CLARKE DOWDLE & ASSOCIATES

DEVELOPMENT CONSULTANTS

SURVEYORS • PLANNERS • ECOLOGISTS • BUSHFIRE CONSULTANTS

ABN 15 114 156 740

Wayne C. Dowdle **B.SURV. Postal Address:**
REGISTERED SURVEYOR NSW (M.I.S)
Anthony W.G.Clarke **B.SURV.** (Hons Class 11)
REGISTERED SURVEYOR NSW (M.I.S)

Brett A.B. Williams **B.SURV.** Ass. Dip.Eng (Civil)
REGISTERED SURVEYOR NSW

Kristan T. Dowdle **B.ENV.SC**. (Environmental Management)
Grad. Dip. (Design in Bushfire Prone Areas) M.F.P.A.A
Associate:
Paul DeFina **B.APP.SC**. (Environmental Planning)

PO Box 3122, Umina Beach NSW 2257
Ph: (02) 4344 3553 Fax: (02) 4344 6636

APPENDIX 3 – PLANT SPECIES LIST FROM QUADRAT & TRANSECT SURVEYS

Native Species List With Frequencies (Quadrat)			
CAPS Number	**Family**	**Display Name**	**Freq**
3769	Fabaceae (Mimosoideae)	*Acacia elongata*	1
3771	Fabaceae (Mimosoideae)	*Acacia falcata*	3
3777	Fabaceae (Mimosoideae)	*Acacia floribunda*	3
6472	Fabaceae (Mimosoideae)	*Acacia irrorata subsp. irrorata*	1
3816	Fabaceae (Mimosoideae)	*Acacia longifolia*	13
3817	Fabaceae (Mimosoideae)	*Acacia longissima*	1
3834	Fabaceae (Mimosoideae)	*Acacia myrtifolia*	3
3885	Fabaceae (Mimosoideae)	*Acacia terminalis*	1
3893	Fabaceae (Mimosoideae)	*Acacia ulicifolia*	3
4353	Orchidaceae	*Acianthus fornicatus*	1
3968	Myrtaceae	*Acmena smithii*	2
1094	Apiaceae	*Actinotus helianthi*	1
7997	Adiantaceae	*Adiantum aethiopicum*	2
2012	Casuarinaceae	*Allocasuarina littoralis*	9
2017	Casuarinaceae	*Allocasuarina torulosa*	12
7686	Rhamnaceae	*Alphitonia excelsa*	1
Amye	Loranthaceae	*Amyema spp.*	2
2206	Commelinaceae	*Aneilema acuminatum*	1
3970	Myrtaceae	*Angophora costata*	18
4749	Poaceae	*Anisopogon avenaceus*	1
2266	Cunoniaceae	*Aphanopetalum resinosum*	1
4774	Poaceae	*Aristida warburgii*	2
5345	Proteaceae	*Banksia oblongifolia*	2
5347	Proteaceae	*Banksia robur*	1
5349	Proteaceae	*Banksia spinulosa*	6
2299	Cyperaceae	*Baumea juncea*	1
2302	Cyperaceae	*Baumea rubiginosa*	2
4671	Pittosporaceae	*Billardiera scandens*	11
3528	Blandfordiaceae	*Blandfordia grandiflora*	1
8052	Blechnaceae	*Blechnum cartilagineum*	3
8057	Blechnaceae	*Blechnum indicum*	1
5750	Rutaceae	*Boronia pinnata*	8
5751	Rutaceae	*Boronia polygalifolia*	5
2695	Euphorbiaceae	*Breynia oblongifolia*	4
3533	Colchicaceae	*Burchardia umbellata*	1

Native Species List With Frequencies (Quadrat)			
CAPS Number	**Family**	**Display Name**	**Freq**
4673	Pittosporaceae	*Bursaria longisepala*	2
2270	Cunoniaceae	*Callicoma serratifolia*	2
4010	Myrtaceae	*Callistemon pachyphyllus*	1
4015	Myrtaceae	*Callistemon salignus*	5
8341	Dicksoniaceae	*Calochlaena dubia*	7
Care	Cyperaceae	*Carex spp.*	1
3467	Lauraceae	*Cassytha glabella*	2
3469	Lauraceae	*Cassytha pubescens*	1
Casy	Lauraceae	*Cassytha spp.*	2
6281	Vitaceae	*Cayratia clematidea*	5
Chei	Adiantaceae	*Cheilanthes spp.*	1
6285	Vitaceae	*Cissus opaca*	2
6864	Poaceae	*Cleistochloa rigida*	1
Clem	Ranunculaceae	*Clematis spp.*	1
2209	Commelinaceae	*Commelina cyanea*	1
8801	Rutaceae	*Correa reflexa var. reflexa*	1
9687	Myrtaceae	*Corymbia gummifera*	2
2242	Crassulaceae	*Crassula sieberiana*	1
4419	Orchidaceae	*Cymbidium suave*	2
3172	Goodeniaceae	*Dampiera purpurea*	3
10647	Davalliaceae	*Davallia solida var. pyxidata*	1
2827	Fabaceae (Faboideae)	*Daviesia ulicifolia*	2
4435	Orchidaceae	*Dendrobium teretifolium*	1
2834	Fabaceae (Faboideae)	*Desmodium brachypodum*	1
Desm	Fabaceae (Faboideae)	*Desmodium spp.*	1
2840	Fabaceae (Faboideae)	*Desmodium varians*	7
3540	Phormiaceae	*Dianella caerulea*	6
6700	Phormiaceae	*Dianella caerulea var. caerulea*	4
7337	Phormiaceae	*Dianella caerulea var. producta*	9
11904	Fabaceae (Faboideae)	*Dillwynia retorta species complex*	7
6446	Dioscoreaceae	*Dioscorea transversa*	5
5911	Sapindaceae	*Dodonaea triquetra*	7
8064	Blechnaceae	*Doodia aspera*	1
2556	Droseraceae	*Drosera auriculata*	1
2559	Droseraceae	*Drosera peltata*	1
2574	Elaeocarpaceae	*Elaeocarpus reticulatus*	1
4946	Poaceae	*Entolasia marginata*	2
4947	Poaceae	*Entolasia stricta*	16
2599	Epacridaceae	*Epacris microphylla*	1
2605	Epacridaceae	*Epacris pulchella*	3
8599	Myrtaceae	*Eucalyptus carnea*	2
4087	Myrtaceae	*Eucalyptus eugenioides*	6
8355	Myrtaceae	*Eucalyptus fergusonii subsp. fergusonii*	1
4128	Myrtaceae	*Eucalyptus microcorys*	13
4155	Myrtaceae	*Eucalyptus pilularis*	7

Native Species List With Frequencies (Quadrat)			
CAPS Number	**Family**	**Display Name**	**Freq**
4156	Myrtaceae	*Eucalyptus piperita*	11
4162	Myrtaceae	*Eucalyptus propinqua*	3
8694	Myrtaceae	*Eucalyptus resinifera subsp. hemilampra*	8
4171	Myrtaceae	*Eucalyptus robusta*	3
4177	Myrtaceae	*Eucalyptus saligna*	1
6015	Luzuriagaceae	*Eustrephus latifolius*	7
5860	Santalaceae	*Exocarpos cupressiformis*	1
7479	Moraceae	*Ficus coronata*	1
3924	Moraceae	*Ficus rubiginosa*	1
2431	Cyperaceae	*Gahnia aspera*	1
2432	Cyperaceae	*Gahnia clarkei*	6
2441	Cyperaceae	*Gahnia radula*	2
2442	Cyperaceae	*Gahnia sieberiana*	1
Gahn	Cyperaceae	*Gahnia spp.*	1
6016	Luzuriagaceae	*Geitonoplesium cymosum*	8
6708	Gleicheniaceae	*Gleichenia microphylla*	1
7866	Euphorbiaceae	*Glochidion ferdinandi*	7
2860	Fabaceae (Faboideae)	*Glycine clandestina*	3
2868	Fabaceae (Faboideae)	*Gompholobium pinnatum*	1
Gomp	Fabaceae (Faboideae)	*Gompholobium spp.*	1
3247	Haloragaceae	*Gonocarpus tetragynus*	8
3248	Haloragaceae	*Gonocarpus teucrioides*	1
3188	Goodeniaceae	*Goodenia hederacea*	4
3190	Goodeniaceae	*Goodenia heterophylla*	1
8755	Goodeniaceae	*Goodenia heterophylla subsp. eglandulosa*	4
7057	Goodeniaceae	*Goodenia paniculata*	3
1195	Araceae	*Gymnostachys anceps*	2
3236	Haemodoraceae	*Haemodorum planifolium*	1
5409	Proteaceae	*Hakea dactyloides*	3
2873	Fabaceae (Faboideae)	*Hardenbergia violacea*	4
1492	Asteraceae	*Helichrysum elatum*	1
2527	Dilleniaceae	*Hibbertia aspera*	3
2528	Dilleniaceae	*Hibbertia bracteata*	1
2532	Dilleniaceae	*Hibbertia dentata*	8
10863	Dilleniaceae	*Hibbertia empetrifolia subsp. empetrifolia*	8
2542	Dilleniaceae	*Hibbertia obtusifolia*	2
2548	Dilleniaceae	*Hibbertia scandens*	5
8877	Malvaceae	*Hibiscus heterophyllus subsp. heterophyllus*	2
6266	Violaceae	*Hybanthus monopetalus*	1
1126	Apiaceae	*Hydrocotyle geraniifolia*	1
1128	Apiaceae	*Hydrocotyle laxiflora*	1
8511	Poaceae	*Imperata cylindrica var. major*	14
2448	Cyperaceae	*Isolepis cernua*	1
2898	Fabaceae (Faboideae)	*Kennedia rubicunda*	5
9175	Sterculiaceae	*Lasiopetalum ferrugineum var. cordatum*	1

