## Introduction

*Canterbury Local Environmental Plan (LEP) 2012* is the statutory planning framework that establishes land use zones and building envelope controls such as floor space ratios and building heights in the former City of Canterbury.

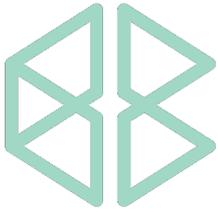

City of Canterbury Bankstown Council is in receipt of a spot rezoning application requesting to amend *Canterbury LEP 2012* in relation to part of the site at 165–169 Holden Street in Ashbury. 165-169 Holden Street, Ashbury is currently owned and managed by Sydney Water and includes the operational Ashfield Reservoir, a state agency and local heritage item, directly south of the subject site proposed for rezoning.

Council considered the spot rezoning application at the Ordinary Meeting of 26 May 2020 and decided to proceed to the next stage, which is to submit a planning proposal to the NSW Department of Planning, Industry and Environment to seek a Gateway Determination. The Gateway Determination would enable Council to exhibit the planning proposal and to request additional technical studies and investigations.

According to the Department's publication '*A guide to preparing planning proposals*', a planning proposal is a document that sets out the justification for making changes to the CLEP 2012. A planning proposal is comprised of the following components:

Part 1	A statement of the intended outcomes of the planning proposal. It is a statement of what is planned to be achieved, not how it is to be achieved.
Part 2	An explanation of the proposed changes to CLEP 2012 to achieve the intended outcomes.
Part 3	The justification for making the proposed changes to CLEP 2012.
Part 4	Maps to identify the intended outcomes of the planning proposal.
Part 5	Details of the community consultation that is to be undertaken on the planning proposal.
Part 6	Outline the indicative project timeline.

Following receipt of the Gateway Determination, the exhibition process, a review of community feedback and any additional information may see updates and amendments to the planning proposal.

## Part 1 – Intended Outcomes

This planning proposal applies to part of the site at 165-169 Holden Street in Ashbury (Part Lot 1 on DP911478 and Part Lot 1 on DP115504) as shown in Part 4 (Map 1).

The intended outcomes of this proposal are to amend the *Canterbury LEP 2012* to enable low density residential development of surplus Sydney Water land that is sympathetic to the prevailing character of the Ashbury Heritage Conservation Area and provides a new active transport connection to Peace Park.

The roughly 2,540m<sup>2</sup> area recommended for rezoning and associated planning controls are intended to protect and preserve the adjacent Ashfield Reservoir which is listed on the State Agency Heritage Register.

## Part 2 – Explanation of Provisions

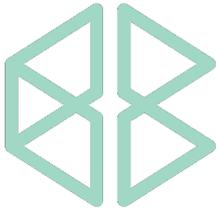

The proposed outcome will be achieved by amending the *Canterbury LEP 2012* by:

- Amending the *Canterbury LEP 2012* Land Zoning Map on the identified surplus Sydney Water land from SP2 Infrastructure (Water Supply System) to R2 Low Density Residential in accordance with the proposed zoning map (refer to Part 4, Map 3).
- Amending the *Canterbury LEP 2012* Heritage Map to alter the local heritage item (No. I1) curtilage of the Ashfield Reservoir (WS003) in line with the recommendations of this report as demonstrated in Part 4, Map 5, and supported by the attached Statement of Heritage Impacts (SOHI) report.

*Realignment of the State Agency Heritage Item Curtilage for Ashfield Reservoir (No. WS003) will be subject to a separate application by the applicant to NSW Heritage.*

- Amending the *Canterbury LEP 2012* Height of Building Map as demonstrated in the proposed Height of Building Map (refer Map 7 in Part 4 of this report) to apply a maximum height of 8.5m to the portion of the site identified for rezoning.

No Floor Space Ratio (FSR) amendments are required for this site as it is managed under clause 4.4 and 4.4A of *Canterbury LEP 2012*.

## Part 3 – Justification

### **Section A – Need for the planning proposal**

#### **1. Is the planning proposal a result of an endorsed local strategic planning statement, strategic study or report?**

This planning proposal is not the result of any strategic study or report prepared by the Department of Planning, Industry & Environment, Greater Sydney Commission or Council.

However, the proposal is considered appropriate given its comparable use and outcome to the existing and future surrounding context. The rezoning and controls proposed, generally resemble those of the existing Heritage Conservation Area while providing a public benefit to the local community.

Council's assessment considered the following technical studies submitted with the spot rezoning application:

- Statement of Heritage Impact (SOHI) by Extent Heritage (dated October 2018)
- Preliminary Site Investigation and Sampling Analysis and Quality Plan by Parsons Brinckerhoff Australia (dated 14 May 2015)
- Detailed Site Investigation by Parsons Brinckerhoff Australia (dated 24 July 2015)
- Summary of Contamination Condition by Progressive Risk Management (dated 29 March 2019)
- Data Gap Analysis by Progressive Risk Management (dated 17 June 2019)
- Site Audit Report by JBS&G Australia (dated 16 August 2019)
- Potential Development Concept Plans by Prescott Architects (dated 27 November 2018)

Council also referred the planning proposal to NSW Heritage for comment due to the state significance of the Ashfield Reservoir Heritage Item. Both Council and NSW Heritage Officer assessments supported the proposal on the condition that a site specific DCP is applied to ensure sympathetic development.

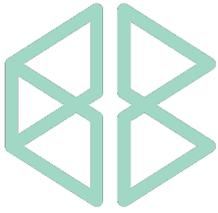

Council's assessment indicates this planning proposal has strategic merit to proceed to Gateway subject to:

- Receipt of a Statement of Suitability of Proposed Uses (SSPU) (undertaken or reviewed by an accredited site auditor) prior to exhibition.
- The exhibition of a planning agreement and site specific development control plan concurrently with the planning proposal.

Following the exhibition process, a review of community feedback and any additional information may see updates and amendments to this planning proposal.

#### **2. Is the planning proposal the best means of achieving the objectives or intended outcomes, or is there a better way?**

This planning proposal to rezone surplus Sydney Water land at 165-169 Holden Street, Ashbury is the best means of achieving the intended outcomes outlined in Part 2.

The proposed rezoning will provide for local housing needs and is consistent with low density residential character of the surrounding neighbourhood. This will be achieved through extending the R2 zoning from adjoining sites to the subject site, which is more efficient than introducing a site specific clause.

The addition of relevant planning controls, including site specific controls, are to be applied over the subject site to facilitate delivery of new development that does not impact on the character of the Ashfield Reservoir and surrounding Ashbury Heritage Conservation Area (HCA).

Following receipt of the Gateway Determination, a site specific development control plan will be drafted and exhibited concurrently with the planning proposal to ensure sympathetic development with the surrounding character housing.

## **Section B – Relationship to strategic planning framework**

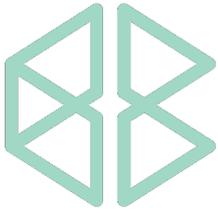

### **3. Will the planning proposal give effect to the objectives and actions of the applicable regional, or district plan or strategy (including any exhibited draft plans or strategies)?**

#### **3.1 Greater Sydney Region Plan ‘A Metropolis of Three Cities’**

*A Plan for Growing Sydney* has been replaced by *A Metropolis of Three Cities* as the Metropolitan Regional Plan for the Greater Sydney area.

This planning proposal is generally consistent with the Greater Sydney Region Plan, *A Metropolis of Three Cities*, namely the objectives outlined in the table below.

<b>Objective</b>	<b>Rationale / Justification</b>
4 – Infrastructure use is optimised under ‘A city supported by Infrastructure’ direction	The proposal would encourage infill development within the established suburb of Ashbury which is frequently serviced by various bus routes. Furthermore, the rezoning of land is no longer required by Sydney Water for operational purposes. Residential development will facilitate maintenance and management of the Sydney Water network.
10 – Greater Housing Supply under the direction for ‘Housing the City’	Rezoning the land for residential development will help meet the housing targets outlined in the GSRP while providing diverse housing supply.
13 – Environmental heritage is identified conserved and enhanced under ‘A city of great places’ direction, and	The proposal is within the Ashbury Heritage Conservation Area and will include a site specific DCP to ensure that a sympathetic built form is delivered as part of any new development.
37 – Exposure to natural and urban hazards is reduced under the direction for ‘A resilient city’	As remediation works will be required to be undertaken prior to development, the proposal will reduce urban hazards and is not exposed to any known natural hazards. Therefore the proposal will reduce the exposure of residents within the Greater Sydney area to natural and urban hazards.

The proposed zoning and planning control amendments is consistent with the low density residential and conservation character of the surrounding neighbourhood and the significance of the Ashfield Reservoir.

