Code 3:

Current Use: Electricity Substation

Former Uses: Electricity Substation

Assessed Significance: **Local**

Endorsed Significance:

**Statement of Significance:** The Railway Lane substation is a rare and representative example of a small yet monumental purpose designed and built structure designed in the Interwar Functionalist style. It is the fifth of 8 substations built by St George County Council to supply power to the local area. It was commissioned in 1939.

**Historical Notes or Provenance:** The Railway Lane substation is a purpose designed and built structure constructed in 1939. Lettering attached to the parapet reads; 'COUNTY COUNCIL ELECTRICITY SUB-STATION No 20'.

The St George County Council (SGCC) was founded in 1920 as a joint electricity supply undertaking of Bexley, Hurstville, Kogarah and Rockdale Councils. This was the first of the County Councils, which were authorised under the Local Government Act 1919 to allow joint undertakings by local councils, which spanned multiple local government areas. The SGCC electricity system was initially supplied with bulk electricity from NSW Department of Railways. Power was generated at White Bay Power Station, which commenced operation in 1913 and was transmitted at 11,000 kV to eight switching points along the St George railway line for suburban distribution.

By 1936, demand in the St George area had increased to the point where additional infrastructure was required. Up until that point, SGCC had fewer than 1000 electricity customers while electricity was used for street lighting throughout the suburbs of St George area. In 1936 an initial system of 8 control substations were proposed to be housed in 'attractive brick buildings' which would draw power from the railway electricity supply and distribute it to smaller pole, and later, kiosk-style substations. This ultimately expanded to 11

control substations.

The initial 8 were all built near the railway line to draw power from the railway network. Arncliffe, Banksia and Rockdale shared a bulk supply feed from the Railway Department's substation at Meeks Road, Sydenham. The Kogarah Substation also received its bulk feed from Meeks Road, but via a separate supply line. Allawah, Hurstville, Penshurst and Mortdale were all supplied from a Railway Department transformer at Hurstville. Interconnection with the Sydney region electrical systems began in 1945. The Electricity Commission (Elcom) took control of bulk electricity supply operations on 1/1/1953, but the final disconnection from the railway supply system did not occur until 1961, when the Hurstville substation (SS 10016) was finally disconnected.

The first SGCC substation was built at Allawah in 1936 (SS10014), which was decommissioned in 2004. This was followed by Kogarah (SS 10010 Gray St), Hurstville (SS 10016 Ormande Pde) and Rockdale (SS 10005 Seven Ways) in 1937 and Mortdale (SS10020 Cook St) and Banksia (10002 Hattersley St) in 1938. Substation construction was suspended for nearly a decade due to World War II and its aftermath, although NSW Railways did construct a new substation at Carlton in 1944 to cope with local demand. Arncliffe substation finally commenced operation in 1948 and Penshurst substation (SS10018 Bridge St) in 1951, although the land had been purchased in 1945 and the plans completed in 1949. Further control substations were built at Kingsgrove (1951), Carlton (1954) and Gungah Bay Rd, Mortdale (1955). Elcom completed the Blakehurst Zone Sub in 1964, the same year as the Peakhurst Regional 132/33kV substation, which supplied bulk power to the entire area. In 1936, SGCC had 64 pole substations, supplied by the control subs. By 1979, when SGCC was absorbed into Sydney County Council, that had grown to 653 pole and kiosk substations. Connection to the network and demand for electricity grew sharply from 1960, necessitating a large expansion of infrastructure. By the mid-1970s, growth, and therefore infrastructure expansion had slowed.

Electrical equipment within substations tends to be of a common arrangement. The equipment consists of a high voltage (sometimes referred to as a high tension) switchboard, which receives the bulk power supply at 11,000 kV from a zone substation. This is passed to one or two transformers which will lower the voltage and pass it to a low voltage (or low tension) switchboard for local distribution, typically at 240v for domestic uses. Both switchboards allow portions of the system to be isolated or taken off line to undertake maintenance or correct faults. The interconnection of substations into the energy grid allows sections of the system to be taken off-line without disrupting supply to customers. "Cottage" type or indoor substations were built in the early- to mid-twentieth century when the switching and transformer equipment was quite large. Switch gear often has exposed electrical components, which are dangerous and larger transformers can generate a considerable amount of noise, necessitating a brick enclosure. Typically, the function of an average suburban substation can now be performed by a small kiosk which contains fundamentally similar components to the indoor substations in a much more compact package. Kiosk style substations came into use from the mid-twentieth century and buildings are now only required around the larger electricity installations.