Native Species List With Frequencies (Quadrat)			
CAPS Number	**Family**	**Display Name**	**Freq**
9008	Sterculiaceae	*Lasiopetalum ferrugineum var. ferrugineum*	1
11102	Dryopteridaceae	*Lastreopsis microsora subsp. microsora*	1
8379	Cyperaceae	*Lepidosperma elatius*	1
2465	Cyperaceae	*Lepidosperma filiforme*	2
6402	Cyperaceae	*Lepidosperma laterale*	3
2470	Cyperaceae	*Lepidosperma longitudinale*	1
2471	Cyperaceae	*Lepidosperma neesii*	1

Unusual Observation Report (UOR) may be required; please make field notes

INSTRUCTIONS: **This record sheet lists the species more likely to be found. Additional space is provided for reporting any species not listed. Use one sheet for each 10 minute grid – if in doubt as to grid boundaries, use a new sheet for each location. Record all species present, indicating <u>exact numbers</u> if possible. Otherwise, use the approximations A = 1-5 birds present, B = 6-20 birds, C = 21-50 birds, D = 51-100 birds, E = over 100 birds, X = not counted, H = heard only. All records of Category 3 bird species require an Unusual Observation Report (UOR) to be completed; for Category 2 species, a UOR may be requested if species are present in unusual numbers, location or season. Species, in the second column, which appear on the List of Threatened & Endangered Species for NSW ("Schedule 1&2") are indicated in Bold – observation reports of these species may assist in development of management strategies for NSW.**

BREEDING RECORDS: **In the third column, please indicate any observed breeding behaviour, using the abbreviations ny = nest with young, ne = nest with eggs, fs = fecal sac, on = bird on or seen leaving nest, nb = nest building, cf = carrying food, dy = dependent young, ih = 26ubs26drica hollow, di = display, co = copulation.**

APPENDIX 5 – ATTRIBUTE SHEETS FOR FAUNA HABITATS SIGNIFICANCE

Vegetation community- Stunted Forest on Alum Mountain Volcanics					
Does the vegetation community support known threatened fauna species or endangered populations			**no**		
Does the vegetation community type constitute a community of local ecological significance			**yes**		
Subjective scoring system					
Attribute	**Weighting**	**High**	**Moderate**	**Low**	**Score**
Abundance of hollows	**10**			**0**	**0**
Abundance of dead trees\Stags	**10**			**0**	**0**
Any caves, mines or tunnels presence	**5**			**0**	**0**
Presence of wet areas\water bodies	**10**			**0**	**0**
Abundance of rocks or escarpments	**5**	**2**			**10**
Abundance of fallen timber or logs	**5**			**0**	**0**
Abundance of nectar resources	**5**		**1**		**5**
Abundance of fruit resources	**5**			**0**	**0**
Community part of wildlife corridor	**10**	**2**			**20**
Community in key habitat area	**10**	**2**			**20**
Faunal refugia values	**5**	**2**			**10**
Dense shrub or groundcover	**5**		**1**		**5**

APPENDIX 7 – LETTERS FROM NATIONAL HERBARIUM OF NEW SOUTH WALES

ROYAL BOTANIC GARDENS SYDNEY

Mr Robert PAYNE
Ecological Surveys and Management
15 Mountain-Ash Way
Umina Beach, NSW 2257
AUSTRALIA

Inquiry No: 14385
Botanical.Is@rbgsyd.nsw.gov.au
Fax No: (02) 9251 1952
Ph No: (02) 9231 8111
Date: 7 January 2009

Dear Mr PAYNE,

In reply to your inquiry of 09-Dec-08 the following information is supplied:

Thankyou for the *Callistemon acuminatus* specimen. This specimen has been retained by the herbarium. The other specimen is *Einadia hastata*. There is no charge for this enquiry.

Thank you for your inquiry.

Yours sincerely

Barbara Wiecek
Identification Botanist
Botanical Information Service

PlantNET

Go to our online Botanical Information Services at plantnet.rbgsyd.nsw.gov.au to find out more about plants of New South Wales

ROYAL BOTANIC GARDENS SYDNEY

National Herbarium of New South Wales

Mr Robert PAYNE
Ecological Surveys and Management
15 Mountain-Ash Way
Umina Beach, NSW 2257
AUSTRALIA

Inquiry No: 15865
Botanical.Is@rbgsyd.nsw.gov.au
Fax No: (02) 9251 1952
Ph No: (02) 9231 8111
Date: 25 August 2010

Dear Mr PAYNE,

Thank you for your enquiry of 20-Aug-10. We are happy to provide the following information:

Thank you for the donation of *Pleurosorus rutifolius* to our collection Dr Elizabeth Brown confirmed the identification.

Thank you for your enquiry.

Yours sincerely

Barbara Wiecek
Identification Botanist
Botanical Information Service

Curriculum Vitae

Robert Payne

Education

1991 – 1996 Master of Natural Resources University of New England, Armidale.

Major: Wildlife Management, Flora and Fauna Survey Techniques and Biological Conservation

Thesis: The Distribution and Reproductive Ecology of *Syzygium paniculatum* and *Syzygium 41ubs41dr* (Myrtaceae) in the Gosford-Wyong Region.

1985 – 1987 Master of Letters University of New England, Armidale

Major: The Ecology of Australian Ecosystems

Thesis: Structure, Floristics and Ecology of the Gully Rainforests on the Central Coast of NSW

1977 – 1983 Bachelor of Arts University of New England, Armidale

Major: Botany, Ecology, Physical Geography and Archaeology

1994 – Identification of the Plants of the Tropical Rainforest James Cook University.

1999 – Introduction to Analysis SPSS Sydney

1999 – Introduction to the SPSS Statistical Package SPSS Sydney

2003 - Wildlife Photography Course – Ms. Esther Beaton Wildlife Photographer

2004 – Computer Aided Drafting Hunter Institute of TAFE - Introduction & Intermediate Courses.

2005 – Introduction to GIS Course – Hunter Institute of TAFE-

2004 Educational Tours

- Undertook World Wildlife Fund educational tour of Peruvian Andes at high altitude and upper Amazon ecosystems involving archaeology, geography, flora and fauna.

Skills

Terrestrial ecology

- Flora and fauna surveys
- Management of rare and threatened species
- Management of ecosystems
- Aquatic surveys and wetland assessment
- Water quality interpretation
- Environmental impact assessment
- Environmental auditing
- Field Research

Project management

- Environmental design/management
- Erosion and sediment control
- Construction supervision involving natural ecosystems
- Air photo interpretation and surveying
- Vegetation Mapping

Professional Experience

1990 – PresentRobert Payne- Ecological Surveys & Management Umina Beach, NSW

Director, Wildlife Ecologist

Research into Rare Plant and Weed Ecology: for several species including the Black-eyed Susan, the Somersby Mintbush the Tranquility Mint Bush, the Parramatta Red Gum and the Magenta Lilly Pilly. Cattail on the Umina sandplain and Alligator Weed in the Everglades Wetlands.

Major Flora and Fauna Survey Projects, Natural Areas: Colongra Wetlands (2 year FF survey), Bouddi National Park, Wyrrabalong National Park, Wamberal Lagoon Nature Reserve, Munmorah State Recreation Area, Lower Hunter-Central Coast Regional Survey, Southern Tablelands Regional Survey, Warragamba Special Area Wilderness Area Regional Surveys and 2005 Lower Hunter Central Coast extended area surveys into the Great Lakes Shire. Wyong Rivers and Ourimbah Creek Valleys Rivercare Surveys. 2007 extended regional surveys for Bulahdelah, Great Lakes and Crowdy Head areas. Brisbane Water National Park Eastern Pigmy Possum, small mammal and microbat specific surveys. Specific microbat and small mammal surveys of Rileys and Pelican Island Nature Reserves. Alum Mountain Bulahdelah flora, fauna & vegetation mapping.

Infrastructure; Jolls Bridge to Calga Sydney Newcastle Freeway, Western Sydney Land Snail Survey for Western Sydney Orbitor, Guyra to Ebor Main Road Survey and the Brunswick to Yelgin By-pass. Rainforests of the Gosford LGA. Jolls Bridge to Hawkesbury River & Hawkesbury River to Kariong for the Sydney Newcastle Freeway widening. Pacific Highway Kariong to West Gosford flora & fauna surveys.

Major Construction Projects: All major Telstra optical fibre cable projects in NSW 1990-1998, especially the major telecommunication lines between Sydney to Brisbane1, 2 & 3. Tuggerah Public School, Munmorah High School, Bluehaven Public School and the Lakes Anglican Grammar School Stages 1, 2 & 3 (current). East Hills to Sydney 330 KV underground transmission line and Wyong to Sterland Trig Transmission line. Arterial road and watermain between Wyong and the new Warnervale City. Foresters Glen Retirement Village ongoing. Amy Close Wyong Development Complex and Somersby Fields (mining) threatened plant species investigation.

