Current Use: Residential Housing

Former Uses: Residential Housing

Assessed Significance: **Local**

Endorsed Significance:

Statement of Significance: "Bangala" at 7 Myall Street in Oatley is a good example of Inter-War bungalows that were built well after the Oatley Estate subdivision in 1904.

It has high contributory values to the streetscape featuring the characteristics of the Inter-War period and built with reference to Federation Queen Anne style architectural elements. It has high aesthetic value due to its asymmetrical facade with a projecting gabled bay flanked with a veranda.

The veranda features an arched slatted timber valance and timber balustrade, red-face brick walls, timber shingled awning, double hipped roof with terracotta ridge roof extending over the veranda, rough cast rendered half timbered gable, an intact timber palling fence on a brick dwarf wall and a tall rough cast chimney with brick corbelled top and pot.

Historical Notes or Provenance: Part of the 1904 Oatley Estate subdivision, the current house now known as "Bangala" was constructed by 1926 at which time it was known as "Coo Ley". It was owned by Mrs Lavinia Rugless until she sold it to Francis Arthur McQuade (draftsman) and Elizabeth Norah McQuade in 1956. In 1962, it was owned by Mr Edward George Patrick Beevons and Mrs Beryl Dorothy Beevons.

Item Name: **Bangala**

Location: **7 Myall Street, Oatley [Hurstville]**

Designer:

Maker / Builder:

Year Started: 1926

Year Completed: 1926

Circa: Yes

Physical Description: The house known as "Bangala" is typical of Inter-War Bungalow with Federation Queen Anne style architectural elements. It features an asymmetrical facade with a projecting gabled bay flanked with a veranda featuring arched slatted timber valance and timber balustrade, red-face brick walls, timber shingled awning above projecting bay window, double hipped roof with terracotta ridge roof extending over the veranda, rough cast rendered half timbered gable with an intact timber palling fence on a brick dwarf wall and a tall rough cast chimney with brick corbelled top and pot.

Physical Condition: Very good.

Modification Dates:

Recommended Management: Continue to maintain the property and ensure any major changes are accompanied by a Heritage Impact Statement indicating the significant internal and external fabric of the house.

Management: Statutory Instrument List on a Local Environmental Plan (LEP)

Further Comments:

- Criteria a)** 7 Myall Street in Oatley is a good example of an Inter-War house built c.1926 and is representative of the Oatley Estate subdivision that occurred in 1904.
- Criteria b)** Research to date does not indicate any historical association with a person or groups that are important to the historical development of the area.
- Criteria c)** This house is contributory to the streetscape of Myall Street. It features characteristic elements of the Inter-War bungalows with reference to Federation Queen Anne style architectural elements. It has high aesthetic value due to its asymmetrical facade with a projecting gabled bay flanked with a veranda featuring arched slatted timber valance and timber balustrade, red-face brick walls, timber shingled awning, double hipped roof with terracotta ridge roof extending over the veranda, rough cast rendered half timbered gable, an intact timber palling fence on a brick dwarf wall and a tall rough cast chimney with brick corbelled top and pot.
- Criteria d)** Social significance of the place requires a more detailed study to ascertain its value for the local community. However, it could be anticipated that the house's Inter-War period style and architectural character would provide a historical connection to the local community.
- Criteria e)** The house has potential to provide evidence on the construction system of the Inter-War

Assessed Significance: **Local**

Endorsed Significance:

Statement of Significance: 36 Lloyd Street, Oatley is of local significance as one of a few surviving examples and evident of Inter-War Californian bungalows in the area. It is evidence of development in Oatley that occurred in the 1920s. Its relatively large scale and more elaborate architectural detailing which sets it apart from other modest returned soldiers housing that were built in Lloyd Street after World War II. Its notable features, including a prominent low-pitch roof with broken pitch extending over the deep L-shaped veranda. The veranda supported by short sphere shaped columns on tall square brick piers and dwarf wall panels in between. The street fronting gable and the simple garden landscaping contribute significantly to the streetscape.

Historical Notes or Provenance: Part of James Oatley's 300 acre land grant, this parcel was sold by his estate to Charles Cecil Griffiths in 1881. It was then broken up into suburban lots and sold. This property was one of those sold as part of the Como Lakes subdivision, but like much of Oatley, it was not developed at this stage. The house was constructed around the early 1920s.

Item Name: **House**

Location: **36 Lloyd Street, Oatley [Hurstville]**

Maker / Builder:

Year Started: 1943 Year Completed: 1943 Circa: Yes

Physical Description: 36 Lloyd Street, Oatley is an Inter-War house featuring characteristic elements of a late Californian Bungalow style house. It is a relatively large house unlike other houses that were built for the World War II returned soldiers. Notable features include a prominent low-pitch roof with broken pitch extending to form a turned deep shaded verandah supported by short sphere shaped columns on tall square brick piers and dwarf wall panels in between boarded eaves and exposed timber rafters. Of particular interest is the L-shaped verandah and some earlier Federation bungalow features including the timber shingled awning and street-facing timber battened gable. The street boundary of the property is defined by a two-course face brick dwarf wall and tall piers. Garden shrubs form part of the fence and garden landscaping.