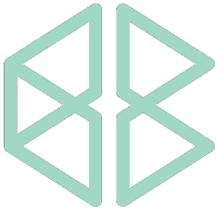

### 3.2 South District Plan

The proposal is generally consistent with the South District Plan, namely:

Planning Priority	Rationale / Justification
S1: Planning for a city supported by Infrastructure	The proposal supports the infrastructure maintenance and management of the three cities by allowing underutilised public land to be opened up for residential development. Thus, enabling the optimisation of existing infrastructure within the established suburb of Ashbury. The proposed additional housing can be serviced by existing infrastructure, subject to the provision of a pedestrian connection to the park.
S5: Providing housing supply, choice and affordability with access to jobs, services and public transport	Rezoning the land for residential development will help achieve the housing targets outlined in the GSRP while providing diverse housing supply and choice.
S6: Creating and renewing great places and local centres, and respecting the District's heritage	Located within the Ashbury Heritage Conservation Area, the proposal will require a site specific DCP to ensure the infill development will be sympathetic to the surrounding character. Additionally, the delivery of a pedestrian connection to Peace Park from the west will expand green web access for the local community.
S16: Delivery High Quality Open Space	Whilst the proposal does not provide new open space and is located adjacent to Peace Park, access to the park is greater than 400m. The provision of a pedestrian connect to Peace Park will achieve consistency with S16, where all dwellings should be within 400m of open space. This will also create greater access and activation of Peace Park for surrounding residents.

The proposed rezoning will optimize infrastructure use by unlocking infrastructure land that is no longer required for operational purposes to provide greater housing supply within the greater Sydney region. Furthermore, the proposed R2 zone is consistent with the low density residential and conservation character of the surrounding suburban neighbourhood.

The reduction to the State Agency Heritage curtilage of the Item is considered appropriate as per advice from the Heritage Office and Heritage Consultant. Potential impacts to the Ashbury Conservation Heritage Area will be managed through application of a site-specific DCP, to will ensure consistency with surrounding and future uses on the site.

#### **4. Will the planning proposal give effect to a council's endorsed local strategic planning statement, or another endorsed local strategy or strategic plan?**

##### **4.1 Community Plan – CBCity 2028**

*CBCity 2028* is the Council's 10-year plan to guide the City of Canterbury Bankstown on its journey of seven directions to be a thriving, dynamic and real city.

The proposal is generally consistent with the Canterbury Bankstown Community Plan – *CBCity 2028*, especially direction 6 for a liveable and distinctive city, as it will provide additional housing diversity that is sympathetic to the local character within a heritage conservation area.

##### **4.2 Local Strategic Planning Statement (LSPS) – Connective City 2036**

This planning proposal is consistent with the Local Strategic Planning Statement (LSPS), *Connective City 2036*, namely Action E6.4 to Protect the low-density character of suburban neighbourhoods within Evolution 6 (Urban and Suburban Places, Housing the City). The proposed zone is consistent with the low-density residential character of the surrounding suburban neighbourhood.

On 10 December 2019, the Local Strategic Planning Statement (LSPS) – *Connective City 2036* was adopted by Canterbury Bankstown Council. The LSPS was endorsed by the Greater Sydney Commission on 16 March 2020.

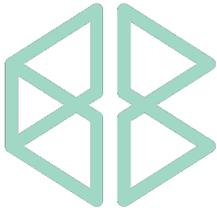

*Connective City 2036* aims to integrate a variety of transport modes with different land uses so that more people can connect to more places within the City and beyond. It will help to improve the City's ecological and river systems and create quality places for healthy living and ecological integrity.

With a City-wide target of 50,000 new dwellings by 2036, the planning proposal delivers on Actions E6.4.119 and E6.4.120 of Evolution 6: Urban and Suburban Places, Housing the City. These actions are:

- E6.4.119 Reinforce the low density character of suburban areas subject to Council's Local Housing Strategy
- E6.4.120 Identity the attributes that make special character areas unique, refine their boundaries and protect them from inappropriate development.
- E6.11.137 Affordable and social housing – prepare and exhibit the Affordable Housing Policy.

The proposal will ensure that impacts to the heritage water tower and heritage conservation area are minimised through a site-specific DCP that would be exhibited with the Planning Proposal. The proposed R2 Residential Zone is in keeping with the surrounding zone.

Council has adopted an Affordable Housing Strategy on the 23 June 2020. With the adoption of this strategy, the Planning Agreement Policy will be amended to require a 5% affordable housing contribution for planning proposals resulting in uplift of more than 1000m<sup>2</sup> of residential floorspace, unless otherwise agreed with Council.

A potential yield of 5 residential lots (including up to 10 dwellings based on lot configuration) would trigger the 1000m<sup>2</sup> threshold. The proponent will be asked to demonstrate how they can comply with this direction post Gateway.

As such the proposal is generally consistent with the LSPS – *Connective City 2036* and supports delivery of the evolutions as identified above.

### 4.3 Canterbury Bankstown Housing Strategy (CBHS)

The *Canterbury Bankstown Housing Strategy* (CBHS) has been adopted by Council on the 23 June 2020 to support the LSPS, *Connective City 2036*, and guide future planning decisions within the LGA. Council has reviewed the new strategy and supports the applicant's position that the proposal is generally consistent with the local strategy.

With a forecast population of 500,000 by 2036 and the scarcity of greenfield development land, Council recognises that it cannot continue to rely on the delivery of housing in suburban areas.

The proposal delivers on the following strategic directions:

- #1 – Deliver 50,000 dwelling by 2036, subject to the NSW Government providing upfront infrastructure support;
- #4 – Ensure new housing in centres and suburban areas are compatible with the local character, and;
- #5 – Provide a choice of housing types, sizes, tenures and prices to suit each stage of life.

The proposal and intended form of housing supply in the Ashbury area aligns with the purpose of zone R2 Low Density Residential as outlined in the CBHS.

Subsequently, the planning proposal is generally consistent with the *Canterbury Bankstown Housing Strategy*.

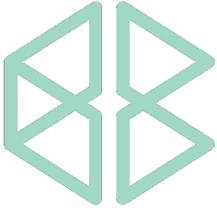

## 5. Is the planning proposal consistent with applicable State Environmental Planning Policies?

This planning proposal is consistent with the applicable State Environmental Planning Policies as shown in Attachment A, namely:

### 5.1 State Environment Planning Policy (Infrastructure) 2007

This SEPP identifies matters for consideration in relation to development adjacent to state classified infrastructure such as transport, electrical and water supply facilities.

The proposal is consistent with the aim of this SEPP by allowing for the efficient development, redevelopment or disposal of surplus government owned land, whilst maintaining sufficient land for the water reservoir.

## **6. Is the planning proposal consistent with applicable Ministerial Directions (s.9.1 of the EP&A Act)?**

This planning proposal is consistent with applicable Ministerial Directions (as shown in Attachment B), namely:

### **6.1 Direction 2.3 – Heritage Conservation**

The objectives of this direction is to conserve items, areas, objects and places of environmental heritage significance and indigenous heritage significance.

Council referred the SOHI to the NSW Government Heritage Office for review and comment. The Heritage Office review supported the spot rezoning as the recommended controls are considered appropriate and in keeping with the surrounding residential development. The Heritage Office requested a site specific DCP to guide sympathetic development. Council has reviewed the SOHI and agrees that the spot rezoning and potential future development will have minimal impact on the heritage significance of the Ashfield Reservoir or Ashbury Conservation Area, with application of a site specific DCP to guide sympathetic development.

The SOHI states that the planning proposal will maintain the item of significance, the Ashfield Reservoir. This is consistent with the requirements of this Ministerial Direction.

Council notes that the subdivision DA is on hold until the rezoning is resolved.

The development outcome/s that could result from the rezoning has the potential to be inconsistent with the conservation of the Ashbury Conservation Area character.

Based on this, Council has requested a site specific DCP to facilitate protection of the Ashbury Conservation Area character (to be provided post-Gateway). This is supported by the NSW Government Heritage Officer.

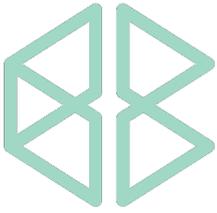

Based on the assessment the planning proposal can be made consistent with the requirements of Direction 2.3 – Heritage Conservation.

### **6.2 Direction 2.6 – Remediation of Contaminated Land**

This Ministerial Direction requires Council to consider land contamination where it is proposed to enable development for sensitive land uses. Division 9.1 of the EP&A Act reinforces this direction.

According to the DSI report and subsequent Site Auditor Report (SAR) submitted with the application for the proposed low density residential use; the nature and extent of the contamination has been appropriately determined and the investigation, remediation or management plan is appropriate. The attached contamination reports (refer attachments J – N) has identified the site as contaminated and currently unsuitable for the proposed use without remediation works. As such, remediation will be required for development of the site.

Should a Gateway Determination be granted, Council will require a Statement of Suitability of Proposed Uses (SSPU) (undertaken or reviewed by an accredited site auditor) prior to exhibition. The SSPU will confirm the suitability of the site for all permitted uses (with or without consent) in

the proposed R2 Low Density Residential zoning with or without remediation works to make the proposal consistent with this ministerial direction.

It is noted that the site's location within the Ashbury Heritage Conservation Area restricts residential development under the State Environment Planning Policy (Exempt and Complying Development Codes) 2008, and instead will require a development application for redevelopment of the site.

### 6.3 Direction 3.1 – Residential Zones

The objectives of this direction is to encourage a variety of housing types, make efficient use of existing infrastructure and minimise the impact of residential development on environment and resource lands.