Vegetation Mapping: Local Government Areas of Lismore, Tweed, Port Stephens, Taree, Richmond River, Wyong and Campbelltown. Bouddi National Park, Wyrrabalong National Park, Wamberal Lagoon Nature Reserve, Munmorah State Recreation Area, Wallarah Peninula and the Colongra Wetlands. Coastal wetlands in the Gosford LGA using high powered GPS technology and Rainforests in the Gosford LGA using aerial photography and computer transformation technology. Botanist for NPWS Lower Hunter Central Coast regional surveys 2000 & 2003, Southern Region surveys 2001, Warragamba Wilderness areas 2002 and Lower Hunter Central Coast Region in 2005, then Port Stephens, Taree and Great Lakes areas in 2006 and 2007. Rockdale, Canterbury and Marrickville Council urban vegetation remnant survey.

Catchment/Natural Area and Wetland Management Plans: Colongra Wetlands (Munmorah Delta Electricity), Porters Creek Wetland, Salts Bay Reserve Swansea, Bongon Lagoon, Munmorah, Tuggerah Oxbows and Kahibah Lagoon Management Plan. Everglades Wetland Management Plan.

Environmental Impact Assessment, Species Impact Assessment and **Environmental Management Plans** for various environmental rehabilitation, strategic and construction projects: Includes underground coal mining at North Wyong, Wallarah Peninsula and Gwandalan, Hawks Nest threatened species Plan of Management, Dorrigo Escarpment World Heritage Area, Meryla State Forest Optical Fibre Cable, Crowdy Head, Nobbys, Sugarloaf Point and Norah Head lighthouses, widening of Henderson Road and foreshore Saratoga, Ettymalong Creek Umina, Voyager Point, Karuah International Raceway, new Warnervale City, Saratoga Oval, Avoca Beach Public School, Brisbane Water cycleway, aquatic, flora and fauna surveys for new wharf & seawall proposals for the Brisbane Water, new arterial road between Wyong and Warnervale and cycleway between Saratoga to Kincumber. Proposed coal mining under Lake

Macquarie- involved major aquatic and depth surveys. Revegetation of EEC at Pat Morley Oval tip refuse site at Bateau Bay. Horsefield Bay to Correa Bay cycleway.

Expert testimony – Represented Great Lakes Council at Commission of Inquiry into Hawks Nest North proposal on threatened species, Swamp Mahogany Forests and wetlands; Represented Planning NSW at Donaldson Mine Commission of Enquiry; Land & Environment Court proceedings for at least 40 different matters.

Professional Associations & Committees

- **Regional Vegetation Committee** – *NSW Department of Land & Water Conservation* as Scientist to deal with changes to Native Vegetation Act (former role). Now Expert Panel Committee Representative for Regional Vegetation Mapping *(current Hunter Councils)*.
- **Coastal Open Space Committee** – *Gosford City Council (former member)*
- **Heritage Committee** – *Gosford City Council (former member)*
- **Wetlands Committee-** Community Environmental Network (current member)
- **Crommelin Native Arboretum;Pearl Beach- (**current since inauguration 1976)

Publications

- New Findings of the rare tree, *Syzygium paniculatum, Cunninghamia 1991-Vol.1(4).*
- Prediction of the habitat for *Tetratheca juncea* in the Munmorah Area near Wyong, New South Wales. *Cunninghamia, 1993 Vol 3(1).*
- A Proposal for the Protection of Remnant Rainforest in the Gosford and Wyong Areas. *Document prepared for the National Parks Association of New South Wales Inc. 1993.*
- Nutrient Filter Research Report:The Effectiveness of Nutrient Filters in managing Stormwater Pollution. *Report prepared for Gosford City Council, 1993; Co-author with Murray Hastings-Andrews Neil.*
- Mapping Vegetation of Sensitive Habitats. *Paper presented at the Conference 'The Status of the Koala in 1996' held at Tweed Heads – August 19-21 1996.*
- Wetland Vegetation Mapping using a Global Positioning System. *Cunninghamia Vol 5(3) 1998.*
- *Tetratheca juncea smith:*Conservation Management Plan. *Published document prepared on behalf of NSW National Parks and Wildlife Service, Lake Macquarie City Council and Broken Hill Proprietary.*
- Trials to eradicate Cumbungi from Ettymalong Creek, Umina Beach, New South Wales. *Ecological Management and Restoration 2001 Vol. 3(2)*
- Soil and groundwater relationships and impacts on Parramatta Red Gum Woodland at Porters Creek Wetland, New South Wales. NSW DECC (in prog.).
- Brisbane Water Sandplain Vegetation- reconstructing its past extent and planning for its future. *Cunninghamia 2010 11(3): 295-318*

Curriculum Vitae
Kristan Dowdle

QUALIFICATIONS / LICENSES

- **2007** - Fire Protection Authority of Australia (FPAA) Member.
- **2006 – 2007** Graduate Diploma in Design for Bush Fire Prone Areas , University of Western Sydney
- **2000 – 2003** Bachelor of Environmental Science (Biology) Schoolof Environmental and Life Sciences ,The University of Newcastle Australia

  •Planning for Bushfire Prone Areas (UTS)
  •Class HC Driver's Licence
  •NSW Scientific Licence No. S11333

EMPLOYMENT HISTORY

Pre 2000: Survey Assistant Wayne Dowdle & Associates, NSW

2000 – 2003: Life Sciences student at Newcastle University.

Nov 2003 – Jun 2004: Environmental Scientist Aargus Pty Ltd, based at Petersham, NSW.

July 2004 – current: Environmental and Bushfire Consultant with Clarke Dowdle & Associates

SKILLS SUMMARY

Ecology and biology

The primary areas of expertise are in the fields of native vegetation and threatened flora and fauna species identification and mapping; revegetation, rehabilitation and monitoring; and, fauna and flora habitat identification. Current and past projects and research involve the following:

- Flora and fauna assessments for single lots, industrial, commercial sub-divisions, rural/residential developments and Environmental Assessments (EA);
- Project ecologist consulting for large scale native vegetation rehabilitation and restoration;
- Floristic and vegetation classification surveys;
- Mapping and classifying natural vegetation communities;
- Vegetation/Bushland Management Plans;
- Environmental Management Plans; and
- Weed Management Plans.

Bushfire

The primary areas of expertise are in development planning and design; bushfire behaviour and threat assessments; bushfire hazard reduction assessments; bushfire, landscape and emergency management plans. Current and past projects and research involve the following:

- Bushfire threat assessments for proposed residential and industrial sub-divisions, rural and urban residential developments, constraints reports and Environmental Assessments;
- Bushfire Management Plans and Emergency Evacuation Plans.

LEGISLATION

Familiar with the relevant requirements of the following:

Commonwealth
Environment Protection & Biodiversity Conservation Act 1999
Environment Protection and Biodiversity Conservation Regulations 2000

NSW
Environmental Planning and Assessment Act 1979
Native Vegetation Act 2003
National Parks and Wildlife Act 1974
Threatened Species Conservation Act 1995
Threatened Species Conservation Amendment Act 2002
Threatened Species Conservation Amendment (Biodiversity Banking) Act 2006
Rural Fire Services Act 1997
Relevant State Environment Planning Policies.
Local government requirements and relevant Flora and Fauna Survey Guidelines.

CURRENT AND PAST ECOLOGICAL CONSULTANCY PROJECTS

Selected project examples are provided under the following headings, which describe the primary field of investigation.

- Flora and Fauna Assessment s
- Vegetation Management Plans
- Threatened Plants and Endangered Ecological Communities
- Bushfire Assessments
- Translocation of Threatened Plants
- Vegetation Community Classification and Mapping
- Fauna Monitoring
- Local Environmental Study

Experience

Some of the projects are 45ubs45drica below:

- **Plan of Management of the Re-Introduction of the Green and Golden Bell Frog (*Littoria aurea)* to the Short Wetlands Centre, 2002 (*University of Newcastle*).** This study examined the specific habitat requirements of the endangered Green and Golden Bell Frog (*Littoria aurea)*. The study involved

extensive frog surveys, water quality monitoring, weather monitoring as well as a extensive literature search and review. The final report made recommendations to the Shortland Wetland Centre on habitat requirements of the species so as the centre could design an artificial wetland area for the species to be reintroduced.

- **Effects of Forest Management Practices on Stream Frog communities (*University of Newcastle*).** This study involved frog survey work in the Watagans Mountains focussing on the Giant Barred Frog (*Mixophyes iterates)*. The survey work and subsequent data was used for a published report by Harko Weldman.

- **Flora and Fauna Surveys for Industrial, Rural and Residential Developments within the Gosford, Hornsby, Great Lakes, Lake Macquarie, Ku-ring-gai, Penrith, Pittwater and Wyong Shires (*Clarke Dowdle & Associates*).** The studies have involved extensive field work (flora and fauna surveys) and desktop studies (literature search and review). Each assessment has reviewed the environmental impacts of the proposed development and has delivered conclusions and recommendations.

- **Vegetation/Bushland Management Plans**. Projects involved flora assessment of the subject property for species and densities, and applying a management plan to aid in protection, preservation and weed control.

