#### 1. ASSESSMENT OF IMPACTS

ASSESSMENT OF IMPACTS		
IMPACT CATEGORY	RELEVANCE	SCOPING QUESTIONS
Population change	The location, size, rate and type of population change have implications for social infrastructure planning, urban design and community cohesion.	Will the development result in a change to the age structure, household composition or permanence of the resident population?  Will the development result in the displacement of current residents, visitors and/or workers?  Will the development increase the size of the population significantly in a short period of time?
ASSESSMENT		

#### ASSESSMENT

Briefly describe how the development will impact on population change below:

Negative Impacts:
Describe the proposed measures you have/will use (which may include social benefits) to avoid, reduce, or mitigate any negative impacts resulting from population change:
reduce, or mingate any negative impacts resulting from population change.

Healthy Lifestyle	Urban design influences. participation in physical activity, such as walking, cycling, children's play and other activities (including walking to public transport), promoting healthy lifestyles and reducing the risk of disease and mortality.  A range of parks and open spaces as well as the public domain provide important venues for physical activity and social interaction; these need to be well distributed across catchments.	Will the development encourage walking and cycling as convenient, safe and appealing forms of access?  Do the location, proximity, design, range and management of open space cater to the needs of all user groups?  Is open space consistent with the Charter for Open Space?  Will the development be likely to alter existing physical activity, or future opportunities to participate in physical activity?  Will the development contribute to the neighbourhood's walkability, particularly in terms of connectivity, density and land use mix?

# **ASSESSMENT** Briefly describe how the development will impact on healthy lifestyle below: **Positive Impacts: Negative Impacts:** Describe the proposed measures you have/will use (which may include social benefits) to avoid, reduce, or mitigate any negative impacts to support a healthy lifestyle:

Healthy Communities	Health is not just the absence of disease. Healthy communities are places where water and air quality are good, there are opportunities for relaxation, there is good access to fresh food and local produce and people are able to locally access the supportive services they need.  Healthy communities are ones where people can walk and cycle around their neighbourhoods, where higher density development is within walking distance to local centres, public transport and local services and where people have opportunities for informal interaction.	Will the proposal impact (positively or negatively) on the health of the community?  Would the proposal create more opportunities for access to fresh food and local produce?  Will the proposal support an increase in supportive social infrastructure (services and/or facilities) in the community?  Does the density proposed match the walkable distance from the town centre?  Will the proposal contribute to the walkability of the neighbourhood? Will the proposal support active transport options?  Will the proposal encourage opportunities for informal interaction?

		SCOPING QUESTIONS
	Community connectedness, established through social networks and opportunities for incidental contact, helps people access the emotional and practical resources they need. A sense of belonging and cultural association with 'place' makes people feel valued and is a major contributor to strong communities and good health.	Will the development impact (positively or adversely) on the strength of the community's social networks, capacity for self help, identity or resilience?
		Will the development impact on an area or item of value or importance to the community?
		Will the development create or alter any physical or social barriers within or between communities?
	Perceived trust along with shared values have a direct and positive effect on health and wellbeing.	Will the development promote integration with adjacent communities (e.g. through design, access to facilities, co-operative action)?
	The absence of physical and social barriers promotes social interaction, social cohesion and belonging.	Will the development ensure public access to the public domain (including privately owned and managed public domain such asshopping centres)?

#### **ASSESSMENT**

Briefly describe how the development will impact on community identity and/or a sense of belonging in the locality/Shire.

Housing	Housing conditions impact on community health and wellbeing in a number of ways. Housing affordability and security are key factors in overcoming poverty, and influence access to employment and training opportunities. Housing stability helps maintain stable social networks.  Housing mix encourages social diversity, stimulating social interaction and inclusion. Concentrated social disadvantage is associated with poorer health outcomes.  Design of both housing and the neighbourhood influences the extent to which different groups' needs are met.	Will the development result in a mix of housing types and sizes?  Will the development be appropriate to meet local needs and the needs of special groups?  Will the development result in the displacement of existing residents, or alter the availability of affordable housing or boarding housing?  Will the development be likely to result in or alter concentrated social disadvantage?  Does neighbourhood design promote inclusion of different social groups and promote social interaction?

Access to Employment and Training	Access to employment and education are key factors in influencing a community's ability to function effectively, to be resilient, and to enjoy good health outcomes.  Costly travel expenses can be a barrier to people on low incomes accessing work and/or education.  Diverse local employment opportunities reduce the risk of unemployment and income disparity, which both result in poorer social and health outcomes.	Will the development alter the number or diversity of jobs available to the local community?  Will employment and education be readily accessible from the development?

Impact on Amenity (pleasantness) of Place and Surroundings	Places with good amenity have a strong positive impact on health and wellbeing. They contribute greatly to happiness, which brings significant health benefits. They also encourage people to spend time outside their homes, which boosts incidental social interaction and community participation.  Good amenity also helps to build a sense of community stewardship over public areas and improves the ongoing maintenance and management of a neighbourhood.	Will the proposal have a positive or negative impact on amenity of the place and its surroundings?  How can any positive impacts be amplified? How can any negative impacts be mitigated?

Impact on Urban Heat	Urban heat is a growing problem in Australia, and can lead to poor social and health outcomes. In addition to heat-related illnesses, it can lead to an over-reliance on air conditioning, inequity because of increased risks for people who do not have access to air conditioning, and a lack of social connection during hot weather as people stay at home. Planning should consider the need for shade and for cool area sanctuaries that are accessible to all and not restricted to libraries and commercial premises.	Will the proposal have a positive or negative impact on urban heat and people's options for coping with urban heat?  How can any positive impacts be amplified? How can any negative impacts be mitigated?