(taken from Energy Australia Heritage Register listing)

State Theme

Utilities

Local Theme

(none)

Designer: St George County Council

Maker / Builder:

Year Started: 1938

Year Completed: 1939

Circa: No

**Physical Description:** Substation 10020 is a single building with a symmetrically designed façade. It is an example of Interwar Functionalism with plain monumental surfaces and horizontal banding brickwork to the base of the building. Fenestration is restricted to a small glass block panel above the main centrally - placed entry doors. Walls are a uniform red textured brick, much of which has been rendered, probably at a later date.

Stylistic elements include monumental massing, stepped skyline and façade. Decorative elements include three horizontal; recessed string courses near ground level and a small and simple cantilevered reinforced concrete awning above the main entry.

The Railway Lane substation is constructed in face brick with a glass block window panel and projecting reinforced concrete awning.

**Physical Condition:** The building is generally in good condition. The original decorative front fence is rusted. There are plants in brickwork (should be removed) and some graffiti.

**Modification Dates:** Gutters and downpipes replaced

**Recommended Management:**

**Management:** Recommended Management      No Action, follow existing management controls

**Further Comments:**

**Criteria a)** The fifth of the original 8 control substations built by St George County Council, to supply power to surrounding suburbs.

**Criteria b)**

**Criteria c)** It is an example of a small yet monumental purpose designed and built structure designed in the Interwar Functionalist style. The building is in the middle of a carpark and can be viewed in the round.

**Criteria d)** While the connection of electricity to the area was undoubtedly a significant event at the time, the commonplace nature of electricity infrastructure today limits the social significance of this item.

Item Name: **Electricity Substation No. 10020**

Location: **31 Cook Street, Mortdale [Hurstville]**

## Criteria e)

**Criteria f)** This substation is one of 7 remaining original substations constructed by St George County Council. It is typical in scale for a suburban substation installation and its electrical gear is also typical. Architecturally, each of the St George County Council substations is different, however this site shares the greatest similarity with the Banksia (SS 100002) and Hurstville (Allawah) (SS10014) substations.

## Criteria g)

**Integrity / Intactness:** Good condition externally and internally. Electrical gear may have been upgraded.

Assessed Significance: **Local**

Endorsed Significance:

**Statement of Significance:** The church is a good representative example of a substantially intact brick and tile Inter-War Gothic style Church, a relatively rare style within the Hurstville LGA. The Church has been a focus for the local community, and integral to its historical development as part of the growth of Hurstville.

**Historical Notes or Provenance:** This lot was part of an estate that was shown as undeveloped in the 1893 Mort's Township Subdivision advertisement. The site, bounded by Mort's Road, Victoria Avenue, Laycocks' Road (now Penshurst Street) and the railway was occupied by a cottage and a gatekeeper's cottage. The land was later subdivided and the current church was built with two memorial stones laid on the 29th October, 1910 -One to E. Knight Esq. and the other to T Carter Esq.

# Hurstville Heritage Inventory

## State Heritage Inventory

SHI Number

**1810166**

Study Number

**23**

Item Name: **Mortdale Uniting Church (Church only)**

Location: **18 Morts Road, Mortdale [Hurstville]**

**Physical Description:** Mortdale Uniting Church is a small Inter-War Gothic style building located. It has a gable roof with corrugated iron roof, and original gable vents. The principal façade has dark red-brown coloured brickwork, rendered plinth and string course, symmetrical window openings and attached vestibule with entrances to the side. The original Gothic brick arched window cases have timber frame. The vestibule roof matches the pitch and material of the main church, and features a single Gothic brick arched window cases similar to those within the main church. At both sides of the vestibule are original Gothic brick arched door cases with vertical boarded doors. At the side is a post war brick structure that appears to be used as parish office.

**Physical Condition:** Generally good externally.

### Modification Dates:

**Recommended Management:** The church should be retained and conserved. A Heritage Assessment and Heritage Impact Statement should be prepared for the site prior to any major works being undertaken. Before the commencement of works, photographic and archival recording (in accordance with Heritage Branch Guidelines) should be undertaken.