- **Bushfire Threat and Protection Assessments** Includes assessments of individual lots with industrial, rural/ residential and residential zones, sub-division design and additions and alterations to existing dwellings through NSW

571968	22	ALUM MTN	RPBUL SL1	1	1	9309	Xanthorrhoeaceae	Xanthorrhoea	latifolia	84ubs.	Latifolia	Xanthorrhoea latifolia subsp. latifolia	-	-	2		-	-
571969	3	ALUM MTN	RPBUL SL1	1	1	9687	Myrtaceae	Corymbia	gummifera			Corymbia gummifera	-	-	1		-	-
571970	17	ALUM MTN	RPBUL SL1	1	1	CASY	Lauraceae	Cassytha	spp.			Cassytha spp.	-	-	1		-	-
571971	21	ALUM MTN	RPBUL SL1	1	1	GOMP	Fabaceae (Faboideae)	Gompholobium	spp.			Gompholobium spp.	-	-	1		-	-

APPENDIX 11 – SUMMARY TABLE OF TARGETED SEARCHES FOR THREATENED PLANT SPECIES

Month/Year	Stage	Species	Habitats targeted using random traverses, targeted niche surveys and quadrat surveys
June 2007	1	Botanical survey quadrats	Coastal plains, tributaries including Frys Creek
		Syzygium paniculatum	Frys Creek
		Angophora inopina	Coastal plain, tributaries including Frys Creek
		Asperula asthenes	Frys Creek, tributaries
		Melaleuca biconvexa	Coastal plain, tributaries including Frys Creek
		Corybas sp.aff. acontiflorus	Coastal plain, tributaries and Frys Creek (not yet listed as a threatened species)
		Callistemon linearifolius	Frys Creek
July 2007	1	*Rhizanthella slateri*	Special trip to Alum Mountain to view location of orchid site.
August 2007	1 & 2	*Cryptostylis hunteriana*	Coastal plain and slopes
		Rhizanthella slateri	Coastal plain and slopes
		Tetratheca juncea	Coastal plain and slopes
		Corybas sp. aff. Acontiflorus	Tall forest gullies and slopes (not yet listed as a threatened species)
		Syzygium paniculatum	Frys Creek
		Melaleuca biconvexa	Frys Creek and coastal plain
		Angophora inopina	Coastal plain and slopes
		Asperula asthenes	Frys Creek
		Callistemon linearifolius	Frys Creek
August 2007 (2nd trip)	1 & 2	*Cryptostylis hunteriana*	Coastal plain and slopes
		Tetratheca juncea	Coastal plain and slopes
		Corybas sp. aff. Acontiflorus	Tall forest gullies and slopes (not yet listed as a threatened species)
		Syzygium paniculatum	Frys Creek
		Melaleuca biconvexa	Frys Creek and coastal plain
		Angophora inopina	Coastal plain and slopes

		Asperula asthenes	Frys Creek
		Callistemon linearifolius	Frys Creek
October 2007	1 & 2	Botanical survey quadrats	Slopes and summit of Alum Mountain
		Syzygium paniculatum	Frys Creek and coastal plain
		Rhizanthella slateri	Coastal plain and slopes
		Tetratheca juncea	Frys Creek and coastal plain
		Melaleuca biconvexa	Frys Creek and Swamp Sclerophyll Forest
		Angophora inopina	Coastal Plain, Swamp Sclerophyll Forest and slopes
		Asperula asthenes	Frys Creek and Swamp Sclerophyll Forest
		Crypostylis hunteriana	Coastal plain, Swamp Sclerophyll Forest and slopes
		Callistemon linearifolius	Frys Creek
		Callistemon acuminatus	Summit of Alum Mountain
		Callistemon comboynensis	Summit of Alum Mountain
VEGETATION ON STAGE 1 WAS CLEARED			
December 2008	2	*Syzygium paniculatum*	Frys Creek and Myall River as far as Warranulla
		Asperula asthenes	Frys Creek
		Cryptostylis hunteriana	Frys Creek and slopes
		Melaleuca biconvexa	Frys Creek
		Angophora inopina	Slopes
		Callistemon linearifolius	Frys Creek
PROJECT STOPPED DUE TO GLOBAL FINANCIAL SITUATION			
December 2009	2	*Syzygium paniculatum*	Frys Creek
		Asperula asthenes	Frys Creek and Swamp Sclerophyll Forest
		Cryptostylis hunteriana	All habitats
		Melaleuca biconvexa	Frys Creek and Swamp Scleropyll Forest
		Angophora inopina	Slopes
		Callistemon linearifolius	Frys Creek
February 2010	1 & 2	GPS vegetation mapping survey	All habitats
		Crypostylis hunteriana	All habitats

		Syzygium paniculatum	Frys Creek
		Melaleuca biconvexa	Frys Creek and Swamp Scerophyll Forest
		Angophora inopina	All habitats
		Asperula asthenes	Frys Creek
		Callistemon linearifolius	Frys Creek
July 2010 (1st trip)	1 & 2	*Corybas dowlingii*	Tall forest gullies and slopes & Frys Creek
		Syzygium paniculatum	Frys Creek
		Melaleuca biconvexa	Frys Creek & Swamp Sclerophyll Forest
		Angophora inopina	All habitats except Alum Mountain
		Asperula asthenes	Frys Creek
		Callistemon linearifolius	Frys Creek
July 2010 (2ND trip)	1 & 2	*Corybas dowlingii*	Northern gullies & slopes
July 28th 2010 (3RD trip)	1 & 2	*Tetratheca juncea*	Coastal Plain
August 9th 2010	1 & 2	*Diuris pedunculata,* *Corybas dowlingii* *Cryptostylis hunteriana* *Tetratheca juncea*	Moist grassy area near yabbie ponds. Northern slopes including upper rocky scree slopes and regenerating areas of coastal plain.
August 12 th & 13 th 2010	1 & 2	*Diuris pedunculata,* *Corybas dowlingii* *Cryptostylis hunteriana* *Tetratheca juncea*	Moist grassy area near yabbie ponds. Northern slopes including cliff faces. Coastal plain and Frys Creek.
October 19 th & 20th 2010	1 & 2	*Diuris pedunculata,* *Cryptostylis hunteriana* *Tetratheca juncea* *Rhizanthella slateri* *Galium australe*	Coastal plain & slopes including northern drainage lines

APPENDIX 12 - SCHEDULE 13 LISTED SPECIES

SPECIES	SCHEDULE 13	RECORDED ON SITE
PART 1		
Adiantum spp.	Group 1, 2	#
Archontophoenix cunninghamiana	Group 1,2	
Baeckea linifolia	Group 1,2	
Baeckea virgata	Group 1,2	
Banksia spinulosa	Group 1,2	
Cassinia aureonitens	Group 1,2	
Caustis spp.	Group 1,2	
Cordyline stricta	Group 1,2	
Crowea exaltata	Group 1,2	
Crowea saligna	Group 1,2	
Davalia pyxidata	Group 1,2	# (summit of Alum Mountain)
Dodonaea lobulata	Group 1,2	
Erisremon spp.	Group 1,2	
Gahnia sieberiana	Group 1,2	
Isopogon spp.	Group 1,2	
Kunzea ambigua	Group 1,2	
Kunzea capitata	Group 1,2	
Leptospermum lanigerum	Group 1,2	
Leptospermum rotundifolium	Group 1,2	
Livistona australis	Group 1,2	
Persoonia spp.	Group 1,2	#
Petrophile spp.	Group 1,2	
Phebalium squamulosum	Group 1,2	
Philotheca spp.	Group 1,2	
Ptilotus obovatus	Group 1,2	
Pycnosorus spp.	Group 1,2	
Restio tetraphyllus	Group 1,2	
Sprengelia incarnata	Group 1,2	
Sticherus flabellatus	Group 1,2	
Swainsonia Formosa	Group 1,2	
Tmesipteris spp.	Group 1,2	
Xanthorrhoea spp.	Group 1,2	#
Xylomelum spp.	Group 1,2	
Zamiaceae	Group 1,2	
Actinotus spp.	Group 3	#
Boronia spp.	Group 3	#
Doryanthes excelsa	Group 3	
Eristemon australiasius	Group 3	
Lycopodium spp.	Group 3	
Persoonia pinifolia	Group 3	
Philotheca obovalis	Group 3	
Blanfordia spp.	Group 4	#
Doryanthes excelsa	Group 4	

Xanthorrhoea spp.	Group 4	#
Boronia deanei	Group 5	
Boronia umbellata	Group 5	
Craspedia spp.	Group 5	
Dicranopteris linearis	Group 5	
Doryanthes palmeri	Group 5	
Grevillea longifolia	Group 5	
Isopogon fletcheri	Group 5	
Leptospermum spectabile	Group 5	
Macrozamia johnsonii	Group 5	
Macrozamia pauli-guiliemi ssp. flexuosa	Group 5	
Persoonia spp.	Group 5	#
Phebalium bifidum	Group 5	
Phebalium glandulosum ssp. eglandulosum	Group 5	
Philotheca ericifolia	Group 5	
Philotheca obovatifolia	Group 5	
Telopea spp.	Group 5	
PART 2		
Ceratopetaum gummiferum	Group 1	
Isopogon spp.	Group 1	
Swainsona formosa	Group 1	
Telopea aspera	Group 2	
Telopea mongaensis	Group 2	
Telopea oreades	Group 2	
Telopea speciosissima	Group 2	
Wollemia nobilis	Group 2	
Arecaceae	Group 3	
Asplenium australasicum	Group 3	
Asplenium falcatum	Group 3	
Cyathea spp.	Group 3	
Dicksonia spp.	Group 3

