1 Sustainability Criteria for New Land Release – Central Coast

Criteria	Requirements	Consistency (Y/N)	Comment
Infrastructure Provision Mechanisms in place to ensure utilities, transport, open space and communication are provided in a timely and efficient way.	Development is consistent with the CCRS, the relevant residential strategy, North Wyong Structure Plan (NWSSP), applicable regional infrastructure plan, Metropolitan Strategy and relevant section 117 directions. The provision of infrastructure (utilities, transport, open space and communications) is costed and economically feasible based on government methodology for determining infrastructure contribution. Preparedness to enter into development agreement	Y	The site is subject to the NWSSP area and has not been identified as a development precinct or green corridor. The site has potential to provide infill residential development to meet the housing targets indicated in the Central Coast Regional Strategy.
Access Accessible transport options for efficient and sustainable travel between homes, jobs, services and recreation to be existing or provided.	Accessibility of the area by public transport and appropriate road access in terms of: Location/land use: to existing networks and related activity centres. Network: the areas potential to be serviced by economically efficient public transport services. Catchment: the area's ability to contain or form part of the larger urban area which contains adequate transport services. Capacity for land use/transport patterns to make a positive contribution to achievement of travel and vehicle	Y	The site fronts Parraweena Road and Kanangra Drive which is utilised by the local bus company to service a link between Lake Haven and Swansea. Several bus stops are located in close proximity to the property boundary.

Criteria	Requirements	Consistency (Y/N)	Comment
	use goals No net negative impact on performance of existing sub regional road, bus, rail, ferry and freight management.		
Housing Diversity Provide a range of housing choices to ensure a broad population can be housed.	Contributes to the geographic market spread of housing supply, including any government targets established for housing for the aged or disabled or affordable housing.	Y	A subdivision concept has been provided which will allow for additional residential land will assist in achieving the targets set by the CCRS.
Employment Lands Provide regional/local employment opportunities to support the Central Coast's expanding role in the wider regional and NSW economies.	Maintains or improves the existing level of subregional employment self containment. Meets subregional employment capacity targets.	Y	Whilst not directly employment related, the proposal may have a small positive impact on local employment through subdivision and construction of new dwelling houses.
Avoidance of Risk Land use conflicts and risk to human health and life is avoided.	Where relevant, available safe evacuation route (flood and bushfire). No residential development within the 1:100 floodplain. Avoidance of physically constrained land. High Slope	Y	Although located on a site affected by bushfire prone vegetation, bushfire risks will be identified and managed through an appropriate Bushfire Management Plan. for the broader precinct. The site is not located on flood prone land, high slope or is not physically constrained.

Criteria	Requirements	Consistency (Y/N)	Comment
	Highly erodible Avoidance of land use conflicts with adjacent, existing or future land use and rural activities planned under the Regional Strategy.		
Natural Resources Natural resource limits are not exceeded/environmental footprint minimised.	Demand for water does not place unacceptable pressure on infrastructure capacity to supply water and environmental flows. Demonstrates most efficient/suitable use of land Avoids identified significant agricultural land Avoids impacts on productive resource lands, extractive industries, coal, gas and other mining, fishing and aquaculture. Demand for energy does not place unacceptable pressure on infrastructure capacity to supply energy. Requires demonstration of efficient and sustainable supply solution.	Y	Consultation will be undertaken with the MSB on how the proposal will impact on resource extraction in the future. It is considered that the site will have development similar to that of land to the west therefore mineral extraction will not adversely affect the site, or the proposal. Services such as water, sewer, power, roads etc) will be available to the site.
Environment Protection Protect and enhance biodiversity, air quality, heritage and waterway health.	Consistent with the approved Regional Conservation Plan. Maintains or improves areas of regionally significant terrestrial and aquatic biodiversity. This includes regionally significant vegetation communities, critical habitat, threatened species, populations, ecological communities and their habitat. Maintains or improves existing environmental conditions for	Y	An approved RCP does not exist for the Wyong LGA.

Criteria	Requirements	Consistency (Y/N)	Comment
	air quality. Maintains or improves existing environmental conditions for water quality and quantity. Consistent with community water quality objectives for recreational water use and river health. Consistent with catchment and stormwater management planning. Protects areas of Aboriginal cultural heritage values.		
Quality and Equity in Services Quality health, education, legal, recreational, cultural and community development and other government services are accessible.	Available and accessible services.	Y	The site is considered to be well located for accessibility to local education and recreation facilities, in addition to local and regional shopping amenities. The following facilities are provided within 2km of the subject site: ▪ General Store; ▪ Local Shopping Centre (containing post office, bakery, bottle shop, chemist, fruit and vegetable store, Real Estate Agency, Takeaway Food outlet and solicitors office); ▪ Preschool/childcare centre; and ▪ Primary school.
