaft.

3 'Big Oakley', depth of 400 feet. This mine at one period yielded the rich return of 10 ozs to the ton.

Circa: Yes

Physical description: This park is named after Tom Howard. This Park was named after Tom Howard, of the Trunkey Creek district, who gave the ultimate sacrifice in the war, dying in the service of his country. His is remembered in the writing of two marble plaques on two of the brick pillars that lead into the park. Inside the small park, with some large conifers, there is some children's playing equipment and a war memorial. This latter is in the form of a marble plaque set on a dressed brick wall. The sign contains the Trunkey roll of honour to the Great War 1919. Each side of this are signs that read Korea, Malaya and Vietnam, Boar War and other conflicts. The monument has a simple roof over.

Endorsed significance:

Statement of significance: Public park space that commemorates a former government plan to establish a city to be called Vittoria.

Important public facility for leisure and recreation. It is a demonstration area as an Arboretum, including farm tree demonstration area, and demonstration forest.

Historical notes This place was once to be part of a government planned city.

of provenance: The concept was abandoned in the 1980s. The following is (From the NSW Tourism website)

The Forestry Commission of NSW established Macquarie Woods so people could learn as much as possible about trees. It is situated on the Mitchell Highway midway between Bathurst and Orange.

Four main areas have been set up to show how careful harvesting of wood can produce a substantial yield while maintaining the structure and ecological values of the forest. Those areas are:

Heritage grove, Arboretum, Farm tree demonstration area, and Demonstration forest.

Endorsed significance:

Statement of significance: The original inspiration and work of Hugo L. Beyer, a successful gold miner of Hill End whose original plantings 1877, and consolidated in 1885-86 provide the basis for this most beautiful avenue of trees. Additional trees were added by the council and others in 1890s. 1928, 1973 and 1980-81. Beyer's avenue which is the main entrance to the village of Hill End, and it stretches for over 1 kilometre, and contains around 200 trees.

More tree types have been added but the original plantings include lindens, oaks, elms and larches, pines, planes, cedars, walnuts and chestnuts.

Historical notes of provenance: Beyers Avenue, Hill End from page 100 of 'The Story of Hill End' by Harry Hodge,

During 1877 Beyers, at his own expense, had imported from Europe sufficient trees to plant an avenue a mile in length from Fischers Hill crest to the post office. Now days those trees, in all the dignity of old age, from the lasting memorial to the man who remembered the town which brought him wealth. Lindens from Germany, oaks and elms from England, larch, pine, plane, walnut, chestnut and a score of other varieties blend their autumn tints harmoniously with the reds and browns of the scarred hillsides

Immediately on his return in 1885 Beyers set about the replacement of tree casualties, extending his avenue up Reef Street and providing wire netting at his own expense to keep stock from the young trees. His one unfulfilled promise to provide seats under the trees for public use was made good thirty six years ago when Councillor W. F. Hodge, who had caused the avenue to be extended along the Bathurst Road as far as Doctor Bakers, had them installed. At the ceremony, for the first time, the avenue was officially given the name of the originator

Item name: Wallaby Rocks**Location:** 557 Hill End Road Sofala 2795

Bathurst Regional

Address: 557 Hill End Road**Planning:** Southern & Western**Suburb/nearest town:** Sofala 2795**Local govt area:** Bathurst Regional**Parish:** Cunningham**State:** NSW**County:** Wellington**Other/former names:****Area/group/complex:****Group ID:** 1080669**Aboriginal area:****Curtilage/boundary:****Item type:** Landscape**Group:** Landscape - Natural**Category:** Geological site or area**Owner:** Local Government**Admin codes:****Code 2:****Code 3:****Current use:** Landscape**Former uses:** Site of small village**Assessed significance:** Local**Endorsed significance:**

Statement of significance: Drammatic landscape that was an important landmark . The main street of Sofala extended to Wallaby Rocks, some five kilometres, in the hey day of mining. Wallaby Rocks itself was the locality of its own small village for a time, The landscape has been the subject of important art works. Has special significance to Aboriginal people.

Historical notes of provenance: By 1868 there were 51 licensed hotels, giving rise to various shops catering for the needs of the prospectors. The main street of Sofala extended, to Wallaby Rocks, an incredible 5 kilometre and a similar distance along the Turon River, known as the Upper Turon, in an easterly direction.

From Hill End by Alan Mayne pp108

Road transport between Hill End and Bathurst was a source of local consternation. The railway from Sydney had reached Bathurst in 1876. However, road travel between there and Hill End was primitive. Local government did not have the resources, and the New South Wales government did not have the interest, to remedy the problem. The Hill End Borough Council repeatedly urged Sydney to upgrade the bridle track from the Turon River to Hill End, explaining that the road in wet weather became 'almost impassable' except 'at risk of life and limb'. The town clerk remonstrated in 1883 that cattle and horses fell to their deaths off the sheer sides of the track, 'and all persons are frightened to use it in its present state'."