**Management:** Statutory Instrument                      List on a Local Environmental Plan (LEP)

### Further Comments:

**Criteria a)** Mortdale Uniting Church has been a focal point for the local Uniting community from the early twentieth century. It provides tangible evidence of the early development and establishment of religious institutions in the Hurstville LGA.

**Criteria b)** Research to date does not indicate any historical association with a person or groups that are important to the historical development of the area.

**Criteria c)** The church is a good example of an early twentieth century ecclesiastical building displaying Inter-War Gothic Revival stylistic influence. Later additions do adversely impact its contribution to the streetscape. Its aesthetic significance is enhanced by its proximity to Cons Deli at 16 Morts Road which also presents in its original federation condition.

**Criteria d)** Social significance of the place requires a more detailed study to ascertain its value for the local community. However, it could be anticipated that the Church has importance to the local community as a place of worship since the early 1900s.

**Criteria e)**

**Criteria f)** This style of church is uncommon within the Hurstville LGA.

**Criteria g)** Mortdale Uniting Church is representative of the early 1900s church buildings designed with Inter-War Gothic Revival stylistic influence.

**Integrity / Intactness:** Largely intact externally

Assessed Significance: **Local**

Endorsed Significance:

**Statement of Significance:** Mortdale Fire Station is located on Morts Road near the corner of Cook Street, in the southern suburb of Mortdale. The fire station was built in 1915 to replace an earlier station established in 1908. It of significance, representing the strong and continuous presence of emergency services within the Hurstville LGA. It is representative of the style of firestations built by architects Spain, Cosh, and Dods who worked on fire stations throughout Sydney.

**Historical Notes or Provenance:** Designed by Sydney architects Spain, Cosh and Dods for the Board of Fire Commissioners in 1913, it was built to replace a weatherboard building which had been erected on the site in 1908. This team of architects also designed and supervised the construction of Marrickville, Katooma, and Wollongong station buildings, while Spain and Cosh were two of the architects who designed the Hurstville Fire station in 1912. It was built to accommodate the manual engine and 2 horses which were in use at the station at that time. The station was closed in 1945 but reopened in 1952, as a volunteer brigade.

**22**

Item Name: **Mortdale Fire Station**

Location: **38 Morts Road, Mortdale [Hurstville]**

Year Started:                      Year Completed: 1913                      Circa: No

**Physical Description:** Inter-War Free Classical style: a one-storey red-brick structure, with a tiled roof and brick parapet, situated in a central location within a suburban block. The brick parapet has a horizontal strip motif painted yellow that has also been used along the ridge of the building. One elevation of the building has been painted yellow to match the strip detail, while the remainder of the building presents in original condition.

**Physical Condition:**

**Modification Dates:**

**Recommended Management:** The building should be retained and conserved. A Heritage Assessment and Heritage Impact Statement should be prepared for the building prior to any major works being undertaken. Archival and photographic recording, in accordance with Heritage Council guidelines, should be undertaken before any major changes.

**Management:** Statutory Instrument                      List on a Local Environmental Plan (LEP)

**Further Comments:**

- Criteria a)** The building has historical association with the local community since commencing its operation in 1913.
- Criteria b)** The Fire Station has historical association with the Architects Spain, Cosh and Dods.
- Criteria c)** The building is sympathetic to the character of the early 20th Century commercial strip featuring characteristics of the free classical style.
- Criteria d)** The building is held in high regard for its links with the local community especially the families of volunteers/retained firemen.
- Criteria e)** The Fire Station has potential to provide information on the architecture and work of Spain, Cosh and Dods.
- Criteria f)** The building is not a rare example of its type.
- Criteria g)** The Fire Station is also significant as a representative example of a large well crafted Interwar Free Classical municipal building. It is also representative of the style of firestations built by architect Spain, Cosh, and Dods who worked on fire stations throughout Sydney.

**Integrity / Intactness:** Generally intact

Current Use: Memorial Park

Former Uses: Memorial Park

Assessed Significance:

Endorsed Significance:

**Statement of Significance:** An important memorial site commemorating members of the community who served in the First and Second World Wars. The memorial has great social significance to the local community. The site is also of high aesthetic significance being a rare garden of this scale in the local area and surrounded by mature landscaping including Moreton Bay Fig trees.

**Historical Notes or Provenance:** Originally known as Newman's Paddock in the 1880s and unoccupied, until it was subdivided and sold in 1893-4 as the Morts Township Estate. It is likely much of the estate, although sold was not fully developed until after World War II, when residential development of the area began in earnest.