The planning proposal is consistent with this Ministerial Direction as the rezoning would provide suitably zoned land for additional dwellings in an existing residential area. The site-specific DCP will ensure any resultant development is in keeping with the heritage character of the locality.

### 6.4 Direction 3.4 – Integrated Land Use and Transport

The objective of this direction is to give effect to and be consistent with specific guidelines.

- *Improving Transport Choice – Guidelines for planning and development (DUAP 2001)*

Many of the planning principles in this guideline relate to location and design considerations for higher density housing. The rezoning of the subject site would allow for low density residential infill development within an established urban area. As such many of the principles in this guideline would not apply.

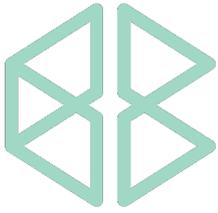

However, the subject site is in proximity to dedicated bus routes which access to the Hurlstone Park or Canterbury railway stations within 5 minutes and as such is consistent the principles of delivering new housing close to good transport options.

- *The Right Place for Business and Services – Planning Policy (DUAP 2001)*

This guideline refers to business and services. The planning proposal does not propose any business activities.

The planning proposal is an extension of an existing R2 Low Density Residential Zone. It is considered that any additional dwellings which result from the development of this land under this zone would utilise existing road networks and public transport services.

The planning proposal is consistent with this Ministerial Direction due to the minor significance of the proposal and its close proximity to bus services being in accordance with objectives 4 and 10 of the GSRP.

### 6.5 Direction 5.10 – Implementation of Regional Plans

The objectives of this direction is to give legal effect to the vision, land use strategy, policies outcomes and actions contained in regional plans.

The planning proposal is consistent with GSRP As set out in section 3 of this report.

### 6.6 Direction 6.2 – Reserving Land for Public Purposes

The objectives of this direction is to facilitate the provision of public services and facilities or the removal of reservations where the land is no longer required.

The proposal is consistent as the rezoning is requested by Sydney Water, the public authority responsible for the site. The site is identified by Sydney Water as no longer being required for operational uses.

### 6.7 Direction 7.1 – Implementation of A Plan for Growing Sydney

The objectives of this direction is to give legal effect to the planning principles; directions; and priorities for subregions, strategic centres and transport gateways contained in A Plan for Growing Sydney.

The proposal is consistent with *A Plan for Growing Sydney* as per section 3 of this report, namely Direction 2.1: Accelerate housing supply across Sydney.

The proposal delivers on the following actions of Direction 2.1:

- Action 2.1.1: accelerate housing supply and local housing choices
- Action 2.1.3: Deliver more housing by developing surplus or under-used Government land.

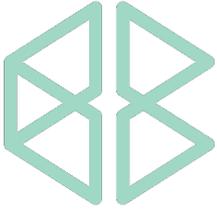

## **Section C – Environmental, social and economic impact**

### **7. Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?**

The proposal is consistent with the Ministerial Direction 2.1 as it does not adversely affect any critical habitat or threatened species, populations or ecological communities, or their habitats.

### **8. Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?**

The proposal is not affected by any other known environmental effects.

**9. Has the planning proposal adequately addressed any social and economic effects?**

The proposal would not have any other adverse social or economic effects that require management or mitigation. The proposal would have a positive social impact, through the provision of a through site link to the park.

**Section D – State and Commonwealth interests**

**10. Is there adequate public infrastructure for the planning proposal?**

The proposal is located within a suburb that is serviced by existing utility, community and transport networks. Council does not consider the scale of potential development, approximately 4 residential parcels, that could result from the rezoning to contribute to a significantly increased demand for services.

**11. What are the views of state and Commonwealth public authorities consulted in accordance with the Gateway Determination?**

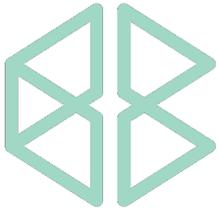

It is noted that the planning proposal has been sought for by Sydney Water. The proposal has not been the subject of consultation with State and Commonwealth public authorities, except for NSW Heritage.

NSW Heritage support the spot rezoning on the following grounds:

- the recommended controls are considered appropriate and in keeping with the surrounding residential development.
- a Conservation Management Plan (CMP) across the site is not required as there will be multiple owners under the Torrens title DAs in the future.
- the draft site specific Development Control Plan (DCP) is referred to NSW Heritage for advice.

Additional consultation with the following State and Commonwealth public authorities will be undertaken post Gateway:

- Ausgrid
- NSW Transport
- NSW Heritage (Draft Site Specific DCP)

## Part 4 – Maps

The maps which support this planning proposal are:

- Map 1 – Land Application Map on Current Aerial
- Map 2 – Existing Land Zoning Map
- Map 3 – Proposed Land Zoning Map
- Map 4 – Existing Heritage Map
- Map 5 – Proposed Heritage Map
- Map 6 – Existing Height of Building Map
- Map 7 – Proposed Height of Building Map
- Map 8 – Current Aerial Image

