This is my True statement about the proposal

Rate payer living in the Shoalhaven area I believe the Cancer center could not be built on a better block of land then is proposed. The land is close to the hospital. It will be of help to the patents to be able to look out over the quiet park view when they are having their treatment. I believe people are more valuable than a vacant block. We need to get the Cancer Centre built as quickly as we can. This is why I support the Proposal.