In 1934 the original obelisk and plinth War Memorial was moved from near Mortdale Railway station where it was built in 1922 after Sir Charles Rosenthal laid the foundation stone on 7th October. It was erected with funds raised by the Mortdale Churches Patriotic League. The ceremony of unveiling the monument was held on 18 November 1922. The park was also laid out in its current form, with a timber rotunda by 1935.

In 1965, due to the Moreton Bay fig trees that surround the park, and their destructive roots, the memorial was demolished and replaced with the current central brick cenotaph to which is affixed a number of honour rolls. Flag staffs, service commemorative objects, and a number of individual memorials are all set within a well-kept tranquil grassed area with numerous shade trees. It also contains individual Navy, Airforce and Nursing Service memorials.

The name "Mortdale Memorial Park" was assigned to the Reserve in July 1997. It is central to Anzac day events, and it also used for community events such as the Carols by Candlelight

**Physical Description:** The park features a central brick cenotaph to which is affixed a number of honour rolls. Flag staffs, service commemorative objects, and a number of individual memorials are all set within a well-kept tranquil grassed area with numerous shade trees. Individual Navy, Airforce and Nursing Service memorials are presented in the memorial plaques. The park contains mature landscaping, characterised by Moreton Bay Fig trees framing the park.

**Physical Condition:** Good

**Modification Dates:** In 1965 the original memorial was replaced with the current memorial.

**Recommended Management:** The park should be retained and conserved. A Heritage Assessment and Heritage Impact Statement should be prepared for the site prior to any major works being undertaken. Before the commencement of works, photographic and archival recording (in accordance with Heritage Branch Guidelines) should be undertaken.

**Management:**

**Further Comments:**

**Criteria a)** The Gardens have historic significance at a local level because of their association with the early Hurstville/Mortdale community and the development of civic pride.

**Criteria b)**

**Criteria c)** The Gardens make a positive contribution to the character and quality of the townscape and to the heritage of Mortdale.

**Criteria d)** The Gardens have been a focus for the community and have social significance

**Criteria e)**

**Criteria f)** Memorial gardens of this scale are rare in the municipality.

**Criteria g)**

**Integrity / Intactness:**

Assessed Significance: **Local**

Endorsed Significance:

**Statement of Significance:** Originally built for St John's, Wahroonga, in 1905, the George Fincham Pipe Organ is of local (even state) significance for its historical, aesthetic and cultural values. It is of historical importance as an example of one of Australia's finest and largest organs building companies. It's an increasingly rare example of an Australian organ from this period still in its original condition.

**Historical Notes or Provenance:** The 1905 George Fincham Pipe Organ, originally built for St John's, Wahroonga, was purchased by the Hurstville Christadelphians in 1961 and moved to its current location between 1986 and 1992 by congregation member John Wright, who has continued to maintain the organ with Lloyd Schwer. The organ was built by George Fincham, one of Australia's finest and largest organbuilding companies and is an increasingly rare example of an Australian organ from this period which is still in original condition. In 2008, the Heritage Branch, NSW Department of Planning, kindly assisted the restoration of the organ with a grant of \$21,000. Peter Jewkes and company, along with valuable heritage advice from Dr Kelvin Hastie, undertook the recent restoration work on the organ. The historic organ continues to be regularly used to accompany worship services held at the hall.

Item Name: **George Fincham Pipe Organ**

Location: **1 Myall Street, Oatley [Hurstville]**

Designer:

Maker / Builder:

Year Started: 1905      Year Completed: 1905      Circa: No

**Physical Description:** The organ is described in the Hurstville District Christadelphian Ecclesia's website under the restoration works as below:

"While the instrument is of modest dimension, there was no pressure to make additions, or undertake modifications to provide upperwork. The sound carries very well in what is a small but lofty building: its adequacy for leading singing was ably demonstrated during the hymn festival of 31 October. The tonal quality of each rank is exceptional: especially fine are the two flutes, a superb Swell Violin Diapason, the very delicate and well-voiced Dulciana and Gamba ranks, as well as bright and clear 4' principals, which compensate for the lack of 2' tone. In a statement of significance prepared during his documentation of 1985, John Stiller made the following comments:

'This instrument is a very fine example of a Fincham organ and has many outstanding tonal qualities. The Great Claribel is very clear and has a distinct chime. The Swell Gedact is beautifully mellow and is a characteristic example of skilled voicing of wooden pipes, which is a hallmark of Fincham organs. Overall there is good tonal contrast and definition between the various registers, supported by a solid Pedal Bourdon.'