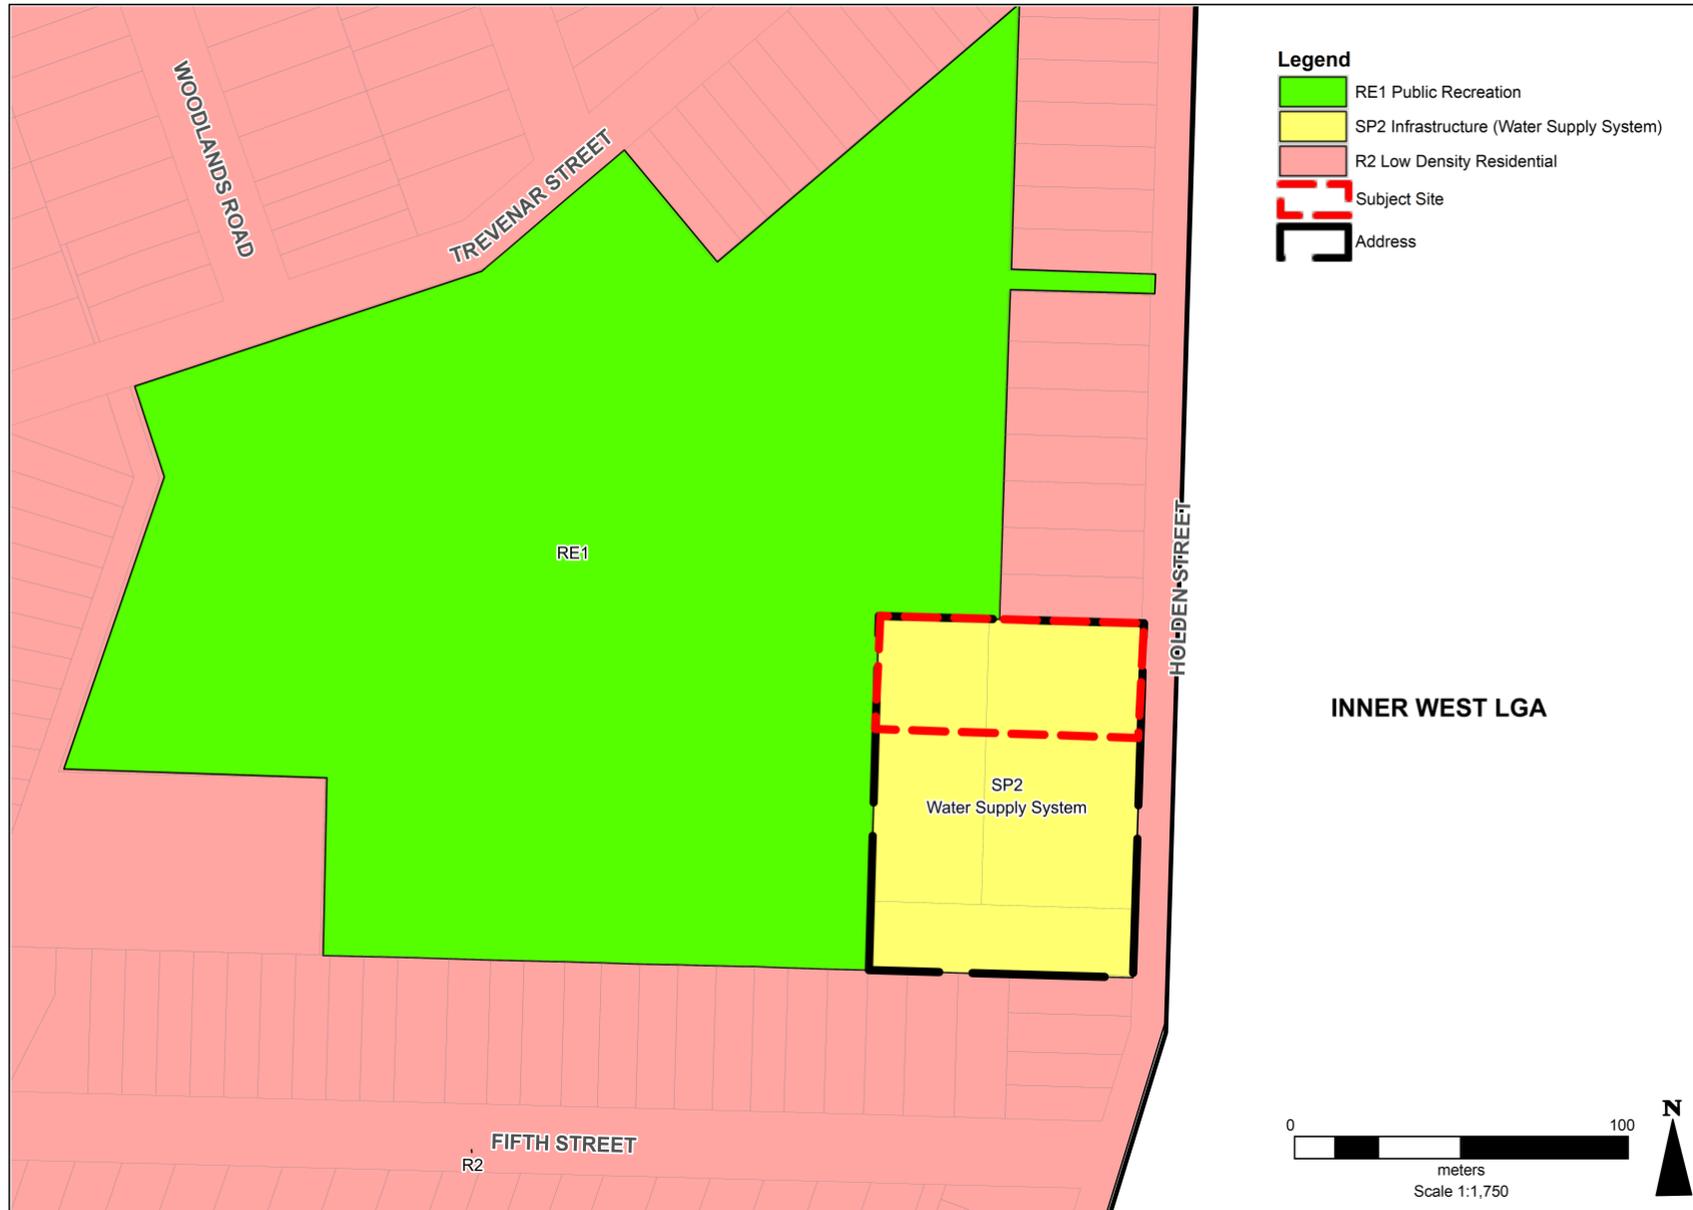

Map 1 – Land Application Map on Current Aerial

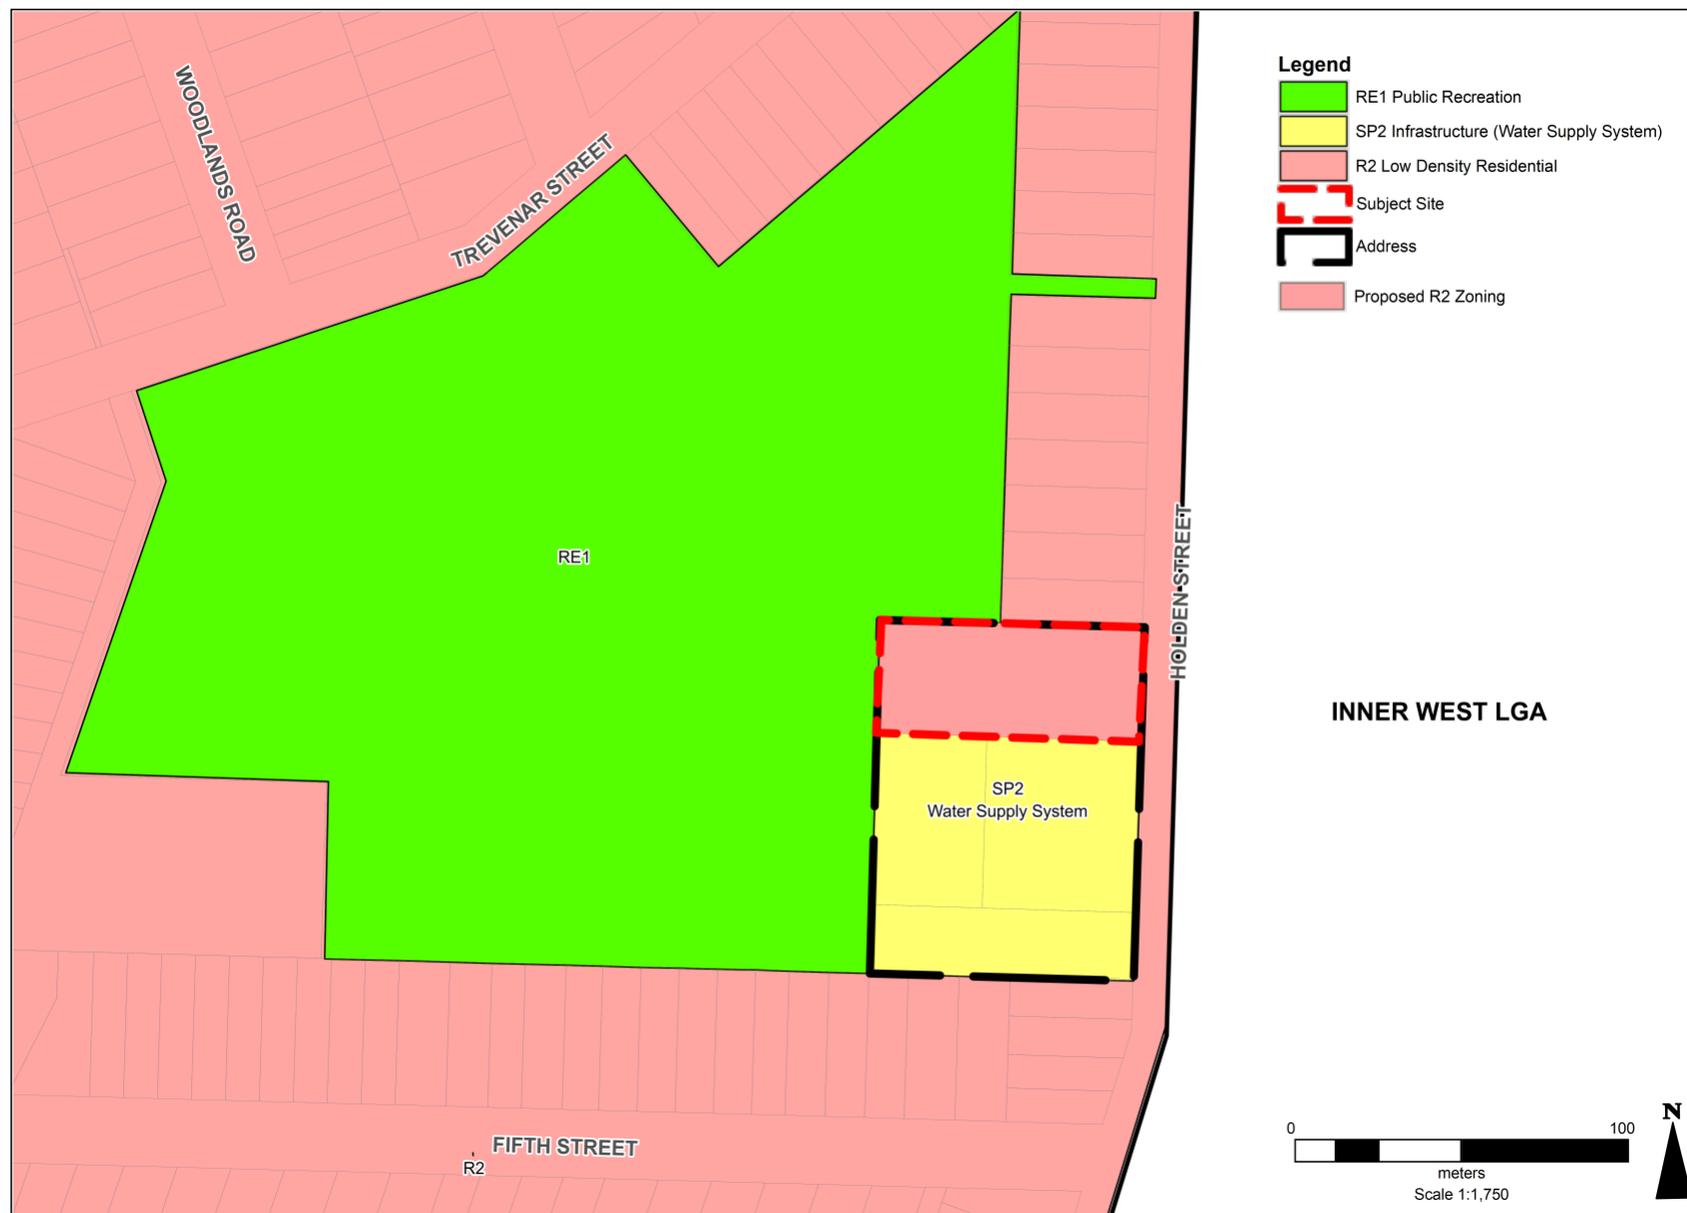

## Map 2 – Existing Land Zoning Map

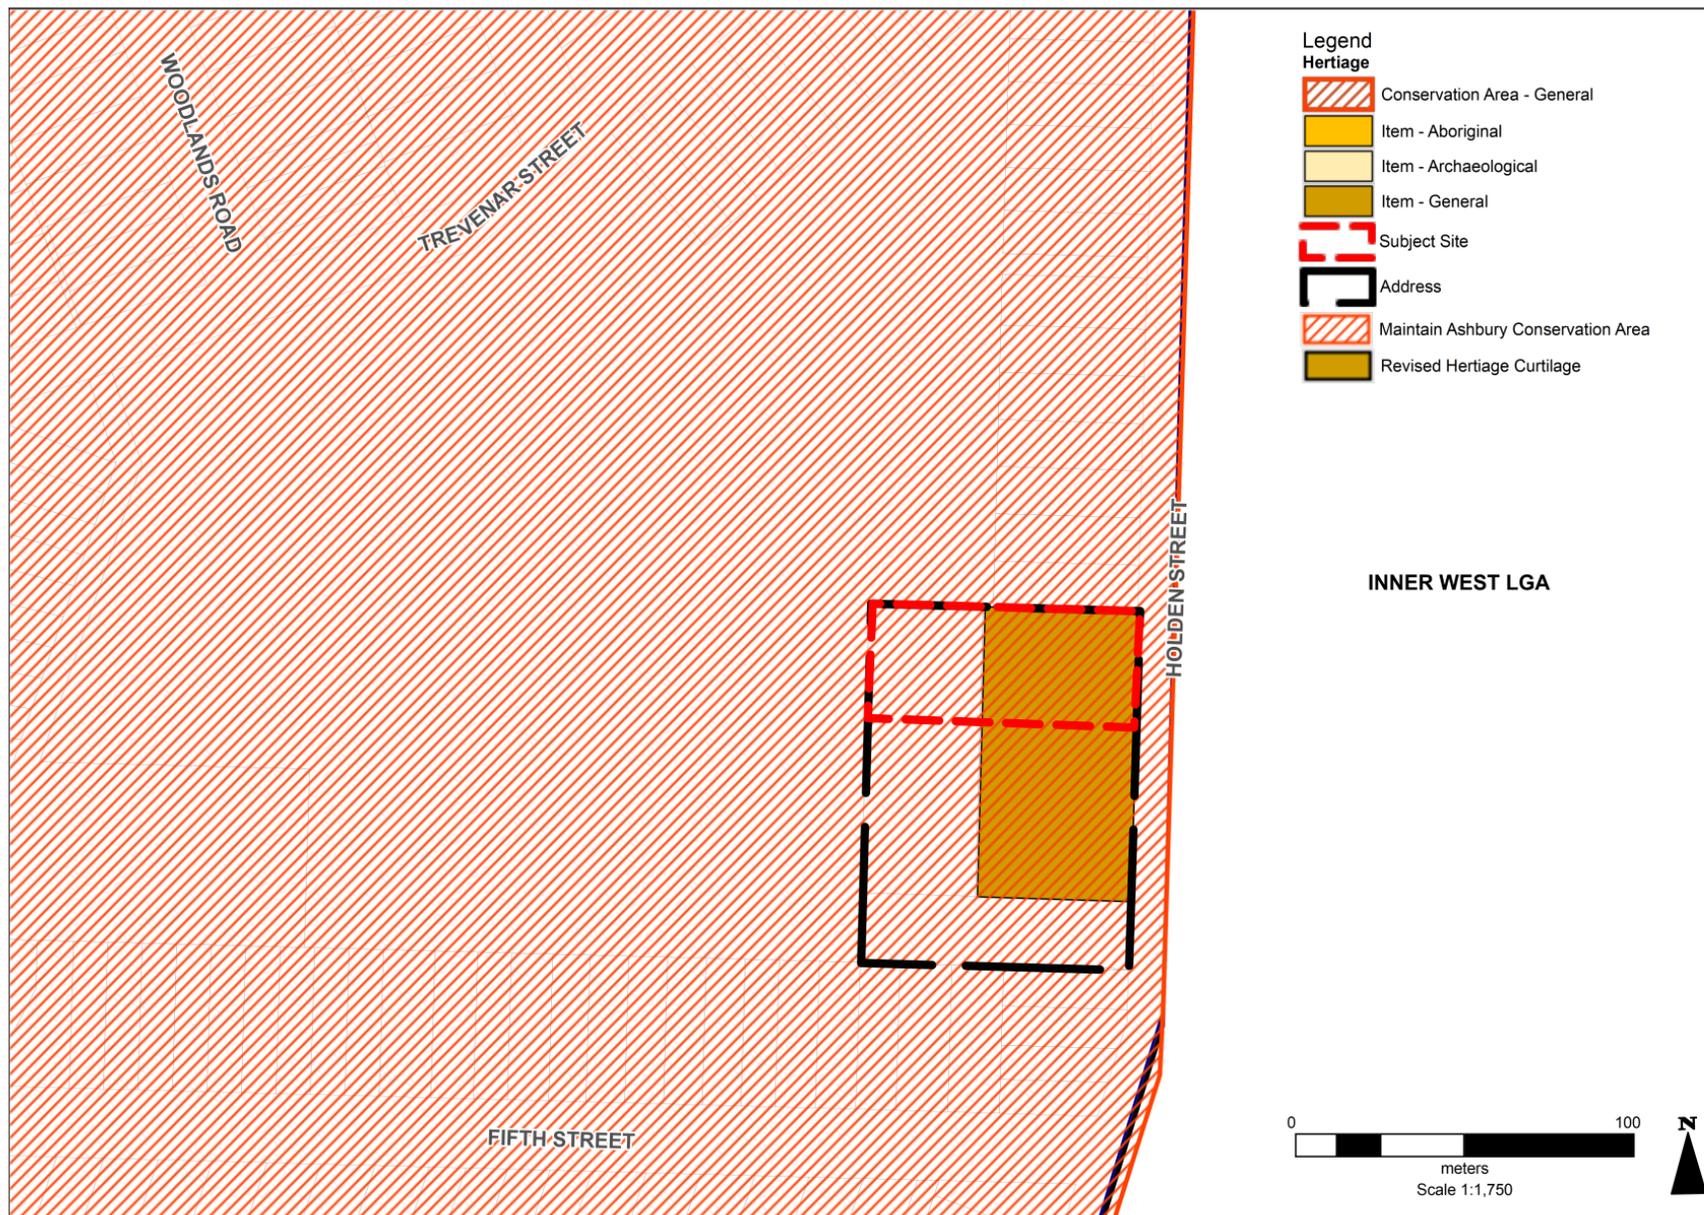

### Map 3 – Proposed Land Zoning Map

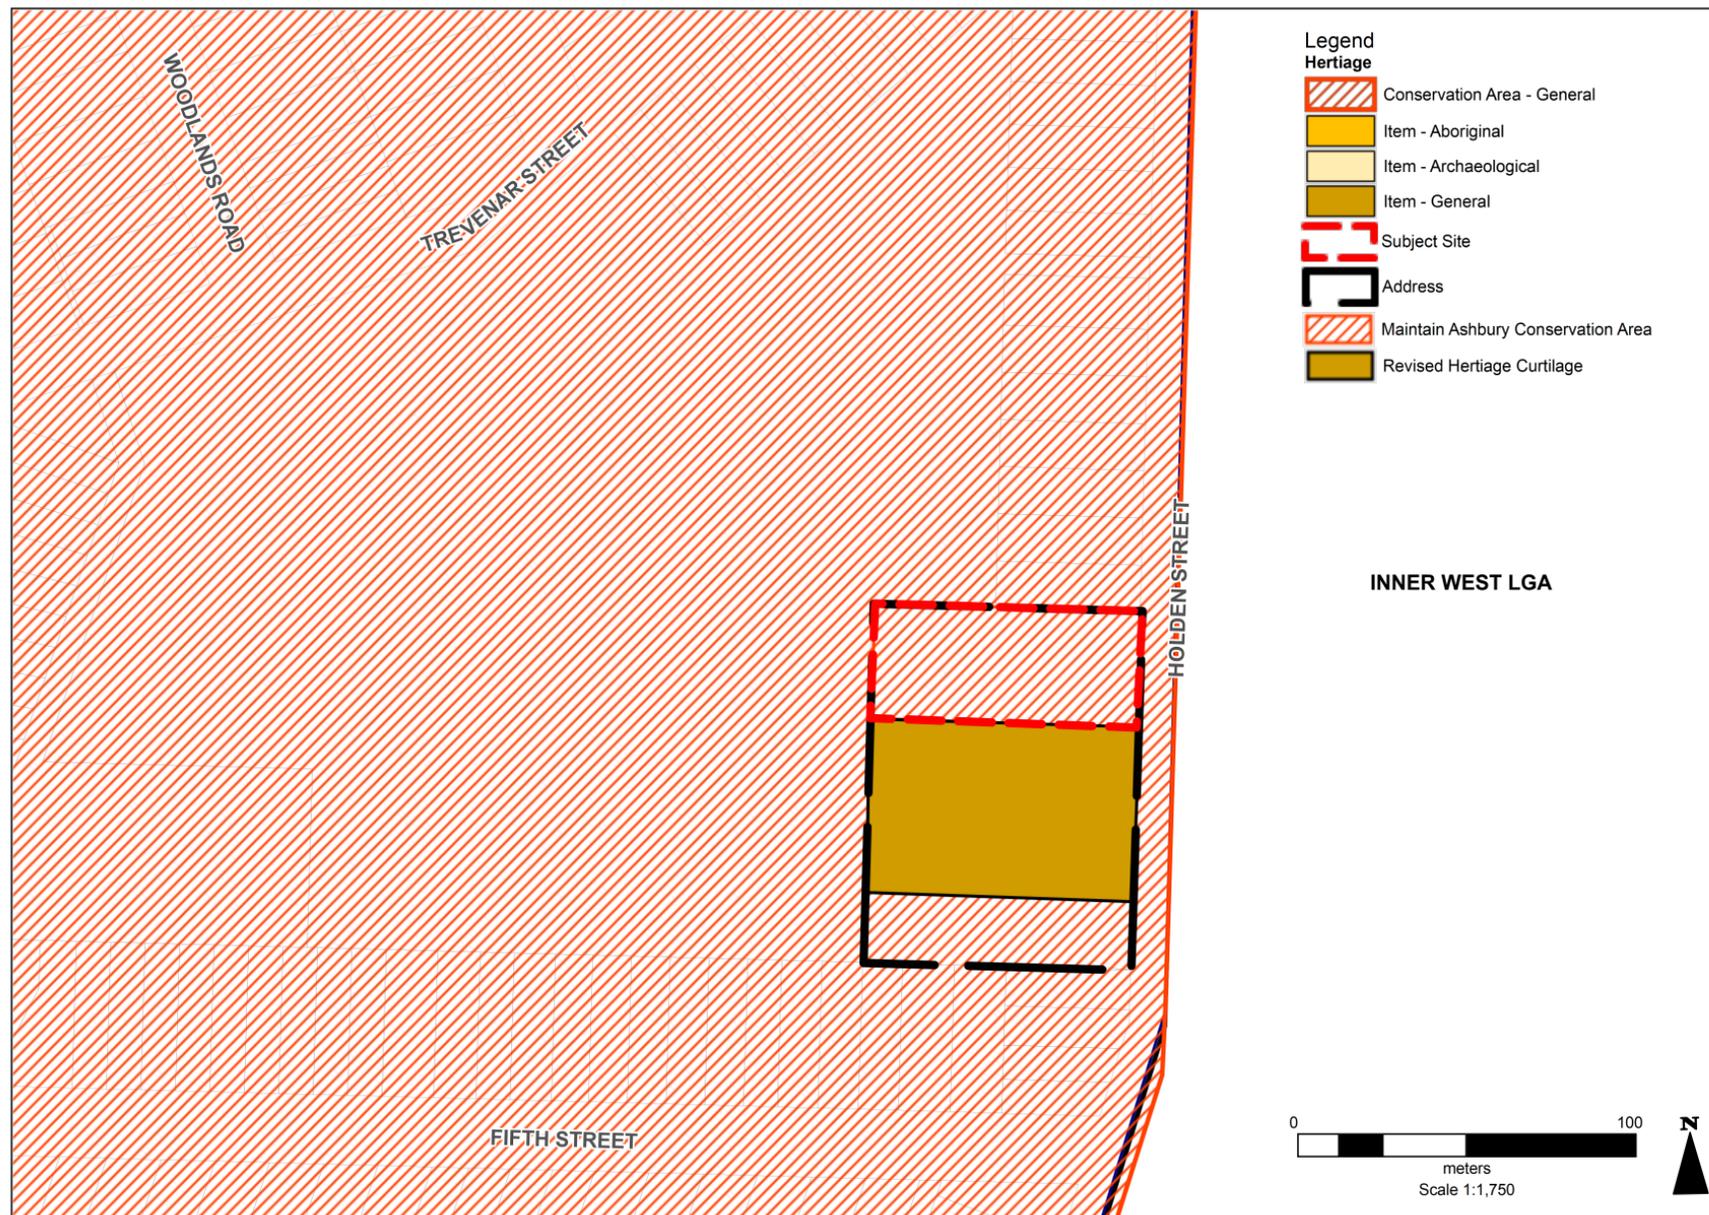

## Map 4 – Existing Heritage Map

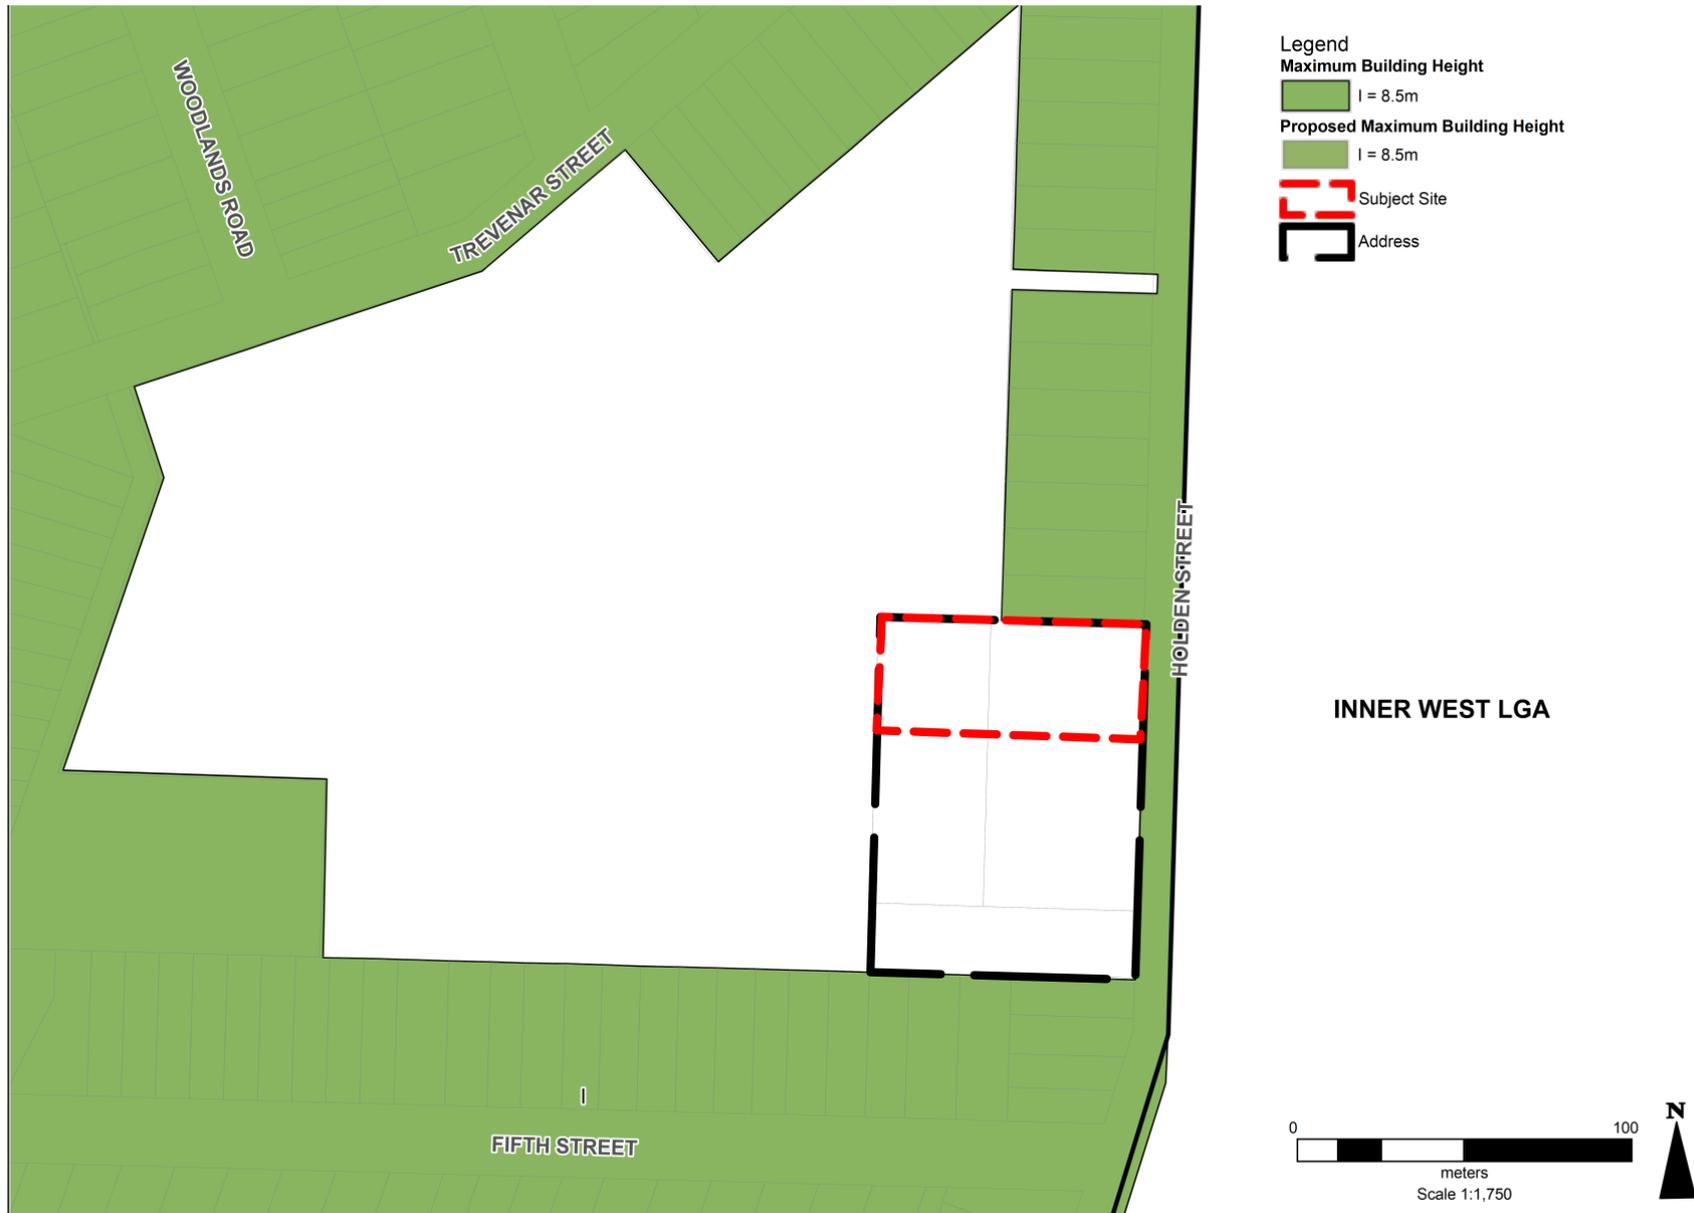

### Map 5 – Proposed Heritage Map

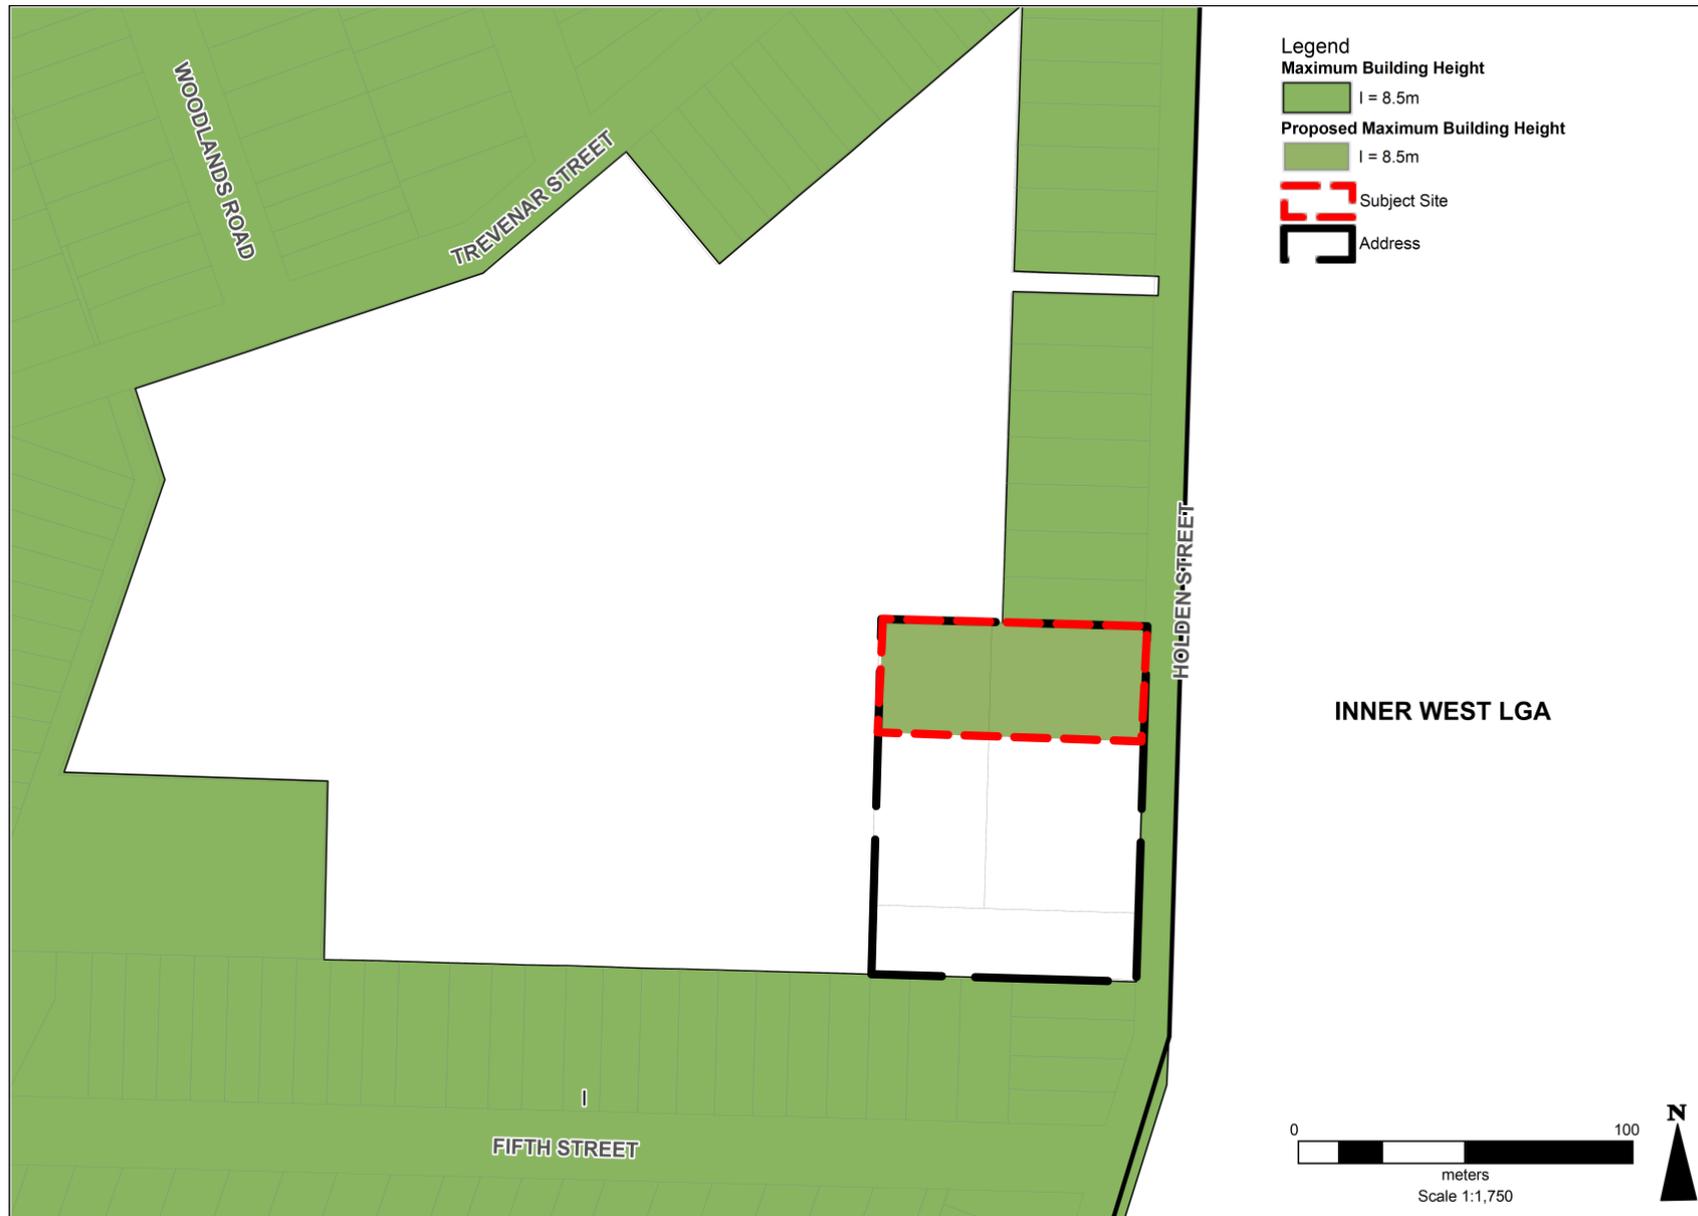

### Map 6 – Existing Building Height Map

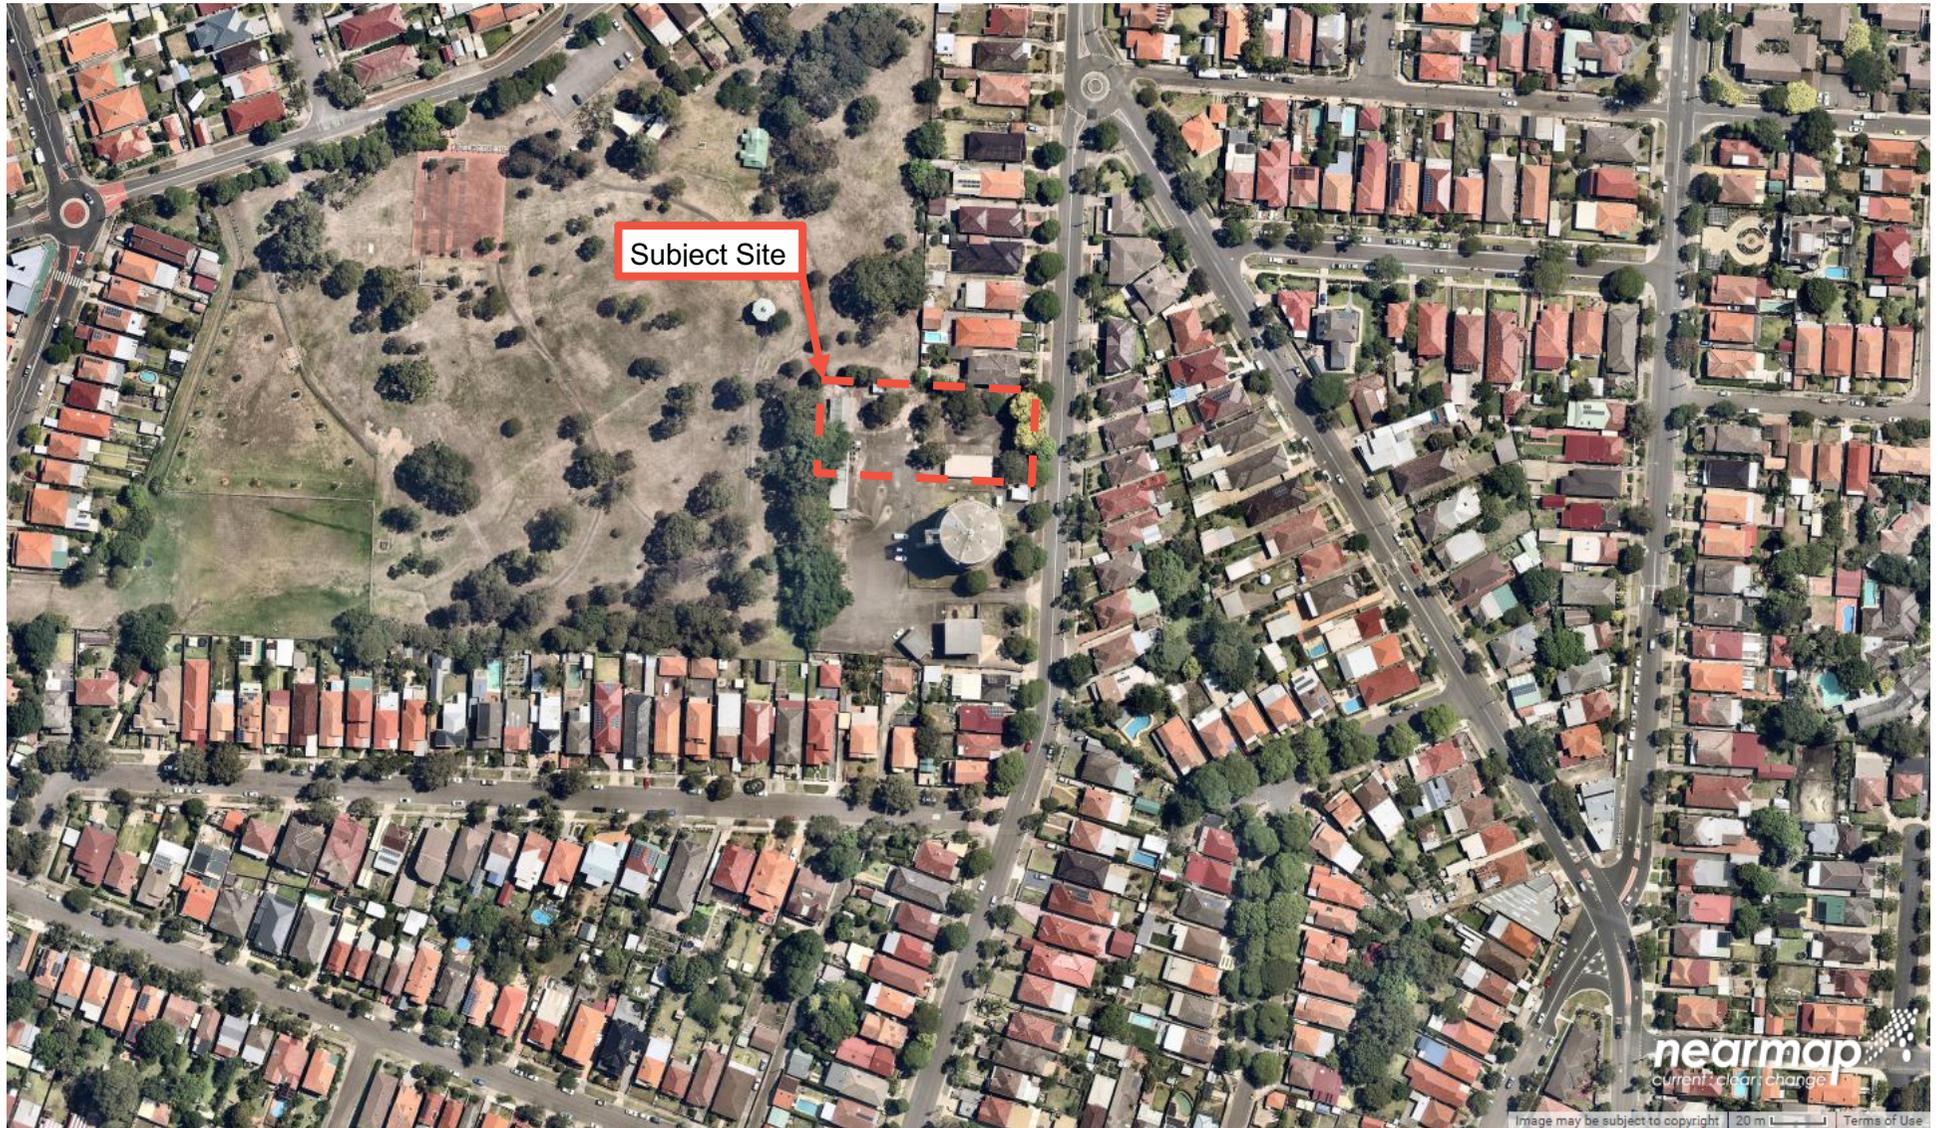

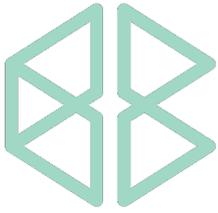

