Re: Grey-Headed Flying-Fox Survey, 147 Garnet Road, Kareela, NSW

Dear Lyndall,

A site inspection was conducted of the Grey-headed Flying-fox (*Pteropus poliocephalus*) population located at 147 Garnet Road, Kareela on the 17 March 2022 to estimate the total number of individuals roosting in the camp. The survey was conducted by Sam Mullins (Ecologist) of Ecoplanning.

The survey commenced at the Harry Denning Sports Field, however, poor visibility of the Grey-headed Flying-fox warranted an inspection that circumnavigated the camp. Grey-headed Flying-fox were observed to be roosting between 5 and 10 m above ground level, with the resident population on the day of the survey between 90 and 140 individuals.

Yours sincerely

Bruce Mullins