Road safety, however, was less an issue than was reliability of access across the Turon River to Bathurst. The town mobilised as early as 1879 to protest about the delays to the mails and general traffic whenever the Turon was in flood. Initially a punt service was suggested. By the late 1880s town opinion had united over the 'absolute necessity' for the New South Wales government to build a bridge over the Turon at the floodprone river crossing at the Wallaby Rocks, near Sofala.⁶³ Petitions were signed, local parliamentarians lobbied, alliances formed with Bathurst, Sofala and Mudgee, deputations sent to Sydney. No other issue mobilised such general and sustained concern at Hill End, because it went to the core of the district's sense of isolation and marginality. Every year flooding at the Wallaby Rocks caused 'great delay and inconvenience ... in the crossing of goods and mails'. Bullock teams had to camp at the crossing till the waters fell sufficiently to enable a way to be forged across with half loads. At times the town went 'short of provisions for several days at a time'.⁶⁴

As Le Messurier explained when the Turon flooded in 1890, with the town's chief means 'of mail communication with Sydney departed, and our telegraph lines being down we are completely isolated, no means of letting the outer world know what we suffer for the want that long needed and often asked for bridge'. When the government belatedly built the bridge in 1897, Hill End declared a two-day holiday to mark the official opening. The Hill End Band played as the ribbon was cut. The district celebrated with a sports day, picnic, banquet d ball.'

Item name: Bathurst Locomotive Workshop Crane**Location:** 34 Alpha Street Bathurst 2795

Bathurst Regional

Address: 34 Alpha Street**Planning:** Southern & Western**Suburb/nearest town:** Bathurst 2795**Local govt area:** Bathurst Regional**State:** NSW**Parish:****County:****Other/former names:** 25 Tonne Travelling Gantry Crane**Area/group/complex:****Group ID:****Aboriginal area:****Curtilage/boundary:****Item type:** Movable / Collection**Group:** Transport - Rail**Category:** Railway Machinery & Objects**Owner:** Private - Corporate**Admin codes:****Code 2:****Code 3:****Current use:****Former uses:****Assessed significance:** Local**Endorsed significance:** Local**Statement of significance:** This 25-ton gantry crane is a 'moveable' item of local significance being a rare and intact example of a large railway workshop crane. The crane was constructed in 1918 at the wagon repair siding to lift defective wagons.

It is a well-known local landmark, being clearly visible from the Rocket Street Bridge and strongly associated with the former railway workshops and a relic from Bathurst's industrial past.
Rusty but in restorable condition.

**Historical notes
of provenance:****Themes:** National theme

State theme

Local theme

Designer:**Builder:** Possibly Golioth (according to information within the 2002 SHI by Simpson Dawbin)**Year started:****Year completed:** 1918**Circa:** No**Physical description:** 25-ton travelling gantry crane possibly dates from 1918 (according to information within the 2002 SHI by Simpson Dawbin). It belonged to the 1880s Bathurst Locomotive Workshops since demolished, leaving it an isolated object / industrial relic on the far north-west corner of the Fabrication Yard.

The crane was constructed at the wagon repair siding to lift defective wagons. The 25-ton gantry sits on rails over which it travelled to allow work to stationery locomotives. No makers' plate has been identified. Constructed of riveted rolled steel joist sections with two overhead attached 5-tonm jibs over an inspection pit and catwalk above. Operator cab has timber lining boards under recent metal sheeting; timber catwalk in disrepair.

Originally hand operated via a winch and at some stage converted to electric power. It appears to be intact. In its original location.

**Physical condition
level:** Good

Item name: Bathurst Locomotive Workshop Crane**Location:** 34 Alpha Street Bathurst 2795

Bathurst Regional

Physical condition: It has not been used since 1982 when the new Bathurst Railway Workshops were opened.

It is a well-known local landmark, being clearly visible from the Rocket Street Bridge and strongly associated with the former railway workshops and a relic from Bathurst's industrial past.

Rusty but in restorable condition. Nothing more is known. Requires more research.

**Archaeological
potential level:****Archaeological
potential Detail:****Modification dates:****Recommended
management:****Management:** Management category**Management name**

Further comments: Research by Sydney Trains suggests that 25-ton gantry cranes are rare, possibly no others still exist with 25-tons being a large crane. The railway had and still has a large number of 5-ton jib cranes which sat next to tracks in railway yards to load freight. Many of these survive and make great local restoration projects. They are even known as "Railway cranes". A comparative analysis would need to look for examples of other locomotive workshop cranes, rather than the jib cranes, in order to determine rarity.