APPENDIX 18 – VEGETATION COMMUNITY CONSERVATION STATUS SUMMARY SHEET

This Survey	Great Lakes Council equivalent	Forest Ecosystems classification (northern region)(Based on Matt Bell at this stage)	Benson & Hager (1994)	Griffiths et. al. (1994)	Somerville (2009)	Overall status
Stunted forest on Alum Mountain volcanics **Medium conservation**	Brushbox stunted forest/ woodland	Regionally rare **Regional conservation**	**Inadequately conserved over all of its range**	No equivalent	No equivalent	**Regional Conservation Significance**
Melaleuca forest with emergents in areas of impeded drainage **High conservation**	Red Mahogany/paperbark swamp sclerophyll forest and woodland	Regionally rare **Regional conservation** **Considered EEC**	**Poorly or not conserved.**	No equivalent	MU 180 Melaleuca nodosa forest **No conservation details available**	**State Conservation Significance**
Upland open scrub with emergents of Swamp Mahogany in areas of permanent high water tables **High conservation**	Swamp Mahogany wet heath low swamp sclerophyll forest and woodland	Regionally vulnerable **Regional conservation**	Not recognised at this scale	No equivalent	MU 171 *Leptospermum liversidgei*/ Crimson Bottlebrush wallum wet heath **No conservation details available**	**Regional Conservation Significance**
Woodland/forest on Alum Mountain volcanic over lower coastal slopes & plains **Medium conservation**	Red Mahogany/Sydney Peppermint/Red Bloodwood dry sclerophyll forest & woodland	Regionally rare or severely depleted **Regional conservation**	**Inadequately conserved over all of its range**	No equivalent	MU 89 Smooth-barked Apple/ Red Bloodwood/Brown Stringybark/ Wiry Panic heathy open forest or MU 34 Pink Bloodwood/Thin-leaved Stringybark/Grey Ironbark shrubby	**Regional Conservation Significance**

					grass forest on ranges **No conservation details available**	
Woodland tall forest on upper slopes of Alum Mountain volcanics **Medium conservation**	Tallowood/Blackbutt/ Sydney Peppermint wet to dry sclerophyll forest & woodland	Regionally rare **Regional conservation**	**Not or poorly conserved**	*E. microcorys* dry sclerophyll forest (MU 35081) 15.5ha conserved in Booti Booti NP	No equivalent	**Regional Conservation Significance**
Riparian tall forest on alluvium along Frys Creek **High conservation**	Smooth barked Apple/ Turpentine/Sydney Peppermint riparian tall forest	Severely depleted **Regional conservation**	Not recognised at this scale	No equivalent	MU 90 Smooth-barked Apple open forest on coastal lowlands **No conservation details available**	**Regional Conservation Significance**

APPENDIX 20 – DETAILS OF *GALIUM AUSTRALE*

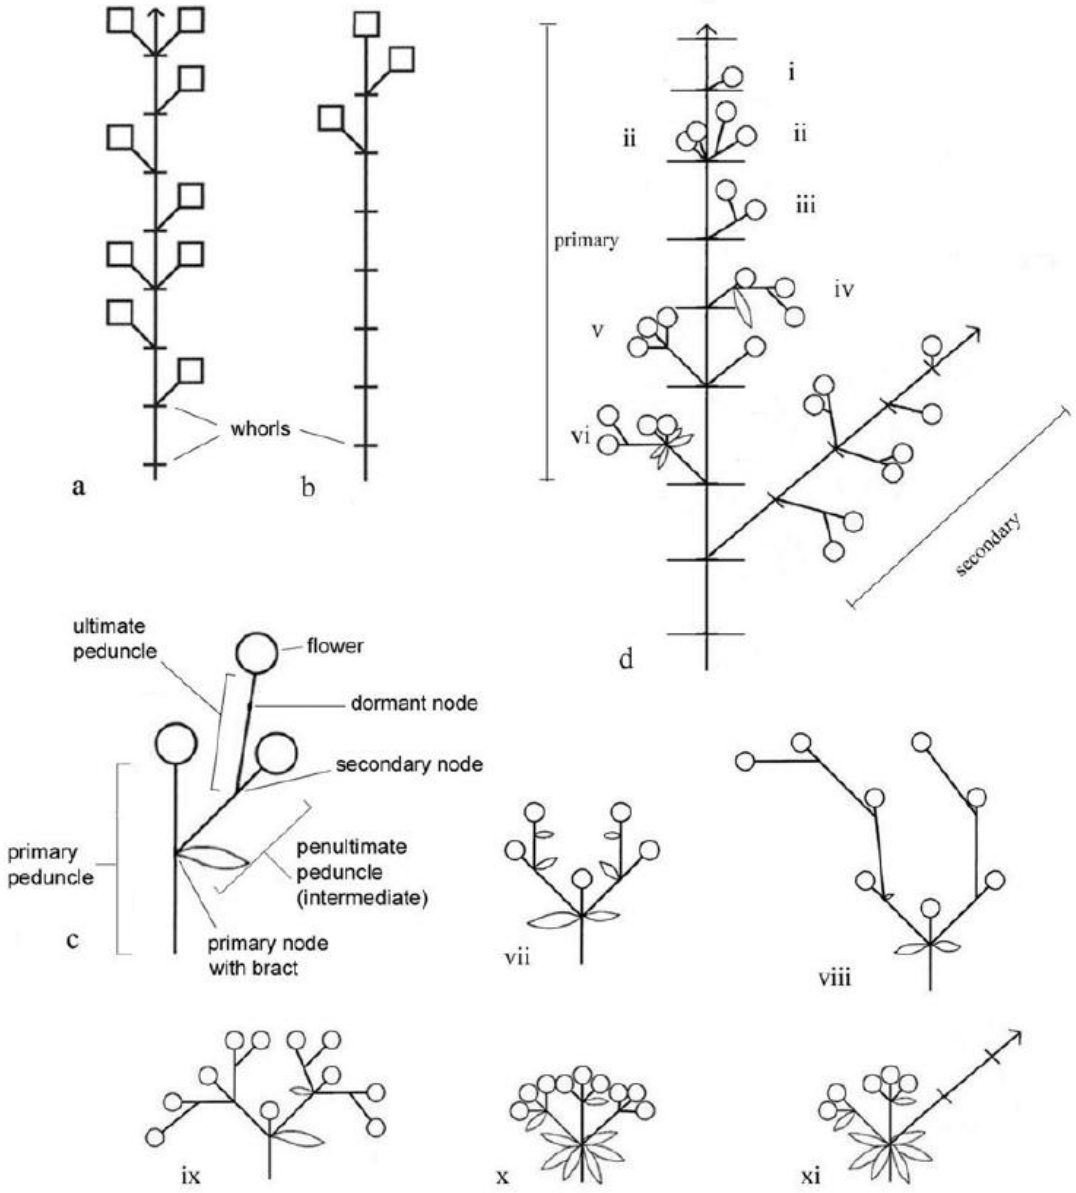

Figure 3. Inflorescences and cymes (schematic). a. Extended type, indeterminate. b. Soon terminating (each box represents a cyme). c. A complex cyme with monochasial branching in *Galium*, displaying cyme terminology. d. Stem bearing a primary and secondary inflorescence. Flowers represented by circles. Cyme variation (i–vi drawn in d.; vii–xi drawn separately): i. Solitary flower; ii. Simple, monochasial, with ultimate peduncle inserted in proximal half or at base (e.g. *G. leiocarpum*); iii. Simple monochasium with ultimate peduncle inserted distally; iv. Complex monochasium with bract at primary node subtending penultimate peduncle (e.g. common in *G. curvihirtum*); v. Simple dichasium (e.g. commonly seen in *G. ciliare* subsp. *ciliare* & *G. australe*); vi. Complex: dichasial then monochasial branching; whorl at first node; vii. Complex: bract at each node including at quiescent nodes on ultimate peduncle (e.g. *G. bulliformis*); viii. Extended monochasial branching (e.g. *G. migrans* subsp. *inversum*); ix. Two dichasial orders of branching (e.g. *G. polyanthum*); x. Whorl at first node, dichasial branching, corymbiform arrangement (typical of *Asperula*); xi. Similar to x. but a shoot growing on from terminal cyme (e.g. *A. pusilla*).