The personnel involved in the project were: Murray Allan, Rodney Ford, Peter Jewkes, David Morrison, Kornelius Schmidt, Daniel Tiedman and Carmel Grech (office administrator). The organ consultant was Dr Kelvin Hastie OAM and the project manager was Dr Rachel Hocking."

(Information obtained from <http://www.sydneyorgan.com/HurstvilleChristadelphian.html>)

**Physical Condition:** Good.

**Modification Dates:**

**Recommended Management:** Maintain the organ in accordance with manufacturers recommendations.

**Management:** Statutory Instrument      List on a Local Environmental Plan (LEP)

**Further Comments:**

- Criteria a)** Originally built for St John's, Wahroonga, in 1905, the George Fincham Pipe Organ is historically important as an example of one of Australia's finest and largest organbuilding companies still in its original condition.
- Criteria b)** The Organ was built by George Fincham.
- Criteria c)** It is a fine and excellent pipe organ that remains in its original condition
- Criteria d)** Social significance of the place requires a more detailed study to ascertain its value for the local community. However, it is anticipated that it would be valuable to the members of the

Assessed Significance: **Local**

Endorsed Significance:

**Statement of Significance:** Constructed following the sale of the Pride of Mortdale estate in 1913, Margrathea is of local significance for its historical and aesthetic values. It is evidence of the late Federation period development in the area that has been under development pressure in the recent years, and contributes to the streetscape with its modest architectural features including symmetrical facade and prominent jerkin head roof with a central gabled porch supported on four timber slender posts.

**Historical Notes or Provenance:** Originally part of a 145 acre grant made to William Barton, this parcel of land was later sold as lot 64 of the Pride of Mortdale estate in 1913. The current house "Margrathea" was built some time not long after this on Lot 110c in the Deposited Plan of 7148. The house has had few external changes made since this time; however the rear of block of land surrounding it was further subdivided to form a number of properties facing onto Anderson Rd. The current owner purchased the property in 1979.

## State Heritage Inventory

SHI Number

**1810198**

Study Number

**25**

Item Name: **Margrathea**

Location: **41 Boundary Road, Mortdale [Hurstville]**

Year Started: 1913      Year Completed: 1913      Circa: Yes

**Physical Description:** A single-storey weatherboard late Federation period cottage with a high pitch jerkin head roof and a separate skillion veranda roof with a gabled entry porch supported on four slender timber posts and metal valance. It has a symmetrical facade with a group of two sash windows flanking the central entrance. A proportionally scaled flat roofed garage is aligned with the main facade of the house but beyond the veranda line. The garden with no fence still retains its original stone pathway with largely grassed garden beds on both sides.

**Physical Condition:** Generally in good condition.

### Modification Dates:

**Recommended Management:** Maintain and preserve the house in its current condition. No intrusive additions or alterations should be made to the main portion of the house.

**Management:** Statutory Instrument      List on a Local Environmental Plan (LEP)

### Further Comments:

- Criteria a)** Constructed following the sale of the Pride of Mortdale estate in 1913, Margretha is historically significant as an evidence of the late Federation period development in the area that has been under development pressure in the recent years.
- Criteria b)** Research to date does not indicate any historical association with a person or groups that are important to the historical development of the area.
- Criteria c)** Margretha is a simply detailed weatherboard late Federation period cottage with a prominent jerkin head roof and a skillion veranda with a central gabled entry porch supported on four slender timber posts and metal valance. With its original stone path and no fencing it contributes to the streetscape of Boundary Road opposite Kemp Street, which is part of the Kemps Estate Special Character Area.
- Criteria d)** Social significance of the place requires a more detailed study to ascertain its value for the local community. However, it is anticipated that the house's Federation style would provide a historical connection to the local community.
- Criteria e)**
- Criteria f)** There are not many late federation period weatherboard cottages in a good and relatively intact condition in the Hurstville LGA.
- Criteria g)** Margretha is representative of simply detailed late Federation period weatherboard cottages.

**Integrity / Intactness:** Relatively intact externally.