Physical Condition: Very good.

Modification Dates:

Recommended Management: Retain and maintain its existing form and streetscape presentation. No additions should be made to the main portion of the house. Existing pavilion style rear addition is appropriately sited and should set an example for any future replacement additions to the rear.

Management: Statutory Instrument List on a Local Environmental Plan (LEP)

Further Comments:

- Criteria a)** 36 Lloyd Street in Oatley is a large Post-War bungalow developed for World War II returned soldiers. It is evident of development that occurred in Oatley during and after the World Wars.
- Criteria b)** Research to date does not indicate any historical association with a person or groups that were important to the historical development of the area.
- Criteria c)** 36 Lloyd Street, Oatley is an aesthetically impressive Post-War house featuring characteristic elements of a late Californian Bungalow style house. It is a relatively large house unlike other houses that were built for the World War II returned soldiers. Its notable features include a prominent low-pitch roof with broken pitch extending over the deep L-shaped veranda supported by short sphere shaped columns on tall square brick piers and dwarf wall panels in between as well as street fronting gable doubled with simple garden landscaping contributes significantly to the streetscape.
- Criteria d)** Social significance of the place requires a more detailed study to ascertain its value for the local community. However, its association with World War II returned soldiers should be further investigated.
- Criteria e)** The house has potential to provide evidence on the construction system of Post-War bungalows that resembles elements of Inter-War Californian Bungalows.
- Criteria f)**
- Criteria g)** 36 Lloyd Street, Oatley is representative of housing styles that were built for the World War II

Assessed Significance: **Local**

Endorsed Significance:

Statement of Significance: Oatley Park is of exceptional local significance as one of few sizeable non-private owned waterfront land promontory jutting along the banks of Lime Kiln Bay and Jew Fish Bay of Georges River and as one of Sydney's finest areas of natural bushland that remained undeveloped in an urban area. It has a high importance as a recreational and sporting place to the local and wider community. Proclaimed in 1888 as Peakhurst Park, Oatley Park is noted for its trees, shrubs and native flowers, as well as the river beaches and prolific bird life.

The Park contains a number of historically important elements including the sandstone kiosk and lookout known as 'the Castle' - well known and used by the local community since the early 1910s built by men on work relief schemes during the Great Depression); archaeological remnants of the structures including kitchen, ordinance store and shower block from the WW II military use of the Park; remnants of the cement map of Tasmania with inscription of the 12th Field Company; and the 'Lone Pine' tree near the entrance of the Park.

Oatley Park is also important for its Aboriginal cultural heritage evident along the Lime Kiln Bay area through historic kilns, constructed to exploit the middens in the area. A mixture of native species present in the area prior to European settlement as well as historical plantings of introduced species add to the significant values of the Park.

Oatley Baths were constructed in 1909 and are significant as one of only a few suspended net enclosures and one of only two baths/pools within the Sydney Region formed by enclosing a naturally occurring shoreline feature. The baths have associations with the local swimming club and its members since 1927; and, the shoreline shows evidence of being modified to create an appropriate facility for the use of swimmers and other visitors to the

Location: **1 Dame Mary Gilmour Road, Oatley [Hurstville]**

baths/pool.

The listing excludes the canteen facilities at the Oval, wharf and amenities (toilets, playground and barbeques, picnic tables and shades).

Historical Notes or Provenance:

Easily the largest recreational area in the municipality, the 45 hectare Oatley Park is on a promontory jutting into George's River, bounded by Lime Kiln Bay and Jewfish Bay. Access is from Dame Mary Gilmore Road. The land was proclaimed on 29 May 1888 as Peakhurst Park, with Hurstville Council being appointed trustee in 1908. Its name was changed to Oatley Park in 1922. It was and remains one of the few sizable areas of undeveloped waterfront land not privately owned. It is used by visitors all year round - enjoying a variety of recreational and sporting activities

Up until the Great Depression years of 1929-1932, the Park remained in a largely natural state (apart from the earlier development of the Baths). However at this time the Department of Public Works funded and supported an Unemployment Relief Scheme and it was agreed to undertake improvement works within Oatley Park. The road system throughout the Park was constructed and sealed, the idea being to create a scenic road around the foreshores of the Park. The walking track and several scenic lookouts were also built under the Scheme, as was the sandstone kiosk and lookout known as "the Castle". The fashion of the time was to decorate the bush rather than blend in, hence the significant use of sandstone and the striking nature of the structures. The Oatley Park Castle remains in use, available to hire for private functions, from weddings to corporate functions.

The roads through the Park were named after the Ward Councillors of this time; Aldermen Mallard and Christensen, while Webster's Look-out was named after the Council Engineer, all of whom were recognised for their contributions in securing the improvements to Oatley Park.