### Map 7 – Proposed Building Height Map

Map 8 – Current Aerial Image

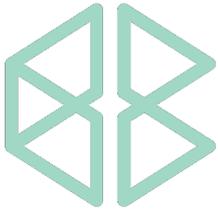

## Part 5 – Community Consultation

The exhibition period for this planning proposal is likely to take a minimum 28 days and would comprise:

- Notification in the local newspaper that circulates in the area affected by this planning proposal, if required.
- Displays on the Council corporate website.
- Written notification to affected and adjoining property owners.
- Written notification to public authorities including:
  - Ashbury Public School
  - Ausgrid
  - NSW Department of Education
  - NSW Heritage Office
  - Transport for NSW (including Local bus operators)

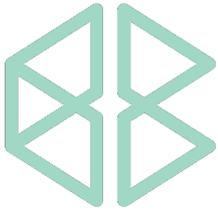

## Part 6 – Project Timeline

The table below provides a rough timeframe for completion of the planning proposal.

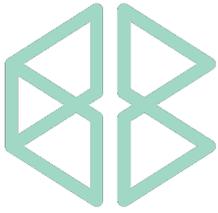

Task	Timing
Anticipated commencement date (Gateway Determination Issue Date)	Not known
Anticipated timeframe for the completion of required technical information	16 weeks
Commencement and completion dates for public exhibition period	Minimum 4 weeks commencing 2 weeks after receipt and finalisation of technical information.
Government agency consultation (pre and post exhibition as required by Gateway determination)	As specified in the Gateway determination. Anticipated timeframe is to run concurrently with the public exhibition period.
Dates for public hearing (if required)	Not applicable at this stage
Timeframe for consideration of submissions	2 weeks
Consideration of Planning Proposal by Council post exhibition (Ordinary Council Meeting)	5 weeks
Date of submission to the Department to finalise the LEP	29 weeks after gateway determination
Anticipated date the local plan-making authority will make the plan (if authorised) and/or forward to the PCO for publication.	2 weeks 31 weeks after gateway determination

Overall Council anticipates that planning proposal will be issued to the PCO for publication 31 weeks after the Gateway Determination is issued.

## ATTACHMENT A – State Environmental Planning Policies

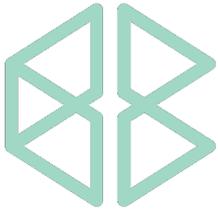

No.	SEPPs (as at June 2020)	Applicable	Consistent
19	Bushland in Urban Areas	Yes	Yes
21	Caravan Parks	Yes	Yes
33	Hazardous & Offensive Development	Yes	Yes