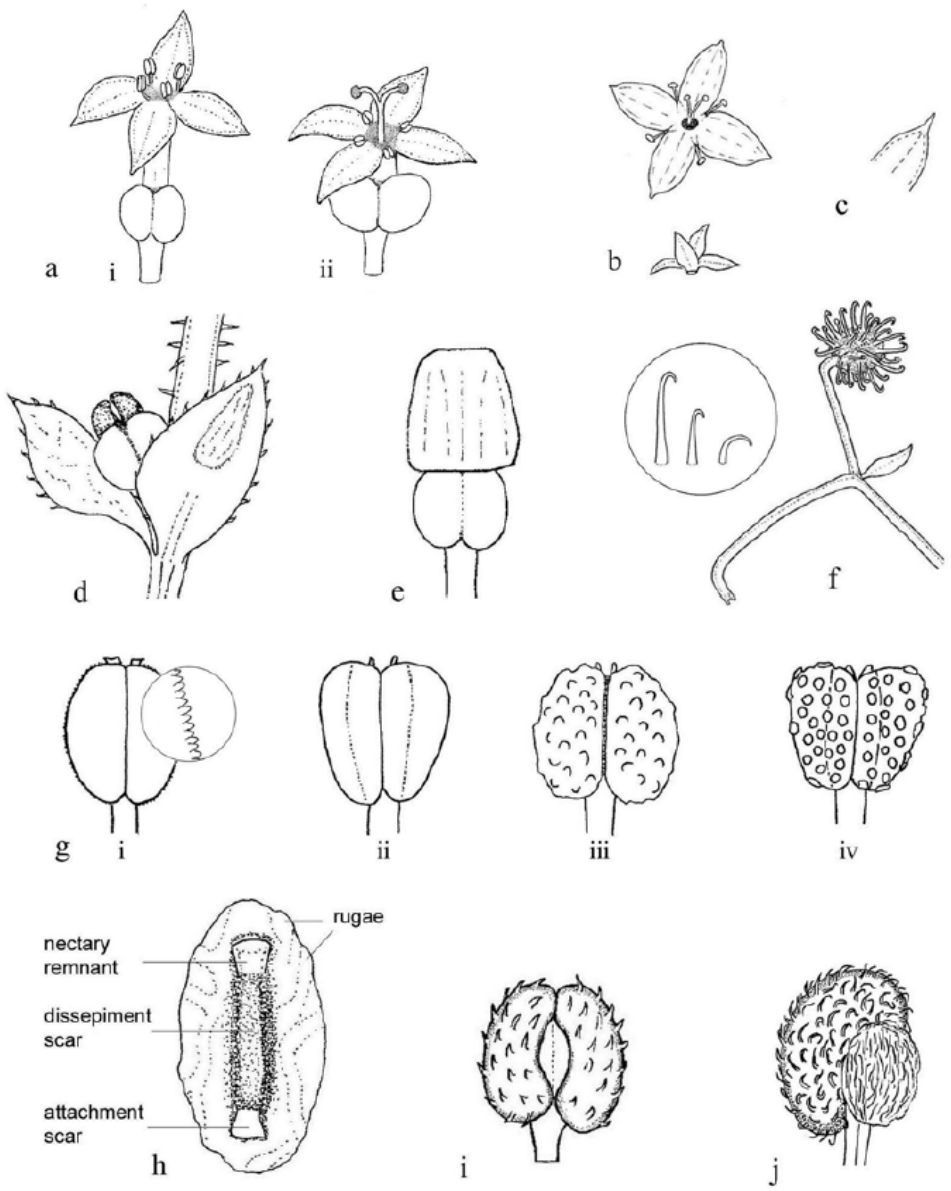

Figure 4. Flowers and fruit. a. Flowers in *Asperula* (face view of ovary): i. male flower; ii. female flower, showing a relatively broad ovary with a deep sinus as seen in *A. wimmerana*. b. Flower in *Galium* (view from above and side view of corolla). Note relatively small anthers and stigmata compared to *Asperula*. c. Apiculate corolla-lobe apex (*G. migrans*); d. Flower in axil of *G. microlobum*; corolla full-sized but unopened. e. Flower in late bud (*G. gaudichaudii* subsp. *gaudichaudii*; drawn from pressed specimen so corolla squashed over top of ovary). f. Portion of cyme of *Galium densum*; inset shows close-up of a mericarp hair of *G. densum* (l), and for comparison hairs of *G. australe* (middle) and *G. curvihirtum* (r). g. Ovary/developing fruit (face view): i. taller than broad & papillose (e.g. *G. migrans* subsp. *migrans*) including close-up of edge view of surface; ii. obovoid (e.g. *G. ciliare*); iii. pustular (*G. leptogonium*); iv. pustular (*G. roddii*). h. Mericarp, medial view (*G. compactum*). i. Pair of mericarps (*G. leiocarpum*). j. Mericarp with associated unfertilised carpel (*G. curvihirtum*).

Key to native species of *Galium*

Notes for key:

- identification will normally require magnification
- all measurements are based on herbarium specimens
- surface features of ovaries are generally best assessed when corolla has withered or fallen
- for terminology refer to notes above and figures 1–4 (pp. 41-44)

1	Fruit with spreading hairs regularly hooked at the very tip and extending 0.3 mm or more out from surface (hairs somewhat antrorse-appressed early in flowering) **2**
1:	Fruit glabrous or hairs not entirely as above **4**
2	Corolla ≥ 4 mm diam., with lobes hairy abaxially; erect corolla 1.8–3.0 mm long; mericarps 1.6–2.4 mm long; stems, leaves and peduncles densely hairy with fine spreading hairs generally > 0.5 mm long ..... ***4. G. albescens***
2:	Corolla < 4 mm diam., glabrous; erect corolla 0.7–1.5 mm long; mericarps 1.0–1.4 mm long; stems, leaves and peduncles with indumentum various, uncommonly both densely hairy and with hairs > 0.5 mm long **3**
3	Longest intermediate or ultimate peduncles in an inflorescence > 5 mm long, becoming curved to hooked c. 1 mm below summit post-flowering; inflorescences soon terminating; fruit with hairs ≥ 0.5 mm long ..... ***5. G. densum***
3:	Longest intermediate or ultimate peduncle in an inflorescence < 5 mm long, remaining straight; inflorescences mostly extended; fruit with hairs ≤ 0.5 mm long ..... ***3. G. australe***
4	Leaves, stipules and bracts lacking glandular cells; mericarps longitudinally rugose (leaves large and tending to spathulate with conspicuous petiole-like portions; far eastern forests) **5**
4:	Leaves, stipules and bracts in inflorescences developing glandular cells; mericarps not rugose or rugae reticulate **8**
5	Cymes much shorter than whorls ..... ***1. G. liratum***
5:	Cymes c. equal to or longer than whorls **6**
6	Leaves with l:w ratio > 3.5 (narrow-elliptic or oblanceolate, sometimes slightly spathulate); developing and mature fruit with a more or less smooth surface (New Zealand) ..... ***G. trilobum*** (see **1.**)
6:	Leaves with l:w ratio < 3.5 (narrowly to broadly spathulate); developing fruit bulliform **7**
7	Leaves to 20 mm long, broad-spathulate with apex mostly obtuse to rounded except for a minute acuminate point; cymes mostly > 4-flowered; fruit acutely bulliform ..... ***2. G. spathulatum***
7:	Leaves to 10 mm long, mostly narrow-spathulate with apex acuminate; cymes 1–4-flowered; fruit rounded bulliform (New Zealand) ..... ***G. sp.*** (see **1.**)
8	Stem-angles broader than faces (examine axis of primary inflorescences) **9**
8:	Stem-angles narrower than faces (examine axis of primary inflorescences) **12**
9	Longest ultimate peduncle < 2 mm long **10**
9:	Longest ultimate peduncle > 2 mm long **11**
10	Ovaries dull, smooth except for scattered pustules (south-eastern New South Wales) ..... ***8. G. roddii***
10:	Ovaries without pustules but with a glistening minutely papillose surface (South Australia and southern Victoria) ..... ***16. G. compactum***
11	Ovaries with hairs 0.3–0.6 mm long (Central Tablelands of New South Wales) ..... ***14. G. bungoniensis***
11:	Ovaries glabrous or with hairs 0.1–0.2 mm long (Flinders Ranges of South Australia) ..... ***15. G. migrans***
12	Whorls below primary inflorescences with stipules less than half length of leaves; corolla to 1.6 mm diam. ..... ***12a. G. binifolium*** subsp. ***binifolium***
12:	Whorls below primary inflorescences with stipules more than half length of leaves; corolla diameter various, up to 4 mm diam. **13**
13	Corolla c. 1 mm diam.; cymes mostly 4- or more-flowered and exceeding whorls; mericarps slightly bulliform, c. 1 mm diam.; bracts present at all cyme-nodes and often developed on ultimate peduncles (arid South Australia) ..... ***11. G. bulliformis***
13:	Corolla > 1 mm diam. or if not then not with the above combination of characters **14**

Galium trilobum Colenso has fruit of similar size to *G. liratum* but the surface is smooth or only minutely wrinkled at maturity. Its leaves are narrow-elliptic to oblanceolate or sometimes slightly narrow-spathulate unlike the markedly spathulate leaves of *G. liratum*, *G. spathulatum* and an unnamed New Zealand taxon. This last entity is similar to *G. liratum* in terms of its bulliform ovary/fruit surface and in the number of flowers per cyme but it has much longer primary peduncles. Specimens recorded of this entity are: Cape Palliser, Wellington (*D.Bowen 14787*, AD; dupl. in NZFRI Rotorua *n.v.*), Canterbury, (*Haast*, MEL), Cape Palliser lighthouse, Wairarapa, Wellington Land District (*P.J. de Lange 1789* MEL, dupl in CHR *n.v.*), and Worryline Stream, Mount Cook, (*A.M.Buchanan s.n.* HO).

Hybrids: A specimen from Bega, New South Wales (*S.J.Forbes 891* MEL) appears to be a hybrid: *G. liratum* × *G. binifolium* subsp. *binifolium*.

2. *Galium spathulatum* I.Thomps., *sp. nov.*

A G. lirato *N.A.Wakef. apicibus foliorum obtusioribus, cymis longioribus, floribus pluribus, ovario minute muriculato differt.*

Type: **QUEENSLAND**. West of Beta Creek, Eungella National Park, *A.R.Bean 4488*, 27 May 1992; holo: BRI.