The tracks just below the Castle lead to the Oatley Park Baths. Construction of the Baths was recommended and financed by Council in 1909. In 1935 the Bath area was extended by a Special Lease to an area of 2.63 hectares, and this area remains part of the Park boundary today. Additionally, rockwork along the foreshore, and the construction of dressing sheds and a shark proof net were completed at this time. The landward perimeter of the Baths is named Walkers Promenade, after another Alderman of the time who contributed to the project. The original piles for the shark proof netting and the jetty were constructed from Turpentine logs, cut from a property at Herne Bay, the original name for the suburb now known as Riverwood. The Oatley Amateur Swimming Club was established in 1927 and still utilises the Baths today.

In July 1942, during World War II, Council was advised that an Order under National Security (General) Regulation 54 had been made and that a portion of Oatley Park would be occupied for military purposes. The 26th Field Company of the Royal Australian Engineers (R.A.E.) was moved from Carss Park at Blakehurst to Oatley Park in July 1942. Several temporary structures were assembled to accommodate the soldiers. These included a Mess tent, kitchen, rations tent and quartermaster's store, a stove and chimney, shower blocks, a store house for engineering and road building equipment, and a canteen made from galvanised iron. By January 1943, most of the soldiers had joined the A.I.F., so the 26th Field Company

was disbanded. In the same month, the Tasmanian 12th Field Company R.A.E. Was stationed in Oatley Park, to be equipped for tropical service. The Unit was posted to New Guinea in July 1943, and Council was later advised by the Australian Military Forces that it intended to cease using Oatley Park in October 1943. Some of the foundations of the kitchen, ordinance store, and shower block remain. A small concrete map of Tasmania was constructed from left over cement for the building foundations, and inscribed, by members of the 12th Field Company. These remnants are still visible and form a valuable record of this period in the Park's history.

Additional features:

"Lone pine" tree

The pine tree near the entrance to the park is reputed to have been grown from seed taken from the Lone Pine area in Gallipoli. This was the site of a major battle during World War I. A group of Turkish Pine trees was cut down by Turkish soldiers to be used as cover for trenches during a battle, leaving one lone pine, later destroyed in the battle. Pine cones were retrieved by Australian soldiers and returned to Australia, where a number of seedlings have since been raised and planted as memorials in places such as the Shrine of Remembrance and the Australian War Memorial.

Historic Kilns

In the Lime Kiln bay area of the park there are historic kilns, constructed to exploit the middens in the area.

with the baths (1935), in addition to rockwork along the foreshore and a shark proof net. The park also features remnants of temporary structures constructed by the military during World War II to accommodate soldiers (1942). These included Mess tent, kitchen, rations tent and quartermaster's store, a stove and chimney, shower blocks, a store house for engineering and road building equipment, and a canteen made from galvanised iron.

The park also features a historic planting of a Turkish pine tree, commonly known as Lone Pine.

Physical Condition: The waterfront areas of the park remain largely unaltered. The interior of the park has been developed in some places with pathways and viewing platforms allowing access to patrons, sporting fields and structures associated with its use since 1888. The species present in the park represent a mixture of natives present in the area since prior to European settlement as well as historical plantings of introduced species relating to landscaping and the creation of recreation areas.

The park has European and Indigenous archaeological potential. Indigenous communities are known to have used the area prior to European settlement in the area, and sites associated with the use of the coastal resources are likely. European sites include remnants of Lime Kilns constructed to exploit middens in the area, and the foundations of WW2 era temporary buildings.

Modification Dates: The main period of modification within the Park was Inter-War, 1929-1934.

Recommended Management: Maintain significant values of the Park and associated elements as defined in the Statement of Significance.

Management: Statutory Instrument List on a Local Environmental Plan (LEP)

Further Comments:

Criteria a) The 45 hectare Oatley Park is easily the largest recreational area in the Hurstville Municipality and is on promontory jutting into George's River, bounded by Lime Kiln Bay and Jew Fish Bay. The land was reclaimed in 1888 as Peakhurst Park, with Hurstville Council being appointed trustee. Its name was changed to Oatley Park in 1922. Apart from the construction of the Baths in 1909, the Park remained in a largely natural state up until the Great Depression years of 1929-1932. The sandstone kiosk and outlook known as 'The Castle' was constructed as part of the Unemployment Relief Scheme. It remains in use and available to hire for private functions including weddings and corporate functions. The Park was used by Australian Military Forces in 1943 between January and July as a station for the Tasmanian 12th Field Company R.A.E. The shoreline shows evidence of being modified to create an appropriate facility for the use of swimmers and other visitors to the baths/pool.

Criteria b) The pool has associations with the local swimming club and its members since 1927.

Criteria c) Oatley Park is an important recreational and sporting place to the local and wider community. It is noted for its trees, shrubs and native flowers, as well as the river beaches and prolific bird life. The Castle and a number of lookouts together with its natural bushland and beaches
