STATEMENT OF HERITAGE SIGNIFICANCE

Architecture/Environment:

A series of single storey shops/offices connected by a single masonry facade with awning. The parapet has a central triangular pediment bordered by capped piers. The facade has been altered by removal of some original window casements and replacement of the original awning. The shops are representative of the early main street facades and their scale and design provide a suitable basis for guiding other main street facade restoration and infill development.

History:

Recommendation:

Maintenance. Encourage reinstatement of replica of original awning. Rendering with original colour scheme.