Herbs, generally sparsely haired, with moderately coarse hairs to c. 0.5 mm long; rhizomes and rootstock not seen. *Stems* to c. 1 mm diam., with slender angles, with hairs retrorse; whorls 4-partite, with stipules slightly shorter than or similar to leaves throughout. *Leaves* spathulate, 6–25 mm long, 3–10 mm wide, with l:w ratio mostly 1.5–3, with petiole-like portion mostly 3–6 mm long; margin flat or narrowly recurved; apex rounded but also with a minute apiculation, without a terminal hair; adaxial surface with midrib variably distinct; abaxial surface with midrib distinct throughout length, lacking glandular cells. *Inflorescences* extended; cymes mostly 4–10-flowered, occasionally fewer, usually equal to or exceeding whorls when mature; primary peduncle 5–35 mm long, glabrous or hairy; secondary peduncles inserted strongly distally; bracts longer than the peduncle they subtend; ultimate peduncles inserted variably, 0.5–3 mm long, glabrous. *Flowers*: corolla 1.5–2 mm diam., with lobes c. 1 mm long, not apiculate, cream or white (uncertain), glabrous; ovary c. circular in face view, c. 0.2 mm long, glabrous. *Fruit*: fruit-set percentage low, with unfertilised ovaries enlarging to c. 0.7 mm long; developing fruit dull, acutely and coarsely papillose; mericarps reniform, 1.5–1.8 mm long, c. 1 mm wide, dark-brown to blackish, longitudinally rugose; dissepiment scar c. 0.8 mm long. (Fig. 2d-i)

Flowers autumn.

Selected specimens: **QUEENSLAND**. Swampy Ridge, west of Eungella National Park, *A.R.Bean 4461*, 24.v.1992 (BRI); Mt Aberdeen National Park, W of Bowen, *P.I.Forster 9969*, *M.C.Tucker & G.Kenning*, 29.v.1992 (BRI).

Distribution and habitat: Occurs in north-eastern Queensland near Bowen (Fig. 9). Grows on rainforest margins at altitudes between 900 and 1100 m.

Notes: Similar to *G. liratum* in having spathulate leaves that lack glandular cells. All collections of this species were made within a few days of each other and further collections are desirable to better characterise it. Only one of the three collections has flowering material and information from this is limited. It is unclear whether the corolla is bright white as in species of *Asperula* or more a dull cream as in *G. liratum*. The cyme architecture is unusual in consisting of a long primary peduncle with the remainder rather complexly branched with short peduncles, reminiscent of the branching pattern in *Asperula* sect. *Dioicae*. The scaly appearance of the mericarps is also distinctive for Australian *Galium*.

Etymology: The epithet refers to the shape of the leaves (from L: *spathulatus*, spatula-shaped).

3. *Galium australe* DC., *Prodr.* 4: 608 (1830)

Type: **VICTORIA**. Western Port, Bass Strait, *A.Lesson*, 1829; holo: G *n.v.*, *fide* D.J.McGillivray, *Telopea* 2: 360 (1983).

G. squalidum Hook.f, *in* W.J.Hooker, *London J. Bot.* 6: 462 bis (1847); *G. australe* var. *piloso-hispidum* Benth., *Fl. Austral.* 3: 447 (1867). Type: New Norfolk, *R.C.Gunn 1129*, 6 Nov. 1840; lecto: K, *fide* D.J.McGillivray *loc. cit.*, image seen MEL; iso: HO, NSW. Remaining syntypes: Glen Leith, *R.C.Gunn s.n.*, 14 Sept. 1840; syn: K; Lawrenny, *R.C.Gunn 1009*, Oct. 1840; syn: K.

Herbs, sparsely to somewhat densely indumented, with slender to somewhat coarse hairs to c. 0.5 mm long or scabrosities; rhizomes not seen. *Stems* to c. 1 mm diam., with angles slender to somewhat

broadened, with hairs and scabrosities spreading to retrorse; whorls 4-partite, with stipules mostly 2/3 or more of leaf length below inflorescences, decreasing upwards to be finally < 1/2 of leaf length or occasionally not developed. *Leaves* oblong-elliptic, elliptic, narrow-elliptic or narrow-ovate, 2–12 mm long, 1.5–5 mm wide, with l:w ratio mostly 2–6, with petiole-like portion 0.5–1.5 mm long; margin usually recurved or revolute, sometimes strongly so; apex acute, sometimes with a terminal hair; adaxial surface with midrib variably distinct; abaxial surface with midrib only conspicuous proximally, distal glandular cell patch small to moderate, proximal glandular cells variably present, sometimes conspicuous. *Inflorescences* mostly extended, rarely soon terminating; cymes 2–10-flowered, often 3-flowered, commonly exceeding whorls when mature; primary peduncle to 20 mm long, often hairy; intermediate and ultimate peduncles 0.5–5 mm long, with insertion position variable, glabrous or hairy; bracts c. equal to or more often shorter than peduncle, developed at most nodes. *Flowers*: corolla 1.5–3 mm diam., with lobes 0.7–1.3 mm long, not apiculate, cream or greenish-cream, occasionally tinged purplish-red abaxially, glabrous; ovary circular to slightly oblate in face view, c. 0.5 mm long, covered with antrorse-appressed, but later spreading, robust hairs 0.3–0.5 mm long, hooked, sometimes pigmented orangish to brown throughout or distally. *Fruit*: fruit-set percentage generally high; developing fruit dull, more or less smooth between hairs; mature peduncles stout, straight, mericarps reniform, 1.0–1.3 mm long, c. 0.8 mm wide, dark brown, reticulately rugose; hairs weakly tubercle-based; dissepiment scar c. 0.5 mm long.

Flowers spring–summer.

Selected specimens: **SOUTH AUSTRALIA**. Near Pink Bay, Kangaroo Island, *coll. unknown*, ?1847 (MEL); Limestone cliffs near Dry Creek, Glenelg river, *R.J.Bates 41837*, 3.i.1996 (AD); Honans Scrub, *R.J.Bates 26322*, 23.xi.1991 (AD). **NEW SOUTH WALES**. Nowra-Yalwal Rd, c. 11 km W of Nowra, *D.F.Blaxell 1350*, 21.iv.1974 (NSW); Mt Dromedary, *E.Reader*, Nov. 1894 (MEL); W side, Lake Windemere, ANBG annexe, *G.Singh & E.A.Geissler*, 24.iii.1981 (CANB). **VICTORIA**. Point Addis Coastal Reserve, c. 6 km ENE of Anglesea PO, *A.C.Beauglehole 63495*, 19.i.1979 (MEL, NSW); Queenscliff, *A.J.Tadgell*, Oct. 1904 (MEL); Sorrento Ocean Beach, *I.R.Thompson 1038*, 2.i.2008 (MEL); Shallow Inlet, NW of Wilsons Promontory, *P.C.Heyligers 93023*, 16.xi.1993 (CANB, MEL); Wilsons Promontory, *E.Chesterfield 2134*, 11.i.1989 (MEL); Wingan Inlet, *J.H.Willis & N.A.Wakefield*, 30.xii.1951 (MEL); Dunes, Betka River, *N.A.Wakefield 4802*, 31.xii.1952 (MEL). **TASMANIA**. Mt Killiekrankie, Flinders Island, *S.Harris 236*, Sept. 1980 (HO); South Patriarch Trig, Flinders Island, c. 20 km NE of Whitemark, *I.Crawford 1111*, 8.xii.1988 (BRI, HO, MEL); Hogans Island, Furneaux group, *J.S.Whinray 9317*, s.d. (AD, CANB, HO, MEL, NSW); Low Head, *W.M.Curtis*, 7.xii.1955 (HO); Deal Island, Kent Group. *J.S.Whinray 276*, 29.xii.1968 (HO); Croppies Point, *A.M.Buchanan 1649*, 22.xi.1983 (HO); Swansea, *A.Simson 2166*, Oct. 1881 (HO); Ouse River near Remarkable Rock, c. 8 km NE of Lake Echo, *A.M.Gray 521*, 14.xii.1980 (HO); Wilson Bight, *A.M.Buchanan 9472*, 14.i.1987 (HO); Fluted Cape, South Bruny Island, *A.M.Buchanan 8370* (HO); near Derwent River, *R.Brown*, 1804 (CANB).

Distribution and habitat: Occurs in southern New South Wales, southern Victoria, far south-eastern South Australia, and Tasmania (Fig. 9). Grows mostly on or near coasts, often in sandy soils, in shrubland and forest.

Notes: *Galium australe*, like *G. albescens* and *G. densum*, has hooked spreading hairs on ovary and fruit; they are shorter in *G. australe*. Also, compared to *G. densum*, *G. australe* has a less marked size difference between leaves and stipules, often firmer leaves with evenly revolute margins, extended inflorescences, and cymes with shorter and always straight peduncles. *Galium australe* has smaller flowers and fruit than *G. albescens* and the stem and leaf indumentum is not as dense and hairs not as long. Uncommonly for Australian *Galium*, in more complex cymes a third peduncle sometimes arises from the primary peduncle. This pattern is more typical of species in *Asperula* sect. *Dioicae*.

Specimens from Deal Island in Bass Strait, Tasmania (*J.S.Whinray 276* HO and *D.A.Reynolds 97* HO) are atypical in having inflorescences terminating after only 2 or 3 nodes.

Hybrids: The following collections appear to be hybrids: **1.** Clyde River, south-eastern Tasmania (*P.Collier 1649* HO): *G. australe* × *G. densum*. **2.** Hogan Island, Bass Strait (*N.P.Brothers 191 & 251* HO) and St Margaret Island, Victoria (*A.C.Beauglehole 62333* MEL): *G. australe* × *G. gaudichaudii*. **3.** Lower Glenelg River, far south-western Victoria and far south-eastern South Australia (e.g. *R.J.Bates 41316* AD): *G. australe* × *G. compactum*.

4. *Galium albescens* Hook.f., in W.J.Hooker, *London J. Bot.* 6: 462 bis (1847).

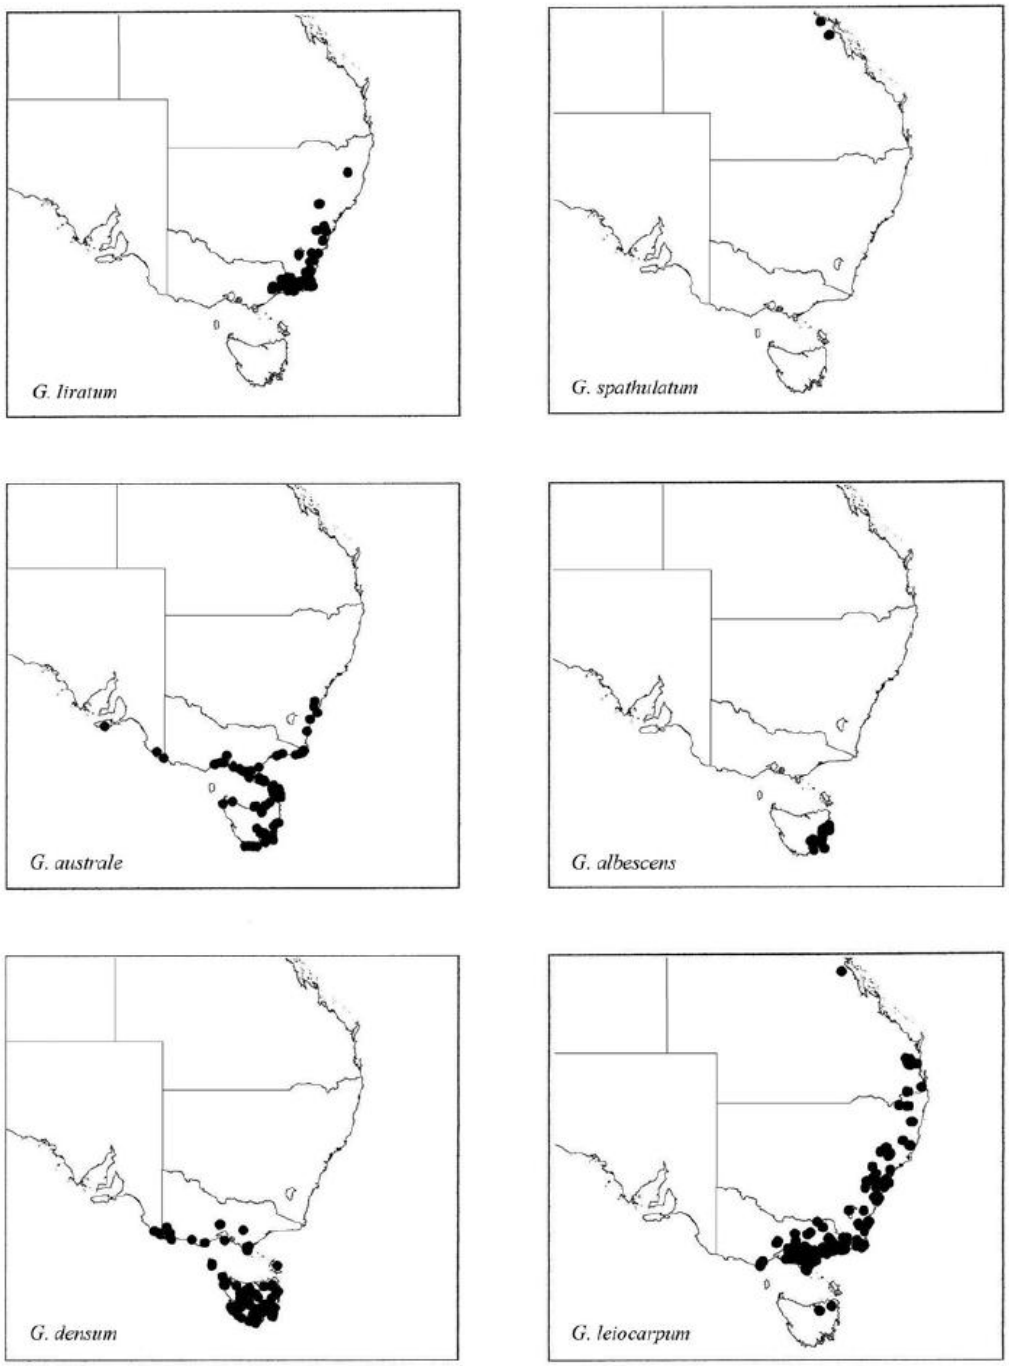

Figure 9. Distributions of *Galium liratum*, *G. spathulatum*, *G. australe*, *G. albescens*, *G. densum*, *G. leiocarpum*.

Asperula perpusilla Hook.f. is very similar to Australian *Asperula*. Several workers, e.g. Mueller (1875) and Airy Shaw and Turrell (1928) have also suggested over the years, quite reasonably in the view of the author, that Australian species of *Asperula* are perhaps closer to *Galium* than to *Asperula sensu stricto*. Airy Shaw and Turrell considered that Australian *Asperula* were at least worthy of separation from European *Asperula* and erected *Asperula* sect. *Dioicae* Airy Shaw & Turrill to accommodate them.

Australian taxonomic history

The taxonomic history of *Asperula* has been relatively straightforward. The earliest descriptions came from Joseph Hooker (1847) who described six species based on Tasmanian material: *Asperula subsimplex* Hook.f., *A. gunnii* Hook.f., *A. scoparia* Hook.f., *A. conferta* Hook.f., *A. pusilla* Hook.f., and *A. minima* Hook.f. Soon after, Mueller described *A. geminifolia* F.Muell. and *Galium geminifolium* F.Muell. (now *A. gemella* Airy Shaw & Turrill), while Miquel described *Rubia syrticola* Miq. (now *A. syrticola* (Miq.) Toelken). Bentham (1867), in *Flora Australiensis*, reduced *A. pusilla* to a variety of *A. gunnii*, described *A. conferta* var. *elongata*, and synonymised *R. syrticola* under *A. scoparia*. In 1875, Mueller proposed a remarkably conservative classification that incorporated all Australian forms with the exception of *A. geminifolia* under the one name, the illegitimate *Asperula oligantha* F.Muell.

In 1928 Airy Shaw and Turrill produced the first detailed revision of the genus and reversed Mueller's conservative approach. As well as resurrecting all of Hooker's species, they described seven new species: *A. ambleia* Airy Shaw & Turrill, *A. asthenes* Airy Shaw & Turrill, *A. cunninghamii* Airy Shaw & Turrill, *A. euryphylla* Airy Shaw & Turrill, *A. subulifolia* Airy Shaw & Turrill, *A. wimmerana* Airy Shaw & Turrill, and *A. lissocarpa* Airy Shaw & Turrill. In addition, *Galium geminifolium* was renamed as *A. gemella* and *A. conferta* var. *elongata* was elevated to species rank as *A. charophyton*. Eight infraspecific taxa were also described; however, with the exception of *A. euryphylla* var. *tetraphylla*, these names were not subsequently utilised by Australian workers. *Asperula lissocarpa* proved to be the same taxon as *Rubia syrticola* Miq., and was renamed in 1986 as *A. syrticola* (Miq.) Toelken.

The taxonomic history of *Galium* has been more complex. The first Australian species described were *G. gaudichaudii* DC. and *G. australe* DC. by Augustin de Candolle in 1840. Joseph Hooker contributed six species in 1847 based on Tasmanian material: *G. vagans* Hook.f., *G. ciliare* Hook.f., *G. densum* Hook.f., *G. squalidum* Hook.f., *G. albescens* Hook.f., and *G. curtum* Hook.f. In contrast to the species of *Asperula* he described in the same journal, all of which are now accepted, only one species of *Galium*, *G. ciliare*, became adopted through the 20th century and even it was sunk into synonymy for a period. *Galium curtum* and Mueller's *G. geminifolium* were transferred to *Asperula*. In the 1850s Miquel described *G. erythrorrhizum* F.Muell. ex Miq. and *G. axiflorum* F.Muell. ex Miq. Bentham (1867) in *Flora Australiensis* recognised five species, described two new varieties, *G. gaudichaudii* var. *glabrescens* Benth. and *G. gaudichaudii* var. *muriculatum* Benth., and reduced *G. squalidum* to varietal rank as *G. australe* var. *piloso-hispidum* Benth.

Mueller (1875), as he did for *Asperula*, proposed a highly conservative classification, and included all Australian native forms under the one name *G. umbrosum* G.Forst. ex Hook.f., a species described from New Zealand and illegitimately named. Although Mueller's classification was largely followed in subsequent years, *G. australe* was generally maintained as distinct, while Ewart (1931) maintained *G. gaudichaudii*. The next significant publication was by Wakefield (1955) who described two new species, *G. binifolium* N.A.Wakef. and *G. liratum* N.A.Wakef. Also in this paper, which was essentially based on Victorian material, the name *G. propinquum* A.Cunn. was introduced into Australian taxonomic literature to replace the illegitimate *G. umbrosum*. *Galium ciliare* was treated as a synonym of *G. propinquum* by Wakefield. The introduced species *G. divaricatum* Lam. enjoyed a period of recognition as a native taxon under the name *G. parisiense* var. *australe* Ewart & Jean White. In her treatment of Tasmania's Flora, Curtis (1966) resurrected *G. albescens*.

The first detailed revision of Australian *Galium* was undertaken by McGillivray in 1983, in which 11 species were recognised. The four new species were *G. terrae-reginae* Ehrend. & McGill., *G. compactum* Ehrend. &
